End of the Keir Show shatters Labour's lock on London

When political historians ask why Sir Keir Starmer went through the motions of clinging to the Premiership following the council elections of May 2026, even though the Labour Party had suffered its worst ever local election results nationwide, it may be because, in London, Labour didn't do quite as atrociously.

Rather than the wipe-outs his party suffered from Gateshead and Sunderland, through Barnsley and St Helens, Norwich, Thurrock and right the way down to Plymouth, Labour was merely given a severe kicking in London, broadly in line with that they received in 2006.

In Camden, which Starmer represents half of as its MP, Labour comfortably retained power - albeit despite the council leader losing his seat after chicken-running from Hampstead to Covent Garden. The same was true in Islington where Jeremy Corbyn's spectacularly inept attempts to set up a new party of the far left failed to field a single candidate. Greenwich, seemingly forever loyal to Labour, stayed so again.

Traditionally marginal boroughs like Ealing and Hammersmith & Fulham (and slightly less so, Merton) were comfortably held - and in that lies one of the themes of these elections. Labour lost their majority in Barnet (and the popular vote there by a wide margin) but were kept in power by the lone Green elected. They did lose their two former Tory flagship boroughs: Wandsworth and Westminster, but by the narrowest of margins. It was entirely possible at several points in the night that Labour might eke out a hold in both. They didn't, but by no means do these boroughs look like they've reverted to Tory hegemony as usual.

Nonetheless, these were hardly a happy set of elections for Labour.

Labour emerged from the 2022 council elections delighted to have gained three flagship Tory London boroughs: Barnet and Westminster (the first time Labour had won a majority on either council) and Wandsworth (their first win here since 1974).

Offsetting those three gains came the loss of Harrow, their narrow defeat in the first mayoral contest in Croydon (plus a loss of their majority on Croydon council) and the return of Lutfur Rahman as mayor of Tower Hamlets alongside a narrow council majority for his Aspire Party there.

So: three gains and three losses plus quite a few big swings away from Labour in - especially - highly ethnically diverse wards. But this was from a very high base in 2018 and, against the Conservatives, significant progress where it mattered (other than Croydon and Harrow). The 2022 council elections were the first widespread opportunity for the electorate to have their say on a host of issues that had turned Boris Johnson's premiership in the space of barely six months from the high of post-Covid acclaim to the scandal of Partygate.

A dichotomy arose in that there was a (very small) swing from Labour to Conservative across London from 2018. But the Conservatives did far worse in terms of seats and councils won because, in the battleground wards - overwhelmingly affluent, middle class, socially liberal, high proportions of owner occupiers and private renters - there was a much bigger shift to Labour.

It's all very well for the Tories to rack-up 12% swings in Thornton Heath, 14% in Southall Broadway and 9% in Hounslow Heath: safe Labour wards which these (big) swings didn't come close to threatening, but at the same time they were losing critical wards like Trinity and St Mary's in Wandsworth, Hyde Park and Lancaster Gate in Westminster, Brook Green and Sands End in Hammersmith and Fulham, and Childs Hill and Brunswick Park in Barnet (and those were just their losses to Labour).

So, Labour began the 2022 to 2026 term with 1,158 London councillors, an almost 3:1 ratio over the Conservatives, who were left with just 405 - their lowest number since the boroughs were founded in 1964, 176 Lib Dems (again, far below their 1994 peak of 323) and 77 others - mostly comprising Residents Association councillors in Havering and Aspire councillors in Tower Hamlets, alongside a handful of Greens.

Compared to what followed during the next two years, the May 2022 council elections were a point of relative success for the Conservatives. Boris Johnson was ousted as Prime Minister in July; Liz Truss was elected by Conservative Party members in September and by October she had resigned following the mini-Budget that ended any prospects of the Tories winning a fifth term of office. Rishi Sunak replaced

Truss but the damage was terminal and Sunak found both his party and the civil service incapable of implementing his ideas to restore faith in Conservative leadership.

One fleeting point of modest celebration for the Tories was their defence of Boris Johnson's Uxbridge and South Ruislip seat in July 2023, which he resigned from to avoid the House of Commons Privileges Committee recommending a likely record suspension for various examples of what they regarded as misconduct.

The Tory hold of Uxbridge and South Ruislip by 495 votes - on paper the least secure of three Conservative seats being defended that day - was put down to opposition to the Mayor of London, Sadiq Khan, expanding the Ultra Low Emission Zone (ULEZ) to the edges of London, obviously affecting suburbs like Uxbridge.

But there was an alternative explanation, which was that despite the accepted wisdom that Boris was a popular politician with a big personal vote, in fact he was a drag on Conservative fortunes there. Consider that, at the 2019 general election, he won a majority of 7,210 or 15%. At the 2018 council elections when, remember, the unpopular Theresa May led the party, the Conservatives were ahead in the wards comprising that constituency by 60.6% to 30% for Labour. In other words, the Tory lead halved between those two different elections in the space of just a year.

And that could well mean that the innate Conservative lead in Uxbridge was far larger with Johnson off the ballot, and why Labour failed to overturn it despite gaining the - on paper - far safer Selby and Ainsty in North Yorkshire.

But that was a small setback for a Labour Party clearly in the ascendancy, heading for a landslide majority at the general election that likely would be held some time in 2024.

Before that big event though came another test of London public opinion in the form of the Mayoral and Assembly elections in May 2024. Two-term incumbent Sadiq Khan announced he was seeking an unprecedented third term (Ken Livingstone had sought a third term but lost to Boris in 2008; Boris sought only two terms before returning to parliament in 2015).

The Conservatives barely put any effort into identifying a candidate of sufficient gravitas or name-recognition to challenge Khan - they even blocked Paul Scully: the Minister for London and MP for Sutton & Cheam, hardly a household name but clearly someone a tranche or two above the shortlist they did allow to go forward. After some further selection shenanigans, the leader of the Conservatives on the London Assembly, Susan Hall, was nominated. This was the second election in succession where the Conservatives effectively wrote off the mayoralty and the second when the result suggested that, had they actually tried a little harder, they might have given Labour a run for their money.

For the first time the election was conducted under First Past The Post rather than the two-choice Supplementary Vote.

Labour attempted to scare progressive voters who might have given their first preference to the Greens or Lib Dems that this electoral system change jeopardised Khan's chances of winning. But as he had comfortably led on first preferences (equivalent to a FPTP election) in both 2016 and 2020, and Labour was far further ahead in the polls in 2024 than in those earlier elections, this wasn't too convincing a claim.

Hall attempted a repeat of the anti-ULEZ campaign that the Tories believed had worked so well in Uxbridge, but of course this was exclusively a campaign for outer London (inner London already had the ULEZ) and, in any event, it is a simplistic caricature that the Tories can win London on the votes of outer London alone.

The outer boroughs are diverse, including Labour strongholds like Merton, Redbridge and Newham, not monolithically Conservative in their voting intentions. That said, a significantly higher turnout from the outer Conservative boroughs versus a much lower turnout from inner London could, theoretically, make a city-wide election competitive if animus against the ULEZ were to be a truly motivating factor.

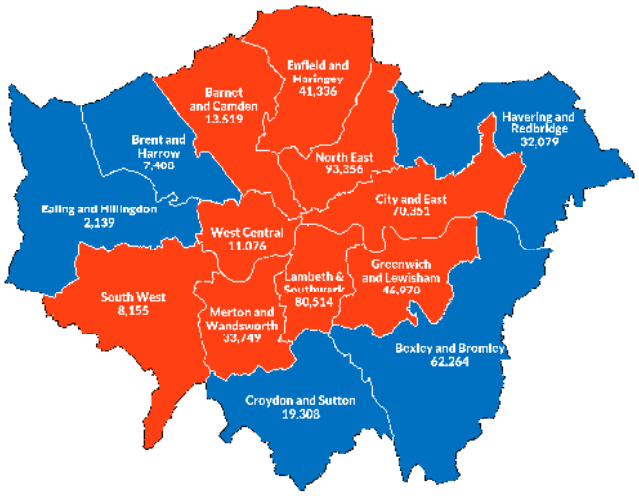
In the event, Sadiq Khan won 43.8% and Susan Hall 32.7% - a 3.2% swing from Conservative to Labour compared to the 2020 mayoral election. The Lib Dems and Greens virtually tied with 5.8% apiece. But this 11% Labour lead compared to a 16.5% Labour lead at the 2022 council elections.

The Conservatives did about eight points better in the mayoral election than the council elections; the Lib Dems eight points worse and the Greens six points worse, partly explained by the focus on the two candidates who could realistically win the mayoral election. An 11% win is comfortable, but in an increasingly left-leaning city, at the nadir of Conservative fortunes and facing an uninspiring Tory candidate it is not especially stunning a Labour performance.

Under the Supplementary Vote system, London election ballots were counted by scanner machines which collated and published results by ward. Under FPTP, where counting is more straightforward, it was done by hand and ward figures were not provided.

However, we do have the results by London Assembly constituency - clusters of two or three boroughs. The

Conservatives won five GLA constituencies: Bexley & Bromley, Brent & Harrow, Croydon & Sutton, Ealing & Hillingdon and Havering & Redbridge. Labour won the remaining nine including, critically, West Central (Hammersmith & Fulham, Kensington & Chelsea and the City of Westminster), South West (Kingston, Richmond and Hounslow), and Merton & Wandsworth.



2024 London mayoral results by GLA constituency (numbers show lead either Sadiq Khan or Susan Hall secured in each)

The Conservatives almost certainly need to lead in these three GLA constituencies to win London-wide. In 2012, when Boris Johnson only narrowly won re-election, he led by 113,618 across these three constituencies. In 2024, Sadiq Khan was ahead by 52,980.

