London passes peak Labour

Following the 1990 council elections, Conservative Party Chairman Kenneth Baker was able to spin what were pretty awful results for his party into an apparent triumph because of a perverse set of results in west London. Across the adjoining boroughs of Westminster, Wandsworth, Hammersmith and Fulham, Brent and Ealing the Conservatives gained 74 seats and Labour lost 72 - a huge number across just five councils.

In 2022 something similar occurred in reverse. The overnight counts produced Labour gains in Wandsworth and - for the first time ever - Westminster and Barnet, so the headlines on Friday morning suggested a massive success for Labour. In these boroughs alone Labour gained 37 seats. But, as in 1990, this was far from the whole truth - not only nationally but in London too.

By the time the last ward - Havering's Rainham and Wennington - had been declared after four recounts late on Monday 9 May, Labour had also lost three boroughs. Croydon (where they failed to win the borough's first-ever directly-elected mayor race as well as surrendering their majority on the council), Tower Hamlets to a resurgent Lutfur Rahman and his Aspire party, and Harrow. The three council's Labour gained account for all of Labour's advance in London: Labour ended down two seats net in the capital beyond Barnet, Wandsworth and Westminster.

So, contrary to the election night narrative, there was no Labour advance in London (in terms of votes, as well as in councils controlled). Their share of the vote fell and they lost almost 100,000 votes compared to 2018. 100,000 lost votes is not a rounding error and, while turnout fell (unevenly) these lost Labour voters cannot be written off as apathetic abstentions either.

Labour	**2022**	**973,682**	**42.4**	**- 1.4**
	2018	1,072,698	43.8

	2018	137,927	5.6	

London-wide results by party for 2022 and 2018 for comparison

Rather, they gained relative to the Conservatives because the Tories lost 112,000 votes. Where these votes went is interesting because, while the ones Labour shed were overwhelmingly in the party's very safe wards, the Conservatives' shed them in their most vulnerable seats.

The Conservatives now have the fewest councillors in London ever; nearly 200 less than their last worst result in 1971 and 106 than they won in 2018. Labour isn't quite at the highest ever total having only added 35 councillors to their 2018 tally and about 120 fewer than they won in 1971. Labour has won more than a thousand councillors in eight sets of London borough elections since 1964 while the Conservatives have only done so in their 1968 landslide. The Lib Dems added 22 seats - almost all of them in Kingston and Richmond, but remain at a significantly lower level than at any point since the founding of the SDP Liberal Alliance in 1982. Other parties added 32 seats net.

	Con	Lab	LD	Others
2022	405	1,158	176	77
2018	511	1,123	154	45
2014	582	1,089	119	63
2010	717	874	245	23
2006	785	685	317	74
2002	653	866	309	33
1998	538	1,050	301	28
1994	519	1,044	323	31
1990	731	925	229	29
1986	685	957	249	23
1982	980	781	124	29
1978	960	882	30	36
1974	713	1,090	27	37
1971	597	1,221	9	36
1968	1,438	350	10	65
1964	668	1,112	13	66

Councillor totals in London boroughs, 1964-2022

The three headlines for the 2022 elections are:

- Boris further breaks the Conservatives following Brexit
- Labour loses votes in safe, especially ethnically diverse wards
- The Greens fail to break through

The year up to the 2022 elections

We'll look at each of those in detail further on but firstly let's discuss how the parties got here, specifically over the twelve months preceding the local elections. Last May, Conservative prospects looked far more promising.

As well as the council elections taking place in May 2021 in England beyond the capital, London went to the polls to choose its directly elected mayor and members of the Greater London Assembly - a body to hold the mayor to account but with very little actual power.

The 2021 local elections were a triumph for Boris Johnson. There were two sets of elections occurring because the 2020 round, which would have been what's left of the county councils and most of the whole county unitary authorities like Durham, Wiltshire and Shropshire, were postponed due to the pandemic. The counties tend to be the Conservatives' very best councils. Both David Cameron in 2013 and Theresa May in 2017 had won landslide victories - indeed, the 2017 county elections indicated that the poll lead May managed to blow in that year's general election really did exist before she got her hands on it - it was not a chimera of false opinion poll leads. The other set of elections - the ones that were meant to happen in 2021 - were for most of the metropolitan districts: the big cities

beyond London and assorted unitary councils and non-metropolitan districts, most of which elect by thirds and undertake elections three years in four.

The London elections had also been held over from 2020, giving mayor Sadiq Khan a five-year first term. Because of the city's ever-expanding Labour lean, because Sadiq hadn't done much to alienate the sort of people who vote for him during his first term, and because the Conservatives had picked the low-wattage Shaun Bailey who duly ran a low-wattage campaign, it was assumed that there would be a Labour coronation.

I won't spend too long recycling last year's council elections because they aren't relevant to London and I've written about them at length in their own results and in the introduction to volume two of this year's results. But to summarise, they were the best Conservative results for years. The Conservatives fairly substantially improved on their 2017 results, removing the Labour majority in Durham for the first time, winning Northumberland and Nottinghamshire and widening their majorities in Derbyshire, Lancashire and Staffordshire.

These "Red Wall" counties continued to give their favours to the Conservatives, with little sign of a compensating decline in the so-called "Blue Wall": usually more reliably Tory counties in the south that voted Remain in the 2016 EU referendum, are more affluent and contain more university-educated professionals. Two exceptions were Cambridgeshire and Oxfordshire.

The set of councils that should have voted in 2020 produced an even better Conservative performance, in part because Labour was more exposed in these councils. Results from smaller cities like Plymouth, Southampton and Worcester, and large towns like Milton Keynes, Colchester, Ipswich and Nuneaton were stunning. The Conservatives also won substantial victories in Dudley and Walsall, and continued their slower improvement in Bolton and the Wirral.

The 2021 London Elections

And even in London, the Conservatives did significantly better than expected. Sadiq Khan won re-election of course - this was never in doubt. But it was not the expected landslide, Sadiq polling 1,013,721 (40.0%) to Shaun Bailey's 893,051 (35.3%). In the second round where all but the top two finishers are eliminated and preferences (where cast) of the excluded candidates redistributed, Khan won 55.2% to 44.8%. There were a total of twenty candidates for mayor.

London's Labour lean should be very much greater than 4.7%, and somewhat greater than the 10.4% second round Khan win. But this was not just about him because Labour didn't perform impressively in the London Assembly elections either. There were 46 wards which voted Labour in the assembly ballot but chose Shaun Bailey for mayor. There were just twelve wards that voted Conservative for assembly but Sadiq Khan for mayor. Twenty seven wards, all in Kingston and Richmond, voted Liberal Democrat for assembly member but none of these voted for the Lib Dem mayoral candidate Luisa Porritt. Instead, fourteen voted for Sadiq Khan and thirteen for Shaun Bailey.

No constituencies changed hands: Labour held nine and the Conservatives five. But the Conservatives picked up a seat on the regional list from Labour - Labour won none of these top-up seats. This left just nine Labour Assembly members (all from the constituencies) against sixteen non-Labour members: nine Tories, three Greens and two Liberal Democrats. This non-Labour majority subsequently got together and removed Labour from chairing all the Assembly's committees, a move that stunned the party - seemingly believing that Greens and Lib Dems would never side with the Conservatives against them despite Labour offering to share none of the chairmanships themselves.

The 2021 London results were surprising as eight opinion polls specifically measuring the London mayoral race from August 2020 to March 2021 had all given Sadiq Khan significant leads of up to 25% over the Conservatives. The six polls conducted in April and early May produced, on average, narrower Labour leads: in date order 22%, 21%, 13%, 19%, 12% and 12%.

The polls overstated Labour's share compared to the actual result by between one and eleven points, and understated the Conservatives by between four and nine points. London polling was substantially wrong for the 2018 council elections, it was wrong for the 2021 mayoral elections and it was substantially wrong for the 2022 council elections. We'll look more at this later.

Some ascribed the far closer than expected result in London to the low profile of the campaign - with Labour voters so certain of a Sadiq Khan win that they didn't turn out. But turnout was a fairly decent 41% and no explanation was offered as to why Conservatives didn't also regard Sadiq as a certainty for re-election yet did turn out. It also does not explain why he was the only one of the strategic mayors up for re-election this year who didn't improve his position after their first term.

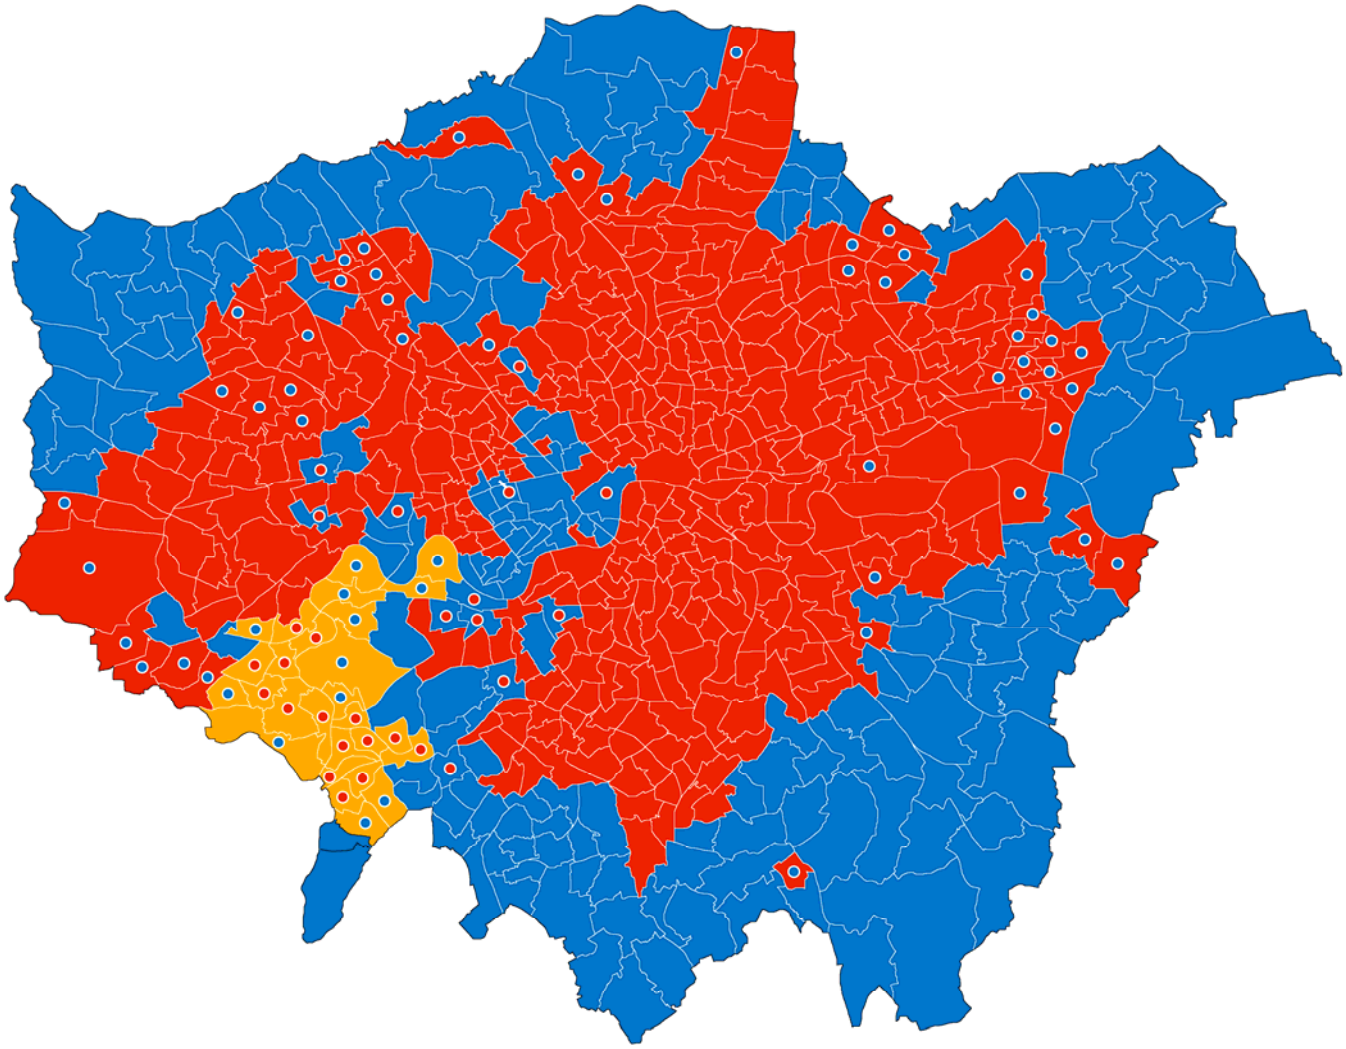
That question aside, it is just as likely that London was as susceptible as the rest of the country to the pro-Conservative headwinds of 2021, These were, among some, ascribed to a so-called "vaccine bounce" - essentially voters being impressed by the efficient roll-out of Covid vaccinations and being somewhat demob happy as lockdown restrictions started being lifted. This was no doubt part of the Conservative uptick in the polls but it also absolves Labour of any blame for their "downtick". The party simply had no impact.

There was little indication in most boroughs of the Conservative meltdown that would follow a year later. In hindsight, Labour's strong showing in Wandsworth in both the GLA and mayoral votes was a sign - but Wandsworth is Sadiq Khan's home borough and he had a strong showing in his 2016 win that was not followed through in 2018.

Likewise, his dreadful performance in Harrow; somewhat worse than for the assembly seat, might have pointed towards a Conservative gain; but it may also have been a Muslim mayor polling slightly behind his party in a borough with a large Hindu population. He also did far worse than Labour in Barking and Dagenham but with no consequence for the local elections.

And, while Labour didn't do hugely well in New Addington in Croydon, the party held all its other wards and activists there were broadly content with the assembly results which didn't portend their council losses in 2022.

Some of these Mayoral and GLA results signalled something, others did not - and it's not psephology but crystal ball gazing is the only way to sift which were which.



Map of London's 2021 Greater London Assembly elections for the constituency seat. Dots denote wards that voted differently for Mayor. A red dot on a blue-coloured ward means the ward voted Conservative for the assembly seat and Labour for mayor, and vice versa. Data from London Elects

As well as the Mayor and Assembly elections on 6th May 2021 there were forty-six by-elections in London council wards - the large number the result of elections being postponed during lockdown. These included Chessington South in Kingston where nineteen candidates, thirteen of them from the Monster Raving Loony Party, stood. The Lib Dems held the seat (former Labour MP for Thurrock Andrew Mackinlay the new Lib Dem councillor) with 1,387 votes. All the Loony candidates combined managed 97.

The vast majority of these by-elections - a mini local election in itself - resulted in no change but the Conservatives gained two - both in marginal boroughs (East Barnet in Barnet and Chase in Enfield) and the Liberal Democrats gained a formerly Green Party seat in Richmond in an absolute rout. There were swings to the Conservatives in thirty six of the by-elections and swings to Labour in ten.

The Conservative lead in the polls - varying from about six points to thirteen depending mostly on the methodology of the pollsters, lasted throughout the summer of 2021, enduring the Chesham and Amersham by-election - gained by the Lib Dems, and the Batley and Spen by-election - narrowly held by Labour.

I go through in more detail the political events that shaped the fortunes of the parties in the year up to the 2022 council elections in the narrative to volume two of these election results.

Owen Paterson and Partygate

It was not until mid November that Labour started taking the lead regularly in opinion polls. This was the beginning of the string of Boris Johnson missteps that brought his party low in May 2022: the Owen Paterson saga and the attempt by Johnson to save the former cabinet minister and then abandon him. Paterson resigned from the Commons and the by-election for his North Shropshire constituency took place just before Christmas 2021, by which time far more problematic misconduct in 10 Downing Streets was being exposed on a near daily basis.

The scandal of lockdown-breaking parties began with TV footage of Downing Street spokesman Allegra Stratton joking in a press conference rehearsal about an illicit party. She resigned in tears but her oh-so-humorous joke at the expense of the law-abiding public set the dogs running. Soon Christmas parties and leaving parties, and Christmas quizzes and garden socials were dominating the headlines most days. Internal inquiries and then police investigations followed. The question of whether the Prime Minister had deliberately misled the House of Commons became a career-ending threat.

The Conservative Party could not get on the front foot of these crises because their leader would not let them. By obfuscating, claiming everything damaging was now out in the open when it wasn't and by attempting to bluff and play down activities that outraged the public who had obeyed the rules and sacrificed, he made bad but probable survivable behaviour far worse. It became a

question of not just honesty and integrity - and his lack of those qualities, but about whether the entitled, public school, Bullingdon Club, Oxbridge elite he epitomises thinks it can behave however it likes while locking down what it seemed to regard as the "little people" beneath them.

This Prime Minister, who throughout his political career has got away with misconduct that has brought others down, believed he could do so again. It would prove his penultimate miscalculation - the final one being his belief that he could ride out the mass resignation of his government...but that takes our timeline beyond this year's local elections.

The Conservatives did not experience an opinion poll lead after 6th December 2021 - that remains true to date at the end of August 2022. Labour's lead steadily widened, with economic issues: principally rising inflation and the cost of household energy being as damaging to the Conservatives to the Partygate scandal.

Conservative candidates in some boroughs attempted to put a modicum of distance between themselves and the Boris brand by describing themselves on ballot papers as "local" Conservatives and avoiding any mention of the Prime Minister on their leaflets. This couldn't even be described as a fig leaf: the public, and especially what was left of their support base in London was talking about it and they were, by and large, furious.

The opinion polls

This completely altered reality for the Conservatives compared to just seven months earlier was reinforced by polling by YouGov for Queen Mary's, University of London. This polling has become a fixture in London election campaigns, widely picked up by media.

But there are problems with polling local elections compared to national elections and even mayoral elections. The first is a very much lower turnout in local elections. 49% of voters in the final poll of the 2022 campaign stated that they were 10 out of 10 certain to vote. One reason why polls like these skew is that more of those who claim they'll vote and then don't will say they're voting Labour.

A second problem is that vastly more of those who will vote in local elections are willing to consider supporting minor parties, independents and residents' association candidates - but when asked who they're going to support may well revert to their national political preference.

And a third issue is that the parties people are able to vote for often differs, certainly between boroughs - but also between wards. The Lib Dems contested just 71% of seats this year; the Greens stood for just 47% of seats. Residents Association candidates attract substantial amounts of votes in Havering, and in Merton Park ward in Merton, but barely anywhere else. Independents stood in just 5% of seats - much lower than elsewhere in England, Wales or Scotland.

The final poll of the campaign produced a prediction of Labour 50%, Conservative 23%, Lib Dems 12% and Greens 9%. Broken into inner and outer London, the poll suggested Labour had a lead of fifty points in inner (63% Labour, 13% Conservative, 11% Green and 9% Lib Dem) and of thirteen in outer (42% Labour, 29% Conservative, 13% Green and 9% Lib Dem).

As shown in the table at the start of this introduction, Labour won 42%, so the poll overstated Labour by eight points. The shares for all the others were within the margin of error: this is simply a fault in measuring the Labour share. But it's a significant error and it's occurred in three successive elections now.

Labour won inner London by less than thirty points, not by fifty; and by less than ten in outer London - within the margin of error.

		Inner %	Outer %
Labour	**2022**	**48.2**	**39.3**
	2018	48.6	41.2
Conservatives	**2022**	**18.8**	**29.6**
	2018	21.4	32.8

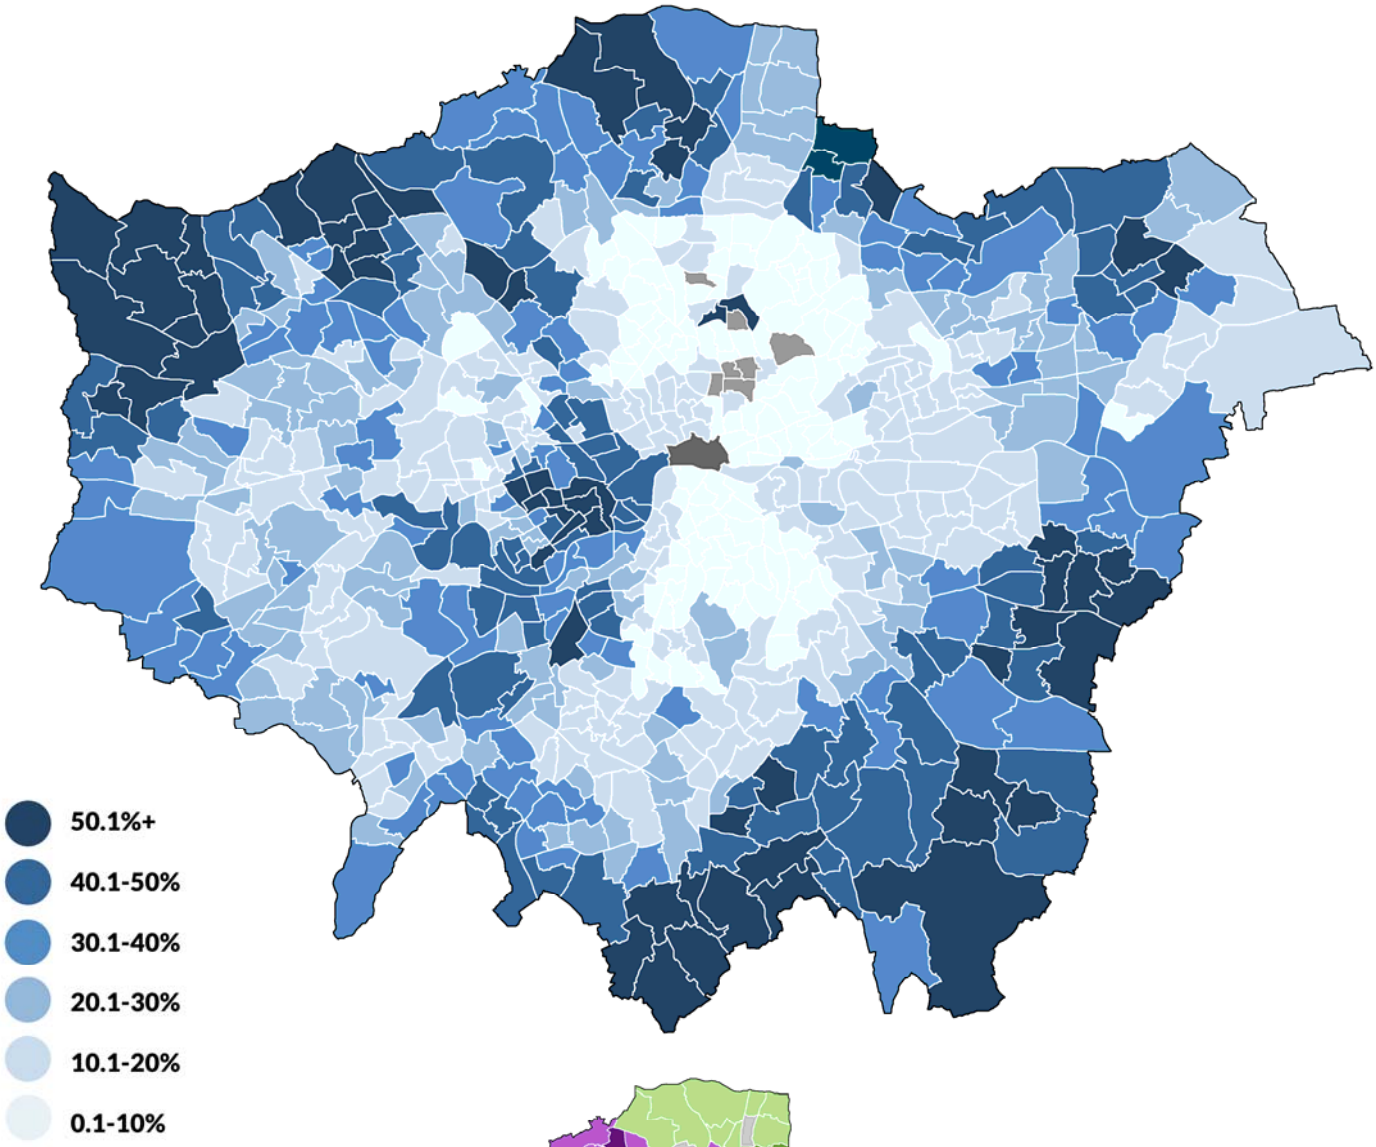
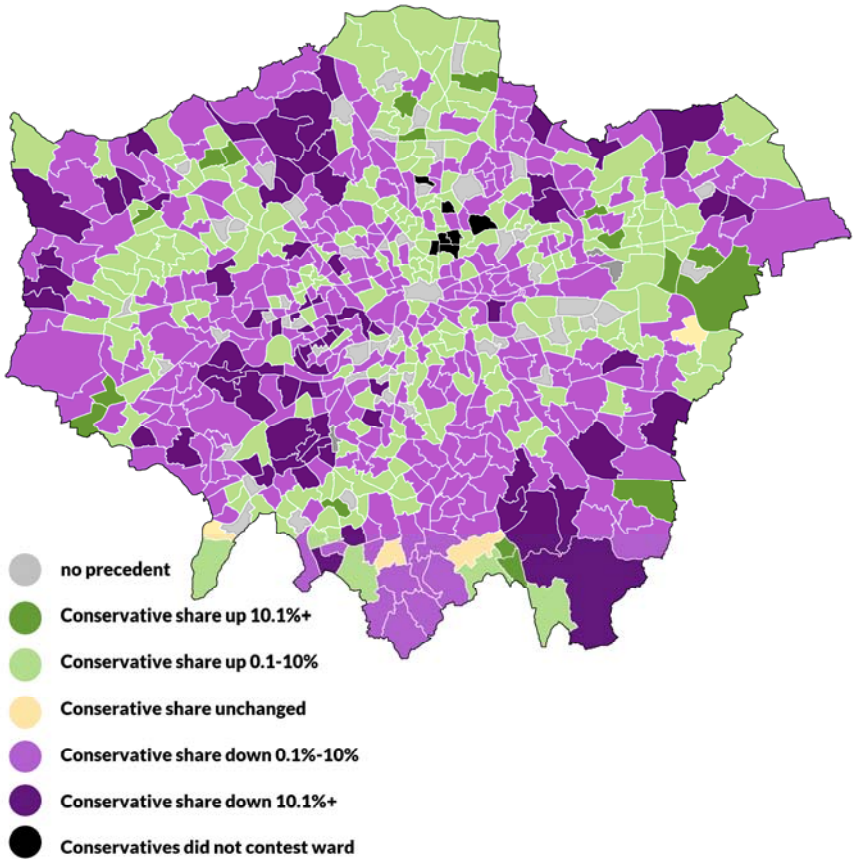
Changes in the Conservative vote share in each London Borough in 2022

Conservative support





Organisations undertake polling for many reasons; increasingly to get their brand in the news less than to provide useful data to inform voters' choices. Polls should follow the news, not lead it - especially when they're so often wrong. I should add that these same pollsters got the 2016 mayoral contest correct but one out of four isn't astounding polling accuracy.

The result: Conservatives

But, of course, they got the basic forecast correct: Labour won comfortably and the Conservatives, already reeling from a 2018 spanking over Brexit, surpassed even that dreadful result. And, crucially, they did so because results in "their" wards: that is, safe and marginal Conservative-held wards, were so much worse than elsewhere. On the face of it that's not surprising. There are far more Conservative voters in Conservative-voting wards than in London overall, so in an electoral slump the party will shed a larger number of votes.

But this isn't what happened in 2022. The Conservatives did perfectly well away from their wards ("perfectly well" being a relative concept in a city that has swung from them over decades - but by which I mean they either held their own or gained). Had their performance in boroughs beyond their reach been replicated in boroughs they held, there'd have been no Labour triumphs in Barnet, Wandsworth or Westminster. The tornado that swept the Tories away in these boroughs was almost genetically engineered to locate and destroy Conservative seats specifically. Even within these three newly Labour boroughs you will find wildly varying swings, with Conservatives even gaining in very safely Labour wards whilst losing critical marginals.

Take Wandsworth as an example. Let's allocate every ward to one of three categories: Labour (of whatever margin of safety - none were at threat this year); marginal Conservative and safe Conservative. Then calculate the vote shares in each of these three tranches and repeat the process for 2018. Yes, ward boundaries have changed but because we're looking at clusters, which are as easy to define for 2018 as 2022, and broadly cover the same areas, this is not so important.

Band of wards		Con share	Lab share
Labour	2022	25.6	53.5
	2018	26.8	56.8
	Change	- 1.2	- 3.3
Marginal Conservative	2022	34.0	39.0
	2018	37.8	34.1
	Change	- 3.8	+4.9
Safe Conservative	2022	40.3	38.4
	2018	50.1	25.7
	Change	- 9.8	+12.7

How three types of wards swung in Wandsworth from 2018 to 2022

In Labour-held wards, in a borough Labour gained from the Conservatives, there was a swing to the Conservatives. Not a massive one (1.05%) but one nonetheless. In the marginals, where party activity on both sides was presumably targeted, there was a 4.35% swing to Labour. And in safe Conservative wards there was a massive 11.25% swing to Labour, resulting in three shock gains (in East Putney and West Putney wards) and a near miss in Southfields.

