The 2019 council elections

volume one

England: Bedfordshire to North Yorkshire

Acknowledgements

Almost all the electoral information in this book is compiled from local authority websites, some (much) better than others. I am especially grateful to those councils which provided all information required - including turnout and electorate figures - on their websites without me needing to ask. I appreciate those electoral services officers who responded promptly to my requests for any missing data. A plague on the dozen councils that insisted I submit a Freedom of Information request to obtain this data that was sitting on their computers right in front of them when I asked for it.

I am of course grateful to Professors Colin Rawlings and Michael Thrasher and their Local Elections Centre for the 2015 data, their suggestions and advice as to how this information should be presented.

Finally, the local election results spreadsheet compiled by the Britain Elects team and put on their website, free, for people like me to download and then reorder and interpret was absolutely essential. Thank you.

The Brexit election that wasn't (really)

The council elections that took place on Thursday 2nd May 2019 took place in the midst of the rapidly degenerating final months of the May premiership. That period commenced on 15 November 2018 when the Prime Minister unveiled her Brexit Withdrawal Agreement and cabinet members, including Dominic Raab, her Secretary of State for Exiting the European Union, resigned in protest.

The turbulence from that day caused the government to delay its attempts to ratify the bill until the new year, and triggered enough letters of no confidence in Theresa May from Conservative MPs to mandate a leadership election, which took place on 12 December. May won, by 200 votes to 117 but it forced her to agree publicly to step down before the next election.

From the New Year onwards almost every day saw increasing pressure from those critical of her EU deal and her longer record of perceived missteps; and increasingly brazen push-back from May to stay in 10 Downing Street.

On 15th January May's first attempt to gain parliamentary approval for her withdrawal agreement was defeated in the Commons by a majority of 230: the largest vote against any government measure ever. The following day the Prime Minister survived a no confidence vote in the Commons: the first manifestation of the unintended consequence of the Fixed Term Parliaments Act (FTPA) to keep a government in office but not in power. The Withdrawal Agreement was rejected again on 12th March, this time by a majority of 149 and, after some parliamentary shenanigans, for a third time on 29th March by 58 votes.

Mrs May, her own contributions to her fate aside, had become an unlucky Prime Minister. The fact that this year's set of local elections would not only be the largest tranche of councils going to the polls, but the set that had last elected on general election day 2015, when the Conservatives had both polled well and benefited to a certain extent from the far higher general election turnout, was another example of misfortune.

Until March 2019, the Conservatives were polling around 40%, approximately five to ten points ahead of Labour. During March they slid to approximately 35% and parity with Labour. During April - following the government's request to extend the Article 50 negotiating period until 31st October - their support fell below 30% in most polls and a deficit of between five and ten points with Labour.

David Cameron's Conservatives had polled 36% in the local elections of 2015: 1% less than they won in the simultaneous general election; Labour 28% (2% less); and the Liberal Democrats 10% (2% more). The two principal political parties tend to fare worse in local elections for a range of reasons; most notably that there is a wider range of options, especially many independent candidates, which are not often available in national

elections; and because the Liberal Democrats are more widely considered a credible choice in local elections, thanks to decades of their "pavement politics" approach to local issues and the generally higher visibility of their councillors and council candidates.

Whereas in 2015 the Conservatives had led Labour by eight percentage points, in 2019 they were heading into the council elections trailing by a similar margin - and that, of course, equates to an 8% swing.

Yet Labour was not exactly reaping the benefit of this substantial Conservative collapse. This was not only a mid-term election; it was a ninth year of Tory government mid-term election and in normal circumstances that would equate to a substantial lead for the principal party of opposition. Although being so long out of power nationally is a relatively rare occurrence, there are two fairly recent examples of election results taking place in these circumstances.

Nine years after Tony Blair's 1997 landslide, the opposition Conservatives had won the 2006 council elections 39% to Labour's 26% (with the Lib Dems on 25% and others winning 10%). The nine year mark following Margaret Thatcher's first election win of 1979 was 1988 when the Conservatives won 39% to Labour's 38%. But this was not a mid-term election: it was 11 months on from the 1987 Conservative landslide which sent Labour reeling and imploded the SDP/Liberal Alliance. If we take 1989 as the more accurate mid-term election instead, Labour beat the Conservatives by 42% to 36%; and in 1990 by 44% to 33%. In other words, it's reasonable to expect very significant leads for the principal opposition party at such a point in the electoral cycle. That simply wasn't happening.

Yes, Labour had opened up a poll lead in the weeks preceding the council elections, but that was because Conservative support had cratered; not because Labour had surged. At the start of 2019 Labour had been polling around 35%; in February it was polling just below 35%; in March 35% and in April slightly below 30%. Labour was going backwards too. Why was this?

Following the 2017 general election Labour had moved into a consistent lead over the Conservatives of around five points - ranging from parity to 10% ahead, especially following the Grenfell Tower tragedy of 14th June. The party remained ahead until April 2018, when the party's lingering anti-Semitism problems erupted again following Jeremy Corbyn's endorsement of an anti-Semitic mural in the East End and the resignation from the party of several MPs to establish a new party: Change UK. These MPs included Luciana Berger, one of the most prominent Jewish MPs, which ensured that these issues besetting the party rumbled on throughout the year.

Labour's response to Brexit was also damaging the party. The party's problem was that it represented both the most strongly Remain-voting constituencies in England, and the most strongly

Leave constituencies - and there are far more of the latter than the former. Even though its members were strongly pro-EU its leadership was not - the only significant split among its pro-Corbyn activist base. Hence, the party essentially fudged its position, arguing that specifically because it straddled both sides of the fence it was uniquely placed to reunite a divided country. As the saying goes, however, being in the middle of the road ensures you get hit by traffic in both directions.

However traumatically for some in the party, the Conservatives had hitched their flag to the Leave side of the divide - partly expediently to see off the existential threat UKIP had posed to their support; partly because since the Maastricht ratification process the party's membership had been selecting far more euro-sceptic MPs and partly because the principal driver of Brexit: national sovereignty (or "taking back control" as Dominic Cummings phrased it) is a far stronger, older strand of conservative-liberal philosophy than it is for any other political party.