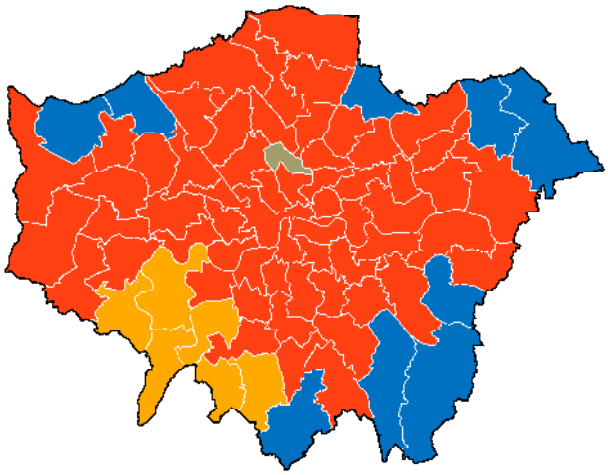
Barely had the mayoral and assembly ballot boxes been placed back into storage than Rishi Sunak called a general election, far earlier than expected. On 4 July 2024 the country returned Labour to government with London playing its part. Continuing the theme of the council and London elections, Labour gained seats in Barnet (all three constituencies) Westminster (the Cities of London and Westminster going Labour for the first time), both seats in the Royal Borough of Kensington and Chelsea - even Uxbridge and South Ruislip fell this time.

But also carrying through those converse trends of the local elections there were big swings against Labour in parts of London; both Tower Hamlets constituencies; Ilford North and South, in Newham and in Islington where Jeremy Corbyn was re-elected as an independent MP, having been expelled from Labour.

Bob Blackman, the iconoclastic Conservative MP for Harrow East, increased his majority substantially; Iain Duncan-Smith defended a tiny majority in Chingford & Woodford Green after Labour's 2019 candidate was barred from standing for the party in 2024 and contested the seat as an independent, splitting a vote that, combined, significantly outnumbered the Conservatives'.

There were marked swings to the Conservatives in Brent West and Hayes and Harlington - a continuation of that trend of ethnically diverse west London neighbourhoods (especially those with large Hindu and Sikh communities) abandoning Labour.

Even Sir Keir Starmer had to fend off a feisty challenge in his Holborn & St Pancras constituency, winning by 11,500. That was comfortable enough - but in 2017 he won by over 30,000.



2024 general election result in London

The change of government effectively split the 2022-2026 local government term into two: one half being about a Conservative regime testing the depths of unpopularity; the other half with a landslide Labour government rapidly following suit. Labour, as perhaps all Labour governments do, fell between two stools.

On the one hand, they entered power backed by the lowest post-war winning vote share on a near-record low turnout, so lacked the support lent from the right that accompanied, for example, the Blair or Wilson landslides right out of the blocks. On the other - and especially true of their London vote - there was a desire for far more radical action than Sir Keir Starmer had proposed in his pretty vacuous manifesto. They campaigned as "change" and soon showed that the main change was in personnel, not in policy direction.

Coupled to those two problems, the new government's messaging was miserableist and hopeless. *"Things are so much worse than we expected"* may well have been true (though it probably was not: this was likely a message decided upon long before they won regardless of what they found) but is not

going to make the electorate feel inspired by the government they'd just elected. *"We therefore have to cut winter fuel payments to OAPs"* followed; again not a message to those expecting money poured into services and benefits paid for by redistribution from rich to poor.

This messaging debacle was reminiscent of Jeremy Corbyn's successful bid for the Labour leadership when all the mainstream contenders (Burnham, Cooper and Kendall) plus their outriders campaigned by telling Labour members what they couldn't expect from a government they led. Meanwhile Corbyn painted the vision of the progressive government of most Labour members' dreams and won.

This time the austere message from the top simply served to sour opinion on the left far faster than it otherwise would. Labour membership - over 800,000 under Corbyn, went into steep decline and primed the field for the Green surge following the election of Zack Polanski as their leader in the autumn of 2025.

48 of the 110 London council by-elections that occurred between 2022 and 2026 took place after the general election; sixteen caused by Labour councillors newly elected as MPs (plus one caused by a newly-elected Conservative MP). 41 of these 48 were indeed in seats Labour won in 2022. Opposite is an extract of the by-elections summary table, the whole of which can be found towards the rear of this results book, showing just the changes in vote share across those 48 by-elections, and with Labour's shares highlighted.

While there were patchy performances for the Conservatives, Lib Dems and Greens, Labour almost uniformly lost vote share - usually a lot of vote share. Some of this can be put down to the peak Labour achieved in 2022, some to far lower voter turnout in by-elections; and there may have been local issues that had an impact on the outcomes (this was certainly the case in the Shooters Hill by-election on 26 June, for example). But they offered a glimpse of what might occur on 7th May 2026.

These by-elections, incidentally, also missed out on any Green surge because the six month rule that means councils do not have to hold by-elections within six months of the full set of elections, kicked in only a few days after Polanski's election as party leader.

These by-elections proved prescient both in forecasting the hit Labour was to take at the local elections and the atomised nature of who they would take the hit from in different parts of the capital.

London by-elections since the 2024 general election

Ward	Date	+/-	+/-	+/-	+/-
● Beckton	18.07	-5.8	-9.0		-17.0

● Hendon	30.10	+3.4	-12.9	- 2.2	- 2.8

N.B. The coloured dots denote the party that defended the seat; the ward names in bold denote that a party other than the one defending it won the by-election.

The debut of Reform UK and the surge in membership of the Green Party, as well as clusters of so-called "community independents - principally to the left of Labour, mainly standing in areas with large Muslim populations, loosely affiliated with Jeremy Corbyn's Your Party, and typically focussing on the conflict in Gaza, led to a huge upswing in candidates contesting the elections: a record number, in fact.

8,987 candidates contested London's 1,817 council seats in 2026, compared to 6,190 four years earlier. Labour contested every seat as you would expect, though there were excitable press reports in the days running up to the deadline that they were struggling in boroughs like Sutton.

Despite their electoral woes the Conservatives too managed to contest every seat (though one Hounslow Conservative candidate who had attempted to also stand as a Lib Dem in another ward was disqualified from both, leaving them one from a full house): an improvement on 2022.

Greens fielded 1,527 candidates, a near doubling of the 846 they managed in 2022, the Lib Dems 1,504 up from 1,303, and Reform 1,573 up from 32. Aspire contested every seat in Tower Hamlets; Residents' Associations of varying descriptions, independents and community independents fielded 521 candidates, compared to 209 in 2022.

Candidates contesting London council seats: 1964-2026

	Con	Lab	LD	Grn	Ref	Oths
2026	1,816	1,817	1,504	1,527	1,573	750
2022	1,754	1,817	1,303	846	32	438
2018	1,833	1,833	1,419	866	*155	449

*UKIP total prior to 2022. Prior to 1986 the Green Party contested elections as The Ecology Party

The campaign

Four years on from the 2022 local elections fatally crippling the premiership of Boris Johnson, the opposition parties were fairly confident they could repeat that feat with Sir Keir Starmer.

That was one of the central pitches of the Reform and Green Parties especially: vote for them to get rid of Starmer, an historically unpopular Prime Minister. Reform even set up a website (still live in August 2026): **www.getstarmerout.com**.

Council election campaigns tend to be, for opposition parties, continuations of their national attacks on the government of the day, while that same government discovers the importance of local track records, having "nationalised" their campaigns when they were in opposition.

Hence, London Labour - which had no city-wide messaging but left it to borough parties to design their own communications - focussed on their achievements if they were in power locally. Some boroughs (Ealing, Hammersmith & Fulham and Wandsworth) even came up with their own branding, abandoning or altering the party rose logo, to try to distance themselves from the deeply unpopular national party.

Generally, the Conservatives stuck to local issues in their publicity, as did the Liberal Democrats - though including their obsession with the US President in some of their leaflets.

Md. SAYMON
Newham Council Elections 7th May 2026
Md. Saymon is a self-employed businessman living in Newham. Married with young children and a local school governor, Saymon has been a strong voice against crime and drug abuse in the community. If elected, Saymon wants to tackle anti-social behaviour and its causes, with emphasis on serious crimes and drug abuse. Saymon supports business growth to attract employers who are willing to create jobs and support the economic growth of local communities.