And this is absolutely critical to understand what happened to the Conservatives in 2022 London. If a specific, select band of seats is experiencing a certain electoral outcome that is not occurring across the board, it means that a specific type of voter, substantially represented in these wards but not elsewhere, has been triggered. That type was mainly white, affluent, university educated, Remain voting (but not so passionately that they were in the first tranche of Conservative-leaning Remainers to peel off four years earlier). They may also have been somewhat older than the average for the boroughs they live in, and probably comprised of more females than males.

In Conservative-held safe and marginal wards in generally affluent, Remain-voting boroughs the Tories shed huge amounts of votes to whichever party was best placed to defeat them. In other words the backlash against the Conservatives - on top of already dismal 2018 results for the party - was delivered by erstwhile Conservative voters, not by some greatly increased turnout of non-Conservatives.

Ward	Borough	Con%
Telegraph Hill	Lewisham	2.7
Stroud Green	Haringey	2.9
Shadwell	Tower Hamlets	3.7
Spitalfields and Banglatown	Tower Hamlets	3.7
Harringay	Haringey	3.7
Bethnal Green West	Tower Hamlets	3.7
Bromley South	Tower Hamlets	3.9
Bromley North	Tower Hamlets	4.0
Stepney Green	Tower Hamlets	4.1
Whitechapel	Tower Hamlets	4.1

Ten lowest Conservative vote shares in London in 2022

Ward	Borough	Con%
Kenton East	Harrow	60.3
Canons	Harrow	61.1
Northwood	Hillingdon	61.3
Knightsbridge and Belgravia	Westminster	62.0
Ruislip	Hillingdon	62.3
Selsdon Vale and Forestdale	Croydon	65.5
Golders Green	Barnet	65.8
Brompton and Hans Town	Kensington	66.6
Sanderstead	Croydon	68.5
Royal Hospital	Kensington	69.0

Ten largest Conservative vote shares in London in 2022

Then, in areas that were safely Tory but voted Leave (not a huge number of places in London - but especially in Bexley), the principal reason for lost Conservative votes was abstention. The difference in electoral consequence between this class of wards and the first set is huge: the Tories lost just one seat in Bexley despite a Labour surge of seven percentage points (generated by the party aligning pretty much all non-Conservative voters behind it),

And in safe Labour wards principally of north London: especially ethnically diverse wards - there was a decline (often a big decline) in Labour's vote.

Ethnic diversity and white flight

This phenomenon has largely been overlooked, partly because it's not immediately obvious: these swings occurred in, mainly, very safe Labour wards that are now just safe. They are in a specific set of wards - and to clarify that set further, they were often wards with large populations of Hindus and Sikhs - but not just confined to these wards.

It's almost certainly why the Tories gained Harrow (and to explain why I'm hedging a bit in that statement read the Harrow profile!) - but Harrow was significant only because it was a marginal borough where these swing voters had enough clout to make a difference. But it occurred also in Wembley, in Greenford, Southall, Heston, Feltham, Hanwell, central Hounslow, Hackney, East Ham and Barking, to name a few.

Interestingly, this pattern did not repeat in Labour's safe boroughs south of the Thames: Labour's borough-wide share increased in Greenwich, Lewisham and Lambeth and declined by less than half a percent in Southwark (the Conservatives also fell by 1% in the first three and by 0.9% in Southwark). Why might this be? I suspect it is to do with a somewhat different ethnic mix in south London.

The four safe Labour boroughs south of the Thames have very much larger African and Caribbean communities in far larger proportions and in specific places than in much of North London beyond Tottenham, Edmonton, Harlesden, Stoke Newington and West Ham.

Whereas, north of the river, these communities are blended with Muslim neighbourhoods of mainly Pakistani and Bangladeshi origin and Hindu and Sikh areas, South London isn't quite so mixed. Yes, there are areas that have high Muslim populations: Tooting, Mitcham and Thornton Heath, for example, but these are in boroughs that aren't long-term safe Labour - at least to the same degree as the south-centre. Brixton, Peckham, New Cross, Thamesmead: these are established, well-known black neighbourhoods.

There are at least two reasons for the further Conservative erosion in London. The most obvious is that London has swung firmly from a disdainful if partially amused tolerance of Boris Johnson when he was London's mayor from 2008 to 2016 to angry disdain at his mendacity, chaos, failure to deliver and, of course, championing of Brexit.

The second - and in the longer term this is the far more consequential change - is the continuation of white flight from London.

According to the Office of National Statistics, just 43% of Londoners identified as white British in 2019. down from 45% in the 2011 census. If those figures are borne out even proximately in the 2021 census that represents a dramatic slowing down of the trend: I would be unsurprised if the new census figure was significantly below 40%.

Much of the change between 2001 and 2011 was caused by white British residents being replaced by white Europeans reflecting the huge impact freedom of movement had on London, especially of Eastern Europeans (London already long being a city with large communities from western Europe). But other ethnic groups also continued to grow, albeit in smaller numbers. The greater birth rate of, in particular, ethnicities from the Indian subcontinent also produced growth in population. These trends all gradually tip London towards Labour as the departures are more Conservative and the arrivals are either uninterested in voting or are more Labour.

At the time of writing, the ONS had released its first census data-dump, focussing solely on population, which showed that Kensington and Chelsea (-9.6%), Westminster (-6.9%) and Camden (-4.6%) continued to depopulate while every other borough grew, Tower Hamlets (+22.1%) and Barking and Dagenham (+17.7%) being the most rapidly expanding boroughs.

Boroughs with declining populations, or those simply not growing at the same pace as the capital overall (about 5% growth) are already raising objections as to the accuracy of the census given it took place during lockdown when, they argue, many Londoners had relocated beyond the city, and would have been required to state their current location when completing the census form. Government funding follows population, hence these big drops decline. But isn't a more likely reason for their decline is that these three boroughs are also the most expensive boroughs to buy a home in? Why aren't any other boroughs depopulating?

The result: Labour

As the headline results of election night: gained three, lost three suggest, Labour had a mixed bag of results. Just as the Conservatives were damaged by a specific type of voter in a specific type of ward, Labour were the principal beneficiaries, while the Lib Dems gained in the two atypical South West London boroughs of Richmond and Kingston.

Croydon was Labour's worst result with the party losing over twelve points of support. Newham was not that far behind, but again we see the consequence of such a loss of votes in very different types of council. In Newham, a loss of twelve percentage points cost Labour two seats. In Croydon it turfed Labour out of power.

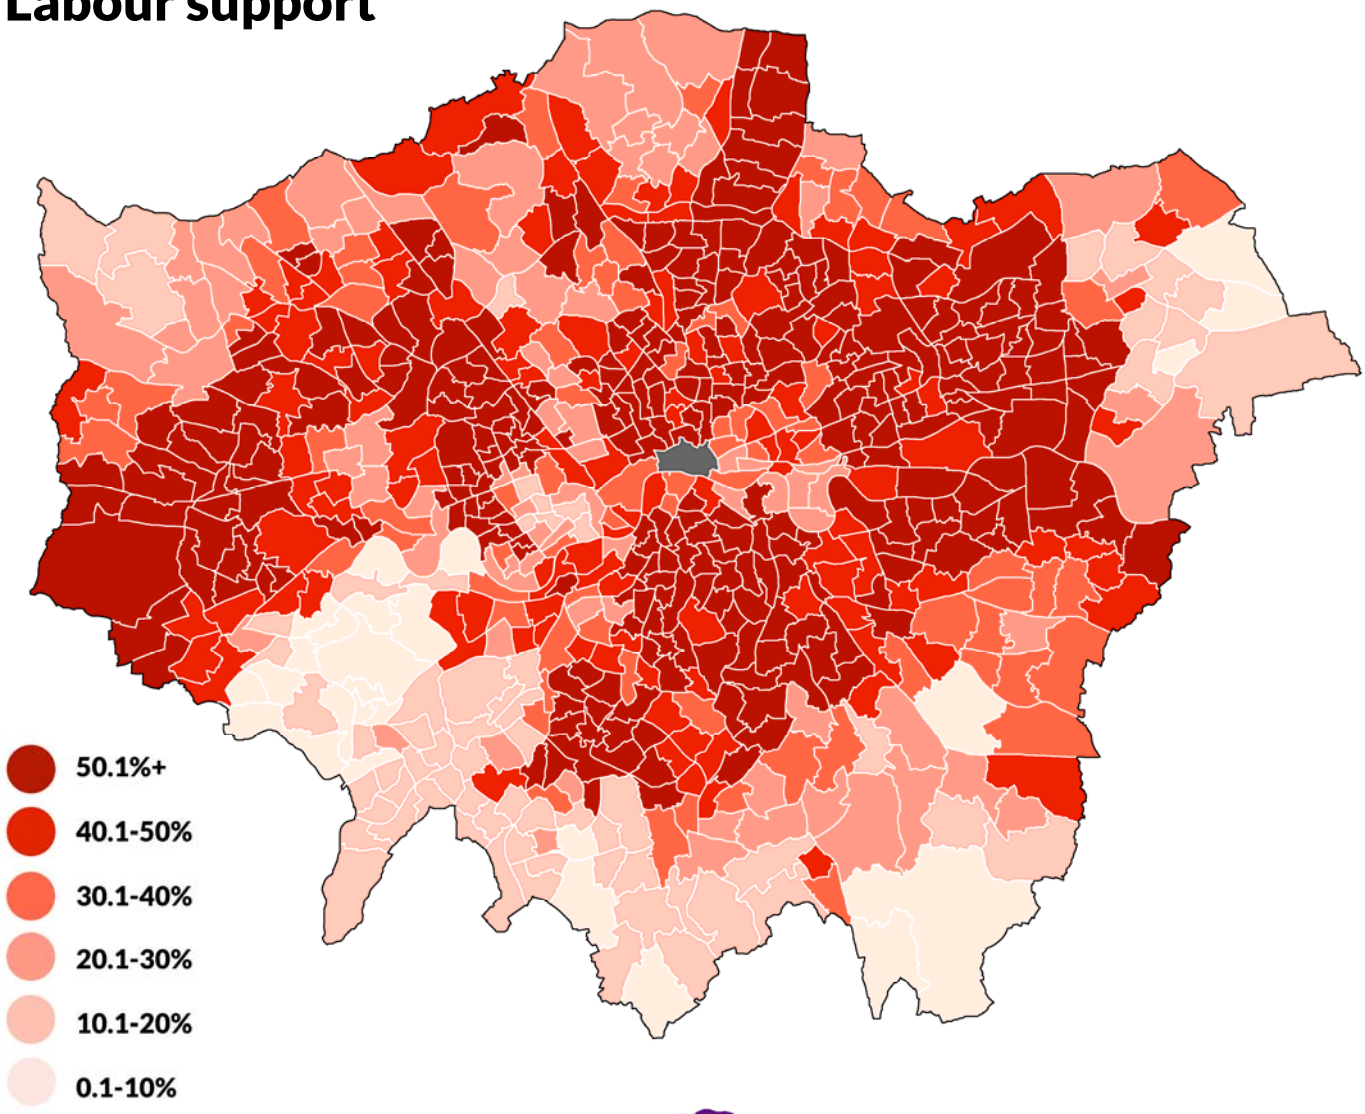
While Labour increased support in 14 boroughs and lost it in 18, among what I classify as long-term safe Labour boroughs they lost support in ten and gained share in four - and in Camden this was almost certainly because the Greens only contested twelve wards, so Labour did not have the sort of progressive challenge to their left that they did in, say, Hackney or Newham.

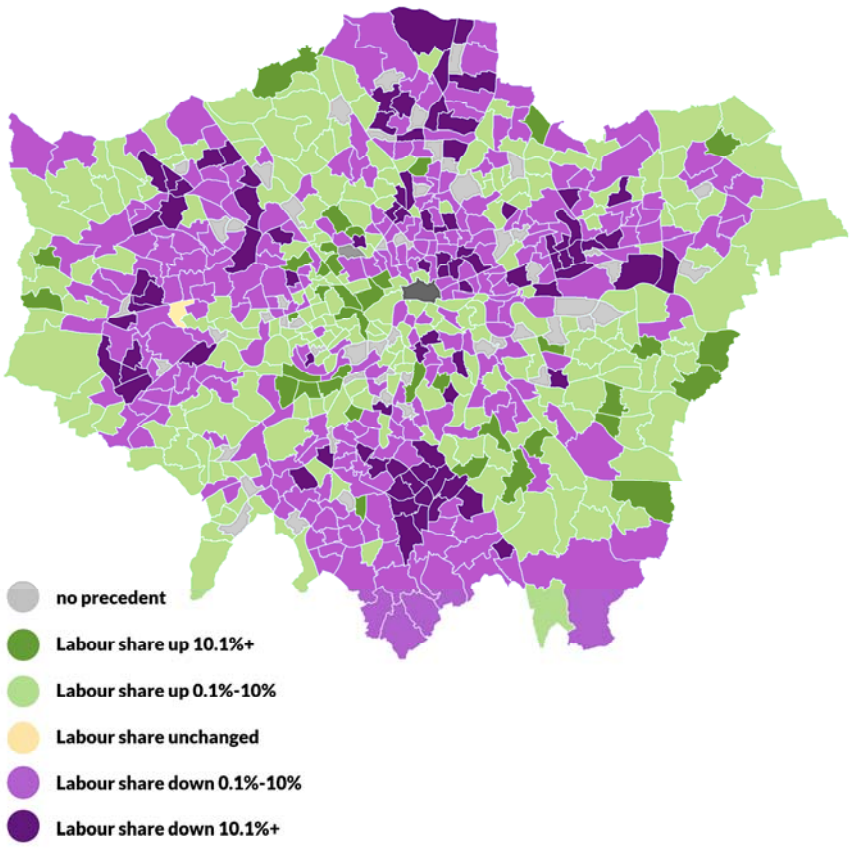
Ward	Borough	Lab%
Queen's Park	Westminster	76.4
Goodmayes	Redbridge	76.5
Ilford Town	Redbridge	76.5
Camden Square	Camden	76.6
Pinkwell	Hillingdon	77.0
West Green	Haringey	78.1
Village	Barking	78.7
Peckham	Southwark	81.0
Loxford	Redbridge	82.2
Clementswood	Redbridge	84.2

Ten largest Labour vote shares in London in 2022

Of the nine boroughs in which Labour's vote dropped markedly - by five points or more - Ealing, Brent, Harrow and Enfield were boroughs

Labour support





in which the Conservatives were principal beneficiaries (though the much depleted Conservative group in Ealing might not see things that way - it was one of those boroughs where they shed votes in their held wards and gained them in safe Labour wards) while in Islington, Hackney and Newham it was the Greens; in Tower Hamlets it was Aspire; and in Croydon it was to pretty much any party that could give Labour a kicking. The Conservatives benefited the most but their vote in Croydon fell as well.

Ward	Borough	Lab%
South Richmond	Richmond	5.1
Old Coulsdon	Croydon	6.0
Barnes	Richmond	6.5
Ham, Petersham & Richmond Riv.	Richmond	6.5
East Sheen	Richmond	7.1

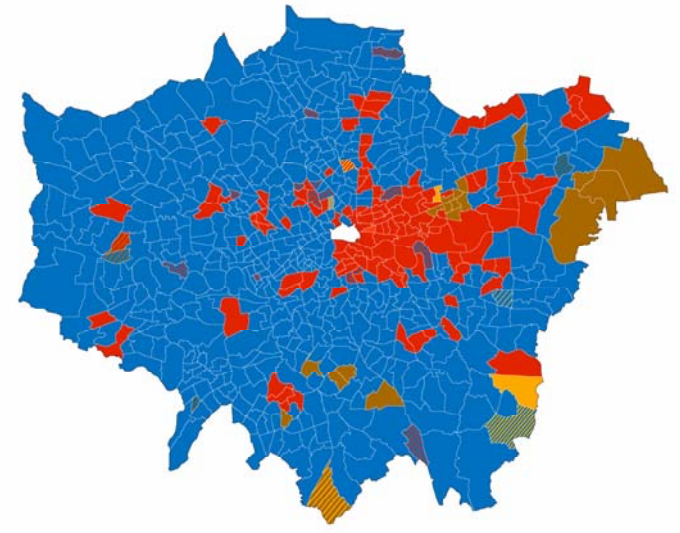
Hampton North	Richmond	7.4
Hampton	Richmond	7.5
South Twickenham	Richmond	7.7

Ten lowest Labour vote shares in London in 2022

London's councillor totals have often outshone Labour's performance in general elections in the capital - though no longer. In the 1986 council elections, Labour won almost 300 more councillors than the Conservatives, yet in the 1987 general election Labour only won twenty three of London's then 84 constituencies.



The 1968 local election result in London

In 2019 the sole reason Boris Johnson did not replicate or exceed Margaret Thatcher's 1987 majority of 101 seats was London: there are literally two dozen London constituencies that were Conservative then and Labour now (or abolished). Putney, Ealing North, Hayes and Harlington, Harrow East and West, Brent North, Enfield North, Enfield Southgate, Hornsey and Wood Green, Hampstead and Highgate/Kilburn, Dulwich, Battersea, Mitcham and Morden, Lewisham East and West, Eltham, Ilford North and Ilford South, Walthamstow, Ealing Acton; the list goes on and on.

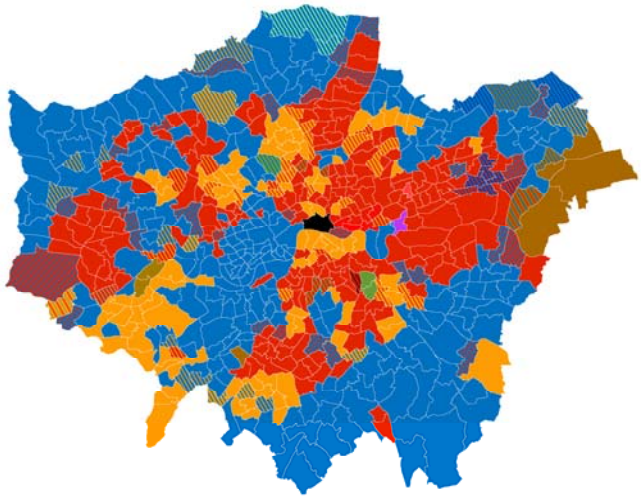
If London had been as Conservative as 1987, the Tories would have not only exceeded that 101 seat majority; they'd have surpassed Mrs Thatcher's 143 from 1983 and been heading towards the sort of majorities Tony Blair won in 1997 and 2001, though not quite attaining that stratospheric command of the Commons.

What has changed is not just that London's demography has altered radically in the 35 years since 1987 but also that London has stopped being a two-party city: when Labour gains it no longer automatically means the Conservatives will do broadly equally badly. This is now at least a four party capital.

It's why, when in 2006 Labour had as bad a result as the party's 1968 meltdown, the results were nowhere near as bad as Harold Wilson's party experienced. Whereas in 1968 people voted Conservative to protest devaluation and general weariness with Labour after four years (they often had little option then: the Liberals contested very few seats and the Green Party hadn't been founded yet), in 2006 protest votes went all over the spectrum.

Enough went to the Tories to give them boroughs like Hammersmith and Fulham, Ealing and even minority control of Hounslow and Merton, but to the Lib Dems in Lewisham, Camden and Southwark. And the fractured non-Labour vote also enabled Labour to hold onto seats it would have lost in a straight fight.

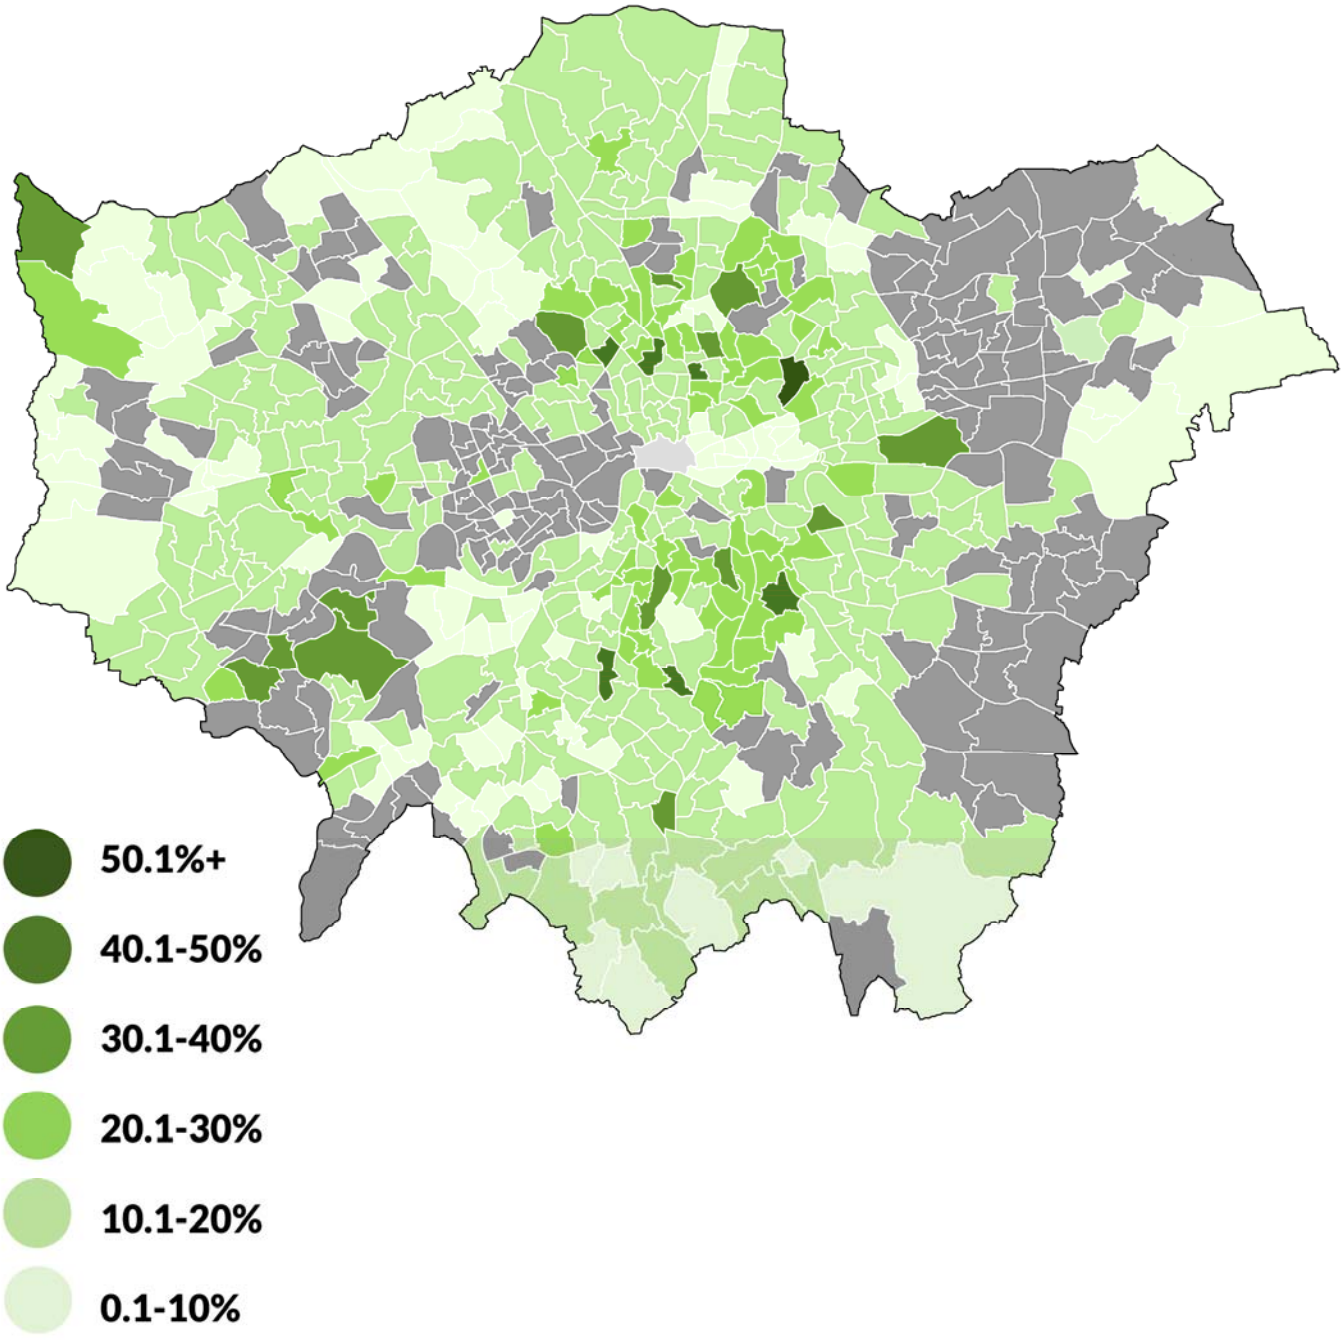
This is a change that seems permanent, though we are experiencing a stasis in the non-Labour vote. The city has moved away from the Conservatives over the long-run, and away from the Liberal Democrats (beyond their outer south west enclave) but it has yet to truly find a new home. The Greens are inching towards being that party but they do not stand a comparison with the Lib Dems at their peak in London towards the end of the Blair years.



The 2006 local election result in London: similarly poor for Labour in terms of vote share but far less damaging in terms of seats held because the non-Labour vote was far more diffuse

Labour did not enthuse Londoners in its best boroughs greatly in 2022 - as all those safe boroughs where their vote fell considerably demonstrate. So why didn't other parties do far better than they actually did? There were thirty two gains by "others" in 2022. Had those gains been entirely, or even mainly, by the Green Party then the third of our headlines in this introduction would have been about a decent Green breakthrough.

Green Party support



Bexley	+7.5

Changes in Labour's vote share in each London Borough in 2022

As it was, Aspire - the Tower Hamlets party of Lutfur Rahman, accounts for two thirds of those gains so we're left talking about how the Green Party failed to breakthrough in London in surely the most optimal electoral environment that party is ever going to enjoy.

The result: Green Party

There is a dichotomy between the sort of wards the Greens have been gaining in the country beyond London, and those of London. In the wider country, most of the party's gains have come in formerly Conservative wards. In London, the Greens' best boroughs are Labour-held (and not just Labour-held but very safe Labour boroughs). With the exception of Streatham St Leonard's in Lambeth, every seat they hold, or have ever held, in London (with the exception of Richmond, where an electoral pact with the Lib Dems has gifted them seats they otherwise would not have won) has been a long-term Labour ward.

That is a real challenge for the Greens, in part because very safe Labour boroughs are exactly that and it is very hard to overcome huge majorities - but also because Labour and Greens are, by and large, competing for the same pool of progressive, left-leaning voters. The Lib Dems, in contrast, have often first mopped-up Conservative wards before then tackling Labour, not just here but in cities like Sheffield, Liverpool and Newcastle.

While Labour is in opposition nationally there is also little animus to drive voters to turn out against them, as there was most recently in 2006 (and, to a much lesser extent, 2010). The principal party of opposition will always be the principal vessel to which voters turn to kick the party of government, especially in a city which leans Labour even during their lowest ebbs.

On the other hand, many of these now safe Labour boroughs have histories when they were far less secure for the party, be they councils that have transitioned from sizeable Conservative oppositions straight over to Labour domination, or gone via the Lib Dems in the interim.

Nowadays, with Conservative support in many of these inner city boroughs almost extinct and the Lib Dems having gone much the same way there should be a homeless vote looking for a non-Labour party to get behind. Why can't the Greens capitalise in the midst of a "climate emergency"? Shouldn't London look more like Little London on the south coast - Brighton and Hove, with its Green administration?