Meanwhile the Liberal Democrats, traditionally the most Europhilic major party, saw the chance of using an issue they passionately believed in to resuscitate their approval ratings after flat-lining since entering the coalition government.

Some have argued that it was anti-Semitism specifically that caused Labour's sudden decline in the polls just prior to the local elections. I cannot disprove that assertion but I do not believe it to be correct: anti-Semitism simply does not have sufficient public salience to damage a party as significantly as Labour clearly was in spring 2019. It is, however, an issue that softened the party up - especially because it has been a consistent drip-drip issue pretty much since Ken Livingstone's comparison of a Jewish journalist to a concentration camp guard - so that when issues that concerned a far larger section of Labour's support, far more directly and deeply, its vote would slump quickly.

It was not anti-Semitism alone: it was anti-Semitism PLUS the evidence that Labour was a deeply divided party - shown by that breakaway to Change UK (which would have been far bigger had Tom Watson not persuaded many disenchanted MPs to stay); PLUS an increasing exasperation among passionate Remainers that their party was not enthusiastically in their corner, arguing at the very least for a second EU referendum PLUS the much lower ceiling on Labour support the party had placed upon itself with a leader such as Jeremy Corbyn, whose own satisfaction ratings were dismal - and had been since the end of 2017.

For the Liberal Democrats, the 2015 council elections had been part of the utterly horrible cycle of results that had done huge damage to their local government base. Until 2011 - the first round of local elections following their decision to join David Cameron's coalition - the Lib Dems had (with two exceptions - both coinciding general election years) polled in excess of 20% every year since 1993. In 2011 they polled 16%; in 2012: 15%; in 2013 13%; in 2014: 11% and in 2015 just 8%.

These numbers were far in excess of their national opinion poll shares, but they represented hundreds of lost councillors year after year. For the self-styled party of local government, this was

a devastating loss in terms of influence in local government, in terms of activists in positions of authority and even, since the introduction of substantial allowances for councillors in the Blair years, in terms of party income from contributions levied on their local representatives.

Since 2015, Lib Dem fortunes hadn't revived at all: they had advanced a little in the 2016 district elections (the smallest round in the electoral cycle) but had then managed to lose even more county councillors in the 2017 elections than they had in 2012 - and that despite the collapse of UKIP, given that a large interchangeable element of the votes of both the Lib Dems and UKIP was a "plague on all your houses" protest vote.

Throughout the spring, as the Lib Dems were starting to up-the-ante on their hostility to Brexit there was no cut through to the opinion polls. It was not until late April 2019 that the party moved consistently to a double digit share (until then they had been hovering at or, more often, below 10%). It was probably because there was no obvious Lib Dem surge - and even then, not that much of one - that had damped down estimates of how many seats the Conservatives were likely to lose.

Those estimates forecast a Conservative loss of about 750 seats - and the fact that the Conservative Party itself was bandying that forecast around itself suggested its strategists expected a lower figure. It was far, far worse.

Change UK was not the only new party founded in early 2019: Nigel Farage, who had left a collapsing and fragmenting UKIP to its own Tommy Robinson-endorsing, aggressively anti-Muslim, BNP-lite strategy, founded the Brexit Party in January. Critically for the local elections neither party was officially registered with the Electoral Commission (or organised sufficiently well enough) to contest the elections.

A Brexit election?

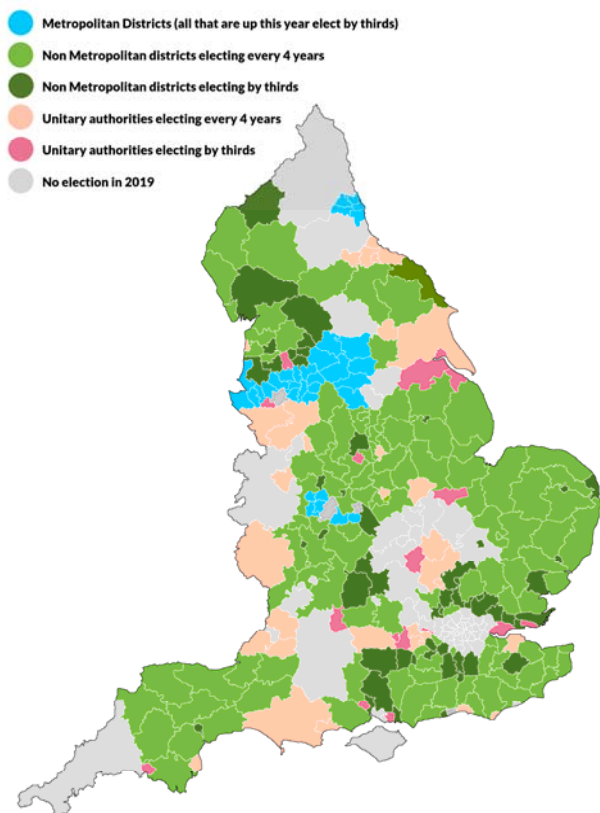

Inevitably - and I have hardly done anything to dispel such a narrative in the introduction above - these elections were presented as a Brexit election. Or rather *another* Brexit election. Of course the election can be looked at that way: results can be interpreted however one wishes, to the point where interpretation becomes meaningless.

A Remainer could argue that the significant losses of the only true "Leave" party - the Conservatives - coupled with the success of clear "Remain" parties the Lib Dems and Greens, meant the country was clearly protesting against Brexit. That claim can be dissected to slithers pretty easily, though it is true to say that those relatively few areas that voted Remain which were up for local election this year saw far better Lib Dem and Green Party performances than Leave areas.

Theresa May, however, could - and did - point to the disastrous Conservative performances and say "look: our party has been punished because Tory MPs refused to deliver Brexit by voting for my Withdrawal Agreement." That's certainly one explanation.

It was, however, rebuffed by Conservative Leavers arguing in leave heartlands (where the vast bulk of this year's local election votes were cast) voters regarded Mrs May's agreement as Brexit in name only and were therefore casting a judgement on the unsatisfactory nature of that, rather than urging her MPs to support it.