SOUTH WOODFORD LABO
nding Up for ALL of South Woodf
Meet your local candidates
CLLR BEVERLEY BREWER
I have lived in South Woodford with my husband and four children since 2002. I care passionately about our area and have helped 100s of local people with their concerns. Alongside this I worked hard to secure extra funding for our local GP surgeries. My career was spent in the health and social care sector and as an inspector for the Care Quality Commission.
CLLR JOE HEHIR
I was born and raised in East London and have lived in South Woodford for 21 years with my wife and two children, who both attend local schools. I have pushed for improved children safety around our schools via School Streets. I have also successfully campaigned for the re-opening of the Post Office and the local library, which is due to return this summer.
ROB NEWMAN
I am proud to be standing as a Labour candidate for South Woodford at this election, the place I call home and a community I love. I have been an East London school governor, a trustee of a refugee charity. I've seen the difference a Labour council makes and we are the only ones with a costed plan for the whole borough. That's why we need your support this election.
Our Pro
A clean and green South Woodford by continuing to deal with litter louts and fly tippers. And protecting our great green spaces.
A safe South Woodford by working with the police and council to keep crime down and protect our area.
Let us know if you're supporting us

Introducing your Reform UK candidates for Bickley and Sundridge
LAWRENCE, Adrian
Reform UK
I am a long-standing Bromley resident and businessman with deep roots in the community. I understand the challenges residents face, from housing to local services. As your Reform UK candidate, I will focus on responsible development, financial discipline, and proper representation.
ELLERY, Michael
Reform UK
I am a long-term resident of Bickley, concerned by falling standards and inefficiencies within local government. I work in the tech sector and as an outsider, with no political experience, I can bring a fresh perspective to reducing waste and improving local services.
EVANS, John
Reform UK
I am a long-term local resident with a 25-year career in broadcast engineering. I am not a career politician and am standing to address local issues: potholes, rising crime, and wasteful council spending. I strongly believe in Reform UK's values of Family, Community, and Country.
LONDON
NEEDS REFORM
[redacted]
Hornchurch
RM12 [redacted]
Dear [redacted]
After almost 10 years of living under Labour Mayor Sadiq Khan, does London feel like the safer city Khan promised?
You don't need me to tell you that Khan's London is lawless.
In the 10 years to March 2025, violent crime in London soared by 40%, sexual offences by 75% and theft from the person by over 200%.
It's shameful that a phone is stolen in London every six minutes. It's disgraceful that people fear using a smartphone or wearing a watch on our capital's streets or the Tube.
Police hardly dare to use stop-and-search, even though they know it reduces knife crime. Under Labour and Tory mayors, the number of Metropolitan Police stations with front counters open to the public has been cut by 80%.
Met chiefs and Khan seem more worried about hiding the truth of the grooming gangs scandal from the people of London.
Nobody really knows how many hundreds of thousands of illegal immigrants live in Khan's London. We do know that thousands of undocumented young men are put up in London hotels at taxpayers' expense and left free to roam the streets.
Whose side are Mayor Khan and his cronies on? The local elections in May will be your chance to help change the way London is run. Reform UK will stand up for all the hard-working, law-abiding people of London.
You might not know that Reform's policing policy is now driven by our crime tsar Colin Sutton – the former top Met detective who caught serial killer Levi Bellfield and the "Night Stalker" serial rapist Delroy Grant.
A Reform government will crack down on lawless London by hiring thousands more police. We will step up stop-and-search to drive knives off London's streets. We will pursue every burglar and trackable stolen phone and prosecute shoplifters.
We will make prison automatic for sexual offences, violence and knife crime – with no chance of early release. Reform will detain and deport illegal immigrants in London.
Unlike the old parties, we will not let you down. Only Reform can be trusted to put the pride back in London.
Nigel Farage
REFORMUK

A record of action...
...and a promise of more.

A RECORD OF ACTION!
since being elected. Here are some of the things the local Lib Dem team have done for residents in the last 12 months
Securing Funding for a new Zebra crossing on South Lane
Improving Our Ward and Shop Parade: Five new notice boards and additional public bins have been installed across across the ward.
Major Improvements to the Hogsmill Walkway: Completely resurfaced and now fully accessible, with new signage and enhanced safety measures, ensuring everyone can enjoy this protected green space all year round.
Resurfaced roads. Landseer, Kneller, Coensborough road & South Lane
Greener: We've planted over 140 new trees in Old Malden, the largest number planted in any ward across the borough in the past two years.
Safer Roads for All: installation of four new digital speed displays and regular police speed checks throughout the ward.
Sheephouse Way: New Merrotter bins installed to improve waste management and prevent fly-tipping, with CCTV monitoring in place.
Old Malden
Green Initiatives: Our focus has been on Six Acre Meadow and the Southwood reserve. We are now working on securing funding to complete the Meadows boardwalk.
Muybridge: Implementation of a new CCTV system to secure the block and car park
Safety First: Enhancing pedestrian alleyways with new dog fouling and no cycling signage, alongside improved LED lighting to create a safer and more welcoming environment.
Plough Pond Restoration project launched for our historical pond, with public consultation ongoing and completion targeted for early 2025.
Walkway improvements: New safety bollards installed at Manor Drive North to protect pedestrians.
Life-Saving Initiatives: 9 fully secured AEDs defibrillators have been installed across the ward, making Old Malden one of London's most prepared wards.
Church Road: safer, cleaner: Overgrowth cleared, 20mph road markings and signage in place.
Improved Maintenance: Leaks fixed in collaboration with Thames Water; storm drain work ongoing to prevent ice build-up and improve road conditions.
Lib Dems: the team that gets things done for Old Malden

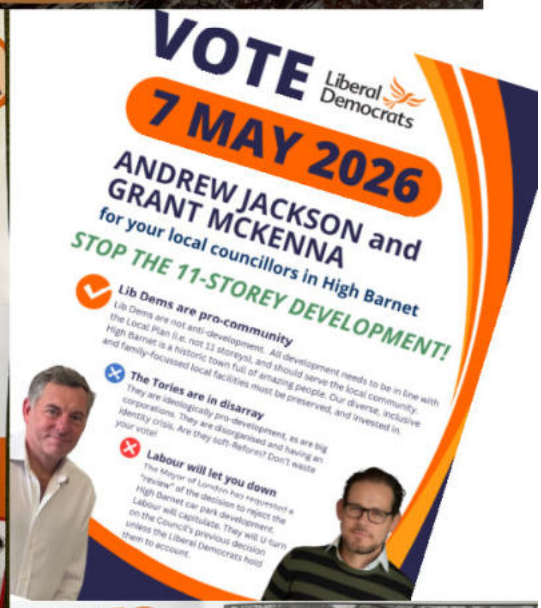
Liberal Democrats
LIB DEMS LAUNCH DUMPER DOSSIER
Campaign to find and tackle Lambeth's worst fly-tipping hotspots
Local Lib Dem campaigners are collecting a "Dumper Dossier" of our area's worst grot-spots.
"We'll press the Council for action on all the grot spots we identify," said local Lib Dem David Whitaker.
PREVENT DUMPING
"The high level of fly-tipping shows how street cleaning is failing," added Lib Dem Tamora Langley. "More CCTV enforcements would help tackle regular fly-tipping sites. We want more 'community skip days' that make it easier to get rid of bulky rubbish items legally."
The Lib Dem team are identifying our area's dumping hotspots
STOCKWELL COUNCILLOR SWITCHES TO LIB DEMS
Stockwell's longest serving Labour councillor, Cllr Tina Valcarcel has switched to the Lib Dems.
Like many local people, Tina feels that Labour no longer represents her.
She has joined the Lib Dems and is backing local Lib Dem campaigners Tamora Langley and David Whitaker.
Many long-time Labour voters agree - it's time for a change after 20 years of Labour in Lambeth.
Lib Dem leader Ed Davey visited Lambeth to welcome Tina to the Lib Dems.
Liberal Democrats winning here



VOTE
Liberal Democrats
7 MAY 2026
ANDREW JACKSON and GRANT MCKENNA
for your local councillors in High Barnet
STOP THE 11-STOREY DEVELOPMENT!
Lib Dems are pro-community
Lib Dems are not anti-development. All development needs to be in line with the Local Plan (i.e. not 11 storeys), and should serve the local community. High Barnet is a historic town full of amazing people. Our diverse, inclusive and family-focused local facilities must be preserved, and invested in.
The Tories are in disarray
They are ideologically pro-development, as are big corporations. They are disorganised and having an identity crisis. Are they soft-Reform? Don't waste your vote!
Labour will let you down
The Mayor of London has requested a "review" of the decision to reject the High Barnet car park development. Labour will capitulate. They will turn on the Council's previous decision unless the Liberal Democrats hold them to account.

Our better plans for South Croydon
EXCLUSIVE: Mayor raising tax 33% - and plans yet more service cuts
33% Council Tax rise in four Tory years
Paying 33% more to get LESS!
What would we do?
CROYDON'S DEBT: THE FACTS
Labour added £628 million of debt (since 2014)
Tories added £724 million of debt (2006 - 2014)
Labour bankrupted Croydon twice, but previous Conservatives were as bad and they have bankrupted us a third time!
Over half Croydon's debt mountain came from previous Conservative Councils. This time added yet more cheer.
The Tories failed to collect Council Tax, and misspent on a now empty HQ and their own version of Brick by Brick.
Meanwhile Lib Dem controlled Sutton avoided big cuts and has been far better at handling its finances.
Only the Lib Dems offer SENSIBLE CHANGE for South Croydon

THE LIB DEMS ARE ON THE UP!
Lib Dems welcome their 8th Councillor to add to the growing Official Opposition team
Like many local people, Kate found her new political home with the Liberal Democrats. She believes they are the best choice to stand up for local people as Ealing Council's Official Opposition.
The Liberal Democrats are committed to defending our public services.
Many Labour supporters are turning to the Lib Dems this May to SEND A MESSAGE to Labour.
They say that the Lib Dems have a strong record of action and can deliver the change our borough desperately needs.
Ealing residents need a strong voice in the Town Hall. Be part of the WINNING momentum by voting Lib Dem on 7th May.

London mayoral contests

Five London boroughs: Croydon, Hackney, Lewisham, Newham and Tower Hamlets have directly-elected mayors. Going into the 2026 elections, Labour held three of the five (Hackney, Lewisham and Newham) whilst the Conservatives had won Croydon in its inaugural 2022 contest and Lutfur Rahman of Aspire had regained office after his disqualification for electoral fraud, in Tower Hamlets.

Two of these mayors had been elected in by-elections: Hackney, after the resignation of Labour's Philip Glanville in 2023 (he was succeeded by Labour's Caroline Woodley), and Lewisham where Damian Egan was selected to stand in the Kingswood parliamentary by-election in early 2024 (succeeded by Brenda Dacres, also Labour).