Ward	Borough	Grn%
Beckton	Newham	31.8
Harefield Village	Hillingdon	32.1

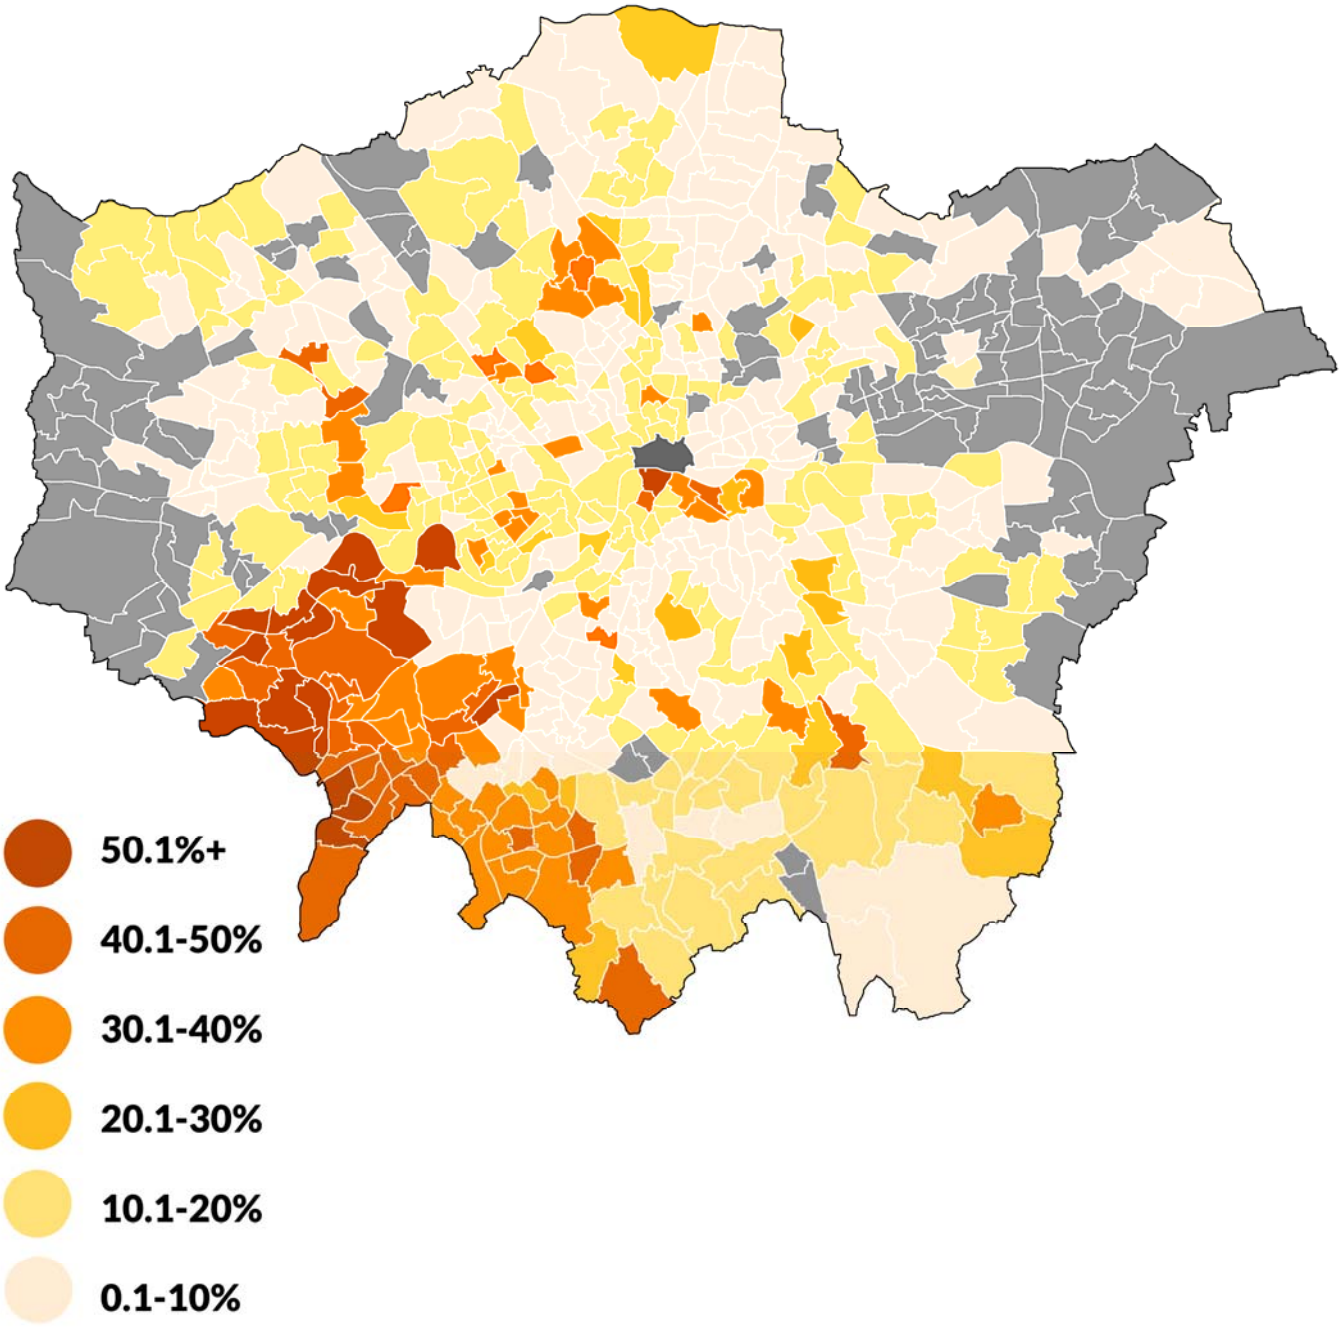
Highbury	Islington	46.1
Dalston	Hackney	49.9
Stratford Olympic Park	Newham	51.6

Twenty largest Green Party vote shares in London in 2022

As well as the generic factors making it harder for the Greens to break through in Labour wards, one of the reasons is that, with a much smaller activist base they struggle to contest wards in all-out councils and run intensive campaigns in a number of target wards. But, with the stark exception of Camden, they managed to contest most seats in most of those inner London boroughs that they should be throwing everything at. People just didn't vote for them in anything like the numbers needed to break through.

Liberal Democrat support



The result: Liberal Democrats

As for the Liberal Democrats, they improved on already very strong results in 2018 in Kingston upon Thames and Richmond upon Thames and pulled off their usual trick of losing enough seats to be ousted, but then gaining enough back to hold on, in Sutton. They also continued to consolidate in the Wimbledon half of Merton to become the official opposition there. They have a niche of four strong boroughs in this corner of London.

Ward	Borough	LD%
Raynes Park	Merton	42.8
Streatham Hill West	Lambeth	42.9
Sudbury	Brent	43.8
Belsize	Camden	44.9
Alperton	Brent	45.0
North Bermondsey	Southwark	45.3
St George's	Southwark	45.3
Southfield	Ealing	47.4
Wimbledon Town & Dundonald	Merton	52.0
Borough and Bankside	Southwark	54.2

Ten largest Liberal Democrat vote shares in London in 2022 excluding wards in Kingston, Richmond and Sutton

But beyond outer south west London the Lib Dems continue to struggle. Of their 176 London councillors just 42 are in boroughs beyond Kingston, Merton, Richmond and Sutton. Nineteen boroughs have no Lib Dem representation - a slight improvement on 2018 when it was twenty two. The Lib Dems as an organised party across London are somewhat stronger than the Greens but they were still unable to contest a quarter of London's seats this year. This weakness was manifested in seven specific boroughs (Barking, Bexley, Havering, Hillingdon, Hounslow, Newham and Redbridge) rather than a uniform problem across the majority of the city.

You can also see it in how much lower the highest Lib Dem vote shares are, compared to either of the main parties. These shares are perfectly respectable in themselves - certainly comparable with the Greens. But they include wards that the Lib Dems gained in 2022 and which I would not categorise as secure, with the possible exception of Borough and Bankside - the old Cathedrals ward - in Southwark. And there is no comparison with the situation the Liberal Democrats enjoyed before making their fateful decision to join the Conservatives in coalition government in 2010.
a 61% turnout.

Although seven years have passed since that coalition experiment came to an end in 2015 it may be that a degree of the damage it did to their brand may be indelible. There is as yet no sign of voters returning to them in any significant numbers. Their 15% share London-wide this year is about five and a half points lower than the amounts they were winning here prior to 2010, but it has also redistributed itself towards that south west London enclave: excluding those four boroughs the Lib Dems polled just 11%.

Is it reasonable and meaningful to exclude them given that, with the exception of Merton, they were the strongest Lib Dem boroughs at any point since the mid 1980s and a disproportionate share of their vote came from this area throughout? The only purpose in so doing is to demonstrate how much more of the heavy lifting this corner of London is now doing in holding up the Lib Dems: nothing more.

Was turnout a factor?

Turnout across the capital diverged substantially, but was generally higher than across those English councils beyond London. Just one London ward had a turnout of under 20%: Slade Green and Northend in Bexley. At the other end of the scale was Dulwich Village ward where turnout almost reached 61%.

Ward	Borough	%TO
Slade Green and Northend	Bexley	19.2
Royal Victoria	Newham	20.1
Mayesbrook	Barking	20.6
Wembley Park	Brent	21.0
Eastbury	Barking	21.1
Valence	Barking	21.3
Royal Albert	Newham	21.4
Parsloes	Barking	21.9
Goresbrook	Barking	22.0
Stonebridge	Brent	22.3

Ten wards with the lowest turnouts in London in 2022

Ward	Borough	%TO
Alexandra Park	Haringey	50.5
Alexandra	Kingston	50.9
Wimbledon Town and Dundonald	Merton	51.2
East Sheen	Richmond	51.3
St Dunstan's	Tower Hamlets	51.3

Northfield	Ealing	53.7
Berrylands	Kingston	54.5
Tudor	Kingston	56.0
Dulwich Village	Southwark	60.7

Ten wards with the highest turnouts in London in 2022

I have singled out Bexley as a borough where turnout was dreadful and where this only very slightly damaged the Conservatives. In somewhere like Barking and Dagenham - another low turnout borough but a Labour-voting one, higher turnout may have benefited the Conservatives. No-one knows if higher turnout in those ethnically diverse wards that swung heavily from Labour among those who went to the polls would have swung even further from the party if more had mobilised or whether, instead, those that stayed at home would have been Labour supporters buttressing those wards. Where parties worked hard, turnout was high - not necessarily higher than 2018 though.

Beyond Bexley there is no mass of evidence that turnout - high or low - amplified the kicking the Conservatives received from voters, but a lower turnout in boroughs like Barnet and Wandsworth may have benefited the Tories marginally.

Towards 2026

With London now so heavily tipped against the Conservatives it will be remarkable if the Tories manage to do worse in 2026.

The Conservatives could gain Westminster, Sutton, Wandsworth and Barnet (in that order) on less than a 3% swing. Labour would regain Croydon, Tower Hamlets and Harrow on a similar swing - and though I say "similar" it of course is not similar, because the swingometer is already high on the Labour side. It's equivalent to being near the peak of an increasingly steep mountain: a 3% swing further towards Labour should be harder to achieve than a 3% "downhill" swing to the Conservatives. Of course, that's not to deny the capacity of the Tories to even further alienate London.

The Conservatives are, at the moment, within easy reach of the three boroughs lost in 2022 plus Havering. But these boroughs could follow the trajectory of Hammersmith and Fulham of swinging much further away from the Conservatives in the elections after that borough was lost, depending on what proportion of their loss was down to demographics and what to simple rage at the direction of the Conservative Party.

The latter is easier to fix than the former, especially if the Tories have lost power in 2026 - in which case they should be able to eat further into their target list. Labour would lose control of Ealing on a 7% swing, and the Tories would gain Enfield, Kingston and, surprisingly Hounslow, on around a 10% swing. Redbridge would fall on an 11% swing.

This brings us full circle to the central premise of this introduction. The 2022 elections raise a key question for each party - potentially huge questions.

For the Conservatives, it is simply whether there is a way back for them in London. To those who scoff that of course there isn't, I refer you back to that 1987 general election result when people were asking the same question of Labour. Are you absolutely sure that the London of 2057 will look like London of 2022? A place that can swing one way can obviously swing the other way.

However, it's not quite that simple: London was much whiter in 1987 and even the white English proportion that remains here is of a very different political outlook. The coalition Labour built from 1992 (the year the big swing in London began) has rested on young white liberal professionals who value living in diverse multi-cultural neighbourhoods plus white working class voters stranded on council estates and ethnically diverse Londoners.

The big question for Labour from these elections is: can it maintain that coalition? There are very real signs, not just from these elections but opinion polling (very difficult to poll this accurately because of small sample sizes) that the overwhelming margins Labour has historically won among ethnically diverse communities is coming to an end.

It isn't just Hindu and (to a lesser extent) Sikh neighbourhoods that are increasingly abandoning Labour; the Conservatives are also making strides in the African (not the Caribbean) community.

So far - as can be seen in Redbridge - Labour is still retaining support among Muslims as they become affluent and move to more suburban neighbourhoods, yet it seems that relative affluence remains a bigger driver of voting intention among ethnically diverse communities than it does among white English communities. In fact the reverse has been happening here as Labour becomes the party of the affluent, university educated and the Conservatives are increasingly supported by working class voters: a trend that predates, but was amped-up by, Brexit. If this trend is confusing, view it through the prism of values: of conservatism versus liberalism, rather than one of class or affluence.

It is because Labour clearly started struggling with these ethnically diverse wards in 2022 (arguably somewhat earlier) that I changed the headline of this introduction from "London reaches peak Labour" to "London passes peak Labour".

Coupled with the poorer showing in the 2021 Mayor and Assembly elections, I think there is at least an arguable case that the Labour tide has come in as far as it can - which is a long way - and is now receding somewhat.

It is more likely than not that Labour will have struggles with the various aspects of its coalition: from young white progressives unhappy that it is not being more radical; from what's left of the white working class feeling that Labour no longer speaks for their values while the Trades Unions make more of the running on workers' pay and conditions; from Hindus that the party panders too much to its much larger, more loyal Muslim base, and from ethnic minorities generally that they are taken for granted by a party which assumes they will always be there for it.

The Conservatives have their own problems with their base, but those problems have been stripped to the bone in 2018 and 2022: they surely have little further to fall. But London is nowadays Labour's foundation stone and it's remarkably resilient. We could stay at the peak for a while longer.

Borough by borough

Barking and Dagenham

For the third election in succession Labour won every seat in Barking and Dagenham. But beneath that exemplary headline Labour shed votes by the bucket-load: in the main to abstentions.

Of the ten wards with the lowest turnouts in London six were here: all with fewer than 23% of voters making the effort to vote. Longbridge was the only ward where residents managed a turnout above 30%.

This apathy may be attributed to Labour's monolithic grip here, both in the minds of voters and in the paucity of opposition. The Conservatives managed to field just 30 candidates for the borough's 51 seats, the Lib Dems a pitiful one and the Greens five. You cannot win if you do not stand and, while these parties probably won't win anyway, at least with candidates it's down to voters' choice.

Some of the decisions the Conservatives made about where to stand candidates were perverse. They fielded two candidates in their best shot of Eastbrook and Rush Green, now a two-councillor ward. But the Conservatives have some history of success in Chadwell Heath and yet they only fielded one candidate here. You might argue the Labour win with 70% shows this was unwinnable but it also suggests the Conservatives only stood a paper candidate. The Conservatives might also have looked at next-door Whalebone, not because they've ever won here but because preceding wards used to elect Residents Association councillors (albeit ages ago) suggesting a potential latent non-Labour vote that could be mobilised with some hard work.

The other reason it's essential for the Conservatives to field full slates in these wards and at least do some work in them is because they are within the Dagenham and Rainham constituency which they have been getting very close to winning from Labour in recent years. Although more of the Conservative vote in this constituency comes from the Rainham (Havering) contribution, being able to demonstrate some electoral muscle and some campaigning props on the Dagenham side might be the difference between them losing narrowly and winning.

In the 2021 London mayoral elections Sadiq Khan lost eleven of this borough's wards to the Conservative Shaun Bailey - all of them on the Dagenham side of the borough (though not all within this constituency). In fact every ward in Dagenham and Rainham voted Conservative for mayor in 2021 though Labour held every Dagenham ward in the assembly constituency election. The unstinting return of these wards to the Labour column this year might therefore appear incongruous. Perhaps it's simply that voters are broadly happy with their Labour council but are peeling away from Labour at other elections over the long-run.

An indication of how much more vulnerable Labour would be if the borough had a more pluralist political culture came in Longbridge ward - the one ward a Lib Dem, as well as a full slate of Conservatives, contested. Here Labour's vote crashed by twenty five points, the Lib Dems talking just shy of eleven and the Tories up by twelve. Labour still won handily in this ward that has some history of electing Conservatives, but it's evidence that there are voters wanting more electoral diversity here. Without being given it what are voters to do other than back the only party organised enough here?

The borough is growing, and evolving, rapidly. Two new wards (and by "new" I don't mean renamed but where population growth is creating new neighbourhoods) have been created: Thames View, which takes some of the huge Barking Riverside development and Abbey in Barking proper. There was an Abbey ward previously but most of what was in that ward - old Barking - is now in Northbury. Both of these new wards began their electoral story replicating the voting histories of their neighbours but may not always do so.

And it's not just a growing borough: it's evolving into a much more multiracial borough. The shock BNP surge of 2006 probably couldn't happen here today even in the exact same circumstances because the population is very much less white. Some might even argue that it was many residents' distress at this pretty rapid change in their neighbourhoods' make-up that drove the BNP vote back then, and which didn't recede that much in 2010 (they were wiped out by the very much higher Labour vote that coincided with that year's general election).

That may or may not be true but what it also might show - is that there is a large enough non-Labour vote willing to vote for any party that puts itself forward against them regardless of its ideology. The more controversy Labour's opponent generates, the more attention it attracts and the more votes it garnered.

Barking and Dagenham continues to change - and grow - rapidly: when the Office of National Statistics released the 2021 census figures they revealed a 17.7% growth since 2011, or by about 33,000 people. Most of that growth was factored in to the borough's boundary review in 2020, but not quite all. While much of the growth was specific to the massive development along the three riversides (Thames, Beam and Roding) and so may subside a little now much has been built, but growth in London comes not just from new builds: it also comes - especially in East London - from larger household density: a cultural feature of more ethnically diverse wards as well as from the less affluent cohabiting within dwellings. If this growth continues then Barking and Dagenham may well become one of the first London boroughs to have its boundaries reviewed again.

Barnet

For the first time ever, Barnet has a majority Labour council - and they have a robust nineteen seat margin over the Conservatives.

Labour benefited from favourable boundary changes but also a 7% borough-wide swing, gaining seats along the eastern and western borough boundaries: nine on the Chipping Barnet side and six along

the Edgware Road, plus two new wards: Cricklewood and an extra ward in Colindale. Both are Labour strongholds.

The Conservatives have done very well over the last three council and parliamentary cycles distributing a diminishing vote highly efficiently. None of the three parliamentary constituencies in Barnet is safe for the Conservatives - and all three produced Labour leads in these local elections (Chipping Barnet one of more than ten percentage points). In recent years Barnet Labour has piled up votes in massively safe wards while generally underwhelming in the marginals. These boundary changes didn't really unpack much of that vote (other than in Cricklewood) but their vote surge also won them the marginals too this time.

Although the Barnet results might follow a pattern seen in numerous other London boroughs: safe Conservative councils toppling and then becoming safe Labour boroughs - notably Enfield and Redbridge (and - almost - Harrow), Barnet may not be in that category. While parts of the borough - principally the eastern side - have changed demographically in Labour's favour (and quite rapidly too) these may remain competitive for a while yet - unlike scores of wards in say Redbridge have become.

Barnet is not going to be another Redbridge (and I use Redbridge in relation to Barnet because until 2014 they were pretty similar suburban councils, voting similarly, either side of Enfield) for two reasons. First, while Barnet has seen an influx of demographic and religious groups (Muslim voters) in particular neighbourhoods - Friern Barnet and East Finchley for example - this has not been on the scale, or at the speed of Redbridge.

Nor, probably, will it because the migratory trends altering Redbridge are spreading north and east from the very sizeable populations in Newham, Tower Hamlets and Leyton. There is no comparably sizeable Muslim community in the west of London. Secondly, Barnet has a huge, affluent Jewish community that isn't being displaced and that community decides the political outcome in several wards through the centre of the borough: Garden Suburb, Finchley Church End, Golders Green, Hendon, Mill Hill and Totteridge in particular.

There were hefty swings in these safer Tory wards too but their margin from 2018 was so vast that Labour remains quite distant still.

2022 in Barnet looks less yet another London demographic time bomb detonating in the Tories' faces than it does the twin problems of a deeply unpopular, disliked Conservative prime minister reaping a mid term whirlwind and Labour's vote being artificially suppressed here in 2018 - the midst of Jeremy Corbyn's antisemitism problem - making their surge this time look more impressive than it would otherwise have done. The Conservative council has also attempted to be the new Wandsworth, privatising services and outsourcing call centres, but with far less popular results.

For all that Labour won a broad majority right across the borough their lead in seats is founded on some very small majorities in the wards they gained: the Tories need just a 4.1% swing back in 2026 to recapture the borough. They need ten extra seats for a majority with twelve Labour councillors sitting on leads of less than ten points. Recapturing seats in Brunswick Park, East Barnet and Childs Hill would get them nearly there, plus there are the new wards of Barnet Vale and Whetstone - the successors to Oakleigh, the former which split and the latter which was perhaps Labour's most surprising gain.

Whether the Conservatives can recapture Barnet in 2026 or not, the era of comfortable Tory majorities in this suburban borough are almost certainly behind them. Huge house building programmes in Colindale and West Hendon (to recognise just the two biggest zones) have simply served to create extra Labour seats in safe wards. This seems yet another Conservative own goal (and one Wandsworth Tories also scored).

While councils have housing targets to meet and landowners wishing to make money out of redundant sites; and while it's good to upgrade run down or derelict neighbourhoods, generally speaking the sort of housing that has been approved by Conservative councillors has filled up with non-Conservative voters.

Building for political gain is dodgy - but all parties attempt it and there are other desirable outcomes, like a larger council tax base, from these huge regeneration zones, but it is perfectly possible to oblige developers to build the sort of housing families want - houses with gardens, for example, rather than crammed tower blocks with little personal outdoor space.

Labour - with the exception of the one seat it missed in Barnet Vale and, possibly, Edgwarebury (seemingly the successor to long-term marginal Hale) - won everything it can reasonably expect to for now. Mill Hill is on the cusp of vulnerability but all else remains safely Conservative. That said, a ceiling of 41 to 44 seats is plenty high for Labour to content itself with.

Bexley

Although only one seat switched from Conservative to Labour in Bexley there was a fairly hefty movement of votes in wards that have been safely Conservative for the past three electoral cycles.

In considerable part this was because turnout tanked, down more than ten points to around 27% - and it seems that it was mainly Conservative supporters who sat on their hands. Turnout in Barnehurst ward: down 12.6 points. Bexleyheath was down 13, Blackfen down 11%, Falconwood down 14. Turnout fell everywhere but was less pronounced in Labour wards: Belvedere down 8, Thamesmead East by less than five. The lowest turnout: just 19.2%, was in Slade Green and Northend (the lowest turnout in London) and in just one, Longlands, did it surpass 30%.

Normally it's wise to be a little sceptical of claims of differential turnout: a common claim by the representatives of governing parties attempting to explain a way bad results. Typically turnout declines broadly evenly and cannot disguise genuine switches between parties. But there are occasions when voters are not convinced of the merits of the principal opposition party and yet want to protest at the shortcomings of their own party so stay at home. This is what seems to have occurred in Bexley.

The table below shows the change in the actual party vote in each ward. I've banded the wards into what should be safe Conservative,

tinted blue, potential marginals - all held by the Tories right now (white) and the Labour wards (tinted pink).

In the safe Tory wards, and most of the marginals, the Conservatives lost hundreds of votes. Labour did gain despite the fall in turnout but in far smaller numbers that, had turnout held up, would have barely dented Conservative majorities. The Tory councillor in Northumberland Park last time won a majority of 88: if Labour was just to rely on its increased vote of 28 it'd still be a split ward. An increase in Labour support in the marginal East Wickham of just 6 would have been risible if the Conservative vote had not fallen by over 500.

ward	Con actual vote change	Lab actual vote change
Blackfen and Lamorbey	-489	+170
Blendon and Penhill	-568	+224
Crook Log	-605	+202
Falconwood and Welling	-594	+57
Longlands	-534	+161

The Labour wards are interesting too because in three of the four the party lost considerable numbers of votes; far more than the Conservatives. We'll return to that issue further on.

Most of the Conservative-held wards in Bexley have similar sized majorities. This is not hugely surprising as most of the borough's neighbourhoods are pretty similar and have similar economic and social profiles. But this means that when the borough swings, as it did in 2022, a whole chunk of wards swing similarly. It's a bit like watching a whole slice of a cliff sheer off onto the beach. In order for this to happen, if Labour's advance didn't come from Conservative voters they must have gained those votes from somewhere else. What happened this year was that long-term non-Conservative voters aligned behind Labour, pushing that party up by ten points across the borough as the Tory share stayed essentially the same.

The same story applied to Bexley as to the rest of London: the swing against the Conservatives was not uniform. The best Labour third of wards saw the Conservative vote rise, with pro-Tory swings in Belvedere, Erith, Thamemead and Crayford North End. But what might be called the middle third - or the wards in which Labour used to be competitive but haven't been for at least a decade, and the best Conservative third, saw Labour gains of between seven and nine percentage points - nowhere near enough to win, but certainly enough to make them appear more interesting in 2026.

In other words, even in this Brexit-backing borough there was a protest vote by Conservatives, just as there was in the December 2021 Old Bexley and Sidcup parliamentary by-election. Some protested by not voting and some - not that many - voted Labour.

		Con	Lab
Best Labour third	2022	33.6	59.0
	2018	33.5	57.0
Middle third	2022	52.5	39.9
	2018	54.8	32.1
Best Conservative third	2022	50.1	32.2
	2018	54.4	23.3

The consequence is that the swing Labour needs to gain Bexley halved. It was 11.1% going into these elections: it's now 5.5%. And, beyond the historically Labour ward of Crayford - which swung heavily away from them after 2002, and East Wickham which has occasionally voted Labour and where there is at least a sizeable non-Tory block of votes, the wards they need are far from hospitable territory.

These include Falconwood and Welling, not Labour since they won one seat there on different boundaries back in 1964, Blackfen and Lamorbey (last Labour in 1971), Longlands (Sidcup West) and Bexleyheath, both never Labour. Even in Barnehurst, where Tory suburbia runs up against the gritty riverside Labour wards, the Tories remain 400 votes clear despite a 9.3% swing.

Bexley was a strongly Leave-voting London Borough (63%-37%) in the 2016 EU referendum and this fact more than any other makes it a hard nut for Labour to crack; evidenced by the robust Tory vote share. The Conservatives may have been buttressed by the absence of UKIP in these elections: they (and a handful of BNP candidates) polled almost 8% here in 2018.

It is also, as of now, one of the areas least affected by the demographic trends that have turned once competitive boroughs like Lewisham into a Labour one-party state and Bromley from a safe Tory borough to a very much more competitive one. There are reasons why this is so. The Labour north of the borough is still semi-industrial and working class with limited transport links into London. The more suburban Bexleyheath is shielded from more metropolitan inner London by Eltham, itself a pro-Brexit enclave in Greenwich borough, and the Sidcup end of Bexley remains a very affluent, relatively older community in the mould of Sanderstead and Kenley in Croydon or the outer end of Bromley.

The answer to how competitive can Labour make Bexley in 2026 depends on whether the Conservative leader then can motivate their disaffected vote better than Boris Johnson managed this year. Because there is not much of a demographic shift in Bexley, and because so much of the Labour improvement this year was down to Conservative absenteeism, I suspect advancing further in Bexley will be considerably harder than the now much smaller swing Labour needs appears.

Brent

Several boroughs took the opportunity of their ward boundary reviews to alter the overall number of councillors. In Brent the number was cut from 63 to 57 and all of these abolished councillors turned out to be Labour.

Brent is also a borough with a very large projected population increase so the council size reduction had an even bigger impact on its wards because the ideal number of electors each councillor should represent grew by 800. That may not seem a huge increase but a ward represented by three councillors would need to grow from 10,767 to 12,933.

The growth in Brent is also not evenly distributed across the borough: its epicentre is Wembley, in particular around the national football stadium. Wembley gained one councillor and two new wards. With a reduction in councillors and the growth of Wembley, other parts of the borough lost representation.

Several wards that had three councillors before ended up largely unchanged but with just two representatives: Brondesbury Park, Cricklewood & Mapesbury (the old Mapesbury); Barnhill, Northwick Park and Kingsbury (effectively a shrunken Fryent).

In the east-centre of the borough a slightly complicated rearrangement occurred. From the new ward name it seems that Kensal Green and Harlesden have been amalgamated, but most of this new ward is Kensal while most of Harlesden moved to the re-created Roundwood. Dudden Hill has vanished but about half of it has been merged with half of Willesden Green, with the latter ward name prevailing.

In addition to the six Labour councillors that were abolished by the boundary review, the party also lost five seats: three to the Lib Dems and two to the Conservatives for a net loss of eleven. This is another example of the headline Labour gains of Barnet, Wandsworth and Westminster councils not telling anything like the full story of the 2022 elections. The Brent result looks especially anomalous in this thirteenth year of Tory government.

Labour had a fairly difficult time politically between 2018 and 2022, though nothing like the scale of its problems in Croydon or Enfield. One of its Alperton councillors resigned over housing fraud and the Lib Dems easily won that by-election on a 26% swing. They held that seat this year, added a second in Alperton and assisted long-time Lib Dem councillor Paul Lorber regain his old seat in adjoining Sudbury.