Straight out, therefore, we have three substantially divergent analyses of the same result. And that's before we consider a fourth: that voters were actually voting to choose local councillors and who they wanted running their town halls. A radical thought, I know, to suggest that local elections might not be all about Brexit.

map one: the local authorities holding elections this year

The 2019 round was the stage in the electoral cycle when virtually all of those English councils that elect every four years came up for election; vastly expanding the amount of seats up for election. There were no elections in London, Scotland or Wales; and county-wide unitary authorities: Cornwall, Wiltshire, Shropshire, Durham and Northumberland elect in other years.

In addition, the four districts in Buckinghamshire and the six districts in Northamptonshire saw their elections cancelled pending reorganisation while twelve districts and two unitary authorities had been abolished since 2015 and replaced with new combined councils in Dorset, Somerset and Suffolk.

Other councils, not least Birmingham - the largest - had moved to four-yearly elections and weren't electing this year. Rotherham, following a period of management by appointed commissioners following its political failures over a widespread vice ring in the town, had still not returned to the electoral cycle.

Nominations

Over 25,600 candidates contested 8,399 council seats in these elections: almost exactly three candidates per seat. But, of course, those candidacies were not evenly spread; 118 wards were uncontested; most councils covering urban areas saw at least four parties plus independents contesting each seat; and that meant that a large number saw a Conservative facing just one single opponent - most typically either a Liberal Democrat or an independent.

These 25,600 candidates were down from just over 30,000 who stood in 2015; but there were fewer councils up for election this year

In 2015 there were 9,100 seats up for election so the ratio of candidates to seats was slightly higher at 3.28. It's possible that the coinciding general election in 2015 heightened interest in the electoral process driving extra councillor nominations but the main reason the number of candidates fell compared to four years earlier was the collapse of UKIP, which fielded 3,995 candidates in 2015 and just 1,384 this year.

table one: nominations by affiliation

Party	Candidates	% seats contested
Conservatives	8,048	95.8
Labour	6,468	77.0
Liberal Democrats	4,424	52.7
Green Party	2,611	31.1
Independents	1,813	21.6
UKIP	1,384	16.5
Residents Associations	507	6.0

The nominations provide the first, and most significant reason why the analysis that the 2019 elections were a clear demonstration that the country wanted to remain in the EU is flawed.

Aside from the fact that the Brexit Party contested zero seats, UKIP contested fewer than 17% of the seats up for election. In other words, voters in 84% of the seats up for election this year had no candidate standing unequivocally for Brexit for which to vote.

It's somewhat hard to argue that an election produced a clear result in terms of remaining in the EU if very few voters were actually given a chance to cast a vote for an unequivocally pro-Brexit party; even if you believe - which I do not - that local elections can be converted into an EU opinion poll. What actually happened was that many voters chose whichever vessel was available to them to kick the Conservatives. And then they kicked.

The result

Because the Conservatives started from a relatively high watermark in 2015, substantial losses were inevitable. Yet the scale of defeat took them by surprise: three seats shy of two thousand losses. That was comparable to John Major's catastrophic local election results in 1995.

That said, the 2019 results had nowhere near as bad a practical outcome for the Conservatives as Major's caused: the 1995 elections followed 1991 results that were already very poor for the Tories whereas 2019 followed a very good 2015 round. Hence the damage the Conservatives sustained in 1995 was far worse, leaving the party with a majority in just eight councils up for election that year.

table two: votes won

Conservatives	2,987,440	31.4	-4.4
Labour	2,532,500	26.6	-1.8
Liberal Democrats	1,604,771	16.9	+6.6
Green Party	878,622	9.2	+2.7
Independents	719,307	7.6	+3.6
UKIP	431,035	4.5	-8.3
Others	360,261	3.7	+1.5

table three: councils controlled

	Won	Gained	Lost	Net
Conservatives	90	4	53	-49
Labour	60	5	14	-9
Liberal Democrats	16	10	0	+10
Residents Assocs	2	1	0	+1
Independents	2	1	0	+1
UKIP	0	0	1	-1
No overall control	73	53	5	+48

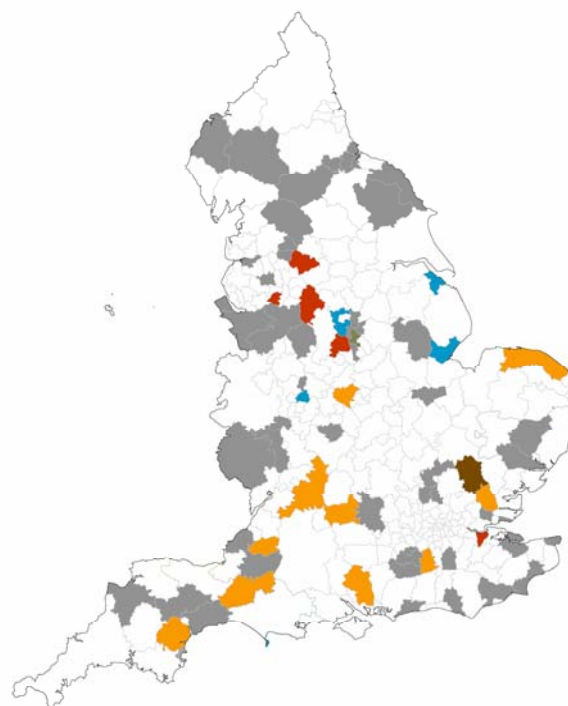

These figures exclude the five new councils electing for the first time this year: Bournemouth, Christchurch and Poole (NOC); Dorset (Con); East Suffolk (Con); Somerset West and Taunton (LD) and West Suffolk (Con)

table four: councillors elected

	Councillors	Change from '15
Conservatives	3,543	-1,997
Labour	2,017	-275
Liberal Democrats	1,345	+684
Green Party	260	+176
Independents	792	+408
UKIP	31	-170
Others	389	+211

The Conservatives gained four councils but lost fifty three; most of them to no overall control but ten directly to the Liberal Democrats and three to Labour.