Prior to the 2026 elections the Labour government had announced its intent to abolish directly-elected mayors for individual local authorities by the time of the 2030 London elections, in part to end confusion between them and regional mayoralties, which it planned on expanding across the country. So this year's contests would likely be the last before power returned to councillors.

Similar to the pattern that played out across London as a whole, Labour had little realistic chance of recapturing the mayoralty of Tower Hamlets and faced a severe challenge holding onto its three mayoral positions in Hackney, Lewisham and Newham.

Of these, Hackney, where Green Zoe Garbett was standing for the third election in a row, was the most vulnerable.

Because of a turbulent term of office in Newham epitomised by splits, failure to deliver on promises and a growing budget problem, Labour was somewhat more worried about this borough despite being one of the party's most secure boroughs over the long run. Incumbent mayor Rokhsana Fiaz had been deselected after two terms while a new party springing out of anger over Gaza and poor council services: Newham Independents, had emerged: well-funded and with a media savvy leader in Mehmood Mirza.

Labour was more confident about holding Lewisham, even as they worried about losing the council. But mayor Brenda Dacres had been appointed to the House of Lords by Keir Starmer and so a third different Labour mayoral candidate in four years, Amanda De Ryk, was on the ballot.

But Labour had a decent prospect of winning Croydon after the incredibly narrow Tory win there in 2022, how politically polarised the borough is, and the fact that the council was still in dire financial straits - in fact somewhat deeper debt than four years earlier. Croydon was also interesting in that it was the only one of the five mayoral boroughs where the Conservatives were in contention and Reform had the potential to have an impact - not strong enough to win but to eat into the Tory vote in the south. Labour selected Rowenna Davis, a one-term councillor and former Labour parliamentary candidate, as their candidate to attempt to overturn the 2,061 vote first-round lead Perry had won in 2022.

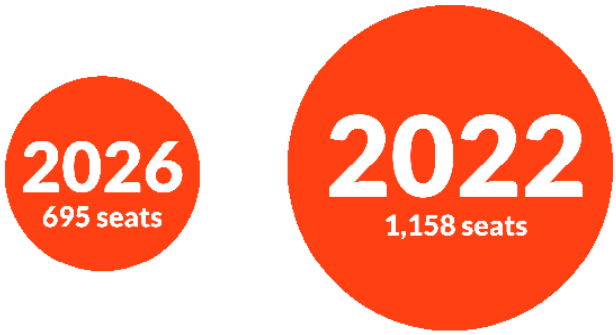
Labour

Labour lost 463 seats, 40% of the total it was defending from 2022. That is a far greater loss than at any election since 1968 (69% lost then, 19% lost in 1978, 21% lost in 2006). Had it been to just one other party (as in 1968 and 1978) the result would have been at least as bad as Labour suffered across the rest of England beyond London. Probably even worse than 1968, when they were left controlling just three councils.



But because London's politics has fragmented so much since 1968, first bythe SDP-Liberal Alliance in 1982, then with the Green Party from 1990 and now Reform UK, Labour's losses were diffused across the political spectrum, both blunting the impact of those losses and in some cases enabling Labour to hold on with very low shares of the vote.

The atomisation of London's politics is critical to understanding the capital in the 2020s; it cannot be understood any other way. The Conservatives effectively no longer exist in swathes of London. Even places they've always struggled to win have traditionally given the party respectable vote shares - but no longer.

distribution of Labour's vote in 2026 and 2022 by tranches of wards

Labour remains the only party with broad support across the bulk of London - that is apart from the three Lib Dem boroughs in the south west. There are just two boroughs (Richmond and Kingston) without any Labour representation, compared to ten with no Conservative councillors, fourteen with no Greens, seventeen with no Lib Dems and twenty on which Reform UK is unrepresented.

Yet Labour's vote was the lowest since the London boroughs were founded: just 25.5%. That was just over three points ahead of the Greens and five points ahead of the Conservatives. In 2006: Labour's last really poor round of London elections, they polled 27.6%; in 1968 28.3%.

What made these elections only extremely bad instead of cataclysmic was that in 1968 the Tories polled 60%; in 2006 35% and in 2026 just 20%. Hence, Labour survived in places they traditionally would not: affluent, middle class wards and boroughs which once would have swung behind the Conservatives in a Labour mid-term. The Conservatives have faded but the Greens cannot replace them to the same level of support the Tories once enjoyed in the capital. Hence Labour can remain competitive, despite also fading substantially, against a divided opposition.

Ward	Borough	Lab%
Figge's Marsh	Merton	55.3
Pollards Hill	Merton	52.2
White City	Hammersmith	51.6
Graveney	Merton	51.0
Longthornton	Merton	50.9
Brondesbury Park	Brent	50.7
Wendell Park	Hammersmith	49.6
Crystal Palace and Anerley	Bromley	48.5
Grove	Hammersmith	48.3
Cricket Green	Merton	48.1

Ten largest Labour vote shares in London in 2026

The ten largest Labour vote shares table highlights the party's collapse. In 2026 Labour polled more than half the vote in just six wards. In 2022, there were forty where Labour polled over 70% - 307 where they polled over 50%.

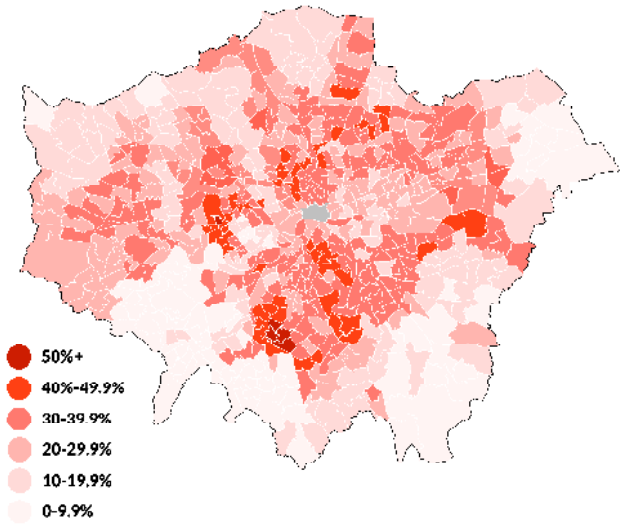
Wards like Northumberland Park in Haringey, which in 2018 was Labour's safest in London with an 81% vote, elected a Green councillor this year. Clementswood in Redbridge, 84% Labour in 2022 (albeit in a straight two-way fight), elected an Ilford Independent this year. Even Figge's Marsh, the ward that gave Labour its highest share this year of 55.3%, was 82% Labour as recently as 2018.

The Labour collapses were right across London. Southall used to produce the largest Labour votes in West London (the antecedent to Southall Broadway gave them 92% in 1990; the predecessor to Southall Green 86% and Lady Margaret as recently as 2018 74%.

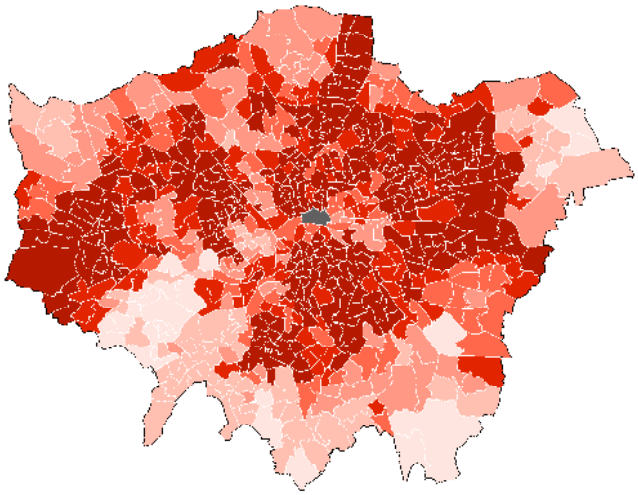
In Croydon, where the north of the borough has swung far and fast to Labour since the 1990s, Bensham Manor has gone from a Labour vote of 74% in 2018 to 43% in 2022 and just 40% this year. Adjoining West Thornton and Thornton Heath have very similar stories: this was not a fluke in that one ward.

In the outlying council estate ward of New Addington South, where Labour polled 81% of the vote in 1971, they managed 22% this year, finishing third behind Reform and the Tories.

Labour vote map 2026



2022



New Addington North, which contains more high-rise housing and fewer homes bought under right to buy, Labour polled three quarters of the vote as recently as 1998; 60% in 2018, 47% in 2022 and 37% in 2026. A quirk of the electoral system meant Labour regained a seat lost to the Conservatives there in 2022 despite that 10-point drop in vote share because the Tories crashed by 25 points.

You can choose almost any borough for similar outcomes. Deptford's Evelyn ward - a high-rise council estate ward - has given Labour as much as 89% of the vote in the past: 31% this year - and it elected its first ever non-Labour councillors (Greens). Golborne in Kensington: 79% Labour in 2018, 41% Labour in 2026; St Helier East in Sutton: 92% (yes, ninety two) Labour in the 1970s; 7% Labour in 2026. Burnt Oak in Hendon - so massively left-wing when it was first built that it earned the nickname Little Moscow: 88% Labour in 1971, 72% Labour in 1994, 63% Labour in 2022, 34% Labour in 2026.

What these long-run figures show is that Labour's problems in 2026 weren't just about Keir Starmer and a specific Labour government: they're about a fundamental realignment of London's political firmament. It happened to the Conservatives from the 1990s as white Londoners moved out of the city at the same time as the capital's ethnic minority and European Union populations began to soar.

