## Acknowledgements

Results compilations like this are only possible thanks to the increasingly efficient work of the local authorities concerned in publishing their results. Bar a few problems results, turnout and electorate figures were, however, promptly and accurately provided in 2018.

I am also immensely grateful to the Local Elections Centre at Plymouth University for providing some historical electoral data used in this publication; and more importantly for the friendship, support, identification of errors and exchange of ideas Professors Michael Thrasher and Colin Rallings of that centre have provided throughout the year. This has enabled me to continue improving the layout and presentation of results.

The by-elections archives maintained by Christopher Keane at [englishelections.org.uk](http://englishelections.org.uk) and those by Keith Edkins at [gwydir.demon.co.uk/byelections](http://gwydir.demon.co.uk/byelections) were also vital in ensuring the compilation of two years of by-election results.

# The Brexit Blocking High

Meteorologists used the term "blocking high" to describe the pressure formation that sat over England for most of the summer that prevented low pressure areas in the Atlantic from bringing typical British weather to the south of the country and allowed scorching heat up from the Equator. The same term could be used when discussing the state of British politics in 2018. In fact there were two - possibly three - blocking political fronts that disrupted typical mid-term election results this year.

The dominant one was, of course, Brexit. The second - linked to that - was how the significant (especially among many of the councils discussed in this volume) 2014 UKIP vote would disperse. The third was how voters were responding to Jeremy Corbyn's brand of Labour politics. Actually that's not correct; it's more how voters in particular areas have been responding to Labour pretty much since Tony Blair ceased being the party's leader - a continued erosion from Gordon Brown through Ed Miliband and which Jeremy Corbyn has not curbed.

How is Brexit distorting the normal electoral cycle? Normally, the further one moves from the general election the better the principal party of opposition does and the worse the governing party does. The longer the party of government has been in power, the deeper the trough of unpopularity it tends to fall into (though there are examples from the 1980s and 1990s that are the exceptions that prove the rule). 2018 was the eighth year of Conservative-led government nationally.

Yet Brexit is exerting a pull - to varying degrees of strength - that is keeping Conservatives buoyant in areas which, and among groups of voters who, voted Leave. This is also working in reverse: the Tories struggled in areas that voted Remain, like South Cambridgeshire, West Oxfordshire and (bits of) Huntingdonshire - though in many of the most strongly Remain

voting areas up for election this year like Oxford and Cambridge this does not manifest because Conservative representation has already been eradicated.

This volume of results is almost the mirror image of volumes one and two. Whereas Labour dominated in London and (much of) metropolitan England, the Conservatives comfortably won in provincial England: eighty four councils (67 district councils, 17 unitary authorities). And yes, there was even a swing from Labour to the Conservatives, mainly because more 2014 UKIP voters switched to the Tories than to Labour - both parties increased their vote share.

Conservatives	1,009,960	39.6	+ 7.9
Labour	811,093	31.8	+ 4.9
Liberal Democrats	428,375	16.8	+ 3.5
Green	109,329	4.3	- 0.4
Independents	89,595	3.5	+ 1.1
Others	104,680	4.1	- 16.9

Table 1: votes cast in 2018

	Con	Lab	LD	Oths
2018	629	503	299	98
2014	563	448	228	205
change	+66	+55	+71	-107

Table 2: seats won in 2018 and 2014, adjusted for councils that elected in 2014 but not 2018 (Bassetlaw, Bristol, Gloucester, Purbeck, Stratford, Stroud and Weymouth & Portland). Figures do not tally due to changes in council size and all-out elections where ward boundary reviews have taken place

It is wrong to regard these areas as traditional Conservative heartlands. Some are, of course. But of the 84 councils covered in this volume, 23 have Labour majorities and a further 20 are areas they are in minority control, just lost control of or are challenging competitively in. In several others Labour has meaningful representation even if it is some way off being able

to challenge for control. At least six others are safe or battleground Lib Dem areas.

	Gained	Lost
Con	Basildon Great Yarmouth Pendle Peterborough Redditch Southend-on-Sea	South Cambridgeshire
Lab		Carlisle Derby Newcastle-Under-Lyme Nuneaton and Bedworth Redditch
LD	South Cambridgeshire	
NOC	Carlisle Derby Newcastle-Under-Lyme Nuneaton and Bedworth	Basildon Great Yarmouth Pendle Peterborough Southend-on-Sea

Table 3: changes in council control 2015 compared to the last council elections in 2016 - some councils changed control in the interim due to defections (typically of UKIP councillors)

And this random collection of councils which choose to elect by thirds runs the gamut from industrial Halton and Hartlepool, through cities like Southampton, Hull, Plymouth and Portsmouth, onward through Midlands Brexit strongholds like Cannock, Newcastle Under Lyme, Nuneaton & Bedworth and North East Lincolnshire to mainly estuarine Essex and commuter-belt Surrey, to rural districts like Cherwell, Huntingdonshire, Tunbridge Wells and Harrogate. All life beyond heavily urban metropolitan England is here.

Whereas in London every seat on every borough was up for election; and whilst in the Metropolitan Districts one seat in

every ward (with a handful of exceptions due to boundary changes) was contested, the electoral cycle in the councils we look at here can be very different, and quite complex. Many wards have only one or two councillors which means that in some years some do not elect at all. This can make comparisons with previous years in the electoral cycle very tricky, and extrapolations to parliamentary constituencies impossible.

2014 was the first of the UKIP breakthroughs at district level (they had also done well in the 2013 county council elections). In some of the most viscerally Leave areas of the country: Basildon, Thurrock, Great Yarmouth and North East Lincs for example, they won huge vote shares and most of the seats.

But with the deliverance of the 2016 EU referendum, its outcome and the Conservative Party's decision to become the party of Leave (these elections, fortunately for the party, occurring before the Chequers proposal) voters decided that UKIP had done its job and its vote collapsed.

So there were two Brexit-related headwinds contorting the results in 2018: that huge pool of ex-UKIP voters; and the steady realignment of voters - affluent professionals in more metropolitan areas moving away from the Conservatives while working class, mainly (but by no means exclusively) white residents in what are somewhat condescendingly termed "left-behind" areas, moving away from Labour. Combined, this swirl of vote-switchers produced results that obfuscated the trends.

As in the 2017 general election, anyone who believed that UKIP voters were one coherent bloc who would transfer wholesale to the Conservatives was wrong. Political commentators often talk about parties as different coalitions of interests. That term is most appropriate when discussing UKIP because the party's voter base comprised a number of competing and conflicting sets of voters. It was, despite the inherent purpose of the party and the image of its leader, more than just a party of stockbroker-belt retired sergeant majors who had never come to terms with the 1975 referendum to join the EU; or indeed of purely anti-EU voters. It also

comprised what you might describe as "plague on both your houses" voters who, until they entered into coalition with the Conservatives, voted Lib Dem - even though the politics of the Liberal Democrats and UKIP are diametrically opposed.