Labour gained just five councils and lost fourteen - including every council on Teesside. The Lib Dems defended all their councils but gained nothing north of The Wash.

map two: councils that changed control in 2019; grey denotes no overall control. A larger map of all of the council results can be found on page , and a table of all council changes is on page

There were some decisive shifts in seats as the following tables show. By looking solely at the magnitude of seats won or lost, councils that elect by thirds aren't going to appear. But there were some big changes amongst these councils too.

If, for example, the Conservatives' ten losses in Wokingham were extrapolated to an all out election that might place this council near the top of this table, rather than not featuring at all because only councils where losses were fifteen seats or worse are featured.

The colour block at the end of each row denotes whether the council area voted Remain or Leave in 2016.

Significant Labour losses

Local authority	Losses	% Loss	
Ashfield	-20	91%	█
North East Derbyshire	-16	47%	█

The Metropolitan Districts

One of the main reasons Labour fared poorly in these elections was its performance in its citadels of the north: the Metropolitan Districts. These are the councils covering the major cities beyond London: Bradford, Newcastle, Leeds, Sheffield, Manchester and the like, as well as some smaller (but still large in comparison to most non-metropolitan areas) districts in between these cities - places like Calderdale, Solihull and North Tyneside.

Since the heavy losses Labour suffered during the mid-term elections of the Blair and Brown governments, when the Liberal Democrats in particular won scores of seats and controlled councils including Liverpool, Stockport, Oldham, Rochdale, Newcastle and Sheffield, Labour has recovered strongly: in most cases improving far beyond where they were before they were elected to government in 1997.

The 2019 Council Elections

But in 2018 Labour's Metropolitan campaign started to go into reverse. In part this was due to there being essentially nowhere further for Labour to go such was their complete dominance across these big, powerful councils.

Labour may well have been a victim of its own success in two ways: by having such a grip on these councils voters may have decided that they had given themselves too little choice in elected representatives. And having massive majorities with little competition, oversight and questioning of key decisions may well have induced a certain degree of complacency among Labour council cabinets that they could pretty much act as they liked. From such complacency, bad decisions get made.

But other factors were at play. The vast majority of Mets voted to leave the EU in the referendum (just Leeds, Liverpool, Manchester, Newcastle, Sefton, Stockport, Trafford and Wirral voted Remain) and probably the biggest problem for Labour arising from the referendum, and its response to it, was to add another (big) issue to the list of grievances Labour leave voters in these heartlands had with their party. The most common of these was "we've been left behind" from which followed "what has Labour done for us?"

table five: councillors elected in Metropolitan Districts

	Con	Lab	LD	Oths
2019	118	502	79	63
2018	149	552	63	35
2015*	144	545	38	15
change	- 31	-50	+16	+28

*2015 figures exclude Birmingham, Doncaster and Rotherham - which elected that year but not in 2019 - so that we are comparing like with like

The pattern of Labour decline was not uniform: as the table above shows, Labour actually improved in the West Midlands and West Yorkshire (in West Midlands somewhat ironically given this was where the Tories scored headline wins in Walsall and Dudley). And while Labour was down a lot in Greater Manchester - notably in Bolton and less significantly in Bury - they still managed to gain the prize of Remain-voting Trafford very easily indeed.

In West Yorkshire Labour added Calderdale (Halifax and the countryside to the west and south of the town) to Kirklees (Huddersfield, Dewsbury, Batley and the countryside in between), which they gained control of last year. There was also little sign of any Conservative improvement in heavily-Leave voting Wakefield - though Labour did lose seats there it was to Lib Dems and independents.

But for every Calderdale, I'll match you a Sunderland and raise you a Wirral. These elections were the first since the current Sunderland council was formed in 1973 that Labour failed to win a majority of seats. The wards comprising Sunderland Central constituency elected four Conservatives, two Lib Dems and two Labour councillors. The Greens won a seat in the new town of Washington. UKIP won three wards including the former mining ward of Ryhope.

Change 2015-19	-4.1	+0.2	+3.7	+0.3

In Wirral Labour lost control as Greens and Conservatives made gains. In fact, across Merseyside, the Green Party performed strongly gaining never-before-won wards in St Helens and building on the gains they made in Knowsley last year.

In South Yorkshire Labour continued to reap the whirlwind of its controversial tree-felling programme, and perhaps from the public implosion of Sheffield Hallam Labour MP Jared O'Mara. Labour won thirteen of the Sheffield seats up against fifteen Lib Dems and Greens. Needless to say, their majority cannot survive long against such voting patterns.

Meanwhile, the other South Yorkshire council up for election this year (Doncaster now elects on a 4-yearly cycle next in 2021; Rotherham's elections are still suspended following its now-ended takeover by Commissioners following the sex abuse scandal) a multi-party system has erupted after one never really having existed before.

The Democrats and Veterans Party - a UKIP splinter - won two seats, which is two more than UKIP ever managed; Lib Dems won three, independents two and the BIG - Barnsley Independent Group - having been turfed out of its Dodworth ward stronghold, came back in Stairfoot ward. For Labour to poll just 32.6% in South Yorkshire is remarkable. And while only half the county voted, I'm not sure Labour can expect very different vote shares from Doncaster and Rotherham.

Across all 38 Mets, Labour's share of the vote was under 41%. That's Labour's worst share in the Mets since 2010: at the end of thirteen years of Labour government. To be back there after nine years of opposition is not normal.

For the past few years elections in the Mets have been spectacularly boring. Suddenly there are interesting patterns emerging - and interesting means bad news for Labour because it means their core support base is shifting away from them. Yes, there were movements to Labour as well as from them (though more examples, and more substantially away than too).

What perhaps explains the divide between those councils that are moving away, and those where Labour fared well is the strength of the Asian vote in each particular council. Labour's vote held up better in districts with large BME populations, such as in West Yorkshire, than in whiter communities like Sunderland, most of Walsall (Labour's remaining wards there are heavily BME) and Barnsley, to name three. In Greater Manchester, the polarised councils to the east of the city: Oldham and Rochdale, hardly registered any swing to the Conservatives; white Bury and Bolton; and to a lesser extent Salford and Wigan, shifted away.