That change made London a Labour city. Now London looks a lot more like European cities like Paris where the centre left's principal opposition - especially in the inner neighbourhoods - come from the more radical left and the Greens.

Ward	Borough	Lab%
South Twickenham	Richmond	3.9
Coombe Hill	Kingston	3.8
Darwin	Bromley	3.7
Worcester Park South	Sutton	3.6
Carshalton South & Clockhouse	Sutton	3.6
Barnes	Richmond	3.6
Hampton	Richmond	3.4
Cheam	Sutton	3.4
Tudor	Kingston	3.4
Ham, Petersham & Richmond Riv.	Richmond	2.6

Ten smallest Labour vote shares in London in 2026

The risk for Labour is that voters who get into the habit of voting for other parties don't necessarily lose that habit, even if their popularity returns. Or, at least, it takes a lot of work to fix the problem and regain the loyalty. If Barnet Labour has to focus effort in holding onto Burnt Oak that's effort not going into wards like Childs Hill or Whetstone or East Barnet. Ditto Westminster Labour needing to work hard now to hold Harrow Road instead of Little Venice or Bayswater. And so on.

Because the Conservatives have been largely neutered in London and a new threat, principally in the centre and east of the city, has emerged the political map has changed starkly.

Labour now looks stronger in more affluent west London than east. The only Labour-run boroughs in the traditional East End are now Barking & Dagenham and Redbridge - once a Tory fief, now with barely any of their councillors left, plus the Newham mayoralty. Hackney is lost, Tower Hamlets is lost, Waltham Forest is lost Newham council is lost. Hackney and Tower Hamlets aren't just lost: Labour barely exist on either council.

The highest Labour borough-wide vote in London was found not in Haringey or Lambeth or Islington but in Hammersmith and Fulham. Even there it was a pretty dreadful 36.9% (down almost 18 points on 2022). In just twelve of thirty-two boroughs did Labour surpass 30% of the vote; in seven they

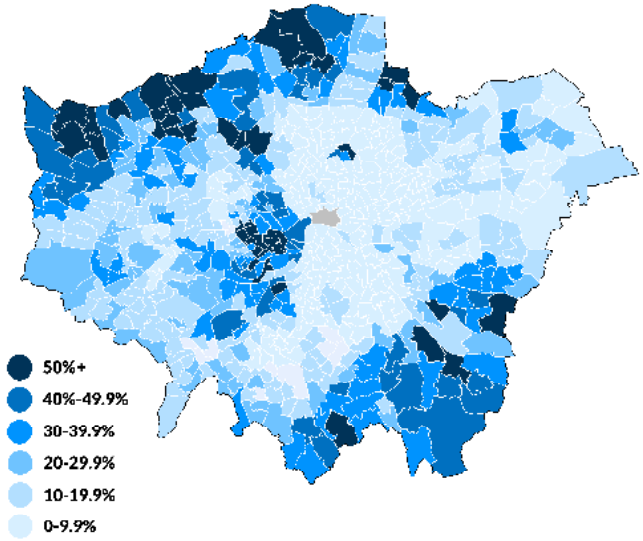
polled less than 20%. It's just that, other than in a handful of boroughs, no one could better those performances.

The Conservatives

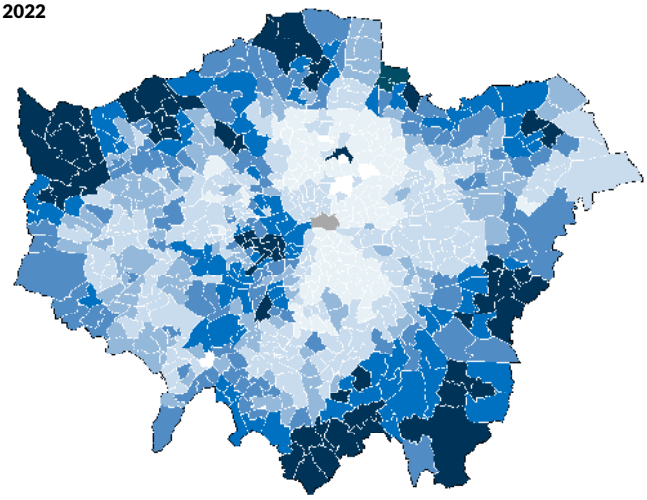
Only in the context of the three dreadful sets of London borough elections that preceded 2026 can these elections be regarded as remotely impressive for the Conservatives. Their result was barely sufficient, and it was barely that.

By regaining Westminster, winning enough seats to run Wandsworth and Enfield in the minority, almost retaking Barnet, seeing off the Reform challenge in Bexley and Bromley, and significantly increasing their majority in Harrow, the Conservatives appear to have done alright. Look beneath the headlines and things are nowhere near as rosy. Their performance was founded on a more efficient distribution of a record low vote.

Conservative vote map



2022



The Conservatives gained just 74 seats across London: almost all in those boroughs listed above, and all 74 from Labour. That's nice, except that between 2010 and 2022 the Tories lost 312 seats net, so they're still 238 down on their last heyday under David Cameron.

Those 74 were not the net Tory result either: the party also managed to lose 68: five back to Labour, 27 to the Lib Dems (two thirds of them in Sutton), one to the Greens, one to Havering Residents and 34 to Reform UK. The net Conservative gain across London was just six seats.

For every seat the Conservatives gained from Labour, the Greens gained almost four. The Conservatives remain the second party in London in terms of seats but no longer in terms of votes: the Greens polled 59,791 votes more.

Yet the swing from Labour to the Conservatives since 2022 was a not-inconsequential 5.55%, and it was focussed on those boroughs where the Conservative vote has not atrophied to non-existence. Three factors explain why the Tories barely shifted the dial from such a low base.

First, those three successive Labour surge elections of 2014, 2018 and 2022 didn't just expand the number of councillors the party returned: they entrenched Labour in wards that were traditionally marginal and, by 2022, were not. Labour was able to shed votes by the bucket-load and still retain enough support to hold wards they once would have lost.

Added to that is the value that campaigning Labour councillors out in their communities would have been able to buttress - the *"I dislike what your government's doing but have seen you've been working for us"* factor. Incumbency matters and, if anything, it is becoming more important.

Second, London is no longer a city where the only swing that matters is between Labour and the Conservative - it hasn't really been so since the SDP Liberal Alliance broke onto the scene in 1982, but is especially so in an era of five party politics (plus localist parties).

This year there was a Labour to Conservative swing of some consequence, but there were also swings from Conservatives to Lib Dems (1.95% - and concentrated in Conservative-Lib Dem battlegrounds, not spread evenly throughout the city), the Greens (8.15%) and, to Reform (9.5%).

The Conservative losses to Lib Dems and Reform, essentially at opposite ends of the capital, were direct hits on Conservative support and seats because these parties were the challengers in Conservative-held seats. But even the Greens, who made little impact on the Conservatives' seats total (just than one loss in Chiswick Riverside, Hounslow) still had an impact on their recovery because voters who would once have swung behind the Tories to kick Labour went Green (or Lib Dem - as in Ealing or Merton) this year.

That, of course, is in no small part a legacy of the positioning the Conservatives have chosen since David Cameron resigned as Prime Minister - principally over Brexit - appealing to the more conservative country beyond London than the much more liberal values of the capital.

But it is why wards that, in economic terms at least, should have Conservative councillors: Hanger Hill, Northfield, Walpole, Ravenscourt, Grove, Brook Green, Clapham Common and Abbeville, Dulwich Village, Dulwich Wood, Greenwich Park, Blackheath Westcombe, Eltham Park, Grove Park, Bromley Town, Beckenham Town and Copers Cope, Belsize, Primrose Hill, South Hampstead, Brondesbury Park, Churchfields, South Woodford, Wanstead Village or South Balham do not.

Many of these affluent wards stayed with Labour, while in others Lib Dems or Greens leapfrogged the Conservatives to snatch seats. Meanwhile Reform did the same in outer wards which either elected Conservative councillors in 2022 or have a recent history of supporting that party; notably places like Hanworth, Feltham, Heathrow and Yiewsley in the west and Hainault, Gooshays, Heaton and Rainham in the east.

Of course, while the fragmentation of London's electoral battleground threw up roadblocks to the Conservatives recapturing wards they might in a more traditional environment have expected to regain (or never lose in the first place), the fact that Labour's vote

Ward	Borough	Con%
Courtfield	Kensington	68.2
Holland	Kensington	66.3
Golders Green	Barnet	65.8
Brompton and Hans Town	Kensington	64.6
Royal Hospital	Kensington	63.8
Queen's Gate	Kensington	61.7
Campden	Kensington	60.8
Abingdon	Kensington	60.8
Norland	Kensington	60.8
Stanley	Kensington	59.7

Ten largest Conservative vote shares in London in 2026

Third, while I assert that the Conservatives distributed a smaller vote better, they also entrenched their own vote in wards they held but which were beginning to look a little vulnerable by 2022. This was especially evident in Kensington and Chelsea where wards like Holland, Courtfield and Redcliffe swung hugely back behind the Tories. Nine of the ten largest Conservative vote shares in London this year were in Kensington & Chelsea.