UKIP did attract a significant proportion of votes from those who had previously voted BNP or National Front, again though UKIP's positioning on the political spectrum was less to the far right. And yes, UKIP did attract a significant share of those who used to vote Labour in deeply working class or depressed areas from the south coast through East Anglia and Lincolnshire as far north as Hartlepool, and up the A5 corridor in Warwickshire and Staffordshire.

What the UKIP tsunami and then retreat has done is obscure the underlying moves between the main parties caused by Brexit. There are, for example, former Labour voters in places like North East Lincolnshire that moved substantially to UKIP, some of whom returned to the Labour fold at the 2017 general election but who then voted Conservative in these 2018 council elections. Likewise, there are Conservative voters, even in places as pro-Brexit as Thurrock who, in the realigned post-UKIP political landscape, vote Labour - with a ward like South Chafford electing a Labour councillor pretty much for the first time since it was created.

This confusing churn does not just make it impossible to visualise trends nationally; they don't especially make sense within councils. There is, for example, a noticeable trend in several councils of incumbents - irrespective of party - improving their position. In Southampton, the Conservatives noticeably improved on the Itchen side of the city (which has a Conservative MP), while Labour strengthened on the Test side. Southampton's wards are not remarkably different to each other: it is why the city has been a political bellwether for decades until 2017; so why are they diverging so starkly all of a sudden?

It would be wrong to ascribe all of the results of the 2018 elections to Brexit however. Clearly the leaderships of the

main political parties had an impact. Labour, for example, strengthened notably in southern areas in which it did surprisingly well at the 2017 general election: Portsmouth - or rather Portsmouth South; it continued to do appallingly in the more working class, deprived Portsmouth North; Worthing - where it won its first council seats ever; neighbouring Adur.

Again, echoing the trend of incumbents doing better, Labour improved far more in the Drake and Devonport half of Plymouth, which has a new and dynamic Labour MP; than it did in Moor View, which has a slightly less new but equally dynamic Conservative MP.

There are now five Labour councillors in Surrey after the party recaptured a seat in Runnymede it lost almost twenty years ago. Labour advanced in Colchester at the expense of the Lib Dems and are beginning to become a force in Southend, where they gained representation in a fifth ward.

The five strongest Labour performances (and by strongest I am using a mix of seat gains and vote share advances) were all in the south:

Adur
Norwich
Portsmouth
Slough
Worthing

#### The best Labour results

But overall this set of elections wasn't especially impressive for Labour. They did not improve on Ed Miliband's achievements in 2014 - which in themselves were not all that impressive because of that huge bite UKIP took out of the Labour vote.

Again, context is key: in 2014 we were four years into a Conservative-led government; in 2018 eight years: the mid term trough should be deepening for the Tories, not shallowing. Labour slipped back - relative to the Conservatives

- in key councils that include marginal seats across the Midlands: in Amber Valley, Derby, North East Lincolnshire, Cannock Chase, Peterborough, Rossendale, Newcastle-Under-Lyme, Tamworth, Redditch, Rugby. Even in councils where their vote share rebounded somewhat like Pendle it was the Conservatives who gained control.

The most notable Conservative successes were more widespread than Labour's southern revival:

Nuneaton and Bedworth
North East Lincolnshire
Great Yarmouth
Basildon
Castle Point

#### The best Conservative results

But the Conservatives also suffered the bigger set backs; biggest of all being South Cambridgeshire. Neighbouring Huntingdonshire - one of their stalwart councils - wasn't all that great for them either. They are also making no real headway in Lancashire, a county with lots of its councils featuring in this selection and a lot of marginal constituencies too. By and large Lancashire did not have a huge UKIP vote (Burnley being the principal exception) and so their decline barely boosted the Tories.

Nonetheless, the Conservatives might have hoped for better in Burnley, Hyndburn, Blackburn with Darwen, Chorley and West Lancashire; and the point I made about Pendle in the Labour paragraph above applies to the Tories in reverse: whilst they gained control of the council they lost vote share ground to Labour in an area they seemed to be pulling far ahead within.

The Liberal Democrats had a reasonably good election too for the first time since 2010. Other than their gain of anti-Brexit South Cambridgeshire their results weren't spectacular but they did well enough where they needed to, especially in Eastleigh (where they continue to impose a lock on the council

they no longer have on the parliamentary constituency); Cheltenham - where they gained seats from despite losing votes to the Conservatives; South Lakeland - which is now a very marginal council but where they clung on to all the seats in Kendal and so maintained control; Watford and neighbouring Three Rivers - where they strengthened slightly.

Kingston-Upon-Hull

Mole Valley

St Albans

South Cambridgeshire

Welwyn Hatfield

#### The best Liberal Democrat results

Their period in coalition government all-but eradicated the Lib Dems as a threat to Labour in local government: the only Labour authority among the bunch looked at here where they pose a modicum of challenge is Kingston-Upon-Hull, where they consolidated good results in 2016 in a council with boundary changes. That is not to say they aren't a threat at ward level: the Lib Dems are slowly taking over Labour wards in Welwyn Hatfield for example; but at authority level this is a Conservative council.

Indeed, Labour's growth in southern England may hamper any Lib Dem attempts to reassert themselves as a major player in local government. The more widespread elections in 2019 will show whether there is going to be red on orange violence in the south or if, instead, non-Conservative voters will line up behind the party most likely to damage them.

The Greens had a mixed bag of results, similar to their results in the Metropolitan councils. In some areas, like Cannock Chase, Reigate & Banstead, Worcester they continued their steady building of a presence. They also erupted onto the scene from nowhere in areas like Burnley and Peterborough; but in Norwich they were wiped off the council and regressed in Nuneaton & Bedworth and Oxford. The seats they gained from nowhere tended to be former UKIP wards or wards like

Peterborough's Orton Waterville which had huge UKIP votes even if they couldn't quite win them: more evidence of that "plague on both your houses" vote that simply refuses to support the two main parties.

Amber Valley

Burnley

Cannock Chase

Craven

#### The best Green Party results

The Greens - and again, this is a generality - seem to be declining in areas where Labour is thriving, especially urban areas, but doing okay in rural Conservative areas and declining Labour areas. Their performance doesn't appear linked to the affluence of an area but more the values of that area. "progressive" urban areas which are much more at ease with the current left-wing bent of Labour are where the Greens are fading.

Independents and Residents Association candidates of various stripes and titles held their own, though suffered a bad set of elections in Elmbridge, Surrey, where they have a significant presence.

How well a party does or does not do in each set of local elections depends in large part on how it did four years earlier. Labour has not had spectacular gains in any year since they lost power nationally in 2010 - they have made solid progress recapturing ground lost during their own mid-term troughs of the Brown years, but there hasn't been a single year when their performance in local elections has made them look like a government in waiting. As we've discussed, a large part of this has been the introduction of UKIP into the mix, pulling down both main parties.