On the same day as the Lib Dems' Alperton by-election success, the Conservatives almost gained two seats in Barnhill on a 17% swing. Barnhill is one of the suburban wards nestled around Fryent Country Park that used to produce astounding Conservative majorities (Preston, Fryent and Northwick Park being others) before disintegrating to Labour at the 1997 general election and not really looking vulnerable since.

But the Tories are having something of a renaissance at the Wembley end of Brent - not quite as strong a one as in adjoining Harrow but for similar reasons. At the 2019 general election the Labour vote in Brent North fell by eleven points with the Tories up nearly four. Labour MP Barry Gardiner's 8,000 majority is hardly small but then nor was Sir Rhodes Boyson's 10,000 Conservative majority going into the 1997 general election which Gardiner himself overturned.

Both Conservative gains came at this end of the borough: two seats reclaimed in Queensbury ward. That cross-border neighbourhood also saw Conservative gains on the Harrow side. Two Brent gains to add to the three seats they already held in this borough's Kenton ward is hardly going to causeLabour's leadership sleepless nights and Conservative improvement in the other Wembley wards they used to hold was modest. They still have long-shot chances in Barnhill, Preston, Kingsbury and Northwick Park but pretty long those shots remain.

The best Conservative result beyond their Queensbury gains was in the new ward of Wembley Hill which they fell short in by less than one hundred. Unlike neighbouring Wembley Park (which is the ward comprising the development around the stadium) - which Labour won by a landslide, Hill is largely occupied already and its competitiveness may therefore be locked-in rather than due to a incomplete electorate. Wembley Park may become less Labour as its electorate looks set to double by the next election.

Wembley is Brent's new battleground, with the Liberal Democrats regaining seats in Alperton and Sudbury and a Conservative renaissance founded in large part on gaining support among the area's large and relatively affluent Hindu and Sikh communities.

The rest of Brent still looks very solidly Labour. Their one shaky ward in the east of the borough: Brondesbury Park, swung heavily to Labour. The Lib Dem vote collapsed in Dollis Hill ward: their last best hope since winning a haul of seats off the back of the 2003 Brent East by-election. They fell back even further in affluent, liberal and cosmopolitan Queen's Park.

Everything at this Willesden end of the borough and its centre is now massively Labour, albeit sustaining some massive drops in vote share. The party won 70% in Stonebridge, for example, but that was down nineteen points on 2018 in an unchanged ward. They were down fifteen in Willesden Green (considerably redrawn), and fourteen in Welsh Harp (Neasden - slightly redrawn). In just two wards was Labour's 2022 share better than their 2018 share in the closest precedent.

Yet despite this hardly being a stellar performance for Labour, we are also an aeon away from the competitive, contrary results Brent used to produce. Even if the Conservatives become able to rebuild a clump of seats in Wembley - a huge "if" in itself - they would still be a country mile from power here: Brent would simply have itself a sizeable opposition once more.

Bromley

Bromley suddenly looks a lot more competitive than it has since the late 1990s. Fourteen Conservative seats were lost this year and scattered to all and sundry: Labour, principally, in the Lewisham borders and the Cray Valley; the Lib Dems in Beckenham and Bromley town centres and to three "Chislehurst Matters" candidates in the eponymous ward.

Although Conservative councillors outnumber Labour - the next largest group on the council - three to one, they have an overall majority of a more precarious fourteen.

More precarious - but still probably less precarious than it seems.

The Conservatives still have a very secure grip on much of the borough, and while one or two wards have started to teeter, it's hard to see much of a progression for either Labour or the Lib Dems beyond what they now hold. While Labour is now stacking up the votes in the three Crystal Palace wards that are part of the Lewisham West and Penge constituency, Bromley is one of the best boroughs for showing the problem it has attracting back its old working class base whilst simultaneously doing much better with affluent, younger, liberal London.

Labour yet again missed reclaiming Mottingham (albeit a more challenging version of the ward than the one that existed before 2002) and won only one of six Cray Valley seats: none of which used to elect Conservatives. Labour did take the slimmed-down Plaistow ward, across the border from Lewisham's Downham estate, and another of those relatively affordable, further-out neighbourhoods that are proving attractive to young professionals priced out of the centre of London.

They also managed to bring Kelsey and Eden Park ward into play. This too is a borders ward, this time with the Croydon neighbourhood of Shirley - which is also inching slowly to Labour.

But Labour should be a little concerned that in Bromley town and Beckenham voters plumped for the Lib Dems, not Labour, in three-way races. To be fair versions of both wards elected Lib Dem councillors in the 1990s but there is potential for these neighbourhoods to form winnable Labour parliamentary constituencies in the near future.

The Conservatives are also suffering a little local difficulty from pop-up independent insurgencies. In 2018 they lost Biggin Hill to two former Tory councillors and this time they lost three seats in Chislehurst. With the seats the Tories lost to established parties in the main looking unlikely to be regained anytime soon, these two wards represent ten seats off a council majority that they might ill-afford to squander. Neither ward would vote other than Tory or for local non-partisan candidates.

What proportion of the swing from the Conservatives was anti-Boris protest and what the inexorable London swing away from the Tories?

In contrast to Bexley a larger chunk will have been demographics. The Tories' borough-wide share was just 38% - much lower than when they lost control back in 1998 (45%) and lower than 2014 when UKIP polled well in this Remain-but-only-just borough (51/49). But while demographics may be altering wards like Shortlands, Hayes and Bromley Common, they cannot entirely account for the huge swings in these wards - and nor can boundary changes.

Shortlands, especially, which has gone from a very safe two-councillor ward to a borderline marginal three-councillor ward underwent a near-fifteen point swing. This is core Beckenham suburbia, most of it a fair distance from the nefarious influence of the Lewisham or Croydon edges. Hayes and Bromley Common are even further out into the Kentish countryside.

Although the Lib Dems regained a presence on the council at the Beckenham end of the borough they made very little impact on their former stomping grounds around Orpington. St Paul's Cray used to be a Lib Dem banker, as did Orpington itself - and in their halcyon days they also won Chelsfield. They improved their positions in all these wards but not to the point of competitiveness. Their 18% borough-wide vote share is still only half that which they managed in 1994. But they have Tory seats in the two wards they gained this year to target and perhaps can inch another ward into play in 2026.

Labour needs a swing just shy of 7% to win Bromley next time. That would require winning all six Cray Valley seats, two in Mottingham, three in Kelsey Park, then taking Beckenham Town from third place and breaking into the next tier of wards: Shortlands, Bromley Common and, at a push, Hayes and Coney Hall. This is a steep order.

Much easier, given how the Conservatives are now assailed on multiple fronts, would be to remove their overall majority. For that they need just a 3.4% swing. Bromley should still be described as something more than a "leans Conservative" council, especially as a degree of their retreat this time was a protest vote. But a demographic tide that does not favour the party is rising here and they are going to have to work ever harder on their flood defences to keep it at bay.

Camden

In the old days, what is now Camden comprised two very secure Conservative boroughs: Hampstead and Holborn, and one that was comfortably Labour: St Pancras. Holborn was a tiny council, not unlike the City of London in some ways, covering an area smaller than the current Holborn and Covent Garden ward. At times the Conservatives (or Ratepayers who stood instead of the Conservative Party) won every seat in Hampstead.

Today the Tories are down to just three seats in Camden: two in still-resilient Frognal ward and one in Hampstead Town. That ongoing disintegration is one story of the 2022 elections in this borough. The other is the abject performance of the Green Party in what should be one of the most amenable boroughs to their politics.

Camden has the longest-lasting Green-represented ward in London: Highgate, which they first won in 2006 but in which they have never been able to get three councillors elected. It's been represented by high profile former party co-leader Sian Berry since 2014 and she polls far ahead of her running mates (500 votes ahead in 2018). So why hasn't the party broken through in Camden?

The primary reason is that, again, you cannot win if you do not stand. The Greens stood just twelve (TWELVE!!!) candidates for 55 council seats (and three of those - a quarter - stood in Highgate) in 2022, so the popularity of the party was barely tested.

Green activists will protest that they are a small party and it's a huge struggle to have an impact in all-out elections within very large, hard to canvass, urban wards with a high turnover of voters. Of course

this is a factor but I return to the question I posed in the narrative to last year's elections: if not now, when will the Green Party ever become seriously successful? If not in boroughs like Camden with its affluent, progressive and politically aware electorate, where?

Yet the Green performance even where they stood was unimpressive. In just two wards beyond Highgate did the Greens poll above 20% (Haverstock and Kentish Town North, though they were just below that benchmark in Kentish Town South and King's Cross). Presumably that was due to little campaigning being done in these nine wards, the bulk of effort going into Highgate.

Perhaps, for all the hype around councils declaring Climate Emergencies, pandering to Extinction Rebellion activists and advancing feel-good green local initiatives, local voters recognise that the impact individual London boroughs can have on global warming is negligible? Or perhaps, while climate change and local environmental problems like pollution and congestion matter hugely, stuff that a council really can have an impact on: housing, social care, education and parks lead voters to choose parties with a more holistic policy platform? Either way, 2022 should have been a breakthrough year for the Green Party in Camden (and other boroughs like Hackney, where at least they gained a few seats) and it was not.

For the Conservatives, things do not ever seem to get better. There are five wards where there remains sufficient a Conservative vote to be competitive: Frognal plus Hampstead Town, plus the new Primrose Hill (the old Adelaide ward, revived), South Hampstead (much of abolished Swiss Cottage ward) and Belsize - a three way marginal still because it gained additional Conservative-leaning territory from the Fitzjohns end of Frognal.

But the Conservatives polled less than 18% borough-wide: the first time ever they have fallen below 20% support in Camden, and that is far too weak a position to launch a serious campaign to capture any new seats. Think back to the wards the Conservatives snatched in 2006: Bloomsbury, Highgate, Gospel Oak. Not the remotest prospect in any of these now - the Tories were over fifty percentage points behind in Gospel Oak.

Labour, in contrast, polled 51.9% - their highest share since 1974 when Camden was a two-party borough, and over twenty percentage points more than they managed in 2006: the dreadful fin de siècle elections of the Blair era. Back then Labour had been assailed on all sides, with Lib Dems netting the most seats and able to form a minority administration supported informally by the Conservatives.

Such a scenario might be possible again in the future if the Greens can expand their battleground and if the Lib Dems and, to a lesser extent the Conservatives, can revive. But at the moment, all three of these parties are struggling to even win seats on the council - let alone enough to threaten Labour. The Lib Dems seem, for now, to have halted their slide against Labour. They easily defended their one seat in Fortune Green in a by-election last year when long-term councillor Flick Rea, in her eighties, stood down and they held it again this year. Belsize is their only other ward but it's not locked down: the Conservatives were eleven percentage points behind and Labour polled over 20% there too. West Hampstead is the only other decent Lib Dem target at the moment.

Camden produced a mini drama on election night when it turned out that Labour was set to win one of the seats in Hampstead Town: for the first time ever. Bizarrely, Labour had picked a council candidate who, it transpired, didn't actually want to win. He wasn't at the count and had to be hauled out of bed for his declaration. But so resolute was his antipathy to serving that he promptly resigned his seat causing an unnecessary by-election. Although the other seat in Hampstead Town remained in Conservative hands it was the former Lib Dem councillor for the ward, Linda Chung, who won the by-election by a country mile. Perhaps that lesson might teach Labour to pick council candidates who want to win?

Croydon

In hindsight, Croydon Labour might have preferred to lose power in 2018 than have presided over the minor disaster that has been the last four years in administration for the party.

Because they did not they have endured the ignominy of failed Ofsted inspections of children's services, huge unfunded splurges on pet gimmicks they had no mandate from their voters for, controversial planning decisions, disastrous property purchases, dodgy deals with their arms-length construction company, a huge punt on a town centre regeneration scheme that collapsed, TV News exposes on shocking council housing neglect, bankruptcy with government commissioners being sent in to impose budgetary constraint and a shocking golden parachute for the Chief Executive who bore a large share of the responsibility for this mismanagement.

Politically, Labour's travails led to a successful grassroots campaign to create an elected mayoralty for Croydon in the hope that this would produce more accountable leadership (principally to voters in the Conservative south of the borough). In turn, the Conservatives won the inaugural contest for that position this year, albeit by a tiny 500 votes. On the one hand, that the Tories could only win by that slender amount after four years of pretty appalling misconduct by Labour is a further marker of how this polarised borough is still shifting inexorably to the left. On the other, that they could win in this horrendous national year for the Conservatives, and precisely in a borough that is becoming ever less favourable to them could be argued to be impressive.

But let's be clear: there was no surge of enthusiasm for a return to Conservative administration after eight years of Labour. Borough-wide the Conservative vote fell almost three percent to 37.5% - their lowest Croydon share bar one. But Labour fell by more than twelve points to just 32%, with very much bigger slumps in their safe northern wards and New Addington. This was a "plague on both your houses" election. The Tories even gained a seat in Waddon because their vote fell less than Labour's. Likewise Labour held on to its seat in split Addiscombe East despite its vote plunging from 46% to 37% because the Tory vote slipped as well. Had the Conservatives held their 2018 share both seats in this ward would've been theirs.

Croydon is a polarised borough with four bands of wards. The north, comprising nine wards with 24 councillors, has become a Labour fortress as safe as any in London. Labour held 23 of these 24 seats, losing one in Crystal Palace and Upper Norwood to the Lib Dems in an area that had an unpopular Low Traffic Neighbourhood

implemented (though why anyone thinks voting Lib Dem is a protest against such environmental measures is a mystery). But Labour did terribly across this tranche of seats: down by as much as twenty six points in Thornton Heath and twenty five in Bensham Manor.

Part of the reason for such a hefty drop in these wards that all have sizeable black populations was the entrance of the Taking The Initiative Party, formed out of the Black Lives Matter protest and getting considerable unwanted publicity in 2021 when its founder, Sasha Johnson, was shot in the head during a post-lockdown party. But their vote shares were unimpressive generally, other than in South Norwood ward, where long-term damp problems in the Regina Road council estate high rise blocks were exposed by ITN.

It isn't actually clear that these precipitate drops in support in Labour's very safest wards were due principally to local factors: as discussed in the introduction, Labour suffered big drops in deeply ethnically diverse wards from Feltham through Ealing and Brent to Newham and Barking. That may be a more worrying problem for the party because dismay at local shortcomings will fade as Labour's term in opposition continues.

Then there is Croydon itself: seven wards with eighteen councillors, of which Labour held thirteen going into the elections and emerged with ten, having lost two in central Fairfield ward to the Greens and one to the Tories in aforementioned Waddon. But Labour performed passably in this tranche of wards - at least in relation to the Conservatives' - and there was even a further swing to them in South Croydon, the old Croham ward, which is the frontier of the demographic change shunting the borough away from the Tories.

The two New Addington wards constitute their own discrete band of wards. This is the one part of the borough where the Conservative vote soared: up nearly sixteen points, while Labour fell by eight. This led to Labour losing both seats in the whiter, higher home-ownership South division on a 10% swing (the first time ever a New Addington ward has elected a full slate of Conservative councillors); while a stunning 19% swing gave them a seat in New Addington North.

	Con	Lab	LD	Grn	Oths
The North	18.8	46.8	12.6	13.2	8.5
	- 0.1	-19.1	+7.7	+3.7	+ 7.8
Central	31.7	37.1	11.3	14.8	5.1
	- 5.3	-10.1	+4.6	+6.3	+4.5
New Addington	44.9	45.2	0.0	9.9	0.0
	+15.6	- 7.9	0	+4.7	-12.4
The South	55.4	16.5	16.6	11.4	0.1
	- 4.8	-7.0	+8.6	+2.9	- 0.5

Note: the wards I have allocated to the parts of the borough above are not necessarily the wards within the parliamentary constituencies

New Addington electing three Conservative councillors and just one Labour is remarkable - hence I'm remarking on it! - but it's been long in the making and is of a part with other outlying massive London County Council estates like Harold Hill, Hainault, St Helier and the slightly more inner Roehampton Alton estate abandoning their deep Labour traditions at various points over the last twenty years.

Finally there is what might be called the deep south, from Coulsdon in the west to Shirley in the east: ten wards electing 24 councillors. These ward are still very strongly Conservative: Sanderstead councillor Lynne Hale has the largest Tory majority of any councillor in London, though neither of the Shirley wards look impregnable any more. Here Labour fell back from an already distant base while the Lib Dems made advances, notably in Old Coulsdon.

Labour can regain Croydon with just a 0.6% swing back in 2026, and capture the mayoralty on only a slightly more exacting 1.2% swing. The seats of the one Tory in Waddon and the two Greens in Fairfield will do it.

Ealing

The Labour administration in Ealing ran into a bit of local opposition in the last four years over what many regarded as an over-zealous implementation of Low Traffic Neighbourhoods. There is no issue - none at all - that can antagonise large middle-class communities than parking and the furore was at least the excuse enough of the Labour councillors needed to oust long-time council leader Julian Bell a year before the elections.

The LTN controversy had no impact on the election results - not because it hadn't enraged a fair few Labour voters but because there were issues of greater salience, notably kicking a Conservative government absolutely toxic in Ealing. The Tories, who had run Ealing only twelve years ago, were reduced to five seats and by some measures were lucky to retain those five. They lost their footholds in Ealing Common and Northfield, had to split Hanger Hill - a ward they had never lost before - with a Lib Dem, and Ealing Broadway was left as the only ward returning three of their councillors.

That said, Labour's vote across Ealing fell by five percentage points and that decline was felt in their quite safe but ethnically diverse wards in Greenford and Southall. It was in middle class, largely white wards in the centre of Ealing that the Conservatives were kicked - and, of course, that's where the Tory vulnerability was.

So while the Conservative vote fell by over eleven points in Hanger Hill, almost ten Ealing Common, and by almost five in Ealing Broadway in Southall Broadway it was Labour that dropped by nineteen points. In Southall Green they fell by fifteen; in the Southall-Greenford borders ward of Lady Margaret they lost more than eleven points; in Dormers Wells over twelve points; in Greenford Broadway more than seven and in Perivale six. Labour's vote fell in sixteen of the twenty three wards that have a clear precedent. All of these wards remain very comfortably Labour and so the damage is not obvious, whereas it very much is for the Conservatives because they lose seats as a result.

And it's not necessarily correct to claim that LTNs had no impact on Labour's vote. In Northfield, one of the affected marginal wards, the swing to Labour was just 2.25% - it's very possible that had popular Conservative councillor David Millican contested the ward again he'd have held his seat. In next door Walpole - Hilary Benn's old ward that was reasonably securely Labour for decades but became a Tory marginal in the Cameron years - there was a swing to the Conservatives.

The Lib Dems now find themselves as the official opposition in Ealing for the first time. They hold almost half a clutch of seats around the edge of Acton but they now represent every ward they are likely to - bar unseen upheavals. They have one more seat than the Tories despite polling seven points less than them borough-wide. They are somewhat better at concentrating their vote.

For a fairly affluent borough - especially in its central wards which are also liberal - the Greens have little traction in Ealing. They polled just 14% - though that is in large part because they only fielded thirty candidates in this (now) seventy seat council. Why the Greens are so weak here is a good question. In boroughs like Hammersmith and Fulham and Kensington and Chelsea it is because the typical Green activist - relatively young, very progressive, very committed to causes - is priced out of thosee boroughs.

Ealing is by no means a borough of low housing prices but it's not in the same league as boroughs further into the centre. Greens seem to do less well in wards with high populations who originate from the Indian sub-continent (a disinclination somewhat less pronounced in communities originating from Africa and the Caribbean) and that makes things tough for the party in Southall, Greenford, Northolt and Perivale. But even excluding these less hospitable wards, the Green share only rises to 17%.

The main reason here is that the Lib Dems are still a viable party in the wards that might otherwise be the Greens' best: they haven't faded and are still seen as the more likely party to win for those who wish to vote against Labour but who under few circumstances would vote Conservative. The best Green ward, by some distance, is Hanwell Broadway (the former Elthorne) which is somewhere the Lib Dems - who once represented it - have collapsed in. But the Greens' 29% is still up against a Labour share of 41%, some 400 votes short in 2022. There is, though, a Conservative-Lib Dem vote of almost 30% that could be squeezed in this ward, and getting Conservatives to vote Green to beat Labour is probably an easier ask than getting Greens to vote Conservative.

Despite this third Labour landslide in Ealing I am not ready quite yet to move it into the column of rock-solid Labour boroughs for two reasons. First, we need to see if Labour's losses in its safer wards are a one-off or the beginning of a trend - in the same way that the US Democrats are starting to lose Hispanic votes in the south. Second, a large chunk of the Labour vote here is, to a degree, a protest vote against a brand of Conservatism lots of its residents detest. How keen are these ex-Conservatives to return to the flock?

Ealing is a swing borough and if or when there is a Labour government not living up to the liberal ideals they expect of it expect there to be a big electoral backlash here: one disproportionately larger than the average. With each ratcheting up of the Labour majority the swing required for such a backlash, as happened in 1978, 1990 and 2006, grows.

At current levels, it seems unlikely Labour will lose but a feature of First Past The Post is that, if voters want to unseat a party, the system often works with them to facilitate it - with larger swings in safer wards. Labour's new leadership in Ealing has unfettered control for now, though.

Enfield

Labour wasn't expecting to lose any of its London boroughs in 2022 but if they were to have made a list of those they might, fourth place behind Croydon, Harrow and Tower Hamlets would surely have gone to Enfield. The Labour council elected in 2018 had spent four years riven by splits, divisions, resignations and by-election losses.

The problems began immediately after Labour's re-election in 2018 with an increased majority. Council leader Doug Taylor was replaced by Nesil Caliskan, head of a greatly-enlarged group of Labour councillors of Turkish origin, reflecting the changing diversity of parts of Enfield.

A year later five members of the Labour cabinet, including the deputy leader, did not seek re-election. Cllr Caliskan was forced to apologise to full council for removing Yasemin Brett "temporarily" from her cabinet job, which was found to be a case of bullying.

Two years in, two Labour councillors had the whip withdrawn and five weeks later, a Community First group was established on the council comprising those two suspended councillors. The membership of this grouping doubled in August 2020 with two more resignations from Labour - each making complaints about a lack of democracy within the Labour Group. A fifth Labour councillor joined Community First on 2 March.

The internal dysfunction within Enfield's Labour Group also created a by-election in marginal Chase ward in 2021 after Cllr Vicki Pite resigned. The Conservatives gained Chase on a 6% swing, suggesting that these problems of political management were having an impact with the electorate - or other shortcomings were. Another by-election in Southbury - once a key marginal but in recent years pretty safe for Labour - produced a near 10% swing to the Conservatives, though Labour remained almost 600 votes ahead. And in a third by-election, again caused by a long-serving Labour councillor quitting having had enough of the group factionalism, Labour held its safe seat in Jubilee ward, with another 6% swing.

Even with just a year to go the council elections problems did not retreat much. Just days after those three concerning by-election results, a further councillor quit to join Community First, while another became the Green Party's first ever representative on Enfield Council. And in February 2022 a final councillor resigned from Labour to join Community First.

It should also be noted, in the interests of balance, that the Conservative opposition had a few "issues" over this period as well. A councillor was suspended after tweeting an old newspaper front page critical of Turkey during the 1970s invasion of Cyprus, though he was eventually readmitted to the group. Another councillor, Will Coleshill, was even more controversial, making remarks some considered racist about the council leader. He also received a fixed penalty notice for breaking Covid lockdown restrictions and, clearly disillusioned, eventually forfeited his Bush Hill Park ward seat having not attended a council meeting for six months. The Tories easily defended his seat in the ensuing by-election.

This churn meant that Labour, which had started off with a majority of 29 seats, ended it with one of just eleven. Nonetheless, the rapidly

shifting demographics of Enfield were still moving firmly in Labour's favour. So the 2022 elections would be a battle of two opposing drivers: Labour's unimpressive record locally versus an increasingly Labour-leaning electorate, with the unpopularity of the Conservative government being a third actor, but perhaps only in certain wards.

Those 2021 by-election swings proved to be an accurate forebear of the 2022 result. There was a 5% swing from Labour to Conservative across Enfield - considerably larger than the swing that gave the Conservatives control of Harrow (but that is a far more marginal council) The Conservative vote increased in nineteen wards - in three by more than ten percentage points - while Labour's fell in twenty - in ten by more than ten percentage points.

Wards in which Labour had begun being competitive like Arnos Grove (formerly Southgate Green), Bush Hill Park, Southbury, Winchmore Hill and Whitewebbs (formerly Chase) swung significantly to the Conservatives. Even the southerly Bowes ward, beyond the North Circular, which had been very safely Labour since 1986, saw a 17% swing to the Tories, though an unpopular Low Traffic Neighbourhood (LTN) had been imposed on this neighbourhood and one of its councillors, Yasemin Brett, had been among those involved in bust-ups within Labour. This clearly shunted Bowes ward to the top end of the anti-Labour swings.

In all the Conservatives took eight seats off Labour on a fairly radically redrawn but same size council, leaving Labour with a trimmed but still workable (assuming the divisions of the past four years didn't re-emerge) majority. But the most affluent, middle class parts of the borough, principally in Southgate, around Enfield Chase and Enfield Town, swung firmly against Labour - to the extent that in the wards comprising the Enfield, Southgate constituency the Conservatives polled most votes. A seat that looked to have shifted permanently across to the Labour column may still have some competitive life in it - this was the only notional Conservative gain in London other than Croydon Central (again due to the travails of an unpopular Labour council).

But the underlying shift to Labour in Enfield is now such that, even after this clear and significant advance, the Conservatives are still left needing a hefty 8% swing to gain a majority on this northernmost London council. To advance further the Tories will need the re-created Highfield ward, where they missed out on one seat by just 29 votes. Beyond Highfield, though, things become much harder: Southbury is the next vulnerable ward, but the Labour majorities here are over 460 votes, requiring a 6%+ swing. Then comes Bowes - which looks nothing like a Conservative ward, and then Bullsmoor - the old Turkey Street ward, and Palmers Green - but by now we're approaching Labour majorities of 20 points.

While the demographics of London generally, and Enfield specifically, aren't favourable to the Conservatives, there is no reason to believe continued Conservative decline is "baked-in" and there is still a large enough professional class in Enfield of the sort the Tories were able to appeal to. This, coupled with what at the very least might be described as Labour's inability to mobilise its black and ethnically diverse constituency in 2022 is the way a Conservative Party optimist might be able to sketch a path back to relevance for their party in Enfield, if the deep wounds inflicted by Brexit and Boris can be healed somewhat.

Greenwich

Greenwich, over the long-run, is probably London's quietest borough - by which I mean you seldom hear of any controversies besetting it and election after election it produces a dependable, large Labour majority. Its residents seem broadly content with the services their council administers.

Despite a boundary review that basically gave the Conservatives everything they asked for (though the increase in council size was more beneficial to Labour), the party was almost eradicated in 2022. They now have footholds in, but lack complete control of, just two wards having lost Eltham Park and Progress (the old Eltham North) entirely, clinging onto just one seat in Eltham Town and Avery Hill (the former Eltham South - never before Labour), and two in the clumsily renamed Mottingham, Coldharbour and New Eltham.

Even though Blackheath Westcombe was drawn more favourably the Tories lost their foothold there by 500 votes. In a good year, which we can all agree 2022 was not, the Tories should also be competitive in Kidbrooke Park, which has been shorn of more Labour-inclined Hornfair, in Greenwich Park (albeit that this is a fair bit harder with a lot of Greenwich West added) and maybe even Kidbrooke Village. This is one of several wards created to represent largely new communities - here the regenerated district built over the somewhat notorious Ferrier council estate.

These wards would all be bonuses for the Conservatives but it is their growing travails in Eltham that must really worry them. Eltham was the only parliamentary constituency in inner London that voted Leave in the 2016 EU referendum (Democratic Dashboard estimates that it voted 52-48 Leave, so reflecting the overall result).

There are some electoral cross-winds blustering around here because Eltham Page (the successor to Eltham West and also the best Labour end of Eltham) swung slightly towards the Conservatives. But the Tories have struggled in Eltham North for the past three elections: it split these past two elections until Labour won both seats this year. In fact the swing against the Conservatives in Eltham proper wasn't all that severe: in the six southerly wards Eltham Page, Park, Town, New Eltham, and Middle Park) , the Tories fell 3% and Labour rose 2%. But in the three competitive wards (Park, Town and New Eltham) the Tories fell seven and Labour rose almost five - more evidence that it was Conservative voters that did most damage to their party in the wards they should be strongest.

The Greens also came away from this election very disappointed. Following their strong showing in the over-sized Peninsula ward in 2018 they had high hopes in the new East Greenwich ward comprising the area not including the Dome. They came 68 votes short of winning there and were 379 votes adrift in next-door Greenwich Park, but that was the sum of their challenge.