I talk about the Brexit divide later, and I'm not going to attempt to make a case that Labour's differing fortunes in the Mets has much of a link to the EU referendum - not least because the vast majority of Mets voted Leave, and even in Remain voting Merseyside Labour didn't have the best of times. Clearly places like Dudley and Walsall are swinging from Labour because of Brexit - but almost as a symptom, not a cause: the decoupling of Labour from heartlands like these is not just about the EU: it's a deeper and wider values fault-line.

But Wolverhampton voted strongly to Leave; so did Sandwell; so did Gateshead; so did Oldham and Rochdale and North Tyneside: these councils all stayed loyal to Labour. No, the difference between councils in which Labour's vote slid, and where it held up, is the size of its BME population.

Non Metropolitan districts and unitaries

I am not a huge fan of analysing unitary councils separately from the non-mets because there is no special quality to unitary authorities that make analysis meaningful.

Yes, unitaries include some quite large councils - the smaller cities like Southampton, Portsmouth and Plymouth; and large towns like Milton Keynes and Luton but they also include some of the smallest councils in existence, like Rutland. There is no logical distinction that explains why Blackpool is a unitary authority but Preston is not; why Peterborough is and Cambridge is not; or why Plymouth is and Exeter is not.

The unitaries had the same Brexit preference as the overall profile of the councils up in 2019: 55-44 Leave.

Nonetheless the Conservatives did less badly in the unitaries than in the non mets. which is perhaps surprising because, although they are both mixed sets of urban, semi-rural and rural councils, the unitaries lean somewhat more to the urban - and therefore the Conservatives have a somewhat weaker base.

The Tories were eight points weaker in the unitaries than the non mets in 2015, and five points weaker in the unitaries than the non mets in 2019; yet the Conservative decline in the unitaries was half what it was in the non mets. Labour declined equally in both; though polls far worse in the non mets: just one in five votes in 2015 and slightly less than that in 2019. The Liberal Democrats are both systemically stronger in the non mets and improved by more in these councils.

table seven: vote shares in unitary authorities

	2019	2015	change
Conservatives	31.1	34.1	- 3.0
Labour	28.1	28.8	-0.7
Liberal Democrats	15.8	10.4	+ 5.4
Others	25.0	26.6	- 1.6

table eight: vote shares in non-metropolitan districts

	2019	2015	change
Conservatives	36.0	42.6	- 6.6
Labour	19.4	20.1	-0.7
Liberal Democrats	19.3	11.6	+ 7.7
Others	25.3	25.7	-0.4

One of the reasons for the divergence between these two types of authority could be the level of competitiveness. In the Mets there were 4.4 candidates chasing every council seats. In the Unitaries the figure was 3.3 and in the non mets it was just 2.8. 0.5 of a candidate difference may not seem all that significant but it is: far more seats in non-mets were contested by (in most cases) a Conservative plus one other; in the unitaries voters had a choice of at least three candidates as the norm.

Of course, a wider choice of non-Conservatives doesn't directly affect the vote share for the Conservative candidate, but - and this is just the author's perception; it isn't verifiable - where the choice is not simply a pro or anti Tory choice, the Conservatives may have fared a little less badly.

Regional analysis

I mentioned earlier that there was limited sign of a political realignment taking place in these elections with one or two notable exceptions. Labour still led by substantial margins in the north, in Yorkshire and in the North West; while the Conservatives led by increasingly large amounts as you proceed south through the Midlands, the East of England and their South Eastern and South Western heartlands.

But look at the vote share changes rather than the headline figures to get a more meaningful measure of what's going on.

Labour's vote fell ten points in their heartland areas of the north west, and by over eight points in the north. They did less badly in Yorkshire; whereas in the Midlands they gained very slightly; but from a position outside the West Midlands conurbation that was already near rock-bottom for the party.

The Conservatives actually advanced in the North West but fell by between six and seven percentage points in the three southern regions; which were also the regions the Lib Dems did best in, increasing by between seven and nine points.

table nine: regional vote shares

	Con	Lab	LD	Oths
North	22.2	33.1	12.9	31.9
2015	23.2	41.6	8.1	27.0
Change	- 1.0	- 8.5	+4.8	+ 4.9
Yorkshire	23.9	33.2	15.7	27.2
2015	27.7	35.6	10.2	26.4
Change	- 3.8	- 2.4	+5.5	+0.8
North West	25.2	40.7	12.1	22.1
2015	23.8	50.7	6.8	18.7
Change	+ 1.4	-10.0	+5.3	+3.4
East Midlands	34.2	31.3	12.5	22.0
2015	35.4	31.2	8.0	25.3
Change	- 1.2	+0.1	+4.5	- 3.3
West Midlands	36.9	28.9	8.8	25.3
2015	38.2	28.7	5.0	28.0
Change	- 1.3	+0.2	+3.8	-2.7
Eastern	35.6	20.3	19.9	24.2
2015	42.3	21.3	10.9	25.5
Change	- 6.7	- 1.0	+9.0	- 1.3
South East	34.9	18.0	21.7	25.4
2015	40.9	20.7	12.5	25.9
Change	- 6.0	- 2.7	+9.2	- 0.5
South West	32.6	15.3	24.9	27.2
2015	39.7	14.5	17.6	28.2
Change	- 7.1	+0.8	+7.3	- 1.0

So, in respect of this realignment process, what looks to be happening is that while Labour is shedding votes by the bucketload in its northern strongholds, those votes are not switching direct to the Conservatives, but - at least initially - opting for an intermediary. This is not unusual: in those areas that were among the first to swing from Labour, their vote decamped principally to UKIP; but when UKIP retreated the votes did not return. In local elections where there are often more choices - or at least a more comfortable choice - for Labour voters switching away the changes are hard to see, but in general elections this switch manifested itself, at least in 2017, in significantly increased Conservative votes in many seats.

It's worth looking at the results county by county, which are provided in tables from page xxx.

Did cities, towns, suburbs and rural areas vote differently?