When the SDP-Liberal Alliance called it a day after the 1987 general election and the Liberal Democrats were formed and tanked in the opinion polls, voters in the aftermath looked

around for other parties to support - it's what led to what was then called a Green surge in the 1989 European elections. A similar occurrence happened in 2018 with the implosion of UKIP, with chaff kicking up surprising and contradictory outcomes in particular authorities. If we are in a post-UKIP electoral reality (and whilst events since the local elections have led to a small revival in the party's support it remains likely that we are) then it will take a further couple of years for their impact to clear from the arena.

In 2019 the set of seats up for election will be those contested on general election day 2015. The much higher turnout the general election produced had two effects: it diminished the impact of UKIP and, because the Conservatives won that general election, it also produced coat-tails for their council candidates. In other words, there is a huge and vulnerable intake of Conservative seats up for grabs next year; a set of elections the Tories won by seven percentage points. A round of elections where, for the first time, Labour will not be going in with an already high base, and in many areas that haven't seen local elections since 2015. Expect thousands of seats to change hands.

# Highlights of the 2018 elections

## Adur

One of the parliamentary constituencies in which Jeremy Corbyn's Labour unexpectedly surged (though not to a win) in 2017 was Worthing East and Shoreham. The "Shoreham" bit of that constituency's title is the small district of Adur, immediately west of what now looks like safely Labour Hove. Labour followed that up by decisively winning a by-election in the district's Mash Barn ward (as well as in neighbouring Worthing's Marine ward).

Labour did ok this time but not as well as in 2017, gaining four seats. Does this mean a) we are past peak-Corbyn; b) that Labour finds it harder to turn its surprise vote out in council elections but it's still there for the next general; or c) they are advancing at both levels, just at a different pace?

I think the latter is the most likely answer. Adur has a nonconformist tradition: it was Lib Dem run for years, then Labour had a mini advance at the start of the Blair years, then turned considerably to UKIP, in votes if not seats. There is a large blob of non-Conservative voters who float around in this council. They're a powerful bloc and could tear power away from the Tories in 2020 (this council elects by halves in even-numbered years so no chance for change until then) but it's also fickle.

## Amber Valley

Amber Valley is a marginal council containing a marginal constituency in a marginal county.

The way the electoral cycle in Amber Valley is structured is that there is one year (which will next arrive in 2019) when the best Conservative wards are up and two: 2016 and 2018, when the better Labour opportunities arrive.

That being so, 2018 was a poor year for Labour as they watched a Tory majority of one expand to five; and that despite a steady Labour improvement in the town of Belper.

Five seats may not seem a lot, and it's also true that there is such a large number of Conservative seats up in 2020 (fourteen out of sixteen) that it might seem easy to overturn. Had Labour not lost ground in the east of the district this year I'd agree with that analysis. But most of those seats up next year aren't just Conservative-held: the vast majority should be very safe seats Labour has little hope of winning. Even so, with their progress in Belper (four vulnerable Tory seats next year) and with the Greens challenging strongly in Duffield ward, just north of Derby, there are still opportunities for Labour - but not if they poll anywhere near as poorly as they did in 2015 (just 29%).

## Basildon

UKIP won twelve of the fourteen Basildon seats up for election in 2014 and just shy of 40% of the vote across the borough. This time they won just 7%; and nearly all of that collapse went to the Conservatives. The Conservatives increased by 15 percentage points; Labour by less than three.

Everything north of the A127 is once again safely Tory: they polled north of 74% in the four Billericay wards (including Burstead and Crouch); the Wickford three are only slightly weaker for them because there is a concerted Wickford Independent campaign there. Everything south of the A127 in the New Town itself - nine wards - is winnable by Labour, at least in theory, though they only regained three seats. Two former UKIPers held their seats very comfortably as independents, and the Conservatives won the remaining two that were up for election this year.

That realignment, coupled to the Conservatives doing better than Labour in the 2015 and 2016 rounds, gave the Tories an overall majority of four - their first majority since the 2012 elections. Basildon hasn't elected a Labour majority since 1999.

## Burnley

Burnley is notable principally for the fact that it was one of only two councils this time around in which UKIP gained a seat (the other being Derby). In some ways the continued UKIP strength here is less surprising: the party also gained the seat on Lancashire County Council that includes the area won this time; and they also won another seat in this ward in 2016.

This is one of those traditionally Labour councils that for a long time has ruptured from the party. As recently as 1996 Labour polled 61% here. Then things collapsed for them: 47% in 1998, 37% in 2000 and just 29% in 2006. Initially a large chunk of voters switched to the BNP - this was an even stronger BNP council than Barking and Dagenham in 2006. Gradually the Lib Dems came to the fore, even winning the parliamentary constituency in 2010. They are still a factor locally; indeed they have won around a third of the vote here in every election since 2006.

UKIP's presence has come principally from the Conservatives and that chunk of the anti-Labour vote that declined to switch to the Lib Dems. It was also strong enough to elect a first Green councillor in 2018 - there are now five parties plus an independent on this council of just 45 seats. Yet in the 2017 general election it was the Conservatives who surged to a strong second place in Burnley - clearly this pool of voters will back anyone as long as they aren't Labour.

While Labour can keep their heads above a 40% share of the vote they probably have enough strength to retain control for

while. But their majority is down to 5, they are now fighting on several fronts and Burnley voted 67% to leave the EU.

### Cannock Chase

Labour retained control of Cannock Chase, just north of Wolverhampton, and with an increased majority - albeit of just three seats. That result was a little perverse as the Conservatives stormed past Labour in votes cast, beating them by 6 points, 44-38. But the Tories distributed that vote poorly and, even though they gained four seats they missed out on targets like Rawnsley, Cannock South, Hednesford Green Heath and Norton Caines.

The Conservatives will be somewhat more on the defensive in 2019 as both their seats in wards won more recently by the Greens are up and all of Labour's seats up are in wards they control fully. That said, Labour's majority cannot survive if they lose by the proportions they lost by in 2018 over the rest of the cycle.

### Carlisle

Unlike Cannock Chase, the Tories did achieve their objective of removing the Labour majority in Carlisle and Cumberland. They did so by gaining Yewdale ward, adding to their by-election gain in the same ward last year. The Tories beat Labour by 3 points and won parity in terms of seats. This is a pretty polarised council: there aren't really any obvious further advances within the city for the Tories and Labour is absolutely nowhere in the countryside.

### Derby

As in 2016, Labour had an utter nightmare in Derby this year. Of course, in between those two horrific council results the party regained the Derby North constituency, so make of that what you will.

2018 was somewhat worse than 2016 for Labour: two UKIP gains, two Conservative gains - one, Mackworth, in a ward the Tories had never previously won; and a one-vote defence of Abbey from the Liberal Democrats. They didn't hang on to Darley ward by all that many more votes either. Compared to 2014 Labour's share fell five points and the Tories added 14.

Labour has slipped into a pincer movement with UKIP challenging them in fairly deprived, white working class wards, and the Conservatives mopping up more affluent wards around the edges of the city.