I mentioned that several wards covering new, or largely new neighbourhoods were created. There are five of these in Greenwich: Kidbrooke Village, Greenwich Creekside, East Greenwich, Woolwich Arsenal and West Thamesmead. Of course, these neighbourhoods were included within much larger, often heavily under-represented, 3-councillor wards before the 2022 elections but they now form bespoke wards for their communities. All of these wards bar East Greenwich stayed safely Labour.

Labour did far better in its four safe boroughs south of the Thames than those north of it. The party's vote share increased in Greenwich, Lewisham and Lambeth, and fell by just 0.4% in Southwark. Obviously there was the minor disaster that was Croydon, and Labour dropped a marked amount in Merton but these are not long-term safe boroughs, and obviously Wandsworth offsets those poorer results. Labour also made advances in Bromley and Sutton. Why this might be is an interesting question though the simplest answer: that it's just different in the same way South Yorkshire is different from West Yorkshire, might be the most reasonable.

Unlike boroughs like Islington or Hackney, where most wards are demographically similar and thus are ripe for one specific left-of-centre party (Lib Dems or Greens) to become the principal alternative to Labour, Greenwich isn't like that. There are areas where the Conservatives retain a sizeable vote and where parties more left-wing than Labour will struggle to establish themselves. They can score well - sometimes very well - in wards which are widely ethnically diverse (by which I mean lots of different ethnic backgrounds including a fairly substantial white population, not areas where one specific community dominates) and fairly high levels of young professionals.

But the Greens polled about 6% lower in Greenwich than the best Green boroughs north of the Thames (and, indeed, Lambeth). Sometimes, where an administration is faced with a diversity of parties opposing it in different wards this can be a threat to them. That's not the case in Greenwich: the Conservatives cannot win a majority here and other parties cannot establish themselves.

Hackney

Hackney produced arguably the best Green performance in London this year. I'll repeat that: two seats gained is arguably the best Green performance in London. Pretty pitiful - especially when, unlike in Camden, the party actually contested every seat.

That's more than can be said for the Conservatives, who managed to find candidates for just thirty two, and the Lib Dems who contested twenty three. The Greens polled 23% in the council elections and 17% in the mayoral vote, coming second in every Labour-held ward bar Cazenove and Hoxton West.

This was another very safe borough where Labour's vote nose-dived. But it's so secure that it only dislodged two of their seats. Whereas Tory vote collapses in 2022 tended to happen in wards where it was far more likely to cost them seats, in places like Hackney Labour is able to shed votes by the bucket-load and hold on. In Clissold, Labour fell from 64% to 48%; in Hackney Downs from 56 to 46; in Haggerston from 72 to 58, in Hoxton East from 65 to 51, Hoxton West from 69 to 51, in Shacklewell from 71 to 55 and in Victoria from 69 to 54.

These are not minor falls: they are hefty losses of support - and it's not explained by Labour voters not bothering because they know Hackney is so safe a Labour borough: turnout was only very slightly down on 2018. This was Labour voters changing allegiance.

The problem is that in all bar one of the wards I've just cited, the much lower 2022 Labour vote is still above 50% - Hackney Downs, the ward in which Labour "only" polled 46% was one of the two Green gains. Even in Dalston, the other Green gain where their new councillor polled a very impressive 61%, the second seat there stayed Labour; Green Zoe Garbett polling 526 votes or 22.2 percentage points ahead of her running mate Tyrone Scott. She was also the Green mayoral candidate, so benefited from the profile that campaign gave her.

In King's Park ward, the top Green candidate polled 37% - but the problem was this was a ward only contested by Greens and Labour and so the bottom Labour candidate still finished more than thirty percentage points (800 votes) ahead. London Fields was a similar story (though here one Lib Dem stood), Green Carrie Hamilton polling 31% but with Labour's third candidate winning 57%. The Greens came fairly close in Stoke Newington finishing 13% behind Labour in a ward contested by four parties.

The party polled above 20% in twelve of the borough's twenty one wards, which isn't bad - it's just nowhere near good enough to win. The Greens would be better served amassing much higher shares in fewer wards, at least until they can establish themselves as a viable alternative on the council. And it's a critical issue: compare the Conservatives, who polled just 11% overall but, because its concentrated in one part of the borough, can get five councillors elected, while the Greens with 23% spread more evenly, got just two councillors elected. Unfair? No, because ensuring local communities with different values and needs to the wider area have their representatives is at least as just a principle as some notion of proportionality overall. In any event, it is Labour massively over-represented in Hackney proportionally - not the Conservatives.

The Greens nearly won a third councillor in Hackney when newly-elected De Beauvoir Labour councillor Tom Dewey resigned the moment he won. Very little has been made public as to why he quit. In the ensuing by-election the Greens missed out by 27 votes - a big step forward from the May result but a loss nonetheless.

Hackney Conservatives have effectively become a localist party representing the Hassidic Jewish community of Stamford Hill. They polled well there: Springfield swinging towards them by nearly nine points and Stamford Hill West by more than five. The third Stamford Hill ward, Cazenove, is a Labour-Lib Dem battleground which saw a very slight shift to Labour, former Lib Dem councillor Ian Sharer finishing clearly ahead of his running mates.

The Conservatives and Lib Dems used to have something of a presence at the Shoreditch end of the borough: both having won De Beauvoir and the Lib Dems also winning the Hoxton wards in the 1980s and 1990s. But they are both firmly out of contention there now.

The Greens are the only party that can credibly take on Labour in Hackney. This has never been a Conservative-inclined borough and even as parts of it have gentrified the sort of affluent electorate that lives in between the council estates is liberal not conservative. Nor do the Lib Dems look remotely like being able to recreate the successes they put together over a quarter of a century ago, not least because they don't appear to have the strength to field candidates for more than a third of the seats.

And while a network of independents is trying to organise themselvess consistently, they're far from achieving this. So it's Labour or the Greens: a party it's reasonably easy to see large sections of the Hackney electorate turning to who want a change from Labour. But the Greens need a massive 18% swing to win Hackney and there's no sign the borough's voters want to make such a radical switch, climate crisis or not

Hammersmith and Fulham

The 1986 council elections that followed just one month after the Fulham parliamentary by-election produced a Labour landslide: 40 of their councillors to just nine Conservatives and one for the Liberal Alliance. 2022 was an almost exact re-run of that election in terms of seats. But in terms of votes it was even more lopsided. In 1986 Labour won the borough 51-34: a seventeen point lead. In 2022, the margin was 54-27: a lead of twenty seven points.

The Hammersmith and Fulham of 2022 is a quite different borough than that of 1986: witnessed, for example, in the fact that back then there was still sufficient a Labour vote in the central Fulham terraces that they could win Colehill and Sherbrooke - wards which now comprise Tory-voting Munster. Labour barely made a dent in the Tory lead in Munster in 2022, albeit that there was a complicating Lib Dem challenge here led by their high-ish profile 2019 general election candidate Nicola Horlick, the businesswoman (and a Richmond resident).

This even-better-than-86 performance, though, is exceptionally odd if looked at in terms of the social and economic profile of the borough. Fulham, in particular, has gone through several phases of gentrification but there are now exceptionally wealthy parts of Hammersmith and Shepherd's Bush beyond the enclaves of Brook Green and Ravenscourt Park.

Shepherd's Bush remains ethnically diverse and is still not hugely affluent. It undergoes a huge turnover of residents in its long, multi-occupancy streets each year. But even here in the new high-rise private developments of Westfield, the University College London transformation of the Du Cane Road area, the long-promised regeneration of the Old Oak railway sidings and the transformation of BBC Television Centre into a hive of luxury apartments, "regeneration" is turning it into a very different neighbourhood from that of the mid 1980s.

But these waves of gentrification have not gone according to plan for the Conservatives. The first two or three very much benefited them electorally, starting off in the far south of the borough and turning the neighbourhoods around Parsons Green and Bishops Park into very safe Tory wards, then moving northwards and into Sands End.

But there appears to have come a point where house prices have reached levels so far beyond even what many considered very wealthy can afford, and where these new inhabitants are essentially indifferent to cost of living crises and have moved beyond a voting type especially reliable for the Conservatives.

In part this is driven by Brexit. Hammersmith and Fulham has not just a large number of residents whose jobs depend on the city and its ability to trade as unencumbered with the EU as possible (as well as those who see globalisation in its broadest terms as desirable) but also many EU citizens. Labour has gone out of its way to mobilise this usually fairly indifferent group of voters effectively and they have contributed considerably to the party's remarkable renaissance since 2010.

Labour's surge was concentrated on the five core Hammersmith wards: Addison, Brook Green, Grove, Hammersmith Broadway and Ravenscourt, plus the Fulham borders ward of Avonmore. Avonmore and its forebear, Baron's Court, was often the only Conservative ward in Fulham back in the day before falling to Labour in 1986. Labour won this ward back then by 47-42. This year the won by 61-23.

Brook Green, drawn almost as a gift to the Conservatives, produced a Labour vote almost touching 60%. Re-created Grove, which the Tories would have won very comfortably in their 2006 and 2010 landslide years - it's the archetypal David Cameron ward: largely comfortably affluent but very liberal - gave Labour two thirds of the vote. Addison, the borough's bellwether ward, awarded Labour a 70% share.

Labour improved more modestly in Fulham but from a decent high already, polling over 60% of the vote in former swing wards like Fulham Reach and Lillie (the successor to Fulham Broadway). The Conservatives threw the kitchen sink at trying to regain Sands End, where a Low Traffic Neighbourhood in all but name had proved highly contentious. But Labour held on with essentially no swing (the new version of this ward is very slightly better for Labour than the old but nothing to write home about). Labour won the new Walham Green ward - arguably the most polarised ward in the borough, covering the large east-central Fulham council estates but also the hugely affluent streets west of North End Road, 53-27. Even if they could overturn that hefty majority the Conservatives would still not be within reach of a majority on the council.

Labour did somewhat less well in its Shepherd's Bush stronghold but because the Lib Dems and Greens made advances, not down to any Conservative impact. In Coningham (the re-created successor to Askew), Labour's vote fell nine points as the Greens took almost one in five votes. That still left them forty percentage points ahead. Labour "only" winning 63% in White City - usually their strongest area - was also a fairly poor showing: there are eight wards where the party won equal or higher vote shares.

Despite their attempts to put Munster into play the Lib Dems should have focussed on Fulham Town, a ward even more affluent than Munster. Without doing any work there the Lib Dems almost beat Labour to second place.

The boundary changes in Hammersmith and Fulham were in some respects radical in that an almost entire 3-member ward pattern was torn up and a majority of 2-councillor wards installed. But this pattern, especially in Hammersmith and Shepherd's Bush, was basically a re-creation of the pre-2002 warding order, with extra seats allocated for population growth in College Park and Old Oak and White City. The borough gained four councillors (again restoring numbers to the pre-2002 council size) and all of these

were Labour - safe Labour. The electoral reality of the boundary review was that entirely built-up, long-settled Fulham wards (beyond Sands End) have not seen population growth whereas the north of the borough, with many more brownfield sites to regenerate, has swelled - with a consequent shift in voting power from Tory areas to Labour.

Labour was very happy with the new boundaries but, as we've seen in respect of the Brook Green and Avonmore results, this Labour landslide was not delivered by a behind-closed-doors bout of boundary-rigging but by the voters themselves. If the Conservatives cannot win Brook Green, cannot win Avonmore and cannot win Ravenscourt that's down to voters, not boundaries. Grove should on all socio-economic metrics be a Conservative ward. Addison should be competitive, not the safest Labour ward.

In Fulham Lillie includes the large Clem Attlee council estate but the far bigger contribution is the West Brompton grid of lovely roads like Walham Grove and Tamworth Street, and where huge Conservative-approved private housing developments have sprung up. In Sands End. if the giant riverside developments coupled with the gentrified terraces off Stephendale Road are insufficient to outvote the council estates plus the housing association blocks in Imperial Wharf and whatever residual Labour support is left in the workers cottages of Sands End, that is a remarkable repudiation of 21st century Conservatism.

Hammersmith constituency is now notionally safer Labour than Holborn and St Pancras or Croydon North, or the constituencies within Greenwich, Hackney, Lewisham, Southwark, Lambeth, Islington or Waltham Forest boroughs and on a par with Tottenham.

But here's the most extraordinary statistic of all: in 2026 the swing required for the Conservatives to regain a majority in Hammersmith and Fulham is greater than they need to win Hounslow, Ealing, Greenwich, Merton or Brent. This makes little sense viewed from a conventional approach to understanding politics, but then perhaps neither does Walsall or Dudley having comfortable Conservative majorities these days.

It may well be the case that the Tory vote is substantially, artificially depressed by the very specific issues Conservatives face in boroughs like this and Wandsworth - and that any sustained national revival or gradual fading of Brexit and Boris may produce a more substantial rebound of their fortunes here. But a rebound significant enough to make the Conservatives competitive again? That would appear, at best, to be a very long term project.

Haringey

Very little changed in Haringey - with boundary changes being the principal reason for that. Here in Haringey the Lib Dems fell victim to one of the factors that hurt the Conservatives elsewhere: that the wards they represent are stable, fully planned and developed communities with little potential for adding housing and thus growing.

In contrast, there are plenty of old factories, warehousing sites and mid century council estates targeted for regeneration on the Tottenham side of the borough. The boundaries of the Lib Dem wards of Alexandra Park and Muswell Hill were barely altered but both lost a councillor each.

Some two-councillor wards were created in Tottenham but for the opposite reason: population growth, as well as to better reflect the South Tottenham neighbourhoods. This helped the Greens as their best finish in 2018 was in St Ann's, now broken into two smaller wards. They pulled off a near 10% swing there but still lost.

Haringey Labour prior to the 2018 council elections had been somewhat taken over by the hard left. The professed motivation behind the Left takeover was "regeneration" plans for a number of the borough's council estates and the perception that Labour under Claire Kober's leadership had ceded far too much to private developers while displacing council tenants.

Some of the estates targeted were in chronically poor condition but others were perfectly decent: they were just land in council ownership that could be redeveloped to higher density, growing the council's tax base and helping meet the Mayor of London's housing targets. Kober and many of her cabinet were either deselected or quit, and this divisive battle was noticed by not-so-left-wing voters.

In 2018, a year when Labour surged across London, the party lost six seats to the Lib Dems who'd been on a steep decline since Lynne Featherstone lost Hornsey and Wood Green constituency in 2015. But Labour's loss of seats was not matched in votes: their share rose nearly ten points, almost entirely limited to their safe Tottenham wards, while they floundered in the Lib Dem targets. It's reasonable to ask whether the passions of middle class Labour activists in the west against "regeneration" were sharer by actual Labour voters in the east, plenty of whom had to live in pretty poor council housing.

The 2018 to 2022 term was therefore about the left consolidating control of the group and beginning to demonstrate the different priorities - especially over housing - that the upheaval had all been for. And, although things were quite as brutal as they had been in the previous term, they were hardly smooth going.

First, Ishmael Osamor - the son of Edmonton MP Kate Osamor - resigned having been caught with Class A drugs at a music festival. Then Barbara Blake, a very long-standing Labour member who had been deselected as a candidate in one ward but chosen in another was expelled during the peak of the Brexit turmoil for sharing tweets from the Change UK group of Labour and Tory outcast MPs.

With the controversy that raged over Haringey becoming the first "Corbyn Council" in 2018 having receded somewhat, the Labour tide also came in a little on the Hornsey side of the borough, giving them a seat in 2-councillor Alexandra Park and Muswell Hill, and two in 3-councillor Fortis Green and Crouch End. As a result Labour increased its majority to 43 seats, their biggest since the near-monopolies they won in 1994 and 1998.

Perversely what happened was the mirror of 2018: Labour gained seats but its vote share fell: down from 57 to 53%. But Lib Dems were also down two points. For the third election in a row the Tories failed to attract even one in ten votes and barely that in their once best, now least awful, ward: Highgate.

Most of the decline in Labour and Lib Dem shares benefitted the Greens who polled 16% borough-wide: their sixth highest share in London. But as other opposition parties have found throughout the years, it is impossible to turn votes into seats in Tottenham: they simply translated into some decent second places. The Greens finished with shares higher than 20% in eight wards but, beyond St Ann's, two of their next best shots are Lib Dem-held: Highgate and Crouch End - seats they surely wouldn't decline but which won't dent Labour's vice-like grip on Haringey one bit.

As the Lib Dems have declined their vote has migrated to the Greens - actually helping Labour as it has. So while the Lib Dem hold on the affluent west-side wards becomes more tenuous (they held Highgate with just 38% while Labour polled 30% and the Greens 21%) they poll nearly 40% in St Ann's but come away empty-handed because there is no similar split in the vote there (Labour polled 53%). In Seven Sisters the Greens took 20% but Labour 65%. In Tottenham Central: 22% Green, 62% Labour.

The Labour vote in Tottenham is as solid as in Merseyside or Manchester. They polled 53% borough-wide but 62.5% in Tottenham (46.2 in Hornsey and Wood Green). Several of these wards typically produce the largest Labour shares in London though the party slid slightly this year: 71% instead of 81% in Northumberland Park; 68% not 75% in Tottenham Hale; though 78% instead of 69% in West Green.

Their only weak ward here is Harringay covering the ladder of streets that climb up the middle of the borough, with the New River streaming down the centre. Here there was a swing to the Lib Dems as Labour's vote fell over thirteen points, mostly benefiting the Greens and Women's Equality Party (they polled 9%). Nonetheless, Labour was still 600 and more votes clear.

The Labour Group remains divided with suspensions and readmissions rife throughout the term. In 2021 Momentum-backed council leader Joe Ejiofor lost the leadership by one vote to Peray Ahmet. Subsequently Ejiofor was barred from standing in 2022; either a case of revenge or a justifiable decision following an Ombudsman's finding against him over one of the regeneration schemes he halted as leader.

It would take a swing of less than 4% for Labour to win all bar one seat, and of 7.6% to sweep all 57 for the first time ever. A similar swing the other way would cost Labour twelve seats and the Lib Dems would need a massive 23.6% swing to gain a majority of just one seat.

Harrow

Despite gaining Barnet, Wandsworth and Westminster, Labour ended up with no net gains in London because they also lost Croydon, Tower Hamlets and...Harrow.

Labour had been slightly jittery about Harrow for months prior to the 2022 elections but helpful boundary changes - which increased the party's majority from an actual seven seats to a notional nine, and the ongoing slide of Conservative fortunes in the capital, were widely expected to see the party through another election.

But there were entries on the negative side of the ledger too, like deeply unpopular council decisions, especially around Low Traffic Neighbourhoods and fraud in highway contracts. The success of Conservative Harrow East MP Bob Blackman retaining his seat in 2019 despite the ongoing shift to Labour in London also suggested that demographics in parts of Harrow were not functioning the way Labour had come to expect. Those characteristics had turned seats like Ealing North, Brent North and Harrow West (and at one time, Harrow East) into Labour constituencies - but had, at best, stalled.

The boundary review in Harrow was radical insofar as there was a big reduction in councillors. Eight seats were abolished. This had a big impact on ward boundaries, compounded by sizeable projected population growth in the centre of the borough and the introduction of several 2-councillor wards in a borough that had, until now, a uniform 3-member warding pattern.

Labour had seats in Harrow on the Hill, Rayners Lane, Roxbourne and West Harrow abolished. The Conservatives saw their seats deleted in Belmont, Canons and Hatch End. Split Kenton West also lost a seat and, as the Conservatives won the third seat in 2018 let's add that to their tally. A new 2-councillor North Harrow ward was created, but that was essentially the successor to marginal Headstone North which had three Conservative councillors in 2018, so that counts as a fifth lost seat for the Tories.

Meanwhile, the population growth in the middle of the borough created an extra Labour seat here. Wealdstone South is the new ward but one of its two seats is contributed from the old 3-councillor Wealdstone, so only a gain of one. Hence, the boundary changes cost Conservatives five seats and Labour three, net.

Yet despite that notionally larger majority, Labour could not defend it. And it was specifically a Labour problem: the Conservative vote across Harrow rose just 0.3 points. Labour lost 6.3 points of support, almost entirely to other parties (the Lib Dems went up 0.2 points). The Conservatives gained three seats and Labour lost eleven when, as we've just analysed, it was the Conservatives who should have suffered heavier losses from the boundary review.

Labour's core problem was that the slump in its vote was not evenly distributed across Harrow. Had it been they might have retained control. There was an 18% swing in Centenary ward (the reurrected name of Queensbury). That ward hadn't elected three Conservative councillors since 1990. In next door Edgware, there was a 13% swing from Labour: enough to give the Tories two seats. One of the new councillors was Nicola Blackman, wife of the local Tory MP. Kenton East swung by 9%: the first time ever that this ward has elected three Conservative councillors. And Kenton West, traditionally the more Conservative-leaning of the Kenton wards, swung by 4.5% - more than enough to oust Labour's Ajay Maru.

These wards have one thing in common: they are all in the Harrow East constituency - and they all have large, pretty affluent Hindu and Sikh populations. Labour lost a bunch of votes in Harrow West wards; just not enough (Rayners Lane being the exception) to cost them seats on this side of the borough. Labour's vote fell eleven points in Greenhill - they just clung on; in Harrow on the Hill by twelve points - they just clung on; in Headstone (the successor to very safe Headstone South but with a Conservative-leaning chunk from abolished Headstone North added) by twenty two points - they

just clung on; and in Roxeth by eleven - they more easily retained this safe ward.

In contrast there were swings to Labour in the safer Conservative wards. Even in this borough that bucked the trend on election day, Conservative voters in Conservative wards showed themselves the least satisfied with Boris Johnson's government. Pinner South swung 9% from Conservative to Labour: the third Tory councillor holding on by just 369 votes in a ward that has never elected Labour. Pinner swung by 3%, Hatch End by 6%, Stanmore and North Harrow (comparing it with Headstone North) by 4%. For a change, given in how many safe Labour wards the Conservatives improved in 2022, these Labour advances had zero impact in these safe Tory wards.

The new wards in Harrow no longer align perfectly with parliamentary boundaries but, give or take, there are now just four Labour councillors in Harrow East wards and just three Conservative councillors in Harrow West wards (no Labour councillors in the Pinner contribution to Ruislip, Northwood and Pinner constituency). In Harrow East the Conservatives polled 54% to Labour's 36%; and in Harrow West Labour polled 43% to the Conservatives' 32%.

Harrow West was once the more Conservative constituency (albeit because it used to include the three safe Pinner wards) but it is not simply a coincidence that the wards the Tories gained were nearly all within a Conservative constituency: it is clear that having the MP boosts their party locally. Gareth Thomas, the Harrow West Labour MP, couldn't prevent Labour losing a shed-load of votes in "his" wards, but he did perhaps limit the losses. Likewise Bob Blackman, who appears to be an assiduous constituency MP, probably helped aggravate Labour's losses in the eastern wards.

This is the point where we have to discuss the Conservatives' advance among Hindus. This is a tricky topic to talk about because there's no empirical evidence - no actual, quantifiable proof, that Labour lost Harrow because they are losing support in Hindu neighbourhoods. We cannot prove that it was Hindu votes in wards with sizeable, but not majority, Hindu populations that produced Conservative gains. Those of us who look at these things are certain it is for that reason and there are plenty of assertions about what's happening but there is no hard evidence because we have a secret ballot.

Joshua Neicho, in a 2020 post for the OnLondon website suggests a whole range of issues explaining Labour's decline among Hindus; in particular what he calls Conservatives pandering to Hindu nationalistic and religious values over Kashmir and the perception that Labour is much more the party of Muslims.

Other reasons cited include the values of hard work ingrained in the Hindu community; of self-advancement that have been reflected in the Conservatives, and the increasing prominence of MPs of Indian origin at the top of the party: Rishi Sunak, Priti Patel, Suella Braverman and Alok Sharma. Ameet Jogia, a Harrow councillor, also suggests that Boris Johnson's trip to India - the first British Prime Minister to visit Gujarat just prior to the council elections, also helped energise the Hindu vote.

What isn't touched on, however, is the simple possibility that we are now long past the first wave of significant immigration from the Indian subcontinent; long past the days of corner shops being taken over by hard-working but quite poor Indian families subjected to the hideous, often violent, racism that dogged London in the 1970s. These neighbourhoods are now second, third or even fourth generation and are far wealthier than their forebears. That affluence equals a Conservative voter is no longer true, especially in London, but perhaps it may be truer among some of our ethnically diverse communities?

The problem Labour has with its wider base of black and ethnically diverse constituents in London is, I believe, considerably wider than Harrow and not just confined to Hindus. It's simply that Harrow, with its electorally powerful Hindu community living in marginal wards is very much more visible, whereas similarly large swings away from Labour in very much safer wards from Hounslow and Ealing across to Newham aren't so obvious.

The Conservatives now have a majority of seven seats on the council. Plenty of seats - on both sides of the aisle in the council chamber - are marginal. A further 5% swing to the Tories would net them another seven seats; a 5% swing back to Labour would give them seven seats and a majority also of seven. Labour need just a 2.3% swing to regain a majority.

Havering

For the first time ever, Havering has a Residents Association-led council supported by Labour. This is quite a feat given the internecine bickering between different sects of the Residents' clusters, the switches between parties, the changes in designation, the resignations and reconciliations, all of which are self-absorbed and baffling to anyone trying to understand their factionalism.

The Conservatives slid to just 30% of the vote borough-wide, down from 33% in 2022. This cost them two councillors net, translating into two losses in Emerson Park, two in Hylands and one to Labour in the new St Albans ward, but offset by three rather remarkable gains in Rainham and Wennington (Wennington being the scene of one of the summer heat wave flash-fires that destroyed some of the village). It's remarkable because the Conservatives have never before won here: it's voted SDP Liberal Alliance, Labour and Residents Association but never Conservative until this year.

Labour is still not functioning at anything like its former self of twenty or more years ago but they at last, at least, managed to win the six seats that in their entirety cover the Harold Hill estate (a third ward, Harold Wood, covers a southern portion but Labour has no chance here). How they ever managed to lose such formerly massively Labour wards is a question psephological historians can inspect in future, and their hold on Gooshays, the outer of the two, is still tenuous: they won just 34% here.

But to these two Harold Hill wards they added the new creation of Beam Park, formed from a chunk of the old South Hornchurch (which has been broken into three); and one seat in the also new St Albans ward, which is central Romford. They were also quite close in the new Rush Green ward (the old Brooklands) and might fancy their chances, still, in shrunken two-councillor South Hornchurch - though the Independent Residents are quite a long way ahead there.

The Conservatives dominate still in the wards that comprise Romford constituency, despite that one Labour councillor in St Albans, while the Residents Associations extended their grip on the wards comprising Hornchurch and Upminster: just one Conservative seat in Hylands and the six Labour councillors in Harold Hill denying them every seat in that constituency. The now ten council seats that comprise the Havering side of the Dagenham and Rainham constituency break 3 Conservative, 2 Labour, 3 Residents Association and 2 Independent Residents Association. Make of that sprawl whatever you will.

I say the Conservatives dominate in Romford - and that is true in terms of seats but the Residents Association is drawing quite close in three wards in that corner of Havering: Mawneys, Marshalls & Rise Park (the old Pettits), and St Edward's (most of Romford Town). They will also be fighting hard to regain Rainham and Wennington: these four wards contain more than enough seats to win an overall majority for the first time ever in 2026.

The Conservatives are also hardly out of the race though they usually struggle to remain competitive in Residents Association wards once they've lost them. Their easiest regain is the Labour seat in St Albans, then the two in Hylands. On paper at least, Gooshays is their next best ward - and the one that gives them a majority if they can win two of its seats.

The Tories have won seats in Gooshays in 2006 and 2010, with the third going to the BNP and then Labour, before UKIP seized all three in 2014. But even though this area is culturally way out of step with today's Labour Party there is still an intrinsic loyalty to it in this working class ex-GLC estate. The Tories need a 5.2% swing to win Gooshays and the borough making Havering their sixth easiest target after Westminster, Sutton, Wandsworth, Barnet and Croydon.

Because of the Residents Association presence, unique for a London borough, and because it is demographically and culturally far removed from a typical London borough, Havering doesn't necessarily swing according to the highs and lows of national political parties.

Hillingdon

Hillingdon Conservatives inflicted on themselves a remarkable act of electoral self-harm in the borough's boundary review by proposing a cut in the council's size from 65 seats to just 53. Every single one of those twelve abolished seats transpired to be Conservative-held; and then on top they lost a further four to Labour, leaving them with an insecure majority of seven.

Such self-mutilation might - just might - be justified if it significantly entrenched their majorities in those seven seats that stand between Hillingdon and a Labour majority, but the Tories didn't achieve that either.

One of the big risks during a boundary review is that warding patterns are based on the political circumstances of the time and not with much regard to what might happen in far less hospitable years for the party. This is what happened to Labour in Hammersmith and Fulham in 1978 when they only paid heed to where they had slipped a little in the 1974 elections and didn't consider what might happen in a rapidly gentrifying borough come 1978. Hence, a 1974 Labour majority of 36 was swept away and eight years of Conservative-led administration followed.