The penultimate way of dissecting the results is to split the councils into four types. One is the Mets - the large cities, which we've already looked at. The other three are

- Small cities and large towns
cities like Plymouth, Portsmouth and Southampton; towns like Reading and Swindon
- Small towns and suburbs
Gedling, Hertsmere, Oadby and Wigston; and Runnymede, Three Rivers and Castle Point are examples of these
- Rural districts - from Allerdale to Wyre

There are always tensions categorising councils this way because some have characteristics of both: Bath and North East Somerset for example. There are several districts based on a town but with a large hinterland like Chelmsford and Colchester, or Telford and Wrekin, but in these cases I have typically allocated them to small towns and suburbs as the urban part usually predominates.

table ten: vote shares by type of council area

	Con	Lab	LD	Oths
Large cities (mets)	21.7	40.8	12.7	24.8
2015	22.1	49.4	7.1	21.3
Change	- 1.4	- 8.6	+5.6	+3.5
Small cities, large towns	29.1	31.5	14.9	24.5
2015	31.8	33.3	9.6	25.4
Change	- 2.7	- 1.8	+5.3	- 1.1
Small towns & suburbs	36.0	22.4	21.1	20.5
2015	42.5	23.1	11.4	23.0
Change	- 6.5	- 0.7	+9.7	-2.5
Countryside	37.1	16.5	19.3	27.1
2015	42.2	18.3	11.8	27.7
Change	- 5.1	- 1.8	+7.5	- 0.6

The fact that large cities, home to significantly larger proportions of younger people, professionals with university education and minority ethnic populations; and are therefore generally seen as more liberal and much more inclined to parties of the left of centre; of Remain, became well established in the EU referendum. It's borne out, to no surprise, in these council election results: Labour winning in the Mets by 19%, albeit there was a swing to the Conservatives in these areas.

That trait diminishes considerably in the next tranche of councils: small cities and big towns, which are also likely to have universities or other higher education institutions, be more diverse than provincial England, and have a distinct sense of place. Labour led in these places by two percentage points, and there was a very slight swing from the Conservatives here.

In the last two categories of council area, Labour becomes far weaker (indeed, if you note, Labour loses nine points of support between the first three groupings and six between the last two). I have grouped together two somewhat different areas in small towns and suburbs, but this can be characterised as commuterland, more affluent and whiter, though it is to these sorts of places that Londoners are migrating for larger, cheaper homes, more open space and a higher quality of life.

Some analysts assert that this is what is helping weaken the Conservatives in the south east especially - but that analysis is founded on the assumption that people change places, not the other way round. Just as radical youngsters become conservative pensioners, it is also the case that living in a radically different environment can also change voting intentions.

A Labour lead of two percent in small cities and large towns became a Conservative lead of fourteen points in this small town, suburban subset. And here the Lib Dems did best, essentially tying with Labour and seeing their vote rise almost ten points. This was reflected in councils like Mole Valley, Chelmsford and Hinckley and Bosworth which they gained.

Finally, rural areas. Here the Conservatives are, unsurprisingly, strongest and which there was least competition. The Lib Dems surpassed Labour to finish second but some eighteen points behind. The others share is also highest here because disproportionately more independents contest rural seats - party politics is inherently weaker in rural areas compared to urban and suburban ones.

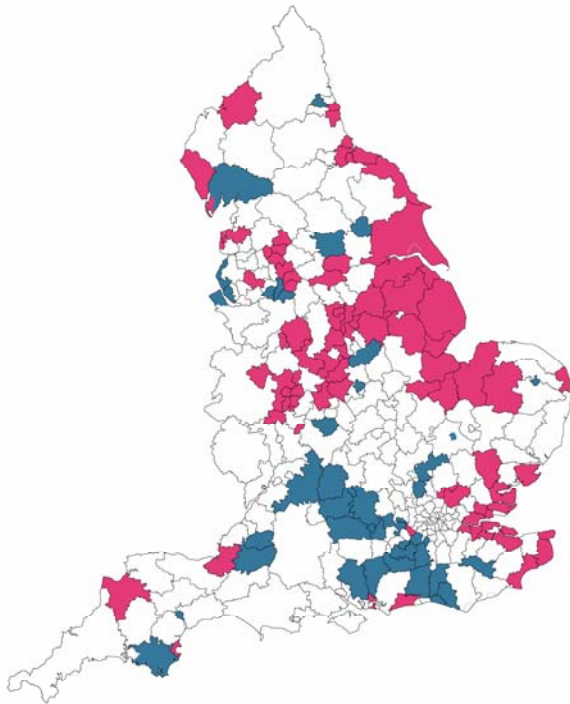

The Brexit divide

The councils up for election in 2019 do not accurately reflect the outcome of the EU referendum of 2016: any set of elections that exclude London and Scotland are evidently going to skew more to the Leave side of the argument than Remain. In fact, had only this set of local authorities voted in the referendum, the result would have been 56%-44% Leave instead of 52%-48%.

Was there a difference in how remain and leave local authorities voted in these elections. Surely there should be, especially if we revert to the narrative favoured by some Remain advocates: that huge Lib Dem and Green advances mean the country has changed its mind over Brexit?

There are slight problems producing a meaningful analysis in terms of Remain areas and Leave areas because, frankly, there aren't all that many Remain local authorities in this year's batch. Just 43 out of 251 councils up for election this year voted Remain; a proportion that is large enough to provide a subset likely to be reflective of such areas. But the Leave subset is simply too large to provide any meaningful data.

Therefore, let's narrow the Leave authorities to those which voted significantly for Brexit - councils with a 60% or greater Leave percentage. Even this smaller set swamps the Remain councils: there are 85 such councils - twice the number of Remain areas.

map three: the 43 remain local authority areas (blue) and the 85 local authority areas that voted to leave the EU by 60% or more (pink)

There are big differences between these two types of council. Remain-voting councils in 2015 tended to have far higher shares for Liberal Democrats and other parties. The Conservative-Labour vote in these councils was 72%. Leave-voting councils were far more likely to be Conservative-Labour battlegrounds only: their combined vote in 2015 was 84%. Lets add a note there that UKIP would have been strong in these Leave councils but collapsed in 2015.

The Conservatives polled about seven points worse in Remain-voting districts than in strong Leave districts; and their vote share fell by very slightly more than the national average in Remain voting areas; whereas it barely fell at all in Strong Leave areas.