### Elmbridge

The Surrey commuter belt council of Elmbridge is a battleground between the Conservatives and a selection of what I call Residents Associations but which include amenity societies like the Walton Society. This is a very affluent area across the Thames from Hampton; most of it is in Dominic Raab's Esher and Walton constituency, with Weybridge in Philip Hammond's equally safe seat. But locally the Tories don't get anything like the same easy ride - Elmbridge has as often deprived them of an overall majority as it has handed them a small majority (never greater than 12, and not of that scale since 1988).

That may - emphasis on may - be changing. The Conservatives squashed the assorted residents association candidates this year, leaving them with just three seats. The Lib Dems also won three but this isn't an especially good part of Surrey for them - they do much better in Mole Valley and Guildford. That means the Tories have 24 seats; with 24 for the Residents and Lib Dems combined. If 2019 is anything like 2018 was the Conservatives will be back in majority control here.

### Gosport

Most of these thumbnail sketches of what happened in each council focus on how the UKIP vote favoured the Tories, or not. In the small naval town of Gosport, their collapse (and a

lot of hostility to Labour in Bridgemarky) benefited the Lib Dems considerably.

In vote share terms Gosport still looks comfortably Conservative: they polled almost 52% with Labour and Lib Dem basically splitting the rest equally. But the Tories pile up huge majorities in their wards and the Lib Dem vote is far better distributed - resulting in a parity of seats: 8 apiece despite that huge disparity in votes. And that Lib Dem advance cut the Conservative majority to just two.

No elections in Gosport in 2019 - this is one of those councils that elects by halves in even years.

### Great Yarmouth

Another of the eastern councils UKIP made a big impact on in 2014, in an area that prior to their intervention had been a waxing and waning Tory-Labour battleground. UKIP lost all 9 of its 2014 seats though most had already defected to the Conservatives or to a local party called Tribune. Of those nine UKIP losses the Tories gained five and Labour four, resulting in a UKIP-cleansed council and an overall Conservative majority of seven. That broadly reflects vote shares with the Tories taking just over half the vote and Labour 39%. There is no Lib Dem presence in Great Yarmouth despite adjoining their North Norfolk stronghold. The key for Brandon Lewis's Conservatives is to hang onto that UKIP vote because Labour's vote is fairly stable, bobbing around the 40% mark.

### Huntingdonshire

Huntingdonshire was one of those very few councils that the Tories managed to cling to in the mid 1990s. In part that was because the local MP, John Major, was Prime Minister, but also it was due to being an intrinsically Conservative former county.

But in the all out elections caused by a boundary review to redress this rapidly growing district's electorate imbalance, the Conservatives came alarmingly close to losing power. They

have a majority of just eight - down from eighteen before polling day. Even in 1995; the Tories' worst election ever, they won by nine overall.

To understand what went wrong for them, appreciate that Huntingdonshire is a deeply divided district - less between political parties but between its rural parts and its booming towns. The countryside remains indefatigably Conservative and voted heavily to leave the EU - indeed Worboys ward in the north east used to be the safest and most longstanding UKIP ward in the country. But the towns: Huntingdon itself, St Ives, Godmanchester and St Neots are far more liberal (and Liberal), a lot more like South Cambridgeshire immediately to the south. South Cambs gave the Tories an even bigger shock than Huntingdonshire, as we shall come to.

Because the boundary changes here were radical it's hard to measure exactly but those four towns gained approximately three councillors and the rurality lost four - that's seven of the ten seat loss right there. Independents and St Neots Residents did very well too.

The Conservatives shouldn't be too alarmed about this council - yet; they have 30 seats and the next largest party - the Lib Dems - has just 7, so even were the unthinkable to happen it would be very difficult for any party other than the Tories to cobble together an administration.

### North East Lincolnshire

The fishing port of Grimsby and the more sedate, adjoining resort of Cleethorpes comprise the bulk of North East Lincs, along with the industrial town of Immingham further up the coast. It produced a spectacular result for the Conservatives second only to Nuneaton and Bedworth - all the more so because it was a little unexpected.

This was one of the UKIP epicentres - they won seven of the fifteen seats up in 2014 and came pretty close to winning Great Grimsby in 2015. But in 2016 they won zero seats - most

of the ones they won the year before were won by Labour; and in 2017 Labour's Grimsby MP Melanie Onn finished 2,500 ahead of the Tories (though Martin Vickers, the Conservative MP for Cleethorpes won by more than 10,000).

This year the Tories cleaned up. Never before have the Conservatives won a majority of the seats up for election: this year they won two thirds of them. Immingham, which only goes Tory at the depths of Labour unpopularity produced a 500 Tory majority (though Labour held a by-election seat here on the same day by 3 votes). Croft Baker and Yarborough similarly switched. Grimsby overall produced more votes for the Conservatives than Labour. Across the authority the Tories polled 49.5% to Labour's 31.3%; in 2016 the Conservatives won just 29%.

In other words the UKIP threat to Labour hasn't vanished: it just got behind the party most likely to defeat them, and the one promising to deliver the sort of Brexit depressed communities like this voted for.

### North Hertfordshire

You might think that a council with the title North Herts would be a Conservative bastion. After all, in next-door East Hertfordshire the Tories hold every seat. But more than half the councillors represent the twin towns of Hitchin and Letchworth - and that, plus the usual tussles the Tories sometimes have with the Lib Dems in the more rural parts of the district, makes it interesting.

The Conservative majority fell from 16 to just 6 this year with Labour gaining seats in Hitchin and Letchworth and the Lib Dems in Hitchin, Knebworth and the remote town of Royston.

Labour is strengthening in the more affluent south while losing ground fairly fast in the more deprived north and Midlands and this is an example: Labour ended up about 5% behind the Conservatives which, given there are still large rural tracts

here in which Labour has no game, shows just how well they did.

### Nuneaton and Bedworth

Nuneaton and Bedworth is part of that string of towns along the A5 through Staffordshire and Warwickshire that is becoming toxic for Labour. They went into these elections with an 18 seat majority over the Tories - on a council of just 34 that's huge. And it was only because they were so far ahead that Labour managed to prevent the Conservatives gaining overall control, for the Tories gained 9 seats - 8 Labour, 1 Green, to hang the council. Exhall and Poplar wards - never before having elected a Conservative went Tory; Heath, only three time previously, did too. The swing in Poplar: 23%; in Bulkington: 21%; 19% in Heath and Exhall; 18 in Bede. This was just about as bad as it was possible to get for Labour.

Labour now clings to power despite the clearly expressed wish of voters - the Tories won by 51% to 35% - for them to be gone. They may survive until 2020 - this is another council that elects by halves in even years - provided there are no Labour or Green by-elections but they are very much on a clock. If Brown, Miliband and Corbyn varieties of Labour cannot endear themselves to these West Midlanders the party is finished here.