Of course, guessing how electoral fortunes might wax and wane is not easy. Hillingdon Conservatives, for example, could not have foreseen the 15% swing to the Greens in Ickenham - once one of their very safest wards in London. It's still pretty safe, but won't be if there's anything like that slippage next time. They may not have foreseen that Yiewsley - the best Tory ward in John McDonnell's Hayes and Harlington, would swing 16% to Labour this year. Or Hillingdon West, more or less the old, safely Tory Uxbridge North, would swing 11.5% to Labour, putting that ward in play in 2026. Did they regard Uxbridge (successor to marginal Uxbridge South) or Colham and Cowley (the former Brunel) as safe enough after their easy 2018 wins? They aren't any more. Hillingdon is now on a precipice - and it needn't have been.

That said, it's as easy to retrofit the 2022 results onto the old Hillingdon wards as it is to project how the new wards would have voted in 2018, and the result isn't hugely better for the Conservatives: they'd probably have won 36 to 29 rather than 30/23. The difference, though, is that the seven seat gap would have been harder for Labour to traverse in 2026 on the larger council: Uxbridge North would have been safer than Hillingdon West and Brunel was more challenging than Colham and Cowley. Only four Conservative seats would be vulnerable.

Hillingdon contains the parliamentary constituency of Boris Johnson: Uxbridge and South Ruislip. The good news for him and his party is that the Tories easily outpolled Labour in the wards comprising this constituency, 51.6% to 34.3%, give or take what Boris won by at the 2019 general election. But this is half what they won by in 2018 so perhaps not quite the good news it first appeared.

The Conservatives win Hillingdon because they have a lock on the borough's northern wards: the communities of Harefield, Northwood and Ruislip. These wards are as safe for the Tories as pretty much all of Hayes, Yeading and Heathrow are for Labour in the south. Central Hillingdon is much more mixed though still leans Conservative except in their poorest years - and 2022 actually wasn't one of those for this Leave-voting borough as London (or perhaps I should say: Middlesex) becomes Buckinghamshire.

The Conservatives finished 6.5% ahead of Labour borough-wide, down from 15.4% in 2018. So while I am critical of the Conservative approach to the boundary review, it has to be recognised that any party losing more than half its lead from one election to the next is going to surrender seats. But as I said earlier, a warding proposal needs to consider not just which seats can be won in a very good year like 2018, but also in a not so good year like 2022.

Hillingdon is a long-established two-party borough. The Lib Dems have been able to win Hillingdon East ward, Ruislip Manor and the now abolished Cavendish, but haven't won any seats here since 2006. Their best ward in 2022 was Northwood, but their 17% share came up against the Conservatives' 61% so that's not a very promising target for them. They only fielded seven candidates in Hillingdon anyway.

The Greens polled 33% in the now single-councillor Harefield ward and part of that surge may have something to do with residents of that isolated village right on the edge of London hating the fact that the boundary changes split their neighbourhood in two. The problem was that Harefield is too large a settlement to be represented by one councillor but far too small to be represented by two - with the result that a (Conservative-backed) proposal to slice off the southern bit of the area and put it with Ickenham, several miles away was adopted.

Or, this could be a genuine surge of enthusiasm for the Greens who are able to better campaign in a small (its electorate is almost exactly 4,000) ward and gain a higher profile. The party also polled 22% in neighbouring Ickenham and South Harefield but the Conservatives still won both wards comfortably.

To gain Hillingdon in 2026 Labour needs to win the second seat in split Charville and the two Tory seats in split Uxbridge. Those three get them to within a seat of victory. Labour finished just 131 votes short of the third Colham and Cowley seat and could easily win the whole ward on a modest swing. They are also just over eleven percent behind in Hillingdon East ward, and fifteen percent behind in Hillingdon West. That is realistically their ceiling in Hillingdon: they actually fell further behind in South Ruislip which they have held in the past and then we are into the safe Conservative wards of the north. But this battleground of eleven Tory-held seats is plenty for them to contend with, and give themselves a shot at their first majority in Hillingdon in over thirty years

Hounslow

The Conservatives showed considerable resilience in Hounslow. Going into the election some observers expected this to be the year, finally, when the three Chiswick wards would break with that party - possibly irrevocably. This prospect was heightened by the fact that little new housing development was happening in Chiswick relative to the rest of the borough, meaning that in the boundary review the Chiswick wards would either lose councillors or have to expand into Labour Brentford, either option a threat.

In the event the wards were expanded with Turnham Green ward no reaching up to the edge of Gunnersbury Park. In theory this should've made it the most vulnerable of the trio but the Tories squeaked a win there (holding the third seat by 29 votes), only to lose one in Chiswick Riverside. Perhaps the expansion of Chiswick Homefields west beyond Duke's Meadows transferred too many Conservative votes out of its neighbour, though it also expanded west past Kew Bridge to grab some of the new-build Brentford riverside blocks. What a ward with Strand On The Green within it is doing electing a Labour councillor is one for the Tories to ponder.

If that were the sum of the changes in Hounslow, even that would have been viewed by the Conservatives as a decent outcome in this very challenging year for the party. Indeed, it's a little ironic that Tories in Remain-voting Chiswick emerged virtually unscathed while Leave-voting Eltham almost eliminated Conservative representation in Greenwich. However, there was better news for Hounslow Tories. At the other end of the borough, they successfully defended the Feltham North seat they won in a 2021 by-election and gained a seat in Hanworth Village (the old Hanworth ward). So, net, the Conservatives actually finished a seat up.

Labour's majority increased though because the size of the council grew following the boundary review. And that growth, alongside the fact that the Conservatives did not make any impact in the once competitive wards of Osterley and Spring Grove and Hounslow South, meant that despite their losses on the edge of London, Labour's grip tightened a bit on the borough.

But again, that's only true in terms of seats. Hounslow did not elude the significant drops in Labour support in safe wards - especially safe wards that are ethnically diverse, any more than it did in Ealing or Brent or Harrow. Those falls were more visible here because it cost Labour two seats in wards the party should not be losing in a year like 2022, but it was not confined to Feltham and Hanwell.

Labour's vote fell fourteen points in Cranford, sixteen in Hounslow Heath, twelve in Hounslow West, ten in Heston Central, nine in Heston East and eight in Heston West. These are all wards with very large Hindu and Sikh communities, not especially affluent and heavily dependent on jobs directly and indirectly created by Heathrow airport. And again, it's easy to overlook these drops in Labour support because the wards are so safe the party was not under threat even after losing such a large amount of votes.

Quite a lot of Hounslow was either left entirely alone in the boundary review or only altered marginally, though councillor numbers changed. But Hounslow (the town, not the borough) is where most of the population growth is occurring, with one whole new ward emerging from the old Hounslow Central. That alone meant two new seats for Labour though they didn't win the new Hounslow East by all that much: it's as marginal as Hounslow South - though that's not especially marginal at the moment.

Brentford was the other part of the borough that has seen a lot of new development, around the creek and along the riverside. The old Brentford ward was heavily over-represented so, as well as losing Gunnersbury to a Chiswick ward, two 2-councillor Brentford wards were created and a further chunk was moved into Syon ward. Of the two, Brentford East produced a very large Labour majority (it does, after all, include the [very] high-rise Green Dragon estate) while West was a bit closer, the Greens finishing second there.

Islington

That third headline of the 2022 London elections: of the failure of the Greens to break through in numbers of any consequence, exhibits itself in Islington. This despite the Greens finally nailing down all three seats in Highbury ward (the old Highbury East) and polling 22.5% borough-wide, their third-best performance in London (behind Lambeth and Hackney).

The Green problem...well, they would say it was the first past the post electoral system - but their problem within the system we have is that their vote in Islington is evenly spread: they need pockets of strength to turn votes into seats. Despite that borough-wide share of 22.5% they exceeded 20% in just four wards. And in two of those four, they were more than thirty points behind Labour.

You see, Labour's support is also pretty evenly spread, but at a vastly higher level: Islington's dominant party polled 53%, a considerable fall from the 59% they won in 2018 but still overwhelming. Even more overwhelming ward by ward: Labour polled in excess of 60% in six wards, between 50 and 60% in seven and under 50% in just four. This is not a competitive borough and the Greens made very little progress in changing that reality.

Beyond Highbury ward, the Greens were close in only one other: Tufnell Park, the renamed but unaltered St George's ward. The Lib Dems also have one ward in play: St Mary's and St James, though they haven't won here since 2002, while the Conservatives are not completely out of the picture in St Peter's and Canalside, where they polled 22% (double their borough-wide vote share).

Whereas an assortment of opposition parties can be a threat, having to fight different opponents in different wards, in Islington the assortment is all jumbled up: it is not all that obvious who the principal opponent is and, even where it's slightly less opaque there is little evidence of supporters of other parties being willing to unite behind a clear challenger. So Labour's dominance appears even stronger though in ward after ward, their share of just over 50% of course means that just under 50% oppose them.

Kensington and Chelsea

At first glance, the swing away from the Conservatives that turned neighbouring Wandsworth and Westminster Labour did not touch Kensington and Chelsea.

Just one seat changed hands: the Lib Dems gaining a second councillor in Earls Court. Not only did Labour miss its top target of Chelsea Riverside but second-nearest Holland swung away from them and they suffered some big adverse swings in their North Kensington fortress wards of Dalgarno and Golborne. But, beneath the surface, the corrosion of once overwhelming Conservative majorities was real enough.

The Lib Dems performed strongly not just in Earls Court (though their failure to win a clean sweep there was a disappointment for them) but in the adjoining wards of Courtfield - where there was a 20% swing, and Redcliffe - a near 15% swing. These wards have swung substantially before: Courtfield in a 1987 by-election and Redcliffe in 2006 - they swung back at the subsequent election. The Lib Dems also narrowly missed out in the ever-shrinking Notting Hill ward of Pembridge where there was a 13% swing. And the main reason Labour missed out on Chelsea Riverside was a seventeen point increase in the Lib Dem vote there too: Labour was narrowly down.

The Conservatives have been haemorrhaging votes in Kensington and Chelsea for a while now. That principally has manifested in a rapidly declining electorate as eligible voters have been replaced by foreign (and indeed absentee) occupants with no voting rights here. As an example of that phenomenon, just three elections on from the Royal Borough's most recent boundary review - the principal point of which is to ensure each councillor represents the same number of constituents, 3-councillor Queen's Gate now has just 4,714 electors while 2-councillor Dalgarno has 4,547. Pembridge has just 3,569 electors: an absurd over-representation, especially when contrasted with single-councillor Darwin ward in Bromley with 4,241, single-councillor Harefield Village in Hillingdon with 4,093, or single-councillor Poplar in Tower Hamlets with 4,940.

But it's about more than just a shrinking electoral register: they are losing votes too; something that's been hidden by the sheer scale of the majorities they have held.

The most obvious decline has been in Holland ward, where they won 66% of the vote in 2006, 58% in 2010, and 49% in 2018, rallying slightly this year to 53%. But look at fortresses like Campden: 68% in 2010, 51% in 2022; Norland: 64% in 2006, 49% in 2022. Even ultra-safe Queen's Gate: their vote down fifteen points in just one election. Until this year the Tory share in Queen's Gate had only fallen below 70% twice. Now it is barely 50%.

Labour has too much confidence in its capacity to win Chelsea Riverside: yes, it contains all of the old South Stanley ward which was nearly always Labour. But the ward's boundaries have now twice extended east along the riverside to include almost all of the old Cheyne ward. The last time that ward was contested, in 1998, Cheyne voted 72% Conservative. In other words, Labour may well have maximised its vote from the Cremorne and Worlds End estates to get relatively close, but made no inroads at the Cheyne end: the Lib Dems almost certainly mopped up the non-Tory votes there.

It is still ludicrous to envisage any party other than the Conservatives winning a majority in Kensington and Chelsea but it is just - just - possible now to see a path to something until now unthinkable: the Tories losing their own majority. The Tories are eleven seats from this seismic occurrence with, all of a sudden, fifteen that could conceivably fall from their grasp. Those would be the remaining seat in Earls Court, three in Chelsea Riverside, Redcliffe, Courtfield and Holland, and the two in Pembridge. Note that the opposition parties don't have to win all of these seats: they could pick off the most vulnerable Conservative councillor in some.

Such a feat is still gargantuan for many reasons: the incredible difficulty in getting access to electors who live in high turnover, hard to reach multi-occupancy dwellings or behind entry-phones and security gates. There is no reason to believe that London Conservatism will continue to decline, any more than there was to believe Labour was fatally compromised in 1987, when the party held just 23 of London's then 84 constituencies. And this is not, really, a swing electorate: the Conservatism of Kensington and Chelsea is deep and largely unbending - hence the party's resilience in such an inhospitable environment as 2022. What did happen this year is the veneer of utter impregnability, that survived even the "Grenfell" election of 2018 has been chipped.

Kensington and Chelsea now looks a bit like Westminster in, say, 2010: a comfortable Conservative majority that looks safe enough but may not two or three elections down the track. That said, there are sufficient differences with Westminster for that analogy to be fanciful: less council housing, far less Labour organisation, limits to the demographic change that can probably occur here and very simply the economic profile of too many neighbourhoods.

Kingston upon Thames

As goes Richmond, so goes Kingston...though not quite as spectacularly and without any electoral pact with the Greens.

Having recaptured Kingston in a landslide in 2018, shaking off the weighty electoral drag of the Lib Dems serving in the coalition government until 2015 and local MP Ed Davey serving in that cabinet, the Lib Dems increased their majority in 2022, leaving the Conservatives with just three councillors.

That in itself is very slightly less awful than the Tory result in Richmond but it was better in other ways too. Kingston's Lib Dem administration has made some unpopular decisions over the past four years, notably concerning the Kingston town centre redevelopment of a leisure centre and building on historic filter beds in Seething Wells.

Twenty of the thirty-two Lib Dem councillors (most of whom were first elected only in 2018) stood down. A higher attrition rate usually occurs after boundary changes as some councillors don't get selected in redrawn wards and some don't wish to start again somewhere different - but even taking that into account this was a huge number of departures and hints at the stresses within the Lib Dems. One councillor resigned from the group after barely 100 days objecting to the closure of the borough's last residential care home; another quit much closer to election day and stood for the Greens in St Mark's, almost winning.

So there was at least one ingredient in the mix in Kingston absent in Richmond, namely a lack of enthusiasm for the Lib Dem council, all the while the national headwinds damaged the Conservatives. What this meant was that while the headline result looked appalling for a Conservative group that had run the council just four years earlier, the ward by ward results weren't quite as bad. Hardly great, but not the catastrophic repudiation of Richmond.

If you just take the first four Kingston wards, alphabetically, as representative of the borough you might even expect there to have been a Tory resurgence. There were swings away from the Lib Dems in Alexandra and Berrylands (two of the three core Surbiton wards), Chessington South (notwithstanding a major Monster Raving Loony campaign there), and an inconsequential swing in Canbury Gardens.

If only the results continued in that vein for the Conservatives. But, as we've seen in other boroughs the Tories did worse in their best wards: losing their one seat in Coombe Vale and both seats in Motspur Park and Old Malden East (of which most comes from former Old Malden - ward boundaries here have been redrawn confusingly here). They came close to losing both seats in Tudor, the very affluent ward just below Richmond Park, and missed out on Old Malden (most of this ward came from St James's, not old Old Malden!) where former council leader Kevin Davis lost his seat.

The Tories were left with just two councillors in Coombe Hill (the ward lost a seat in the boundary review) and one in split Tudor, where the losing Tory had been photographed at the lockdown party London mayoral candidate Shaun Bailey had been forced to resign his GLA positions over.

The Conservatives can, to a degree feel aggrieved about how the cards fell against them in Kingston. Yes, their vote fell by four points to just 25% (by far their worst ever result - the Tory vote has fallen every election in Kingston since 2006) but the Lib Dem vote fell by five: there should, all things being equal, be a slightly enlarged Conservative opposition group in Kingston than one in danger of extinction.

Another factor present in Kingston but absent in Richmond is the presence of a fairly well-organised fifth party: the Kingston Independent Residents Group (KIRG), which contested eight wards this year, winning a seat in one: the new Green Lane and St James. Although some Conservatives regard KIRG as a party set up to further encumber their chances of success (initially most of the KIRG defectors came from the Conservative group) in wards where direct vote share changes with 2018 can be made KIRG appears to have drawn more votes from the Lib Dems than the Conservatives and, in the ward in which they won a seat, KIRG finished far ahead of the Tories: 37% to 11%.

KIRG's single-seat breakthrough sort-of ushers in a more pluralistic Kingston. The council almost ended up with Green representation after a 19.5% swing in St Mark's and Seething Wells ward nearly produced a shock. Unfortunately for the Greens, this was one ward where all three Lib Dem incumbents sought reselection and whatever personal votes they had amassed probably saved their seats for them.

Labour again fell short in Norbiton though the votes of the Lib Dem councillors here, including Ed Davey's wife Emily, crashed. Virtually none of this slide benefited Labour, marooned on a mediocre 26%. The redrawn Tolworth ward would have been comfortably Labour had it existed from 2002 but is now the safest Lib Dem ward in the borough: extraordinary for this working class enclave beside the A3. Labour did moderately well in Kingston Town (the old Grove ward), just snatching second place in a ward with a fairly large student vote. But they were still 500 votes short of winning despite the controversies over the Kingfisher leisure centre redevelopment.

There remain no other realistic opportunities for Labour despite Kingston being a far more diverse and considerably less affluent (though hardly breadline) borough than Richmond. The era when Chessington and parts of New Malden returned Labour councillors is long gone.

But let's return to the Tory plight, which I again assert is not as bleak as the massive Lib Dem majority implies. Of the eleven councillors with majorities of less than ten percentage points, nine are Lib Dems. Another seven have majorities of under twelve points. While in no way understating the difficulty of ousting Lib Dem councillors, that 6% swing would all but erase their majority, and 6% is not unachievable in happier national circumstances.

Not all those losses would be to the Tories: there would be one Labour councillor in Norbiton and a Green in St Marks, so the swing the Conservatives need to regain control is slightly larger: 10% exactly. But it is much better than the 15% swing they need to recapture Richmond.

Lambeth

For the first time in its history, Lambeth has no Conservative councillors. Tim Briggs, the only survivor from 2018, was only 144 votes short of retaining his seat in Clapham Common ward - yet he still finished fifth in what is now a two-councillor ward.

In fact these were pretty grim elections for any party activist not wearing a red rosette. The Greens in particular, having staged a minor breakthrough in 2018 by gaining five seats - the joint largest Green group in London (and the Lambeth lot did so without being gifted seats, unlike in Richmond), lost 60% of them - ending up with just two. The Lib Dems professed themselves to be delighted at winning three seats on the council again - their first since 2010 - but this is a party that once ran Lambeth and whose vote rose just 0.8%. It's not that delightful, really, is it?

Actually, very little changed in Lambeth, especially in vote shares. The Tories fell just 1% albeit to a pitiful 11.5%, Labour rose just 0.2%, and the share of all the other parties including the Greens fell by 0.1%.

What shook things up the most was a pretty radical set of boundary changes that broke up the uniform 3-member wards that had existed since 2002 and reintroduced several 2-councillor divisions in their place. Smaller wards should benefit opposition parties because it is more likely that pockets of support contained within larger neighbourhoods that vote differently can wield greater power.

Hence, the new 2-member Clapham Common and Abbeville was a better prospect for the Conservatives than the 3-member version they won a seat in last time. Yet they still lost. This only really applies to Labour and the Conservatives because their vote is typically more class-based and therefore tied to particular streets with specific types of housing tenure, whereas Lib Dem and Green support can basically pop up anywhere.

The LIb Dem gain in what is the old Thornton ward on a 28% swing looks bizarre at first glance: they hadn't won a seat in this ward for twenty years, while the neighbouring Streatham Hill East ward had been much more recently Lib Dem (2014) yet they came last with just 10% here. Much of the reason is that Thornton experienced two by-elections in the space of weeks in 2019 with Labour councillors (one of whom being the council leader) resigning to take up "better" jobs. The Lib Dems increased their vote by 24 percentage points in the first and by 31 in the second, losing both times but coming very close. They were able to maintain the momentum during the lockdown and come out the other side with a two seat gain. Clapham Common has also been a regularly Lib Dem ward.

They also did considerably better than they have in their last couple of attempts at winning Waterloo and South Bank - the former Bishop's, right at the top of the borough. Bishop's was the first ever Lib Dem ward in Lambeth but they lost it in 2014.

Bishop's is also the cautionary tale for relying too much on population projections to draw wards: hundreds and hundreds of voters were pencilled in to end up in this ward at the 1999 boundary review and they never arrived, leaving this the most over-represented ward in London for a couple of decades. The new Waterloo ward that replaces it is both geographically smaller and only has two councillors, while next door Prince's - where the population growth did emerge - has now been essentially split in two: the new Kennington and Vauxhall wards.

But the Lib Dems tanked in Oval ward, which was their top target in 2018: their vote fell by nearly seventeen points. Oval is another of the growing wards and has been heavily redrawn but now the Greens are second, not the Liberal Democrats.

The Conservatives, while losing Clapham Common, are still competitive there and also put in a surprisingly decent performance in neighbouring Clapham Town, though nowhere near decent enough to win. In fact they polled higher in Clapham Town than Clapham Common - the difference being Labour won a much lower share in the latter.

Much of Clapham Town is not that different from Clapham Common: very affluent, expensive terraces of townhouses. But the Conservatives struggle because the ward extends across Wandsworth Road to include a long chain of council estates that some mistake as being in Wandsworth. These include the high-rise Westbury Estate, just across the road from Wandsworth Town station and their accompanying bright blue tenement blocks. There are others. These inclusions in Clapham Town mean the Conservatives can only get close here in years when Labour is in government and deeply unpopular with it.

Those two Clapham wards are the sum total of Conservative prospects. They polled just under 20% in West Dulwich - the old Thurlow Park, not that long ago their best Lambeth ward, but they're nowhere close any more.

The Greens exceeded 20% in twelve wards, their best three being those they lost seats in this year: St Leonard's, Gipsy Hill and Herne Hill. But the Green problem everywhere else in inner London is true in Lambeth as well: where they have a decent vote, Labour has a gigantic one. Beyond those three wards the Greens are adrift by at least thirty percentage points in every ward in which they exceeded 20%.

The days when Lambeth led the pack that included Haringey, Brent, Islington and Hackney, of London's "loony left" boroughs are long behind us and politics has settled down. The Greens, especially, but all opposition parties, would very much like things to be much less settled because Lambeth is an unshakeably Labour borough again.

Lewisham

For the second election in a row, Lewisham returned a full slate of 54 Labour councillors, as well as re-electing Damian Egan as the council's mayor for a second term with 58% in the first round.

In fact very little shifted at all in Lewisham: Labour's borough-wide share rose by just 0.4% - still significantly below its highs of 60% in 1994 and 63% in 1971; the Tories dropped by one percentage point to 11.3% (not their worst but at these dregs what does that matter?) and there was a slight shift from the Greens and other Lewisham small parties to the Lib Dems - between them they share about 35% of the local election vote.

Labour's vote is distributed remarkably evenly across Lewisham and especially so in the marginals, and this despite the non-Labour vote slowly aligning behind different challengers in different wards. Labour easily fended off the Greens in top target Brockley - even managing a swing to them there. But they nearly lost to the Greens in Ladywell, their second target, and there were strong Green challenges in Crofton Park and, somewhat more distantly, Forest Hill and Telegraph Hill. The Greens also won second place in the mayoral contest, taking 16% and were runners-up in most Lewisham wards.

The Lib Dems continue to challenge in Blackheath with perennial candidate Chris Maines (the former leader of Bromley back in 1998) finishing just over 200 votes behind there. They also did well in Catford South and Lee Green.

The Conservatives fell further back in their only realistic target of Grove Park, in the south east corner by Mottingham, but while they aren't entirely out of contention there they haven't been able to win a seat since 2010. The Conservatives also improved markedly in the cottage council estate ward of Downham, along the boundary with Bromley borough - somewhat ironically given the wards on the Bromley side of that boundary swung considerably away from the Conservatives this year. Downham remains far beyond the Tories reach, but it is the sort of area - a largely white working class council estate - that is becoming less ensorcelled with their long-term party (having been a Lib Dem ward for quite a while).

Boundary changes in Lewisham were relatively minor, with a recreated Rushey Green ward replacing Whitefoot, and two new 2-councillor wards in the north of the borough; Bellingham also losing a seat.

There is potential for Labour to lose several seats in 2026 but only if their vote slides by a bunch of percentage points - and that's only likely if they're in government nationally.

Merton

Back in the day Merton was the first London borough to indicate the dramatic swing away from the Conservatives that began in the 1990s. Labour gained the borough in 1990: that year when Brent and Ealing fell to the Tories and Labour suffered huge losses in Hammersmith and Fulham, Wandsworth and Westminster.

Up until that point, the Conservatives had been competitive right across Merton, with massively safe fortress wards in Wimbledon but prospects too in Mitcham wards like Figge's Marsh, Graveney and Pollards Hill. The days when Conservative MP Angela Rumbold could get herself elected in the Mitcham and Morden constituency (albeit in part due to a split Labour-Alliance vote) are bygone.

At the 1997 general election, Labour regained Mitcham and Morden by a country mile and also swiped Wimbledon too (another constituency that, whilst hardly a naturally progressive seat also was made to appear more Conservative than it was by the opposition splitting the non-Tory vote almost evenly; they were essentially the same size. Merton council swung much further to Labour in the 1994 and 1998 local elections: the Tories reduced to just ten and twelve councillors respectively: all of them bar Lower Morden ward in Wimbledon.

Wimbledon swung back to the Tories at the 2005 general election but it was a measure of how little traction the party had at the Mitcham end of the borough that in Labour's absolutely dreadful 2006 council elections the Conservatives were unable to win an overall majority. They took power because the then three Residents Association councillors in Merton Park recognised that the Conservatives had won the most seats, by a fair distance the most votes, and that an alternative Labour minority administration could only be kept afloat on the mayor's casting vote: four years of political attrition that was not tempting.

Labour failed to regain a majority in 2010 but this time the situation was reversed: Labour had most councillors (just) and more votes (just), and two Lib Dems had won seats. A larger number of councillors held the balance and Labour was able to return to power.

Although Labour did regain their majority in 2014, then and in 2018 they never managed to repeat their landslides of the late 1990s, Majorities of 10 and 12 seats were plenty but not overwhelming. The difference was because Labour had lost huge ground at the Wimbledon end of the borough: first losing enough votes to the Tories to be prised out of the parliamentary seat, but then watching as a chunk of their vote moved back to the Liberal Democrats, just as it had in the 1980s.

At parliamentary level these years following the defeat of the Labour government in 2010 saw a battle royal for second place, not really troubling the Conservatives. The Lib Dems were shock runners-up in 2010 (just one election after Labour's Roger Casale had been ousted as MP in 2005); and then Labour regained a very distant second in 2015. Then in the first Corbyn election of 2017 Labour surged back to competitiveness, only to suffer a probably long-lasting decline in 2019.

The long-term Lib Dem council target in Wimbledon was traditionally Conservative West Barnes - the slightly less grandiose end of Raynes Park. Now the south Wimbledon wards of Dundonald and - more surprisingly because it is less suburban - Trinity were starting to produce substantial Lib Dem votes. Both had been Labour-Conservative battlegrounds. Labour ceded second place to the Lib Dems in Dundonald in 2010 and in Trinity in 2014. Once the Lib Dems were established as the Conservatives' main opponents the Labour vote withered.

Then came the 2016 EU referendum in which Wimbledon is projected to have voted 70% to remain. Even with a staunch Remainer, Cameron Conservative in local MP Stephen Hammond, this created huge problems for the Tories in Wimbledon. Indeed the Tories suffered a sort-of double-whammy in Merton because, while they were badly damaged by the size of the Remain vote in Merton, they got very little electoral benefit from the much larger (45%) Leave vote in Mitcham and Morden.

At the 2019 general election the Lib Dems leapt from third almost to first, finishing just 628 votes behind Hammond. Clearly they had done much better than just polling decently in West Barnes, Dundonald and Trinity.

Although this result was put down to a collapse in the Conservative vote, the Lib Dems took a much larger share of their gain from Labour than the Conservatives. Labour's vote dropped by 6,000 while the Tories lost just over 3,500. Regardless from whence it came, the Lib Dem surge evidently meant the Conservatives were under real threat at the next elections, be they national or local.

Lib Dems further challenged the two-party system in Merton by gaining a (formerly Labour) seat in the suburban Cannon Hill ward at the depth of Theresa May's frantic and humiliating thrashing around for a Brexit deal in 2019; this ward is now a three-way marginal.

Boris Johnson's divisive premiership was the perfect grist to the Lib Dem mill in the run-up to the 2022 council elections. Boundary changes were something of a mixed bag for both parties, with Dundonald and Trinity effectively amalgamated to the Lib Dems' detriment but Raynes Park made much weaker for the Conservatives and a Tory seat deleted in their supposedly safe Hillside ward.