Meanwhile the Conservatives have become as Balkanised a party as the Greens and Lib Dems in London. Here's how their vote share distributed in 2026 compared with 2022:

	2026		2022	
80.1%+	0	40	0	57
70.1-80%	0		0	
60.1-70%	9		8	
50.1-60%	31		49	
40.1-50%	49	125	94	186
30.1-40%	76		92	
20.1-30%	88	513	126	430
10.1-20%	182		198	
0.1-10%	243		106	

distribution of Conservative vote in 2026 and 2022 by tranches of wards (Conservatives did not contest six wards in 2022)

Not just 513 wards where the Conservatives polled less than 30% of the vote, but 243 (that's more than a third of London) where they polled 10% or less - in other words, where they are at best moribund. That compares with just 36 wards in which the Greens polled 10% or less, 89 where Labour did, and 469 where the Lib Dems - the epitome of a Balkanised party - did.

Nor is the future all that promising for the party. Demographic change is still moving against the Conservatives, especially in Barnet and Wandsworth. In Kensington and Chelsea, Wandsworth and Westminster Conservative-run boroughs will be compelled to significantly increase Council Tax because of the Labour government's switch of millions in central grant funding from these historically low-tax boroughs to more highly-taxed northern councils. If, by 2030, there is no longer a Labour government in power the Tories' chances of holding these boroughs, let alone building on their faint recovery of 2026, will be poor.

Ward	Borough	Con%
Limehouse	Tower Hamlets	3.3
Grove Green	Waltham Forest	3.2
Stroud Green	Haringey	3.0
Bromley North	Tower Hamlets	2.9
St Katherine's and Wapping	Tower Hamlets	2.7
Bow East	Tower Hamlets	2.6
Telegraph Hill	Lewisham	2.3
Spitalfields and Banglatown	Tower Hamlets	2.1
Poplar	Tower Hamlets	1.9
St Dunstan's	Tower Hamlets	1.8

Ten smallest Conservative vote shares in London in 2026

If, on the other hand, Labour remains in power, the split in the right is either healed or much less consequential than now,

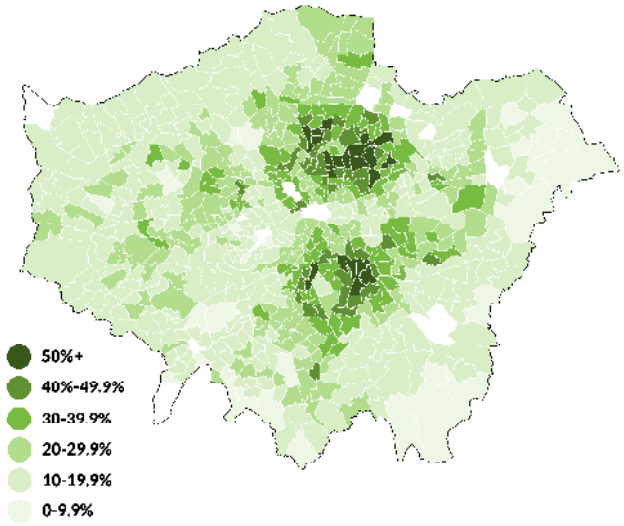
and the Conservatives are less tainted by their time in government, they might have a chance of starting a rebuild in boroughs like Ealing and Hammersmith & Fulham and Sutton, and maybe even Merton, Richmond and Kingston - but probably nowhere else: they're too far gone for that.

The Green Party

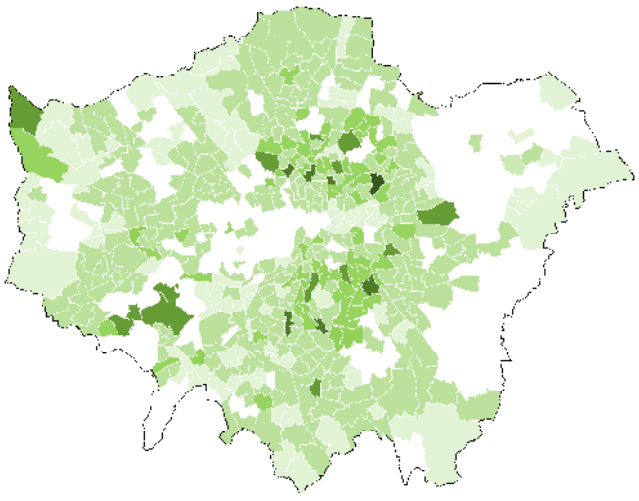
The Greens finished second in the London-wide popular vote with 22%: a bit more than three percentage points behind Labour. In Hackney and Lewisham they polled over 40%; and in five more (Haringey, Islington, Lambeth, Southwark, and Waltham Forest) over 30%. Excepting Islington the Greens are now in power in all these boroughs.

The party is now represented on eighteen of the thirty two boroughs, with groups of more than ten councillors (in other words: of sufficient size to maintain a broadly effective profile) in eight. But they still remain as "Marmite" a party as Reform UK: it's just that there are more Green Marmite lovers in London than elsewhere.

Green vote map



2022



The Greens' results were largely either big breakthroughs or damp squibs. But even in the inner London boroughs on which they are still not represented (Hammersmith, Kensington, Wandsworth, Westminster) they made big incursions in their target wards: a near-kamikaze strategy of trying to win the very safest Labour wards in those boroughs. That failed in the sense they did not win them; perhaps less so if their objective was to take on Labour over a longer-run than one election.

	2026		2022	
80.1%+	0	19	0	2
70.1-80%	0		0	
60.1-70%	3		0	
50.1-60%	16		2	
40.1-50%	48	142	7	22
30.1-40%	94		15	
20.1-30%	156	501	73	467
10.1-20%	309		288	
0.1-10%	36		106	

distribution of Green vote in 2026 and 2022 by tranches of wards (Greens did not contest eighteen wards in 2026 and 188 in 2022)

The Greens now control as many London councils as in the rest of England, Wales and Scotland combined: three where they have outright control and three in either coalition with or the tacit support of the Liberal Democrats. Across England the Greens have majorities on Hastings, Norwich and Mid Suffolk, and run in the minority eleven others.

Ward	Borough	Grn%
Stratford Olympic Park	Newham	62.1

Hermitage and Gardens	Haringey	58.4
Lea Bridge	Waltham Forest	57.1
St Ann's	Haringey	56.9
Forest	Waltham Forest	54.5
Ladywell	Lewisham	53.4
Nunhead and Queen's Road	Southwark	52.8

Ten largest Green Party vote shares in London in 2026

London has gone from being a major Green disappointment to its strongest base in one election. That's because of its shift to a more left-wing position to take on Labour and because of the rare Labour weakness of deep mid-term unpopularity (rare because Labour is so rarely in government, not because it's usually so good at running things when it is).

But still there are swathes of the London map coloured the palest greens - still better than the chunks that were white in 2022: East London, South East London and central London. But that is the downside of a fractured politics: yes, more

wards are brought into play because all parties win much lower vote shares but political polarisation narrows the range of voters each one will ever appeal to. This "marmite" phenomenon may even change tactical voting because while more people identify even more strongly with "their" party, they are less willing to compromise and choose a party less to their liking to defeat the ones they really abhor. We're even seeing this phenomon with supporters of Rupert Lowe's Restore UK party so viscerally animated by their antagonism towards Nigel Farage and Reform UK.

Ward	Borough	Grn%
Courtfield	Kensington	7.4
Worcester Park South	Sutton	7.3
Chelsfield	Bromley	7.2

Rainham and Wennington	Havering	6.8
Upminster	Havering	6.3
Hacton	Havering	6.1
Darwin	Bromley	5.9
Emerson Park	Havering	5.5

Ten smallest Green Party vote shares in London in 2026

The Greens will want to embed themselves in the boroughs they won to ensure they hold them in 2030 and get the few seats needed to take majority control of the boroughs they narrowly missed out on this year. They are just 0.1% from gaining Haringey, 0.3% from Lambeth, 1.6% from Islington, 1.8% from Southwark and 2.7% from Greenwich. These are tiny swings needed, especially when contrasted to the huge swings they achieved this year to put these inner city boroughs into play.

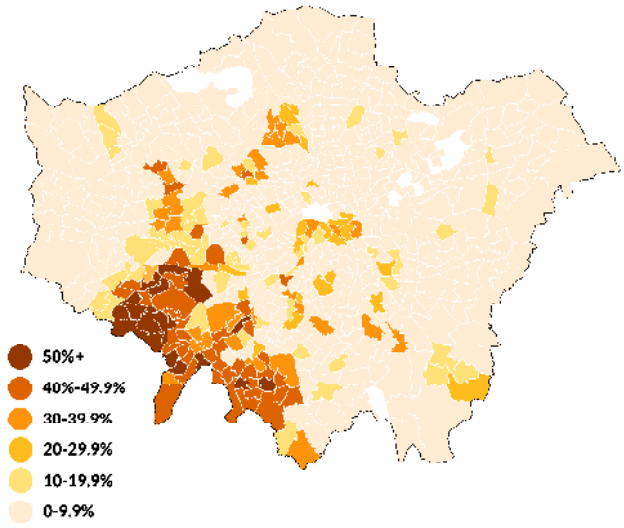
They will also hope to break onto councils they still don't have any seats on, but again which they came pretty close to getting elected to this year. They need 17 more votes to win a seat in Harrow Road in Westminster, 51 more to win in Golborne in Kensington, 52 more in Tooting Broadway in Wandsworth and 175 more in Shepherd's Bush Green, Hammersmith.

But they clearly have an outer London problem. Even in the outer London boroughs on which they won seats the wards they gained tend to have strong demographic similarities to inner London wards. And the fact there are no Greens on affluent south west London boroughs, despite having hordes of the sort of voters you might believe would be open to voting for the party again speaks to the polarisation - the narrowing - of the profile of those willing to back the party. That sounds odd in the year the Greens won so many more seats than ever before, but the reality is that the Greens have a wide floor but a lowering ceiling for their support. They cap themselves with their positioning, even as it opens up a certain type of ward deep in inner London. Trying to push this ceiling up is what they need to aim for by 2030.