### Pendle

The last BNP councillor in England stood down in 2018 from Pendle's Marsden ward, and it was the Conservative gain of that seat that gave them an overall majority of one on this Lancashire council for the first time since 1978. This is an incredibly polarised local authority with heavily BME and solidly Labour Brierfield and Nelson, juking it out with Conservative-leaning Colne and much more heavily Tory surrounding villages. The Lib Dems have been a force locally since the council was established but are gradually being whittled away.

The vote tot-up across the district, which is identical to the parliamentary constituency (though not the abortion that may come into being at the next general election), actually gave Labour a very narrow lead (0.3%) but bear in mind that four rural wards - all of which would give the Conservatives a big lead, didn't elect in 2018.

## Plymouth

30 27

The city of Plymouth has see-sawed between Labour and the Conservatives seven times since 1973, the latest being this year. It was Labour's capture of two UKIP and two Tory seats that gave them back their majority.

The parties finished neck and neck across the authority but, as usual, the Conservatives stacked up the votes in the suburban Plymstock and Plympton wards to the east while losing most of the city-proper more narrowly. They just about scraped the most votes in Johnny Mercer MP's Moorview constituency but trailed by over 4,000 in Drake & Devonport - another example perhaps of how two fairly similar constituencies can pull apart when they have MPs of different parties representing each.

## Portsmouth

19 16 7

Following the defection of 6 UKIP councillors to their side the Conservatives had hopes of taking overall control of Portsmouth this year. It wasn't to be: they ended up with exactly the same tally as they won in 2014.

In the interim though, Labour pulled off the surprising feat of gaining Portsmouth South in 2017 - the first time Labour has ever represented this half of the city.

Eight of Portsmouth's fourteen wards swapped representation this year. Again a Brexit/Corbyn effect occurred: Portsmouth North has until now been the far better Labour constituency but Labour finished almost 10,000 votes adrift there. There is just one Labour councillor representing a Portsmouth North ward.

The Almanac of Council Elections 2018

In contrast Labour won four seats in South as its vote share increased by nine points. Across that half of the city, Labour won 8,400, the Lib Dems 7,829 and the Conservatives 6,628 so there is still all to play for here.

Post-election, Labour's more than doubled group of councillors voted to put the Lib Dems into power but if 2019 produces another Labour wave like this the Lib Dems may soon find themselves as the smallest party on a council on which they had a majority of ten as recently as 2012.

## Redditch

16 13

The only council that switched directly from Labour to Conservative in 2018 is Redditch - another of those heavily Leave West Midlands small towns. There wasn't a massive swing here as there was in Nuneaton & Bedworth: the Tories gained two UKIP seats and one Labour, and edged the popular vote 44.5% to Labour's 41.2%. As usual in areas where there was a big UKIP vote to collapse both main parties rose, but UKIP votes split 2:1 Conservative to Labour which was just enough to wrest control for the first time since 2011.

## South Cambridgeshire

30 11 2 2

The most stunning result of 2018 was not a Labour-Conservative-UKIP battleground but the council that entirely surrounds the city of Cambridge: South Cambridgeshire. The Lib Dems gained 21 seats on a council reduced after boundary changes by 12; the Tories fell from 42 to just 11.

Only once before - and then by just one seat - have the Lib Dems won more councillors than the Tories. The Conservatives went into this election with a majority of 26 - their largest ever. So why did this happen?

First, the result was nowhere near as lopsided in votes as it was in seats: the Lib Dems were just 2% ahead of the Conservatives district-wide. The Tories were down just four on 2016 and

actually up on how they did in 2014. But the Lib Dems surged by 14 points compared to 2016 (by seven compared to 2014); half of which came from Labour, half from "others" - which in South Cambridgeshire means independents more than it does UKIP.

Cambridgeshire is a county of two quite different halves: the north, around Peterborough, is strongly euro-sceptic. The south, full of commuters to both Cambridge and London, is very much more liberal and europhilic. It voted 60-40 to remain in the EU and is the sort of area, packed with academics and higher-educated professionals to be particularly animated by the issue; and by the Conservative approach to it. And while the local Tory MP (for most of the district) Heidi Allen won by a landslide at the 2017 general election, she is among the most liberal Conservative MPs around, regularly in the pro-EU "awkward squad".

There has been a strong centre party presence on the council since the mid 1990s - this was also a council that was run by Independents from its inception until 1991 so there has always been a considerable non-Conservative vote floating around.

Labour has also polled pretty well here, though the party never managed to turn that vote share into a sizeable council group. In contrast the Lib Dems have done far better, at least this time around, at turning votes into seats.

Along with its boundary changes, South Cambridgeshire switched from elections by thirds to all-out elections meaning the Lib Dems have at least four years of untrammelled control to look forward to.

## South Lakeland

29 19 3

If you are susceptible to migraines do not view the political map of South Lakeland where several of the district's largest wards split, resulting in some quite violent hashing.

This vast Cumbrian authority also had radical boundary changes in 2018 with 45 mainly single- or two-member wards swept away and replaced with just 18 mainly three-member divisions.

The Lib Dems have run South Lakeland since 2007, having imposed an impregnable electoral lock on the town of Kendal: by far the largest population centre in the district, since the late 1980s. This success at council level was then translated into big wins for former Lib Dem leader Tim Farron in Westmorland and Lonsdale, before his near-crash to earth in 2017.

That scrape was heralded by pretty dire results for the Lib Dems in the county council elections a month earlier and essentially things haven't moved since. Across the district as a whole the Lib Dems edged things by just 39.2 to 38.4 - but the district includes the Furness peninsula which isn't part of Westmorland and Lonsdale constituency and where the Lib Dems are much weaker.

Labour consolidated its hold on the eastern half of Ulverston but weren't close in any of the enlarged Kendal wards, even though they used to win two or three of the smaller divisions there on occasion.

The Lib Dems finished with a majority of seven overall, and ten over the Conservatives. If the Tories can win outright all the wards that split in May, that would be enough to give them control. Alternatively, they need to crack Kendal.

### Southampton

According to the figures Labour and the Conservatives won exactly the same number of seats this election as they had going into it. So why have I chosen to highlight it? It's because that's the net figure. In fact the two parties swapped three seats apiece. And the reason that's interesting is because of which constituencies the seats were in. Two of the three

Conservative gains were on the Itchen side of the city. Two of the three Labour gains were in Test.

That is a continuation of the mystifying 2017 general election result when Labour massively increased its majority in marginal Test and the Conservatives clung on in Itchen. I describe the results as mystifying because while there are certainly some differences between the two constituencies they are not that great; in fact Test has historically been the more Conservative-inclined of the two. There is no obvious psephological reason for the two seats to diverge so aggressively.

### Swindon

The Conservatives and Labour have almost fought each other to a standstill in Swindon. Despite hopes by the latter that they might remove the Tory majority given only two seats were needed this was always a tall order: one ward, Lydiard and Freshbrook, looked winnable but the second, Covingham and Dorcan, coveted a large Tory majority. In the event Labour won neither, instead gaining a Lib Dem seat in Eastcott. In turn, the Lib Dems nicked the outlying Wroughton and Wichelstowe from the Tories.