Likewise, Labour fared worse in Remain districts, though its share was higher in both types of district than the bulk of councils in the middle. This may have something to do with the demographics of those particular districts than saying anything profound about Labour's plight in slightly Leave areas.

The big difference between the two types of council was: who benefited. There was already quite a difference in the 2015 voting pattern in these councils: in Remain councils the Lib Dems polled 13.5%; while in Leave councils just 5.3. This is unsurprising: one of the core demographics of Remain areas is that they are generally liberal areas; more affluent, more middle class and more cosmopolitan. Whilst many Strong Leave areas may have voted in large numbers for Lib Dems in the mid terms of Labour governments, that was very much a protest vote and Lib Dems were largely evicted from these areas after 2010.

In Remain areas in 2019 the votes divided almost evenly four ways (the combined others polled 23.6) with no party coming close to winning 30% of the vote. Nationwide the Lib Dem share rose 6.6 points. In Remain voting districts they rose 10.1 points, and in Leave voting districts they rose four points.

Yet even in Strong Leave districts there were anomalous results: the Lib Dems gained control of Hinckley and Bosworth in Leicestershire, one of the most strongly Leave-voting councils. They polled well in Chesterfield, Barnsley and Pendle. The Lib Dems also control, for example, Eastbourne, Eastleigh, Oadby and Wigston, North Norfolk, Three Rivers and Watford - all of which voted Leave.

table nine: council areas that voted Remain (43 councils)

	2015	2019	Change
Con	30.3	25.4	-4.9
Lab	34.7	27.4	-7.3
LD	13.5	23.6	+10.1
Green	8.1	12.7	+4.6
UKIP	7.1	2.6	-4.5
Others	6.2	8.3	+1.9

table ten: council areas that voted by more than 60% to Leave (85 councils)

	2015	2019	Change
Con	33.8	32.9	-0.9
Lab	31.4	29.4	-2.0
LD	5.3	9.3	+4.0
Green	3.9	6.2	+2.3
UKIP	18.1	6.7	-11.4
Others	7.5	15.5	+8.0

table eleven: council areas that voted by less than 60% to Leave (123 councils)

	2015	2019	Change
Con	38.5	33.2	-5.3
Lab	27.2	24.6	-2.6
LD	11.1	18.3	+7.2
Green	6.7	9.4	+2.7
UKIP	10.4	4.1	-6.3
Others	6.2	10.3	+4.1

So we need to interrogate the twin narratives that the story of the 2019 elections was a Liberal Democrat surge - and that the reason for that was a Brexit backlash. Let me offer a counter narrative. I've just made the point that remain councils already had a much higher Liberal Democrat vote from 2015. That is not their only characteristic.

Every single council the Lib Dems performed well in this year has a history of Lib Dem local government strength. Some, like South Somerset, Taunton Deane, Vale of White Horse and Winchester

have often returned Lib Dem overall majorities. In other words, there is a case that, following the Lib Dems disastrous 2015 election; indeed the entire cycle of their period in coalition government, voters simply remembered that the party was a useful vehicle to kick the Conservatives with, especially when Labour was not firing on all cylinders and with UKIP all but absent from the battlefield.

That is not to say that the Lib Dems did not benefit from their Brexit stance; it refloated their boat after years of being beached following the coalition government years. But a less-than seven point increase in vote is not hugely spectacular, especially when it still only took them to 17% - far lower than the Lib Dems polled prior to 2010. Of course that rise yielded a lot of seats, and especially so because the party that had replaced them as the protest vote vessel since 2010 - their UKIP nemesis - fielded so many fewer candidates this time. But it was not a spectacular showing in and of itself, and if the principal party of Brexit can only muster 17%, that again raises questions about the motivation of Remain voters. But I just don't see the evidence that what Lib Dem surge there was was an anti-Brexit wave.

Almost as big a beneficiary of the Conservative and Labour decline were the "others" specifically Greens and independents. Vote shares for others are far more heavily influenced by the number of candidates they field than by the propensity of electors to vote for them: less than a third of seats were contested by Greens; in just over 20% was there an independent candidate to stand.

Of course it does not follow that if Greens had contested 100% of seats their vote share would've been 200% greater - small parties tend to focus their candidates on areas they are likely to do best in (though that was less true of UKIP). But given they polled 9% contesting just 30% of seats, it is reasonable to assume that they'd have polled a similar, if not larger share of the vote had they fielded the same number of candidates as the Liberal Democrats, who polled 17% contesting 53% of the seats.

The Green Party is currently occupying that sweet spot of being a radical left-of-centre party but with as strong an appeal in affluent middle class and rural areas as well as urban inner-city wards. The fact that, Brexit aside, the political issue attracting most mention in the media is the so-called climate emergency is clearly propelling them from a party that wins the odd seat here and there towards a position as a national party. How much support the party's affluent, conservationist, not especially radical constituency would give were the Greens ever to have the chance to implement its aggressively radical climate change agenda is moot.

There are now significant Green Party groups in Solihull, Mid Suffolk, Cannock Chase, Lewes, Forest of Dean, Lancaster, Worcester, Reigate and Banstead, and Mendip as well, of course, as Brighton and Hove and Bristol, which wasn't up for election this year. There are Green councillors now serving on 99 councils.

Interestingly the Greens have had the same problem that UKIP had: they were very much a southern party, albeit in different parts of the south to those where UKIP thrived. Yet this year they

won a few more footholds in northern councils. Their most northerly councillor represents Beacon and Bents ward in South Tyneside, and they have councillors in Sunderland, Darlington, Carlisle and South Lakeland. There is now a band of Green Party seats across Merseyside, running from Tranmere on the Wirral, through central Liverpool, Whiston, St Helens and Haydock.

We also saw more of the "Remain Alliance" local agreements between the Lib Dems and Greens, where each party was given a clear-run in certain seats. This first emerged in the 2018 elections in Richmond Upon Thames, although in a slightly different format: there Lib Dems only fielded two candidates in three-member wards, urging their supporters to vote for the sole Green for the third spot.

Nationally, all lumped together the "others" vote share actually fell slightly in 2019 - but that disguised a big decline for UKIP, and gains for Greens, Independents and others, which essentially balanced out.