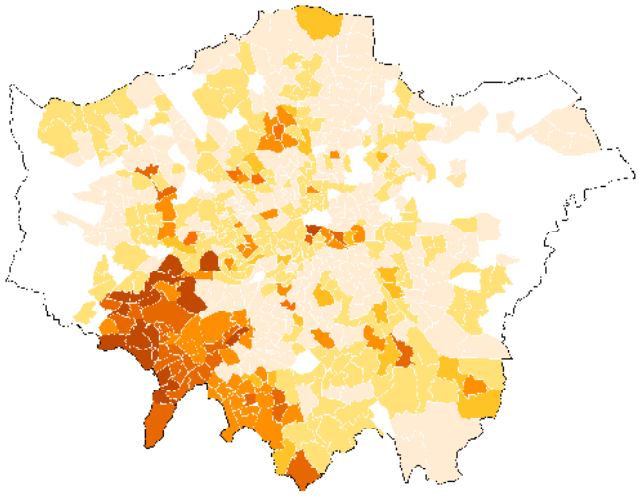
Liberal Democrats

The Liberal Democrats have become largely an afterthought in London elections. They have their three affluent south western boroughs, in which they improved to the point of holding all the seats in Richmond-upon-Thames, and virtual monopolies in Kingston-upon-Thames and Sutton. They also managed to contest all but fourteen wards this time, after leaving 114 without candidates in 2022.

Liberal Democrat vote map



2022



Yet despite that - fairly significant - increase in candidates, the Lib Dems polled 2% less this year compared to 2022. In other words, that decline would have been larger had they contested the same number of seats at both elections. Of course, some of that decline was due to 2022 Lib Dems voting Green in 2026 - potentially even a handful voting Reform this

year. A portion of the Lib Dem vote is, after all, a "none-of-the-above" vote: it is not ideologically desperate for liberalism in their ward or borough. This segment of their vote has diminished greatly since the EU referendum but it's still there and regrouped a bit in the 2024 general election.

The party will point to their vote, as opposed to their vote share, rising this year - by 17,601. That was a feature of a higher turnout across London, not of advances in support. It's the equivalent of those extra 114 candidates of theirs winning 154 votes each.

They are nowhere close to winning control of the other twenty-nine boroughs, even though they can cite a degree of progress in Ealing and Merton, Lambeth and Southwark. In those latter two boroughs the Lib Dems won enough seats to hold the balance of power and become junior partners to the Greens in coalition.

The Lib Dems also hold the balance in Haringey but have been less willing there to unite behind the Green Party, despite this being the first non-Labour majority in 55 years there. The Greens still run the borough; just without the certainty of an arrangement that guarantees they'll win every vote.

20.1-30%	31	571	31	470
10.1-20%	71		216	
0.1-10%	469		223	

distribution of Liberal Democrat vote in 2026 & 2022 by tranches of wards (Lib Dems did not contest 14 wards in 2026 and 114 in 2022)

Essentially, however, this was at best another stand-still election for the Lib Dems as their vote spread table shows. If you add the 114 wards the Lib Dems failed to contest in 2022 to the 223 in which they polled less than 10% last time, the numbers in each band of votes barely shifted. Indeed, the number of wards in their weakest band more than doubled: in more than 70% of London the Lib Dems won less than 10%.

Progressive voters who, in 2006, happily swung behind the Lib Dems in protest at an unpopular Labour government this year chose the Greens - except in boroughs where the Lib Dems were entrenched.

In Richmond, the pact the Lib Dems reached with the Greens to stand down some candidates in order to give the latter a near certain chance of winning council seats, in exchange for the Greens not standing anywhere else in the borough, came to an end. As had been suggested in Richmond by-elections, where the pact didn't apply and the two parties opposed each other, the Lib Dems trounced the Greens, gaining their five seats and eradicating all "opposition" from the council.

Ward	Borough	LD%
Teddington	Richmond	57.2
North Richmond	Richmond	56.7
St Margarets & North Twickenham	Richmond	56.6
Twickenham Riverside	Richmond	55.3
Hampton Wick & South Teddington	Richmond	54.0

Hampton North	Richmond	50.9
Carshalton Central	Sutton	50.7
Wimbledon Town and Dundonald	Merton	50.6
East Sheen	Richmond	50.5

Ten smallest Liberal Democrat vote shares in London in 2026

In Sutton a somewhat different dynamic was at play, whereby progressive voters rallied behind the Lib Dems to stop Reform, while Reform split the right of centre vote. This wiped the Tories - who weren't far off a majority in 2022 - off the council. The Liberal Democrats have now run Sutton for fifty years unbroken, even though in many ways it is far less identikit a Lib Dem borough than Richmond or Kingston.

Ward	Borough	LD%

Hylands and Harrow Lodge	Havering	1.6
Hacton	Havering	1.5
Emerson Park	Havering	1.2

Ten smallest Liberal Democrat vote shares in London in 2026

In many ways the Lib Dems are custom-built to exploit a fractured and polarised political landscape. They know where they can win and where they stand no chance, and they are the experts at maximising their vote in the places they can. That's why forecasts of how many seats the Liberal Democrats can win often predict they'll win more than the Conservatives despite winning millions fewer votes: they can write off nine seats and grab the tenth.

But so much of London on their vote "heat map" on the previous page is barely a lighter shade of pale for them: when

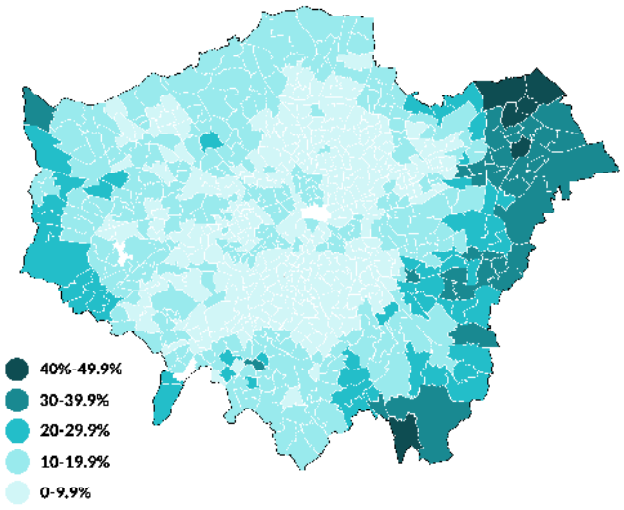
they need far more of it to colour the deep oranges and umbers in which they bask in Richmond. The risk for the Lib Dems where they have a foothold on power, shared with the Greens, is that now voters can see who the principal opposition to Labour is - in places like Bermondsey and Hornsey - they could lose their niches in otherwise barren ground quite rapidly. Plus, if you pretty much hold every seat in the boroughs where your popularity has maintained, sooner or later the only way is down.

Reform UK

The newest party on the block, Reform UK, have yet to master one of the basic rules of politics: under-promise and over-deliver. Prior to the election Reform leaders, not least Nigel Farage were talking up their prospects of gaining six London boroughs. Those were, in increasing order of difficulty: Havering, Bexley, Bromley, Barking and Dagenham, Hillingdon and Sutton. They also seemed to expect sizeable Reform councillor groups in Croydon, Harrow, Barnet and Hounslow.

Yet the party only managed to win Havering; the barely-London borough covering Romford, Hornchurch and Upminster - all areas that prefer to regard themselves as Essex.

Reform UK vote map



Note: there's no 2022 vote share map for Reform because the party only stood in 32 London wards four years ago

Despite internal confidence that they would hold on, the Conservatives' successful defence of Bexley: the Kentish equivalent of Havering, was a major surprise, although a closer delve into the results show an awful lot of Tory seats held by not a lot of votes. Bromley was held more securely still with Reform only breaking through in the formerly independent-held ward of Biggin Hill, and working class St Paul's Cray, where two of the seats had been held by Labour until 7th May.

The only Labour-led borough on Reform's target list, Barking and Dagenham, was there principally because this was a rare Leave-voting London council area in the 2016 EU referendum. But, a decade on, Barking and Dagenham is a radically different borough to that which it was when it voted Leave; even more so than when it elected a dozen BNP councillors twenty years ago.

This "difference" comes in three forms. Old Barking has become substantially more Muslim as population migrates from Newham and Tower Hamlets outwards. New Barking, along the Thames- and Roding-side, has been transformed from industrial to high-rise residential, with a substantial black African and Caribbean population. And the vast Becontree council estate: the core of Dagenham, has also become much less white.

Not so much less white that it was impossible for Reform to win though - they demonstrated that by winning seats in Goresbrook, Parsloes and Valence: the central strip of the estate, as well as the Romford-borders ward of Eastbrook and Rush Common. They simply failed to live up to their own hype in the London borough most loyal to Labour over the long-run.

0.1-10%	310		32	

distribution of Reform UK vote in 2026 and 2022 by tranches of wards (Reform did not contest 2 wards in 2026 and all but 32 in 2022)

Reform UK did well - but, again, not as well as they hyped themselves to do - in outlying old Greater London Council housing estates; still white, with a huge right-to-buy contingent. Harold Hill with its two wards of Heaton and Gooshays, are now two of the strongest Reform UK wards in London (which isn't saying that much but still). They also won seats in nearby Hainault, the aforementioned St Paul's Cray in Bromley, which is less a council estate - rather a working class, fairly deprived ward with the largest traveller community in London, and New Addington South - but not North.