Four Conservative-held wards were brought into play this time, though none of them were especially close: Haydon Wick, Lydiard & Freshbrook, St Margaret & South Marston and Shaw. On the Labour side of the ledger, Liden, Eldene & Park South, Old Town and Penhill & Upper Stratton do not look totally secure.

Labour won the popular vote across Swindon borough by 4 points, though the one ward that did not elect in 2018, Ridgeway, is heavily Conservative so the actual gap would have been more like 2. Labour would have won Swindon South on these results but not by much, and remember this was a mid-term election with very little UKIP vote to distort matters.

### Tandridge

Tandridge should be a safely Conservative district. It is rural East Surrey - the area Sir Geoffrey Howe used to represent; stockbroker and commuter belt. Yet the Conservatives lost nine seats in 2018: 3 to Lib Dems, 3 to Independents and 3 to Residents Association candidates. Compounded by defections in the period since the last elections in 2016, the Tory majority is now just two seats.

Today's map of Tandridge resembles desert army fatigues; blotches of Lib Dem orange in the more densely populated north - Warlingham and Caterham on the boundary with Croydon; while independent olive and Resident Association brown jostle with the Conservatives across the North Downs.

The main problem for the Conservatives appears to be growing opposition to the building of a 4,000 home garden village in south Godstone. If anyone struggles to understand why government is reluctant to build new homes on the scale needed, this is why: uproar in the normally sedate, massively Conservative heartlands where they are planned.

Unless the Conservatives can find a way of mitigating the hostility to their local plan they will almost certainly lose control here in 2019 and, even though the other parties still trail, there is little doubt they will seek to form a non-Tory coalition. Whether they can prevent the building of homes in the green belt is another matter.

### Thurrock

In 2014 voters in Thurrock gave UKIP exactly the same massive vote share: 39% the party won in adjoining Basildon. By 2016 Thurrock had surpassed Basildon in its UKIP-ness and the party had become the largest on the council with 18 seats. En masse, the UKIP councillors resigned from the party at the start of 2018 creating a huge independent group, most of whom survive because their seats weren't up this year.

There are considerable differences between Basildon and Thurrock, even if their right-of-centre working class demographic predominates. Thurrock lacks the strongly Tory hinterland that Billericay and Wickford lend to Basildon. In a good Labour year - and there hasn't been one of those for quite a long time in Thurrock - there really aren't any no-go areas for the party. The area is much "grittier" than Basildon comprising a vast industrial riverside centred on the Tilbury Docks and dwarfed by the Queen Elizabeth Bridge to Dartford. There is also the huge Thurrock Lakeside shopping centre.

Labour got slightly the better of the UKIP decline this year - though in part that's as much to do with which UKIP seats were up this time round. They gained three, including a seat in Ockenden ward where they had lost a different seat to the Tories on the drawing of lots in a March by-election. They won this time by 124. The ex-UKIP MEP Tim Aker held his Rainham-borders seat right up against the boundary with the London Borough of Havering, and the Tories gained Stifford Clays.

These were okay results for Labour: nearly all the wards up this year fall in the Thurrock constituency (the east of the borough is now paired with South Basildon) and Labour won by almost 6 points over the Conservatives. But 25% still opted for neither party and it is these voters who will decide who wins this key marginal at the next general election.

Another seven of the ex-UKIP seats are up in 2019 but unless one of the main parties nets a big haul Thurrock will probably remain hung for a while yet.

### Welwyn Hatfield

Although not the most sensational of results, the Conservative majority in Welwyn Hatfield is being whittled away. The interesting aspect of this whittling is that it is the Liberal Democrats, not Labour, who are doing it.

Labour is in real trouble in this New Town district - arguably the most right-of-centre new town after Bracknell. It didn't used to be so: up until 2002 this was a Labour district in all but occasional years. Voters tended to prefer Conservative MPs whilst electing Labour councils, but the same was true of Harlow, Basildon, Luton, Stevenage and Watford until the Lib Dem intervention there.

A virus seemed to decapitate Labour in 2002: that is when their control ended and without a break it has been Conservative ever since. Labour's vote has declined from the mid forties to below 30%, some of it to the Lib Dems, some to the Tories and some to UKIP, who weren't especially strong here but still polled a quarter of the vote in 2014.

Now the Lib Dems seem to be repeating their Watford trick at the other end of the county, albeit at a more sedate pace. Their vote has climbed from 11% in 2015 to 18% in 2016 and 24% this year.

There are of course differences; this is a very different type of district to Watford and the Conservatives are far stronger, with a core of wards its hard to see any other party representing. But the Lib Dems in 2018 really started to dominate in Welwyn Garden City and one of the great Lib Dem tricks in local elections is, once they've got in somewhere, to demonstrate to voters in neighbouring wards that they really can win here.

Until this year the electoral system very much benefited the Tories here but if things continue in the vein of 2018 - just six Conservative wards to ten non-Tory ones it doesn't take a mathematical genius to work out that their majority: now just six seats - will soon disappear.

### Winchester

The fourth Hampshire district we've looked at, Winchester is one of those authorities that stretch far beyond the place it is named after. In fact, Central Hampshire would be an accurate

description, as Winchester district stretches from the edges of Basingstoke to the edges of Portsmouth. For the Conservatives it's just as well it does for the City of Winchester wards - each named after a saint - vote Liberal Democrat in any normal year.

If those were the only Lib Dem wards things would be manageable for the Conservatives but they also win a couple of wards along the southern boundary with Fareham, and a couple of outlying wards within the orbit of the city. To these they added Alresford & Itchen Valley this year for a total of 9 seats to the Conservatives' 6. If anything like this pattern is repeated in 2019 Winchester will be a Lib Dem gain.

Shortly after the May elections a Conservative councillor resigned from the party in a bid to oust the Tory council leader. This was thwarted when a Lib Dem councillor defected to the Tories, restoring their one seat majority.

### Worcester

Some Conservative activists in Worcester were very confident of regaining control of the council this year. It wasn't to be, though they inched closer by gaining Gorse Hill ward from Labour.

The fly in the Tories' ointment here at present is the Green Party. They now have three councillors, having won the second seat in Bedwardine - and all three represent wards that would otherwise be Conservative. Had they held Bedwardine they would control the council. With all three Green seats regained they would have a majority of five.

Still, these were not good results for Labour: eight percent behind the Conservatives - and this in a city that tends to be more inclined towards Labour locally than nationally. Their loss of Gorse Hill to the Tories was the first time that ward had elected a Conservative councillor since 1976.

## Overview of the 2018 results: seats won

# Guide to results

The results are presented alphabetically and I do not separate unitary authorities from non-metropolitan district councils.