A new Wandle ward around the Wimbledon Stadium: an industrial area being "regenerated", might normally be a three-way marginal and should have served to make Wimbledon Park ward - the old Durnsford - even better for the Tories. Elsewhere, all the safe Labour wards retained their 3 councillors, while Merton Park - the Residents Association ward - lost one.

These changes seemed to entrench Labour. Had the new boundaries been contested in 2018 the result would have been 27 safe Labour seats, eight marginal Labour seats, eight safe Tory seats, seven marginal Tory seats and six Lib Dems: 35 Labour versus 22 non-Labour compared to the actual 34-26 split.

But the realignment of Wimbledon seen first at the 2019 general election continued through to the council elections. The Lib Dems gained eleven seats - nine from the Conservatives (three in Wimbledon Park, three in Raynes Park, one in Hillside, one in Abbey and notionally one in the new Wimbledon Town and Dundonald); and two from Labour (one in new Wandle - the seat council leader Mark Allison was defending; and one that 2019 by-election gain in Cannon Hill which they held).

2022 was not total disaster for the Conservatives: they not only held their one seat in Cannon Hill but gained one from Labour (Lib Dems holding the third - that by-election gain); and in next-door Lower Morden they picked up a Labour seat as well.

But none of this turbulence changed the underlying reality of Merton: Labour retained control, albeit with a reduced majority of five seats. There are four vulnerable Labour councillors: one in Abbey, one in Wandle and two in Lower Morden - enough to erase their majority in 2026.

But there is still no path for any opposition party to replace them with their own majority because none of Labour's Mitcham and Morden seats beyond Lower Morden are remotely close to being vulnerable. The Greens maintained a decent, but still very distant, second place in Colliers Wood and Labour's vote fell steeply in Graveney and Longthornton wards especially. But that was from astronomical highs of 2018: 81% and 78% respectively.

Whilst one of the St Helier wards across the border in Sutton was electing a Conservative councillor for the first time ever, Merton's chunk of this neighbourhood remained resolutely Labour. Neighbouring Ravensbury, which contained a bit of St Helier and a bit of Mitcham, voted 64% Labour. Only one of the Mitcham wards needs to be prised out of the Labour column for a different electoral narrative to emerge in Merton (although now the Conservatives have lost so many seats, the notion that they may ever regain control looks absurd) but none are remotely at risk.

Newham

Dogs bark, cats meow and Labour sweeps every ward in Newham. Well, no longer. There are now two Green councillors in the new Stratford Olympic Park ward to face 64 Labour opponents. 2022 is the first time since 2010 that elections haven't produced a Labour monopoly.

Maybe it could have been more because Labour had a (relatively) horrific time in these elections. Croydon aside, Newham saw the biggest fall in Labour's vote in London. Directly-elected mayor Rokhsana Fiaz saw her borough-wide vote crash seventeen points, though she still easily won re-election in the first round. The mayoral vote perhaps shows why Labour control all they survey because although 44% didn't vote for Fiaz her closest opponent: the Conservative, polled under 12%. Non-Labour votes were split between six opponents and where you have such a dominant administration party the only shot opposition parties have is uniting all those who aren't willing to support them.

Labour in Newham is still dealing with - and I say "still" but it may have barely begun - the fall-out from the party's decision to deselect long-serving mayor Sir Robin Wales prior to 2018 and his most significant legacy: the Stratford Olympics. As onLondon's Joshua Neicho put it:

"Newham's Labour factionalism must be understood in the context of Robin Wales's near-quarter century running the borough as council leader and then elected Mayor. With the first flush of Corbynism, Wales faced mounting opposition to his forceful leadership style and strong pro-development agenda."

In his 2019 book *Legacy: Gangsters, Corruption and the London Olympics*, Michael Gillard lays out a shocking, somewhat partial but fact-based story of how local gangland criminals wangled their tendrils into the police and Newham council. The Newham Observer summarised it thus:

"The final chapters zero in on alleged conflicts of interest within Newham Council during the tenure of the previous mayor, Sir Robin Wales. Legacy unearths evidence of historic "kickbacks-for-contracts" arrangements in the council's enforcement division and highlights potential conflicts of interest at the heart of the bidding process for the Olympic Stadium in 2010."

There are genuinely shocking examples of misconduct within the council on Wales' watch - though the book largely absolves him of culpability. Nonetheless, he was mayor and the buck stops with him. How aware of the problems exposed in this book the electorate

were is questionable but one of the headline reasons so many on the left of Labour wanted to be rid of Sir Robin was his high profile stance on regenerating the borough's council estates, many of whose residents didn't want to be regenerated at all.

There was inevitably going to be turbulence after the change in regime in Newham and Fiaz has faced more than her fair share of criticism, including for allying politically with groups outside the party and bullying opponents. A move, backed by Fiaz, to abolish the mayoralty and return to some form of committee or council cabinet structure was rejected in a 2021 referendum. Indeed, this agenda of returning to what some call a more "democratic" structure caused all sorts of problems during Newham's boundary review, when Labour proposed increasing the number of councillors to a huge 72 - a rise of twelve.

This flumoxed the Boundary Commission, which usually assents to minor increases or decreases, and the Newham review had to be put on ice until this proposal was renegotiated. In the end, Newham council increased in size by six seats.

Fiaz also had to deal with a huge amount of expectation: about what the legacy of the Olympics actually would transpire to be for long-term Newham residents; about what the new mayor would do differently; about what the huge amounts of new housing and new residents would bring to the borough; about what a more left wing Labour party would achieve compared to the rhetoric of the critics of Robin Wales.

If the 2022 results are anything to go by, expectations have not been managed well. Aside from the huge drop in Fiaz's mayoral vote, on the council Labour slumped from 68% borough-wide in 2018 to 56% this year: both the second-worst decline in London and their second-highest borough-wide share in the capital this year.

As with other very safe Labour boroughs in London, that 56% was spread evenly across Newham so that, other than the new Olympic Park ward, the only other wards that look remotely insecure are Beckton (where the Greens secured a 17% swing and finished just 230 votes short) and Plashet (the old East Ham North) where an independent polled creditably.

Looked at as a pair with Tower Hamlets, or indeed as a trio given Labour also lost a bunch of votes in Barking and Dagenham, it might appear that the party has exhausted its seam of ethnical diverse wards in the East End. I would say that this is a slight misreading, in part because (as I discuss in its narrative) Tower Hamlets is a discrete electoral ecology all of its own. Newham is a significantly more diverse borough than Tower Hamlets: it has an even higher non white population but, whereas Tower Hamlets is principally a borough of Bangladeshi Muslims, Newham has a wider diversity: Indians are the largest south Asian group here and black Africans are represented in far greater numbers, especially on the West Ham side of the borough.

Labour does have a problem, as I keep returning to, in its safer wards which, in London, also tend to be deeply ethnically diverse; and it extends far beyond the east end. But it'd probably take another two elections of comparable declines in their vote before Labour wards in boroughs like Newham become threatened.

Redbridge

A Labour majority of fifty three seats on a council they only took control of eight years ago. Just two Conservative councillors left in the constituency once represented by Sir Winston Churchill. Three of the very safest Labour wards anywhere in London found here. A council with an obscure name that now lives up to it: Redbridge is most definitely red. And there's no going back.

In fact the lopsided result in terms of seats is not quite reflected in votes: Labour polled 54% but the Conservatives took 31.5%. The Tories polled less in 2014: 30.5% which netted 35 seats, and 30 seats with 35.6% in 2010. But the difference is the Labour share: just 36% in 2010 and 42% in 2014. The surge into the mid fifties has come from the collapse of the Lib Dems, never all that strong here in terms of seats but with around 20% on and off over the decades. This year they polled less than 7% and their core support in Woodford almost completely disintegrated.

This year Labour consolidated all of their sixteen gains from 2018 and encroached even deeper into the remaining Conservative enclaves: two gains in Bridge, two in Churchfields, one in Fairlop and two in South Woodford. Labour had things virtually their own way but there were swings against them in Hainault: the outlying GLC estate, which they only held by 68 votes, and the semi-rural neighbouring ward of Aldborough, which had looked like it was trending safely Labour. The Conservatives were also not out of it entirely in some of the wards they lost in 2018: Labour held onto Barkingside by just 130 votes - another adverse swing there. The Conservatives just about remain in contention in Fullwell. But those are paltry scraps in a borough they have very rapidly lost.

At the other end of the borough, in the wards that comprise Ilford South constituency, Labour stacked up the votes in awesome fashion. 84% in Clementswood, 77% in Goodmayes and Ilford Town, 82% in Loxford, 71% in Mayfield (and this ward had Conservative councillors as recently as 2010), 67% in Valentines, 65% in Newbury. Labour polled 53% in Wanstead Park to just 19% for the Conservatives: this ward elected Tory councillors as recently as 2014. In neighbouring Wanstead Village (Snaresbrook), Labour's top candidate finished 1,100 votes ahead of the top Conservative.

The cause of the huge political transformation of Redbridge into one of Labour's best London boroughs is principally due to migration. Migration, that is from the overcrowded terraces of East Ham and Leyton and Walthamstow out to a more spacious suburban landscape. That migration has been of British Muslims and, to a lesser extent, Hindus and Sikhs. Redbridge, somewhat remarkably, has the largest community of Pakistanis in London nowadays and, in the 2011 census, there were 116,503 "Asians" to 118,646 "whites". There will likely be a majority Asian population in this borough when 2021 census data fully emerges.

In the Harrow profile we looked a bit at some of the reasons why the Conservatives are polling strongly among the Hindu and Sikh communities of north west London. One of the assertions made is that these communities see Labour as a party far more sympathetic to Muslims, and to Pakistan's claims to Kashmir. However much truth there is in that, the degree to which Pakistani Muslims have helped turn Redbridge Labour lends might stand as evidence for it.

There was a degree of consternation during the election campaign when a candidate contesting the ward of Labour council leader Jas Athwal died, leading to a countermanded poll. The annual council meeting at which the new council leader was to be elected, was scheduled to occur before the election in Mayfield could be rescheduled.

This was the latest arrow of outrageous fortune for Cllr Athwal who was well and truly stitched up in the parliamentary selection for Ilford South, when unfounded complaints against him enabled the Leaders Office to prevent him from contesting the vacancy against Sam Tarry, the favoured hard left candidate. That stitch-up seems to have come back to bite Tarry who, during his first reselection trigger ballot, lost every single ward branch in Ilford South.

Back to the council, though, and the Mayfield election was rescheduled quickly and the AGM delayed a few days. Athwal and his Labour running-mates duly won in their safe ward. This mini saga does raise questions about whether countermanding elections upon the death of a candidate who was never going to get close to winning is the best way to deal with such events. Surely it would be less cumbersome to allow a deceased candidate to remain on the ballot and, should they happen to win, organise a by-election in exactly the same way they would if a serving councillor died?

As for party prospects in 2026, obviously they're not all that great for the Conservatives who even suffered a considerable swing in their one remaining safe ward, Monkhams. But they're also not quite as bleak as they look either. A 5% swing, for example, would turn fourteen Labour seats Conservative. That would still leave a huge Labour majority but it would create a much more effective opposition group, capable of adequately scrutinising decisions. The problem for the Conservatives is that there isn't all that much sign of Redbridge swinging back towards them - the opposite in fact.

Richmond upon Thames

Despite their 2018 landslide showing their electoral pact with the Greens to be superfluous, the Liberal Democrats happily renewed it in 2022, gifting them five seats that would almost certainly have elected Lib Dems if they'd contested them.

At first glance it seems nuts to give away seats to opponents. But the pact gives both parties something - albeit by removing a degree of choice from the electorate. For the Greens the benefit is obvious: they have the largest group in London, albeit one capped to however many seats they can persuade the Lib Dems to give them. They know that if they fought the Lib Dems they would hold five fewer seats, as the Hampton Wick by-election demonstrated.

Hampton Wick was one of the wards the Lib Dems agreed to stand aside for the Greens, who duly took the third seat there. But when the Green councillor resigned in 2021, the Lib Dems contested - and won - the by-election, taking 52.5% to the Greens' 11.5%. The Greens cannot compete with the Lib Dems in Richmond.

For the Lib Dems, the pact removes any chance of the Greens splitting the "progressive" vote. That makes it more difficult for the Conservatives to win: with Labour essentially irrelevant everywhere except Heathfield ward the Tories need something approaching half the vote to win any seat.

At the 2014 elections - the last time the Tories won Richmond, twelve of their councillors were elected with under 40% of the vote (two with under 30%) while Green candidates attracted around 12%. In other words the Tories need to find an extra twelve points or so to win a seat now.

Two factors brought about the Lib Dem-Green pact. The first was the unnecessary vanity by-election in which Zac Goldsmith squandered the 20,000 majority he won at the 2015 general election. He wanted the by-election to be about his opposition to the expansion of Heathrow airport but instead it became about the constituency's outrage at the EU referendum. This was - entirely predictably - exploited by the Lib Dems. The Greens did not contest that by-election and the quid pro quo was this agreement to let them have a free-run at a handful of council seats in 2018.

The second reason was that, until 2018, control of Richmond had see-sawed between Lib Dems and Conservatives and, for the reasons set out above, a pact helped tilt the electoral playing field away from the Tories and usher in a second long period of Lib Dem control after their 1986 to 2002 reign.

Events have made such machinations unnecessary: the borough's antipathy to Brexit and Boris Johnson has made Richmond the archetypal "Blue Wall" borough - and it is now so far from the Conservatives' grasp that they can't even see a path to victory.

If 2018 was a landslide for the Lib Dems, 2022 was an absolute rout. And, because their pact with the Greens skews results in the wards they share, that borough-wide total if anything understates their vote. The party has all-but swept the borough before, in 1986 for example, but those seat landslides were never replicated in vote shares: the centre's vote was wide enough to win almost everywhere but relatively shallow. No more: this year they won over half the vote while the Conservatives crashed to just 23% - their 2018 share of 32% was previously their worst performance ever.

East Sheen, which had previously always returned at least two Conservative councillors, gave the Lib Dems 60% of the vote. Barnes, the only wholly-Conservative ward in the borough last time, fell on a 20-point Lib Dem surge. Not coincidentally this increase was almost exactly the amount the Greens polled in 2018 - Barnes was the one ward in which the pact did not work out that year. This year the Greens swapped Barnes for Mortlake with a happier outcome for them: the pact worked. The Greens also swapped their 2018 seat in Hampton Wick (which they had in any event been routed from in a 2020 by-election) for one in South Richmond.

Even the one Conservative survivor, veteran councillor Geoffrey Samuel, owes his survival to the one Lib Dem elected in 2018 in Hampton North leaving the party and standing this time as an independent, winning 14% - her 628 votes far in excess of Samuel's 131 majority.

Richmond hasn't been a borough with especially secure seats for either party since the Liberal Alliance emerged in 1982. That's changed. The Lib Dems won six wards with over 60% of the vote, St

Margaret's being the safest. The Tories won a seat there in 2014 - they polled just 15% there this year.

Labour made no breakthrough. Their borough-wide vote rose by just over one percentage point, but they slipped back slightly in their only credible target: the Hounslow-borders ward of Heathfield. Beyond their 27% there, their next best showing was 12.9% in North Richmond. There are still concentrations of Labour votes in the borough: notably in Mortlake, but for them to have any chance there this neighbourhood needs to be unshackled from very affluent Barnes Common. It made no sense for Labour not to submit any warding plan during the electoral review - none of the parties did - but some two- or even single-member wards would have helped Labour (and the Conservatives) tremendously.

It is faintly absurd to be talking about a Conservative path back to power given how crushed they now are. The council has 54 seats so 28 are needed for a majority: hence the Tories need to make 27 gains. The 27th seat by percentage majority is the first of the Whitton three, where Cllr Kuldev Sehra holds a majority of 1,016 or 29.5%.

So the swing required for the barest majority is just shy of 15%. Richmond is a borough where, when voters wish to make a change, large numbers of seats tend to change hands. But one heck of a lot of them would have to decide the Conservatives are worth taking another look at. That's not going to happen ay time soon.

Southwark

Southwark is the winner of two prestigious psephological awards this year. Dulwich Village ward wins the "highest turnout" trophy with a thumping 60.7% - better than some constituencies manage oftentimes. And in Peckham ward, Councillor Leona Emmanuel won the largest majority in London, leading her nearest challenger by 1,858 votes or 72.7% (her running-mates Barrie Hargrove came second and Cleo Soanes fourth).

Labour expanded its majority on Southwark council by six seats, flipping the three in London Bridge and West Bermondsey from the Lib Dems. This is an interesting result in the sense that, in 2018, the election was countermanded following the death of a Conservative candidate. Had the ward elected with everyone else it's very possible Labour would have gained it in that election (they won one seat in the predecessor ward of Grange) but having had a chance to see how large a majority Labour won, voters may well have decided to bolster the opposition - this was the only ward in which Labour lost a seat in 2018.

Otherwise, very little happened in Southwark this year. Labour's vote fell by 0.4%, the Lib Dems' by 1.4% and the nowadays utterly irrelevant Conservatives by 0.9% - all benefiting the Greens who polled 16.7% - far lower than Lambeth to the immediate west and Lewisham to the immediate east.

Despite London Bridge falling down for them, the Lib Dems held their other seats pretty easily. Though they have slipped a bit in their Bermondsey strongholds since voters tired of Simon Hughes' long tenure as MP they're still competitive in the northern wards - even Labour-held ones like South Bermondsey. But the Lib Dems have vanished in the middle of the borough where they had some strength - in Walworth and East Dulwich for example.

The fervent voting that took place in Dulwich Village (and this was not a fluke: turnout was 57% in 2018) was because this ward is a sort-of marginal, and very affluent to boot. It used to be the best Conservative ward in Southwark (often the only Conservative ward in Southwark!) but they weren't really in with a credible shot this year and they slumped to third, still with an almost decent 23%. The Lib Dems beat them to second, just, with 23.6% and Labour won with 44% - it wasn't even especially close. Perhaps residents just wanted to make extra sure it wasn't?!

The Tories polled a very similar 22.5% in Dulwich Wood ward (the former College ward) but Labour are even further ahead here, though there was a small swing to the Conservatives. Only in Rotherhithe and Surrey Docks did they exceed 10% of the vote, and only just here.

The Greens managed to come within striking distance in Nunhead and Queen's Road - which is probably not a ward that springs to mind as being fertile ground for the Greens. Until this year it hasn't been, but a 20% swing will tend to make a ward competitive.

Again, the party struggled to fill its slate with candidates, putting just 37 forward for 63 seats in one of the boroughs where there is no meaningful opposition to Labour (and therefore with the potential for the Greens to create one). If London elected by thirds, as other big metropolitan boroughs do, the Greens would be able to compete more capably - but it's wishful thinking: London does not and there's no prospect of it happening. At least here, unlike Camden, they managed at least one candidate in all bar three wards. In nine did the Green vote exceed 20% but, other than in Nunhead, this slammed up against vastly larger Labour shares. Still, having established themselves in second, perhaps the Greens can now progress?

Sutton

The seemingly perennial question: "is this the year the Tories will regain Sutton?" was again answered with "nope!". And, as was the case in 2018, this failure was not because they didn't gain sufficient seats to eradicate the Lib Dem majority of twelve: they gained six and won all three seats in the brand new ward of North Cheam. But Sutton is a council where almost every seat is in play, so despite those gains the Conservatives contrived to lose five, leaving them eight short of a majority of their own and three short of removing that of the Lib Dems.

Thirty three of the borough's councillors have majorities of under ten percentage points; all but five of less than twenty points (and two of those five are the newly-elected Labour councillors for Hackbridge. Time will tell if that landslide win really gives Labour a safe ward in Sutton or was a freak outcome amidst the confusion of some quite different ward boundaries and some very unpopular Lib Dem policy outcomes there.

Even more so than Kingston - in part because they have been in power here for much longer - the Lib Dem administration looks pretty exhausted, making increasingly unpopular decisions. The Conservatives gained a seat in council leader Ruth Dombey's Sutton

North ward, where she won with under 40% and got no personal vote despite being a councillor there for twenty years. The Labour landslide in Hackbridge was, in large part, due to council shortcomings over a council-managed communal heating network fuelled by the Beddington Incinerator that was supposed to supply low cost heat to over 400 homes - but has repeatedly failed.

The Conservatives performed worse on the Sutton and Cheam (west) side of the borough than the Carshalton and Wallington (east) side, notwithstanding the fact that there are still more Lib Dem councillors in the east and they outpolled the Conservatives in this half of the borough (falling slightly short in the wards comprising the western constituency).

The Tories gained seats on the Carshalton side: most surprisingly two in St Helier West: the first time they have ever won seats in a St Helier ward. They were 51 votes from winning The Wrythe, which has been unstintingly Lib Dem since 1986. But they lost seats, net, on the Sutton side: one in Sutton South, two in Sutton West and two in Stonecot. They also nearly managed to lose their supposedly safest ward of Belmont.

Labour returned to the council for the first election since 2006 when they lost St Helier. They have the two in the new Hackbridge - half of the abolished Wandle Valley, and one in St Helier West while the Lib Dems held St Helier East (the other half of Wandle Valley). Labour was only 130 or so short there. But Labour fell back a little in their other perennial target of Sutton Central.

They keep coming close in Sutton Central but the last time Labour won was 1974 and this ward's been unstintingly Lib Dem since 1986. Labour has no other realistic targets on the Sutton side of the borough and they were less than 200 shy of its third seat but it must be infuriating to just keep missing out over and over. These ten seats are the most Labour can realistically (or unrealistically, for that matter) expect - but ten seats would delight them, especially after so long in the wilderness here.

Sutton is gradually becoming a multi-party borough again, after years of being a two party fight. Ex-Lib Dem independents took Beddington ward in 2018, in part due to the backlash over the construction of a waste incinerator in the ward. They held on in 2022 but the ward is not safe for them: they won with just 35%, though that was better than the 29.5% share they took four years ago. Labour returned to the council for the first time since 2006. And the Green Party came very close to winning a seat in Carshalton Central.

Sutton is, at least on paper, the second-easiest borough for the Conservatives to take in 2026, after Westminster. They need just a 2.1% swing. On the basis of three of the last four rounds of election we can almost guarantee they'll achieve that swing - maybe even comfortably exceed it in those seats they need. The question will again arise, though: how many of their own seats will they lose on a counter swing? Until the Tories fix the weakness in their flank, it doesn't really matter how effective they are at the vanguard.

Tower Hamlets

He's ba-ack!

Lutfur Rahman swept back to reclaim the mayoralty he was disqualified from in 2015 and barred from seeking it for five years, once again defeating hapless John Biggs. This time, Rahman's Aspire Party gained a majority of council seats as well, effectively giving him untrammelled power in this East London borough until at least 2026.

Someone remarked that Rahman could have stood representing the BNP and he'd have won. This assertion may test Lutfur's cynicism, and the guilelessness of those who vote for him a little too far, but the underlying sentiment: that his support base is ultra loyal regardless of what he says or does, is valid.

Depending on your yardstick, Labour has been in trouble in the traditional East End either since 1974 or 2005 (the Iraq War), its politics becoming increasingly contentious, acrimonious and divisive in waves. This atmosphere has enabled a succession of chancers and demagogues to exploit the electorate of Tower Hamlets: be that the race-baiting Liberal Alliance administration that directly facilitated the election of the first ever BNP councillor in Millwall in 1993; George Galloway - a carpet-bagging charlatan from Glasgow not the least interested in representing the constituents of Bethnal Green but all about exploiting Labour division over Iraq; and, for the past three elections, Lutfur Rahman.

Galloway's was surely the blueprint Lutfur has followed: the poison injected into politics here has become a hydra. Respect in 2006, then Tower Hamlets First in 2014, the People's Alliance of Tower Hamlets in 2018 and now Aspire are essentially the same mutating beast - less a political party, more a league of political assassins. That makes them sound more awesome than they are, but you get the picture. I should add that PATH de-registered as a political party in 2019 and its sole councillor joined, a little oddly, the Liberal Democrats - seemingly to protest at Brexit.

Aspire runs on the same brand of exploitative populism as Donald Trump does in the US, albeit that Trump runs his through the Republican Party and Aspire is a one-borough, basically one-man show. This is its greatest strength: it is amorphous. You know, more or less what Labour stands for, and what it's achieved and failed at in Tower Hamlets. Aspire is a vapour cloud: it exists to channel hostility against Labour, just as Respect did. It's not about governing: it's about hurting the mainstream, which here is Labour.

Lutfur didn't muster enough votes to regain the mayoralty in the first round: he took 47% - but that was near enough as to make it impossible for Labour's Biggs to catch him given the number of voters who choose not to cast second preferences. In fact Lutfur's lead only narrowed by about 4,000 votes: from 11,639 in the first round to 7,317. The supplementary vote can only overturn leads when they're much narrower than this.

The difference between the 2022 election and Lutfur's last run at the mayoralty in 2014 is that, this time, his Aspire Party was able to gain a majority on the council. This aids him hugely because his opponents will find it far harder to obstruct and investigate him.

Aspire had two strongholds: Poplar stretching north to Bromley; and Whitechapel stretching up to Bethnal Green. Aspire was also to snatch two of the three Isle of Dogs wards: Canary Wharf (which some snobbish Labour councillors declined to return to its historical, working class name of Millwall) and Blackwall & Cubitt Town. As well as the financial district and the hordes of warehouse conversions the Isle of Dogs contains many housing estates and serious deprivation. But Aspire was only able to win on a heavily split vote: they won with 31.5% in Blackwall and 29% in Canary Wharf. But for all that about the deprivation inherent in these two wards, the financial quarter having Aspire councillors looks much odder than, say Poplar or Shadwell.

The only part of Tower Hamlets where Aspire really struggles is in Bow, in the far north. Labour should at least have been able to bank on five councillors from here but a shock 21% swing gave the Greens their first ever seat on the council: their new councillor being self-congratulatory with the surname Bienfait! Well done indeed.

Tower Hamlets has historically been the very worst London Borough for the Conservatives: they had never even won one seat here until 2006. What changed was that the considerable affluence of parts of the Isle of Dogs created a sufficient critical mass for the Tories to win council seats In Blackwall and Millwall, whilst polling virtually nothing anywhere else in the borough. But, given the dependence of a load of City jobs on access to the EU's single market, Brexit and the Conservatives' response to it was going to tank in the financial quarter.

After being stripped back to just two councillors in 2018 (one of whom, the group leader Andrew, Wood, resigning from the party in 2020) they were reduced to one in 2022 - Peter Golds clinging on in split Island Gardens ward. Wood almost held his seat as an independent in Canary Wharf, missing out by 30 votes. But look at these Tory shares in wards they used to win: 12% in Canary Wharf, 19% in Blackwall, 22% in Limehouse and 17.5% in St Katharine's. Because the battleground is now so riven it's possible the Conservatives can win seats back with only slightly improved votes, but these are wards they should be able to hold comfortably.

The big shift from Labour to Aspire in Tower Hamlets was actually not built on that massive a shift in votes. Labour was down eight points - but hardly collapsed. The Conservatives fell two points and the Liberal Democrats gained 1.5 points. Aspire was up six. It was the fragmented nature of the vote that allowed so many Aspire councillors to win on very low shares: in six wards they polled less than 40%, yet won seats in all.

What did for Lutfur after the 2014 elections was the allegation which grandstanding Election Court Judge Richard Mawrey accepted to be proven, of "undue spiritual influence" which, in essence boiled down to his exploitation of community and religious networks within the Bangladeshi community to win power. Unfortunately, whilst no such allegations appear to have been made in 2022, sharp practices continued to be documented.

An organisation called Democracy Volunteers - impartial poll observers - reported a huge amount of what they call "family voting" code for men standing over their wives to ensure they vote the way they wish them to. Political leaflets were also observed in polling booths and large crowds assembled outside polling stations. Their report is available online. There is still some way to go to achieve fully free and fair elections in Tower Hamlets.

After Croydon, Tower Hamlets is the easiest borough - on paper at least - for Labour to regain. They need just a 0.8% swing. But while I have focussed most on Aspire in this narrative, Labour has far more to be worried about. Let's draw a line under their longer-term shortcomings that ceded so much ground to the Liberal Alliance in the 1980s and focus on their travails since 2005. They have had significant problems in this borough for seventeen years and yet with every lurch back the party has assumed that everything is fine once again - only for things to erupt in an even more furious rebuke four years later.

Labour self-evidently has severe difficulties within the sizeable Bangladeshi Muslim population of Tower Hamlets. These problems can probably be ring-fenced from the slide in Labour's vote in other ethnically diverse wards across London, simply because politics is so bespoke here that they could fix one borough without it having any bearing on the other. But perhaps the worm at the very centre of this apple is the same London-wide: an arrogant and cynical belief that voters from minority communities are Labour by default and can be taken for granted.