The story of the others needs much more attention than it gets, even in this narrative here. Up until 2012 the total vote share for the combined others never surpassed 10% of the vote. When the Lib Dems collapsed after 2012, the others leapt to 32% in 2013, 28% in 2014, 25% in 2015 and 21% in 2016. The majority of this vote in those years went to UKIP, which took about 60% of it, give or take. But here's the revelation: UKIP has all but disappeared now - and the others vote share remains in the mid twenties.

This bloc of votes that is not Labour nor Conservative, and which has refused to return to the Lib Dems, seems here to stay. And it is a blocking bloc: it helped knock a whole lot of Conservative councils into no overall control which otherwise would have stayed Conservative. But it probably also prevented the Conservative losses being far worse in that they inhibited Labour and Lib Dems from regaining scores of seats they perhaps used to have a shot at in deep mid term elections.

We continue to see a diversifying electoral battleground in local elections. I've already mentioned the relative success of UKIP splinter groups like Democrats and Veterans in Leave areas. And if you look at some other councils where the Conservatives got absolutely splatted; places like Guildford, Waverley, Tunbridge Wells, Lewes, and Brighton and Hove, it was not principally the Lib Dems who did the damage: it was Greens and other local parties like the Tunbridge Wells Alliance and the Guildford Greenbelt Group (to name just a couple).

A final rapidly developing feature of local elections is the emergence of what might be called regional parties. The Yorkshire Party won seats in the East Riding and in Selby; and polled sporadically well across the county. They were joined by the Black Country Party (BCP) that stood mostly in councils like Dudley in the West Midlands conurbation; and the slightly older North East Party that is mostly focussed on Tyne and Wear. Regional parties are not new but until now they have tended to be focussed on the south west: Mebyon Kernow in Cornwall and the possibly now defunct Wessex Regionalists. There is no reason

why parties utilising strong regional identities cannot do well, especially with confidence in the big parties all tarnished.

In some ways this is just an extension of the sort of localised branding organised independent groups, residents associations and amenity societies employ around the country. In Elmbridge a wide range of organised residents associations stand under different banners - all co-operating to keep the Conservatives out of power there.

If you look at the descriptions of the ruling Residents Associations in next door Epsom and Ewell they stand under each ward's banner (as they do in Havering). Lincolnshire Independents are a long-standing party separate from "regular" independents that compete with them across the county. Ashfield Independents stormed to power in that council - next door there is the Mansfield Independent Forum. In Kirklees the organised independent group rebranded itself as the "Heavy Wool District Independents" and gained a seat in Dewsbury. Our West Lancashire (OWL) is a small force in that district, as used to be the Idle Toad Party in next door South Ribble.

In other words, the only difference between these organised independent groupings and the emerging regional parties is the scale of ambition: one type focuses on the local; the other is trying to build a wider political identity.

Conclusions

The Conservatives were always going to suffer substantial losses in the 2019 council elections for no other reason than that they were relatively popular the last time these seats were fought in 2015, and were relatively not so this year.

The fact that their losses exceeded their worst expectations - putting May up there (or down there) with John Major in terms of local election disasters, was far more to do with the much vaunted hopelessness of the May election machine than by some sudden tsunami that hit the party.

That there were several thousand fewer candidates contesting these elections possibly made the result worse for the Conservatives, because a wider range of choices may have diffused the protest vote and limited losses somewhat. Yet in many seats, especially those away from urban areas, millions of voters had the choice of a Conservative candidate and a non-Conservative, and whatever the political position of that non-Conservative plenty chose him or her.

The Conservatives and Labour both suffered from their Brexit positioning: May claiming her withdrawal agreement represented Brexit when the bulk of Leavers her party was now aligned with disagreed; Labour by pretending to be a party of leave whilst self-evidently being a party trying to thwart leaving. The Lib Dems gained because of theirs, but also set a relatively low ceiling on how much they could gain given the much more pro-Brexit set of elections and the relatively few Remain councils up for election in this part of the cycle.

How bad were the results for the Conservatives, really? Yes, they lost two thousand seats and scores of councils. But look at the election in terms of vote share and the Conservatives won by almost six points after nine years in government. That is remarkable. Look at the regional maps, still mostly coloured blue. And even in those councils where there was, but is no longer, a Conservative majority, plenty are still administered by Tories.

Most prime ministers would do pretty much anything for a result like that nine years into their term of office. The principal party of opposition lost votes and seats as well. In any normal political environment that too would be a news story of some consequence.

The Lib Dems revived after years of traumatic local government losses - but their vote share was still ten points or so lower than what they would have expected to win prior to them entering David Cameron's coalition government - because they are still not winning back that 20-25% of votes that now go to minor parties, independents and residents associations.

Labour's vote is hollowing out quite rapidly in core areas. In some places - former mining and industrial areas outside the large metropolitan areas - this produced spectacular swings from Labour to the Conservatives. The process of change was muted by deserting Labour voters not switching direct to the Conservatives but, in the main, looking to independents and smaller parties: not Greens and not Lib Dems.

The huge vote haul for minor parties is the secret story of these elections because, since this growth of others began in 2012 it has essentially been about UKIP. But in 2019 it was not: UKIP largely retreated yet still well over one in five votes cast went to other parties. This voting bloc is here to stay, and I suspect it will be quite hard for any of the main parties to reduce it significantly. That will have consequences because it will make elections even in supposedly safe places more volatile.

I wrote in last year's results that elections during these Brexit stasis years are like a high tide just as it's beginning to ebb: you get different currents battling away against each other, some at the surface, some deep underwater. These currents are almost battling themselves to a standstill: not allowing a sudden burst towards one destination or another, thrashing and churning and producing nothing much of anything.

The 2019 elections were a chapter of this churning nothingness. They tell us spectacularly little about anything other than the most obvious: who now represents where and which parties run which councils. And perhaps that's how it's supposed to be: council elections being nothing more and nothing less than which councillors are elected, or not.

Conservatives lose to no overall control

numbers don't reflect that outcome as defectors stood down and their seats were retained by the party that won them in 2015