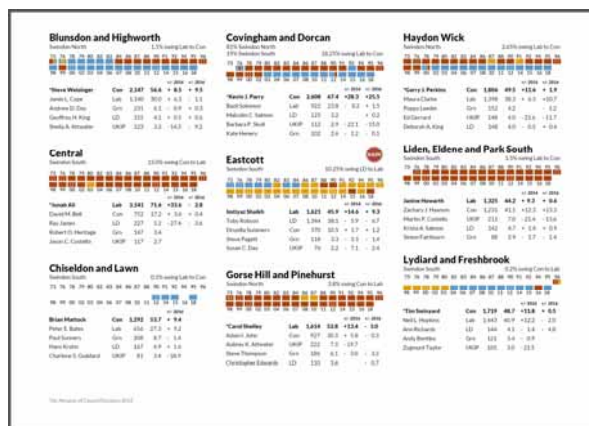

Each set of results follows a standard format. There is a frontsheet with the topline council result, its change status, and a ward map. The change status contains three boxes per party: on the top line a box showing the seats won at this election and one showing the total number of seats that party holds on the council. Underneath is a box showing the gains or losses figure. There is also an "at a glance" feature where every council seat is represented. This shows every year of the electoral cycle and how many councillors each ward has.

If there have been boundary changes there will then be a page showing the old and new ward maps. The next table shows the

headline electoral statistics for the council for every year it has held elections back to its formation in 1973.

There then follow the ward-by-ward election results. These include the vote, percentage vote and two percentage change figures. The first: the change from 2014 is the more pertinent as it was the election this particular seat was last contested. It is the result from which the swing calculation is derived. I also provide, where the ward was contested in that year, the change figures from 2016: the most recent election in the ward, though for a different seat.

I provide a vote share for every candidate. Most councils that elect by thirds have just one vacancy making for a straightforward calculation. But where there have been boundary changes the whole council is up for election creating, in most cases, multi-member vacancies. The highest vote method cannot provide percentage vote shares for individual candidates, so I prefer the average vote method, which requires an adjustment when each party or interest fails to stand a full slate of candidates. This adjustment ensures that the total vote shares equal 100% and, I believe, better reflects the true standing of a party than simply taking the top candidate's share, which may be distorted by a personal vote.

Above the result is a coloured "history bar" that denotes which party has won each seat at each election back, where possible, to the first election of these councils (in their current form) in 1973. Where it is not possible to trace a

ward's lineage back that far, it starts from whichever election I have found it credible to begin from.

Most of the colours are self-explanatory: blue for Conservative, red for Labour, yellow for Lib Dem, green for Greens and purple for UKIP. Independents are represented by olive and brown denotes Residents Association - a catch-all category which I use to define any candidate representing an organised faction which describes itself as non-partisan. Occasionally there are other colours used: dark red normally means independent Labour. Dark blue usually denotes independent Conservative. There are others - please refer to the historic election results files on the Elections Centre website if you want to find out the specific link.