Unless Rahman messes up hugely - and is seen so to do by the people who vote for him, I'm not sure Labour will find it easy to regain Tower Hamlets in 2026. Whatever else he is Lutfur is not an idiot: no-one could organise and win a mayoral election, and then come back from a humiliating disqualification to win again. Labour will begrudge him any semblance of success administering this complex borough but I suspect he might just do so alright, especially with a more pliant council plotting to help him fail.

Waltham Forest

Very little changed in Waltham Forest, the one Labour gain and one Conservative loss down to boundary changes that abolished a Tory seat in Endlebury and created a new Labour one in Upper Walthamstow.

Despite fixing all its problems in the bulk of the borough, the North Circular is very successfully keeping Labour from penetrating any further into the far north.

What is becoming perennially split Valley ward, alongside the Lea Valley reservoirs, stayed split; incumbent Labour councillor Elizabeth Baptiste hanging on to her seat there by nine votes. Labour is not yet making quite the same inroads into the Chingford half of the Chingford and Woodford Green constituency as it is across the border in Redbridge. That said, the party nearly snatched Hatch Lane ward, and the Conservative vote in Larkswood fell below 40% - it's just Labour's vote there fell quite substantially too.

The Greens managed to become runners-up in every ward they contested outside the Conservative wards in the north, polling over 20% in seven. But again they ran up against that capacity Labour has in its better boroughs to spread its vote evenly throughout. Labour polled between 50% and 60% in eleven wards, and above 60% in three more. The only one of the "lower sixteen" - the sixteen wards south of the North Circular - in which Labour polled below

50% was the re-created St James, where one Green candidate polled 30% to Labour's 48.8%. That makes the ward almost marginal but Labour's councillors still led by between 460 and 930 votes.

The Conservative vote in Waltham Forest beyond Chingford long ago evaporated. The first general election I was involved in was 1987. In that election the Conservatives gained Walthamstow constituency from Labour. In the 2019 general election Labour's Stella Creasy held it with a majority of 31,000 - and that was slightly down on 2017. If you remove the Conservative wards above the North Circular, the Tories polled just 7.6% throughout the bulk of Waltham Forest - only in Haringey did they do worse than that (7.5%). In contrast Labour's share went from just over 50% borough-wide to 57% in those non-Tory wards.

A large chunk of the historic Conservative vote in Walthamstow and Leyton migrated to the Liberal Alliance in the 1980s. They were able to win enough seats throughout the 1980s, 1990s and early 2000s to usually hang the council. But they were on the wane even before the Conservative-Lib Dem coalition government from 2010 destroyed the party's standing: from a high of 31% in 1994, they fell to 27% in 2010, 12% in 2014 and just 8.4% this year. They even collapsed in their hold-out ward: Leyton, losing 20 points of support this year. They did poll 24% in Leyton's Grove Green ward, but that was still twenty points behind Labour - and they aren't competitive anywhere else.

Wandsworth

Forty-four years of Conservative administration in Wandsworth came to an end this year as Labour won a workable majority of twelve, their majority reliant on nine councillors representing split wards.

Until this year there had been a substantial divergence between how this borough voted in local elections and general elections - the "Wandsworth effect". Thus, Labour was unable to win any council seats within the Putney constituency in 1994, 1998 and 2002 (or 2006 for that matter) while winning the parliamentary seat by fairly clear majorities in 1997 and 2001 (and only losing by 1,800 in 2005). Likewise, Labour could often only win the old Latchmere ward - which comprised most of the central Battersea estates alongside the Clapham Junction rail line - in Battersea, and the Tories would usually win the majority of seats in the Tooting constituency.

This has now changed. No longer does Labour win Putney essentially on the back of votes from the "A" council estates: the Alton, Ashburton, Ackroydon and Arndale, whilst the Conservatives win the affluent streets downhill and along the riverside. The picture has always been more nuanced in general elections - and now the locals as well. Indeed Labour's performance in council estate-heavy wards like Roehampton and Battersea Park was not impressive in these elections.

The only seat the Conservatives took off Labour was in West Hill, where the presence of independent councillor Malcolm Grimston skews results in the other two seats. West Hill comprises the second largest amount of council and ex-council housing on the Putney side of the borough: the tower blocks that loom over the District Line just before Southfields station are all in West Hill. West Hill is the only ward in London this time around with councillors with three different political affiliations: one independent, one Labour, one Conservative.

There was no swing to Labour in their safe Tooting wards: perhaps because the party has topped-out in these wards; perhaps because they need to invest work simply to hang onto them anymore, but also perhaps for the same reason Labour struggled this time right across London with large populations from the Indian sub-continent.

And yet in what were, prior to these elections, safe Conservative wards there were heavy swings. Because the ward boundary changes in Wandsworth were quite radical direct comparisons with 2018 are a little tricky. Nonetheless Thamesfield's boundaries barely changed: 11% swing to Labour. East Putney - barely changed: 12% swing. West Putney - moderately changed: 13% swing. The borough-wide swing to Labour was "just" 4.9%: what happened was that in the more Conservative wards the swing was very much larger and in the Labour wards it was non-existent.

As I postulate in the introduction, this phenomenon appears to be long-time Conservative voters being turned off voting for the party: essentially activism working against the Tories. The more of the core Conservative demographic present in a ward, the larger the kick to their party. The hit the Conservatives took over Brexit in 2018 - the first post-referendum London elections, did not ameliorate this time: deeply held disdain of Boris Johnson compounded it.

But this was not inevitable. Just a year earlier Labour's vote in the London Assembly election was unimpressive: slightly worse than 2016 despite this being Sadiq Khan's home turf. In November last, a by-election in Bedford ward resulted in a one vote hold for Labour - a 7% swing to the Conservatives. The Tories were not all that far off gaining the second seat in South Balham: the successor ward to Bedford, in this election - though that was as much to do with apparent missandry of female voters in this lopsidedly female borough only voting for female candidates.

In South Balham the male Labour candidate ran 330 votes (nine points) behind the female one. In Tooting Bec, Paul White finished more than 500 (twelve points) behind the two female Labour candidates. Andy Gibbons (who died shortly after his re-election) had been a councillor since 1994 yet finished 450 votes behind his two female running-mates in Tooting Bec, who had only been councillors for four years. This effect replicated right across the borough and was far more pronounced on the Labour side than that of the Conservatives. It was limited to Wandsworth and, to a lesser extent, Hammersmith and Fulham.

It has been a feature of council elections that Conservatives have also benefited from the rub of the green in most council elections: for example the seats breaking their way in 1986 even though Labour polled most votes that year; ditto 2018. That run of luck ended in 2022 as narrow margins benefited Labour for a change.

There are six split wards, but whereas in the old days these would have come in wards Labour should have been winning easily: Furzedown, Queenstown or the old St John ward for example, this time they were in wards that have been comfortably Conservative for decades: Balham, Wandsworth Town (the successor to Fairfield), East and West Putney; St Mary's.

Equally, these splits give a grain of hope to the Conservatives. Simply recapturing the nine Labour seats in these split wards (excluding West Hill) would be enough to regain control. Labour's grasp on Trinity, South Balham, Roehampton, Wandle and at least one seat in Battersea Park is not secure. The borough is still in play: it'd only take a 2.2% swing for the Tories to be back.

But on the other side of the equation, a still consequential chunk of the Conservative vote has been general election Labour voters backing the Tories in council elections to protect low council tax and the perceived good services a Conservative council has provided. That can only really be a factor in 2026 if Labour manages the borough poorly over the next four years - so poorly that people can see a clear difference between pre-2022 Tory Wandsworth and post-2022 Labour Wandsworth. Will they have such a recollection?

Wandsworth is also a borough with a high-turnover electorate, with a demographic currently running away from the Conservatives. There will be a large number of voters in 2026 who will not have lived here in 2022 and the vast majority will not know of the political mythology of Wandsworth: the tax cuts, the service privatisation firsts, the Right To Buy pioneering, the estate improvements, the PR stunts and the constant gearing of all services towards maximising Conservative re-election prospects.

That cutting edge radicalism dimmed substantially in recent years in favour of a much more technocratic, less showy, steady-as-she-goes management, and that may well have contributed to the Conservative defeat. As the borough turned demographically more hostile to them, if anything the Tories needed to step up the brashness, the noise, the PR, to show that they remained different from other Conservative boroughs. Instead, vast new housing projects no doubt contributed to an expanded Council Tax base, in turn helping them keep their flagship low Council Tax down - but also brought in thousands of voters with no affinity for the Conservatives.

There are numerous cases in London of Conservatives losing power and then seeing their vote collapse: Hammersmith and Fulham being the closest example. But this is not an inevitability: events have swung London against the Conservatives: these collapses haven't happened by decree or tenet of electoral lore. A borough that has swung from 51 Conservative and 9 Labour councillors to 35 Labour and 22 Conservative councillors in just sixteen years can swing back - though almost certainly not so far back as to resemble that 2006 result.

Westminster

Thirty two years after Dame Shirley Porter's Homes for Votes scandal had contributed - how much we'll never know - to producing a Conservative landslide in the City of Westminster of 45 Conservatives to 15 Labour (the too-close-for-comfort 1986 result, which prompted her unlawful shenanigans had been 32/27), Labour gained control for the first time ever.

Of the eight "key" wards Porter designated for council house sales and the removal to blocks in safe Labour wards (at least two of which were full of deadly blue asbestos) of supposedly Labour-voting council tenants, it's worth tracking what happened in 2022.

Bayswater elected one Labour councillor in 2018 but they took all three seats this year on a huge swing. But in 2002 the Conservatives had the Hallfield council estate: the core Labour area in Bayswater, moved to their safe Lancaster Gate ward - and that estate contributed to two Labour gains in that ward this year: its first Labour councillors ever.

Maida Vale today looks like a fairly safe Labour ward. Millbank no longer exists but most of it is now in Vincent Square which elected a Labour councillor for the first time this year. Cavendish has also been abolished but the best Labour side of it - Fitzrovia - is now part of West End and that ward elected three Labour councillors as well. St James's stayed Conservative, as did Abbey Road: the successor to Hamilton Terrace.

Labour activists in Wandsworth could feel a little aggrieved on election night when the impressive-enough recapture of their borough after forty-four years was trumped by the party's capture of Westminster. It wasn't even close: Labour outpolled the Conservatives 46.4% to 38.6% borough-wide, netting them a majority of eight seats.

Like coastal erosion, Westminster had been slipping away from the Conservatives since the 2010 elections. Labour's vote has risen, and the Conservatives' fallen, in each of the four elections since 2006, the Tories falling from 58% and Labour rising from 23%. In 2018 the Conservatives only just led Labour - 41.9 to 40.3 - but the Tories still won a misleadingly large majority of 22. Labour has tended to stack votes up in its safe Paddington fiefdoms and lost in the marginals.

A whole tranche of wards just sloughed off in 2022, and the Conservatives cannot blame boundary changes because the pattern of wards that was adopted for this year was basically their proposal. No, this was a direct swing, in part driven by abstentions of protesting Tories about the leadership and direction of their party, but also because Westminster is changing demographically, and the Conservative vote is in trouble.

The most obvious example of this is the area covered by the Knightsbridge and Belgravia ward. Until 2002 this was two wards: Knightsbridge covering just the area south of Hyde Park, around the Albert Hall, and Belgrave, running down the boundary with Chelsea. Knightsbridge had an electorate of 3,811 and Belgrave 4,050 in 1998, their last election before being, essentially, amalgamated, By 2015 the electorate of what was Knightsbridge ward had fallen to approximately 2,518: a 34% loss of voters. The new Knightsbridge and Belgravia ward had, in 2002 an electorate of 6,401. By 2018 its electorate was down to 4,407.

Where are all these voters going? It's not as if vast swathes of two of the wealthiest neighbourhoods in London are being decanted and their residents bussed off to council estates on the outskirts of London. It's not, as inner London boroughs have suddenly started arguing as Census 2021 figures emerge, that Covid has driven voters out of London (it did, but that's obviously not the long-term driver of change).

It is that many of the owners of these ultra-expensive properties are overseas buyers (many of them Russian, many of them Arabs) who aren't eligible to vote. It may also be that some of the properties are bought-up by exclusive, top-end businesses to use for corporate hospitality: no-one will be on the register in such addresses. And it may well be that these are one of many properties in a portfolio, with an eligible elector choosing to register somewhere else.

But the Conservatives cannot lay the blame on an evaporating electorate - not least because it's not entirely true. If you look at largely unchanged wards from 2002, the Conservative vote isn't down: it's rather that the Labour vote has surged.

	Con 02	Con 22	Lab 02	Lab 22
Abbey Road	1,269	1,241	338	803
Bayswater	911	910	558	1,618
Church Street	460	347	969	1,303
Harrow Road	362	381	1,029	1,524
Hyde Park	1,095	758	250	804
Lancaster Gate	1,180	1,110	332	1,057
Little Venice	1,177	1,140	395	1,104
Maida Vale	1,179	833	780	1,590
Queen's Park	318	380	1,154	1,691
Regent's Park	1,145	1,140	410	696
St James's	1,056	979	355	789
Vincent Square	1,351	1,377	406	1,324
Westbourne	399	341	969	1,277

The table above compares the actual party votes in the 2002 and 2022 elections. Yes, ward boundaries have changed in the interim but I have excluded those wards that have changed substantially: these comparisons are reasonable.

This Labour surge cannot, in the main, be explained by surging turnout. Turnout has increased between 2002 and 2022 but only from 27.4% to 31.9%. Turnout in 2022 actually fell - by a lot - compared to 2018: down from 38% four years ago. It does not explain how Labour's vote has, in many wards, trebled, and in several others doubled.

2002 wasn't a great Labour year, of course - better than their 2006 disaster but still a year where Labour voters were not hugely motivated to turn out by the second Blair term of government. Still, the increase is extraordinary and, to be honest, I am at a bit of a loss to explain it. If it isn't a surge in turnout, and if population is declining, and if it's not because supporters of Lib Dems and other parties have swung behind Labour (it isn't), then it's a bit of an oddity.

In 1990, then Westminster Labour group leader Paul Dimoldenberg switched from his safe Harrow Road seat to stand in then Cavendish - the ward his party needed to gain to win an overall majority.

Things didn't go well for him that time but twenty two years later he tried the same trick again: this time moving to Hyde Park ward - and won on a near 13% swing. That gain was arguably the most surprising of election night (and also the one ward in the table above showing a clear swing from Conservative to Labour) but the fact that Mayfair - the most exclusive property in Monopoly - now has three Labour councillors (for West End ward) is also remarkable.

Labour also won Pimlico South - the old Churchill ward but on tougher boundaries, dispatching Murad Gasanly, a Labour to Tory switcher who held his seat for his new party in 2018 but fared far worse this time. They gained one across Vauxhall Bridge Road in Vincent Square, which includes the estates behind the Tate Gallery but a lot of far less promising Victoria - and the Channel 4 HQ.

In the north, things were slightly more mixed for Labour: they again stacked up the votes in their fortress wards of Queen's Park, Harrow Road, Westbourne and Church Street (though there were some small swings to the Tories in three of the four), turned Maida Vale into a fairly secure-looking ward, and gained one seat in Lancaster Gate and Little Venice wards. But Labour absolutely roared to victory in previously split Bayswater, their vote surging by over 23 percentage points there.

Being unable to break truly into Little Venice (a ward they won in1986) and Regent's Park ward actually swinging away from the party were relative disappointments. Labour got within ten points in St James's ward which covers most of tourist Westminster including Buckingham Palace, the Houses of Parliament, Trafalgar Square and Westminster Abbey. They were slightly further off in Pimlico North which now includes the Lillington Gardens estate that was in abolished Tachbrook ward. On these results Tachbrook ward may well have gone Labour had it still existed.

The Conservatives found themselves also needing to play defence against the Lib Dems in Marylebone ward - an absolute nightmare of a ward to campaign in I'd imagine given the inaccessible mansion blocks and hidden-away Mews. A 12% swing in that ward brought the Lib Dems to within twelve points of the Tories.

To regain control in 2026 the Tories need the two seats in Lancaster Gate back, at least one in Hyde Park, the one Labour seat in Vincent Square and the one in Little Venice too. Labour will be looking hard at improving its position in Vincent Square and maybe Pimlico North as well: they may well be able to make progress more easily in Westminster proper than in the Paddington and Marylebone wards.

Overview of the 2022 results: seats won

Note: change figures may not tally because of council size changes

	Cons		Lab		Lib Dems		Green		Aspire		Residents		Independents		Total

Overview of the 2022 results: ward share changes

This table counts the number of wards in each borough where Labour and conservative vote shares fell by more than ten points, by between zero and ten points, and then increased within those ranges. The number of wards shown here won't always tally with the total number of wards because the boundary changes have created entirely new wards with no precedent - hence there can be no comparison.

The boundary changes

Changes to the boundaries of wards have occurred in all but seven of the 32 boroughs (Bexley, Croydon, Hackney, Kensington & Chelsea, Redbridge, Southwark and Tower Hamlets underwent boundary reviews at some point in the previous two terms).

These reviews considered three factors: the overall size of the council; the boundaries of the wards, and the number of councillors for each. At the last review, before the 2002 borough elections, the then government had plans to introduce annual elections, directing the boundary reviewers to create uniform patterns of 3-councillor wards. This was relatively uncontroversial in the larger outer London boroughs which were historically warded this way. But it created radical change in geographically smaller inner London where there were very many more two-member wards.

This time the requirement for 3-member wards was removed; indeed in those boroughs reviewed in previous terms a considerable number of two- and even single-member wards were created.

The other significant change this time was the decoupling of the determination on council size from that of ward boundaries. In the earlier review those submitting warding plans had to argue for council size at the same time as drawing boundaries - with the consequence that if a different size was chosen the whole warding pattern was junk. This time council size was decided first and once it was warding patterns were submitted. A clear improvement.

While most councils were broadly content with their size, there were some radical changes. Eight increased their number of councillors, with Newham gaining the most (six seats); whilst seven reduced their council size - Hillingdon the most dramatic of these, culling twelve (or 18%) of their councillors. Harrow, Brent and Westminster also reduced by more than one or two seats. Overall, London lost sixteen councillors.

Sometimes there are partisan reasons for seeking a larger or smaller council. Sometimes administrations genuinely believe that the size of their current council does not deliver the most effective means of delivering for their residents. Sometimes councils feel the need to correct changes made at the last review which maybe haven't worked out as well as hoped.

Why do council wards need redrawing from time to time? Simply because populations are not static: new developments get built and older ones get pulled down. In London, with its rapid population gain and unique pressures on housing, very few wards are shrinking. Some wards back in 2002 were simply projected to have housing built that never materialised: Bishops ward in Lambeth being the stand-out example. But wards that are essentially fully developed and settled, or even ones that are slowly growing may become over-represented simply by failing to keep up with faster growth and new development elsewhere in their borough.

In Newham, for example, the Stratford and New Town ward in which the 2012 Olympic stadium and athletes village was constructed had by 2020 double the electorate it should have if each councillor were to represent the same number of electors. If the size of Newham council had remained the same then the rest of the borough would have lost three councillors to offset the three gained in Stratford. This was a reason, but not the principal one, why Newham wanted to enlarge its council.

Generally, significant development benefits Labour because London is a Labour city and the party's support is wide as well as deep. But it is also because large development sites tend to be located on brownfield sites which are much more likely to be in more working class neighbourhoods than in affluent ones (though plenty of those elect Labour councillors nowadays too).

For example, four of the new seats being created in Hammersmith and Fulham are in the overwhelmingly Labour north, creating one entirely new ward (White City) which they will win easily, and an additional seat in their second-safest ward, College Park and Old Oak - the neighbourhoods around Wormwood Scrubs.

The planned further development across Park Royal in future decades will almost certainly create even more seats there, though at some point a ward will become essentially new and its long-term political allegiances may well change. But in most cases, the new developments are bolted onto areas where the voting intentions of the longer-term residents are dominant.

Finally there was the question of the number of councillors representing each ward to resolve.

Because the norm for the past twenty years (and in many boroughs long before that) has been 3-member wards, the majority of wards drawn in this review have remained that way. But a 3-member ward in a geographically small inner borough can mean communities being lumped together in divisions that poorly epitomise them.

Councillors tend to prefer 3-member wards because they give them colleagues to share the ward workload with. But that does not necessarily square with the Commission's criterion of providing convenient and effective local representation.

Of the boroughs reviewed this time, only Hammersmith and Fulham has returned to a majority 2-member pattern. Enfield, Harrow and Kingston have approximate parity between 2- and 3-member wards.

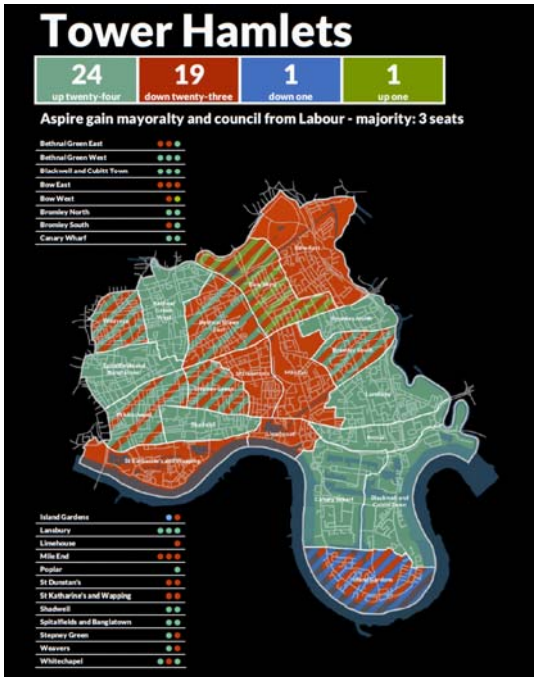
There is also strong dislike for single member wards, despite these being common - often the norm - beyond the capital. Just two were created in this review; one retained in Bromley, one new in Hillingdon. There was a furore when the Conservatives proposed a single member ward in East Finchley in Barnet - that got abandoned; and in the Hillingdon village of Harefield - where it survived as there was no less bad alternative.

In most cases it is relatively straightforward to identify which new ward has replaced an old one. Sometimes it is not. I have linked wards in this way even when they cover somewhat different areas because I think it is more informative to show how party support has changed between elections than to simply leave this information blank. Take more caution with the changes shown though because they will not be exact.

Guide to results

The London Borough results are presented alphabetically. I have reproduced the results of the election to the Common Council of the Corporation of the City of London, which elected in March, for completeness.

Each set of results follows a standard format. There is a front-sheet with the top line council result, its change status, and a ward map. There is also an "at a glance" feature where every council seat is represented. This is especially useful to highlight single- and two-member wards.



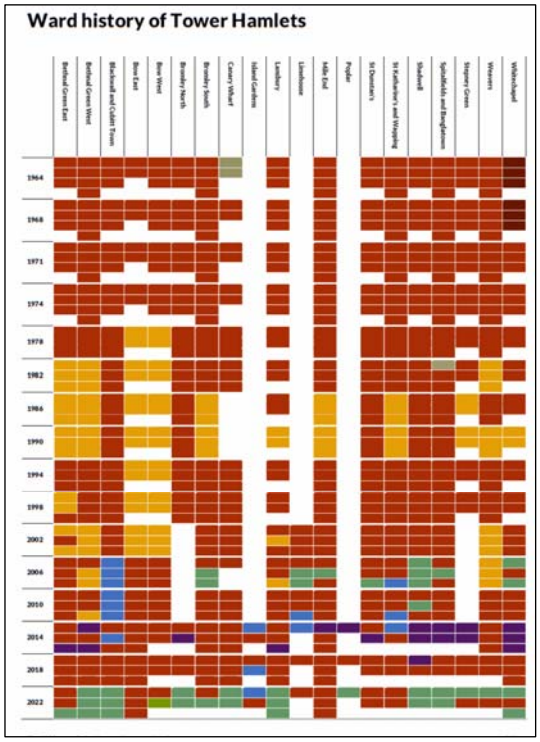
Next, there is a comparison of boundary changes in those boroughs that underwent them, and the borough's electoral history chart since 1964.

The come the ward-by-ward election results. These include the vote, percentage vote and percentage change on the last election in 2018. Under each ward's result I state the 2018 which is the closest precedent to the new ward (or none if that's the case).

I provide a vote share for every candidate, which cannot be done using the highest vote method of calculating percentages. Instead I use the average vote method, which requires an adjustment when each party or interest fails to stand a full slate of candidates. This adjustment ensures that the total vote shares equal 100% and, I believe, better reflects the true standing of a party than simply taking the top candidate's share, which may be distorted by a personal vote.

There is a third column showing the change in vote share compared to 2018. This figure is like-for like: top candidate in 2022 compared to top candidate in 2018 - it does not track a specific candidate; for example if a candidate topped the poll in 2014 but came third in 2018 the change will not be their personal vote change. Attempting to do that would render the change figures meaningless.

Above the result is a coloured "history bar" that denotes which party has won each seat in each ward at each election back, where



possible, to the first election of these boroughs in 1964. Where it is not possible to trace a ward's lineage back that far, it starts from whichever election I have found it credible to begin from. I have also recorded which constituency (or constituencies) the ward lies within. The ward "linkage" is usually shown in the ward electoral histories tables towards the rear of this volume. This should be the same as the electoral histories chart before the borough's election results.

Following the results there is a comparison table that shows each party's average vote share in 2022 and 2018 so that it's easy to see the growth or decline of a party between the elections.

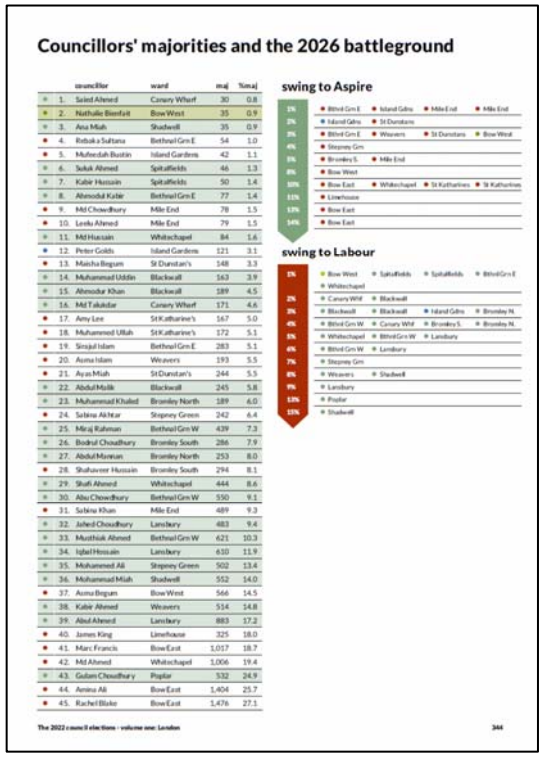
	2018	10,953	38.8	6.7	39.4	7.0	9.0	10.7	28.1		

The fourth section provides a table of every councillor's majority (calculated as the difference in vote and vote share between each winner and the top loser), and a table showing the swing required for the incumbent party and the principal challenger to win further seats. On rare occasions this table will show the swing required for three parties. This can be linked to the 2026 battleground.

Finally, there are maps showing the election result in each borough since 1964.



Councillors' majorities and the 2026 battleground

		councillor	ward	maj	%maj
●	1.	Saied Ahmed	Canary Wharf	30	0.8
●	2.	Nathalie Bienfait	Bow West	35	0.9

swing to Aspire

swing to Labour

To the back of this book can be found details of councillors standing down in 2022, results by parliamentary constituency and tables showing the average party vote share in every ward in every borough since 1964. Behind this there is every by-election that occurred within the London boroughs between 2014 and 2018 and an index of every candidate who stood in 2018. Candidates who won are in bold.

Abbreviations used in the results

	No description
Asp	Aspire Party (Tower Hamlets)
AWP	Animal Welfare Party
Bed	British Democrats
BF	Britain First
Comm	Communist Party of Britain
Con	Conservative Party
Const	English Constitution Party
CPA	Christian People's Alliance
Grn	Green Party
Her	Heritage Party
Ind	Independent candidate
Init	Taking The Initiative Party
Lab	Labour Party
LD	Liberal Democrats
LLL	Let London Live
NHAP	National Health Action Party
OMRL	Official Monster Raving Loony Party
Resur	Resurrection
REU	Rejoin EU
Ref	Reform UK
Res	Resident's Association
SDP	Social Democratic Party
SG	Shared Ground
Soc	Socialist Party
TUSC	Trade Unionist and Socialist Coalition
UKIP	United Kingdom Independence Party
WEP	Women's Equality Party

By-elections 2018-2022

Seventy nine by-elections occurred between May 2014 and December 2017 in the 32 London boroughs (the delayed election in Colindale ward, Barnet, is not counted as a by-election here). The vast majority of seats were held by the party defending them: just seven changed hands. This compares with sixty nine by-elections in the period 2010-2014. A dot indicates the ward was gained by the party the ward is coloured from the party the dot is coloured. A "2" denotes that two by-elections occurred in the ward.