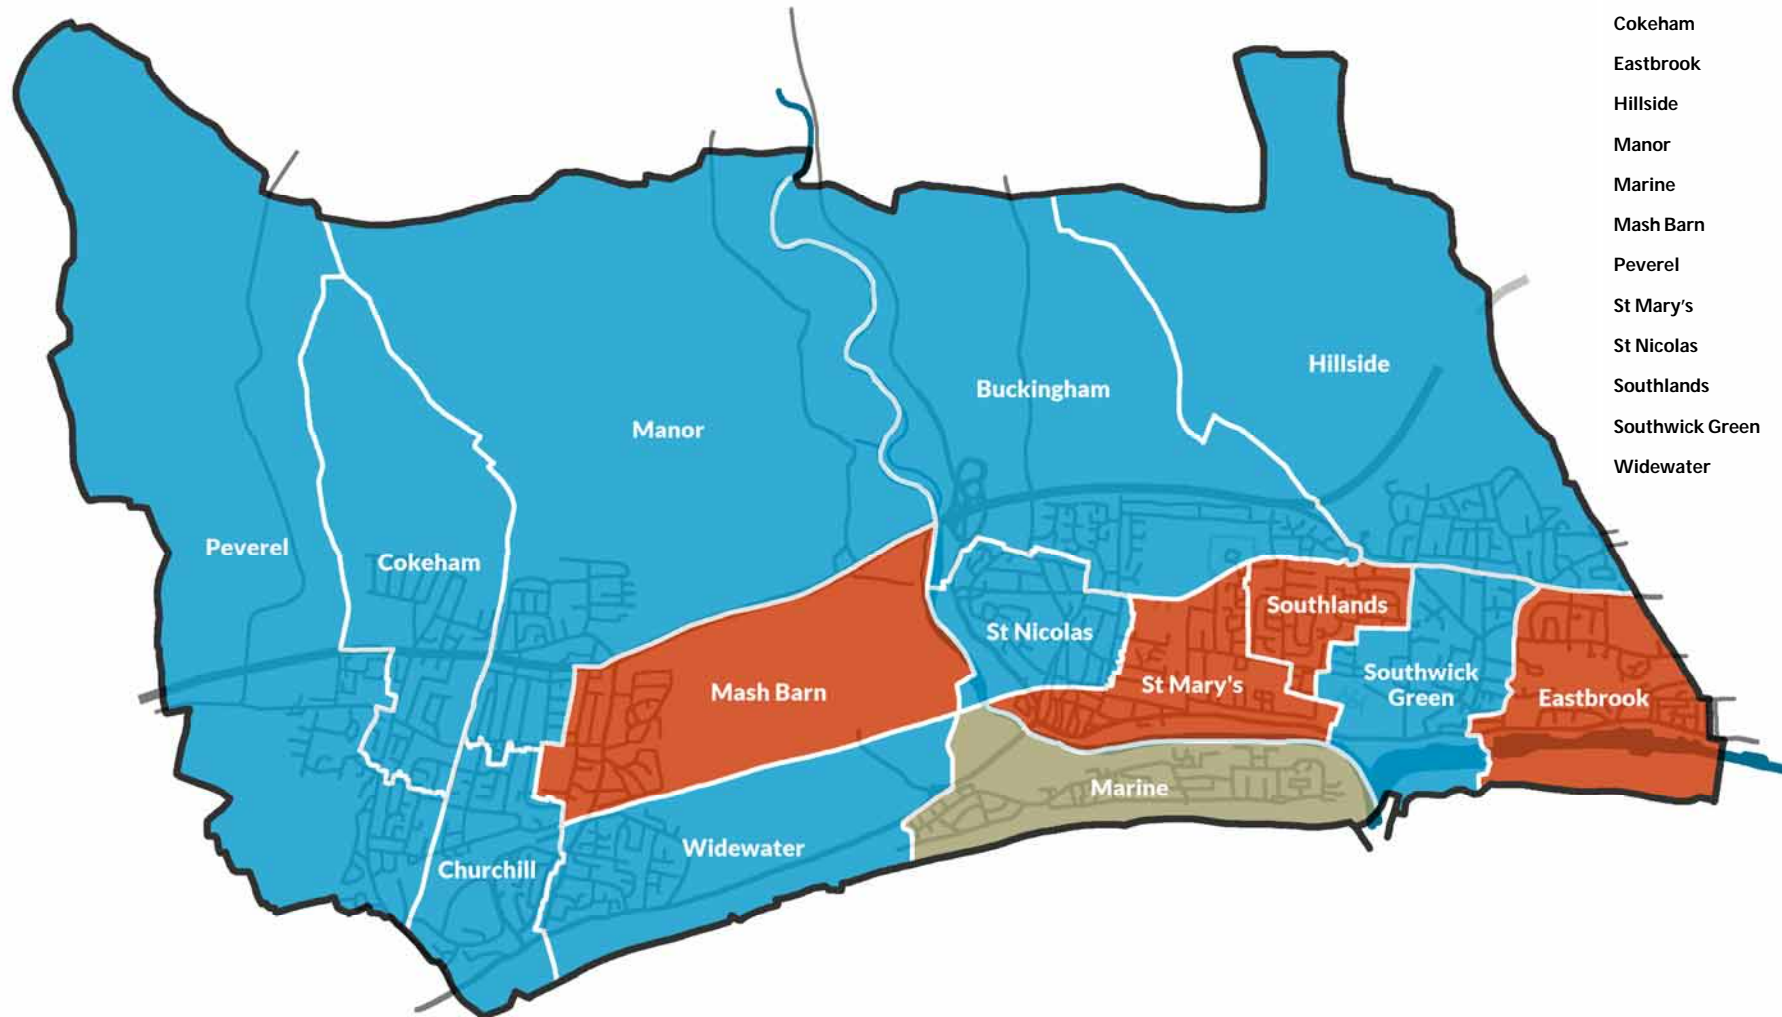

I also record which constituency/ies the ward lies within.

Following the results there is a comparison table that shows each party's average vote share over the electoral cycle: usually 2014, 2015, 2016 and 2018. Where there have been boundary changes in any of these years the cycle starts from that year. This table also shows the results for wards that did not elect this year. The table shows every party or interest that stood in either election.

To the back of this book can be found every by-election that occurred within these councils between 2016 and 2018 and an index of every candidate who stood in 2018.

# Boundary changes

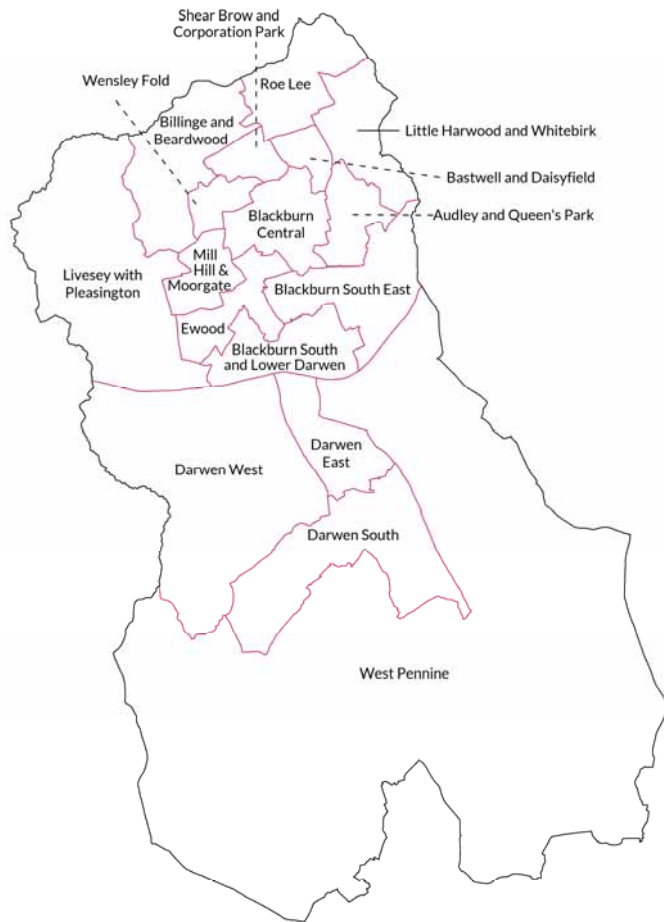

The Blackburn with Darwen boundary changes implemented in 2018 are the fourth set of changes made to wards here since the borough was reorganised in 1973.

The overall size of the council has been reduced from 64 councillors to 51, and all wards now elect three councillors.

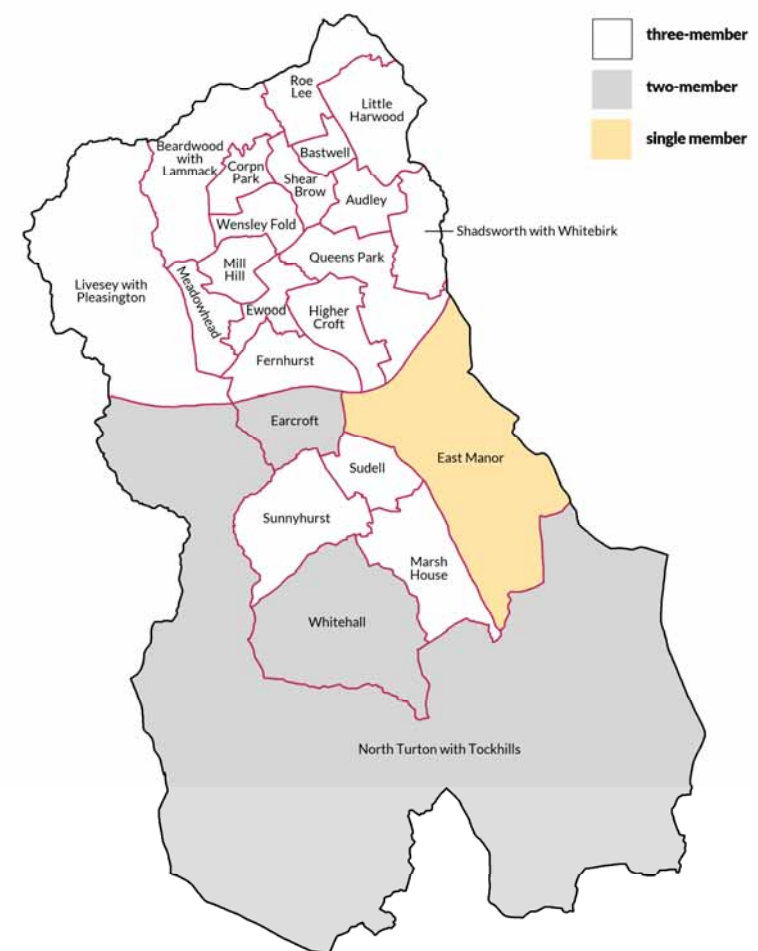

This especially affects the south of the borough where previously there were seven wards: 3 three-member, 3 two-

member and 1 single-member. These are replaced by 4 three-member wards, which reduces the representational strength of the south very slightly in proportion to the north

## New wards