In the west, there is now a Reform councillor representing the villages surrounding Heathrow airport, one in next-door West Drayton, and one in Yiewsley. To the south of Heathrow, Reform won seats, but not whole wards, in Feltham and Hanworth, to give it representation on remarkably diffuse Hounslow council.

These breakthroughs in their first mass foray into London borough elections would have been regarded as a decent performance in by far its weakest part of Great Britain, were it not for Nigel Farage's inability to manage expectations (the media's and his party's), and the successes Reform had in the 2025 council elections. After all, there are more Reform London councillors after one election than there were Green councillors elected in 2022 - and that party's been fighting elections for forty years.

Reform's weakness in London was demonstrated when, prior to the election, the party took out full-page adverts seeking candidates. It is vastly more difficult for even well-established parties to contest every seat in councils with all-out elections than it is to fight just one seat per ward in those authorities with annual elections - up to three times more difficult. That challenge was amplified in a city where Reform is significantly less popular than in the country beyond.

Reform did very well in nominating candidates, even in inner London boroughs like Hammersmith and Fulham where they had no realistic prospects. Reform contested 87% of London's 1,817 council seats which, again, compares favourably with the Greens who in 2022 only stood in 814 (44%).

You cannot win if you do not stand, and in most of London Reform cannot win even if it does, as the vote share table opposite demonstrates. In only thirty-nine wards did Reform poll more than 30% of the vote; versus 310 in which they polled 10% or less. And this was before any tactical voting there may have been by "progressive" voters to align behind the party most likely to defeat Reform candidates.

Mawneys	Havering	38.1

Ten largest Reform UK vote shares in London in 2026

Reform was obviously cogniscant of the electoral realities of London politics and their lack of support in the capital. In fact, Reform used these borough elections to talk about the city-wide issues their candidate for London mayor, Layla Cunningham (pictured alongside Nigel Farage on that newspaper advert) is campaigning on.

This is smart campaigning in the sense that the elections were a great chance to increase awareness of their candidate and their campaign themes with two years still to go before the next London elections, but maybe less so at convincing people that Reform was remotely interested in representing their ward or running their borough. Could that be why Reform significantly underperformed against their own predictions of how well they'd do?

Ten smallest Reform UK vote shares in London in 2026

Aside from Havering there are just forty Reform councillors in London - an improvement on the ten or so they had before the elections (following defections and a by-election gain) but nothing that gets them remotely close to any sort of power. Reform are not that far off winning either Bexley (a 2.6% swing is required there) or Barking and Dagenham (4.7%). But beyond these two, plus Havering, things look bleak for Reform in London. Still, you can't be popular everywhere, especially when you are only winning a quarter of the electorate nationally.

Barking and Dagenham 38 9 4

The only Labour borough on Reform's target list was Barking and Dagenham. This borough has been the definition of a Red Wall seemingly forever: a massive cliff of overwhelming Labour majorities standing against the increasing conservative lean of Essex to the east.

So overwhelming has been the strength of Labour that, until this year, Barking and Dagenham had never truly had a functional multi-party playing field: it had been Labour councillors elected unopposed or with landslide votes against one or two paper candidates.

In 2022 one Labour councillor here won with more than 80% of the vote, twenty-five with between 70% and 80% and a further twenty with between 60% and 70%. Just five won with less than 60%.

Yet modern day Barking and Dagenham has been defined by an election result that caused Labour such shock that it has transformed the borough unrecognisably. That result was the 2006 council elections which elected twelve British National Party (BNP) councillors - all of them from the sprawling Becontree council estate.

It was not just that this most staunch Labour borough had registered a (relatively modest in terms of seats) protest against the end-days of the Blair government, but the vessel the voters had chosen. This was a crisis of the left and it needed a radical intervention.

There will probably never be a full (or, for that matter, any) expose of just how consequentially and aggressively it was decided to remake Barking and Dagenham a multi-cultural borough where supposedly far-right white working class voters would never again have the clout to elect BNP councillors. Here's the result: at the time of the 2001 census the borough was 82% white British (132,556 out of 163,944). In 2011, it had declined to 49% (91,949 of 185,911). And in 2021 it was 31% (67,550 of 218,871).

Part of that huge slump in white British residents was the London-wide phenomenon of "white flight": the process of white Londoners seeking to move to more affordable, quieter neighbourhoods further out which are ethnically much less diverse. But note also that nearly 60,000 more people live in the borough than in 2001.

Barking and Dagenham was part of the Thames Gateway, a huge regeneration project stretching from the Isle of Dogs to Tilbury with the potential for over 160,000 new homes. Barking Riverside: old industrial and warehousing sites along the Thames is where this borough's share of them have been and are still being built - also up the side of the river Roding.

These twin factors: the old population rapidly moving out and new homes being built, plus a third: the migration and expansion of the large Bangladeshi and Pakistani populations of Tower Hamlets and Newham out to the suburbs (it might be called "Asian Flight") has partly relocated here, have transformed the demographics of this borough.

Not enough for Barking and Dagenham in 2016 to vote to leave the EU by 62% to 38%, but had the referendum taken place a decade on in the exact same context as 2016, maybe perhaps.

It was that referendum vote alongside this borough's location in that Essex-borders Reform heartland that may have made that party over-confident at its prospects. Consider the profile of the typical Reform voter right now: older rather than younger, whiter rather than from an ethnic minority, an owner-occupier rather than a private or council renter. Today, under-30s comprise more than 40% of the population in all but two Barking and Dagenham wards.

On the other hand, C2DEs (blue-collar trades-people) outnumber ABC1s (white collar professionals), usually by a lot, in every ward. Barking and Dagenham is still an innately working class borough - it's just that the nature of that working class has changed.

Without claiming that Reform and the BNP are similar parties, the wards that Reform had a decent shot at winning are similar to the ones the BNP won in 2006: the Becontree estate wards. Those are Becontree itself, Alibon, Eastbury, Goresbrook, Mayesbrook, Parsloes and Valence. Then there are "old" Dagenham wards: Eastbrook - the closest ward to Romford and with a not dissimilar demographic; Heath and Village. There is still a large enough white working class vote in these wards for Reform to potentially win.

Labour, for the first time, also faced a serious challenge from the Green Party in the three wards that have been transformed by "regeneration" housing development: Barking Riverside, Beam (the old Thames ward) and Thames View. The Greens would also be principal challengers to Labour in "old" Barking, both because this area too is undergoing massive house-building (Abbey and Gascoigne wards) but because of the surging Muslim population in the wards still gridded by terraced housing: Longbridge (52% Muslim) and Northbury (39%); potentially Chadwell Heath and Whalebone (38%) in the northern "peninsula".

I referred at the start to how uncompetitive a borough Barking and Dagenham has traditionally been. Since 2010, Labour has won every seat. In 2022 just 93 candidates contested the borough's 51 council seats: just 1.8 candidates per seat. Just five Greens stood and one Lib Dem. Even the Conservatives, who strive to contest every seat even in

places they have no hope of winning, could only find 31 nominees. Although these seats don't officially count as "uncontested" - because electors still got to vote - fifteen Labour candidates were guaranteed election because insufficient opponents contested the seat (for example, if 3 Labour candidates are up against just one Conservative, two of the Labour team will win by default: it's just up to the voters to choose which one may not).

This year 215 candidates stood: full slates for Labour, Conservatives and Reform UK; 36 Greens - even 15 Lib Dems. That's more than four per seat; twelve per 3-councillor ward. Unprecedented.

Labour's vote collapsed: the only London borough where they lost more than thirty percentage points of support since 2022. That's a slightly unfair measure because of how few genuine contests there were four years ago - which meant Labour's vote share has always been exaggerated in council elections. But the raw figures are what they are: 69% of the vote in 2022; 34% in 2026. Yet this huge loss of support did relatively little damage to Labour in terms of seats lost.

	2018	2022	2026
Barking Riverside	84.6	62.6	37.3
Beam	78.6	66.9	38.5
Becontree	81.6	76.1	35.4
Eastbrook and Rush Green	51.6	52.6	29.9
Eastbury	76.8	74.3	31.0
Gascoigne	81.8	73.0	33.2
Goresbrook	66.4	70.3	25.7
Longbridge	79.7	55.6	26.4
Northbury	85.2	69.8	38.5

Decline in Labour support, 2018-2026

They forfeited both seats in Eastbrook and Rush Green, and all three in Goresbrook and Parsloes to Reform, alongside one seat in Valence. What do those four wards have in common? They are the four with the largest white populations. Reform came close also in Alibon (11 votes), Mayesbrook (72)

Labour also lost two seats apiece, in Gascoigne and Longbridge, to the Greens. What do those two wards have in common? They are the two with the largest Muslim populations. The Greens also came up just short in Abbey (43 votes), Barking Riverside (22 - where a Labour councillor had defected and very nearly held her seat), Northbury (10)

Two wards: Chadwell Heath and Eastbury, saw Reform and Greens poll similar votes, with Labour holding on with very weak support. The Greens were just 34 votes short in Eastbury while Reform was 124 votes off winning. In Chadwell Heath it was 194 and 156 respectively.

It's hard to argue that these two splitting the non-Labour vote enabled Labour to win because it's not obvious that Green voters would choose Reform as a second choice anyway (you'd assume they would not, even if many of the issues driving a protest against Labour for both sets of voters are similar).

Take a ward like Heath where there were no Green candidates. Reform's vote share was over 30% but Labour won well over 40%. Had the Greens taken ten, fifteen points off Labour, the result there might have been different. Likewise, there were no Greens in Alibon or Village: Labour held both with far higher shares than they won in wards the Greens contested.

Labour now has a majority of 25 seats on this council; 29 over Reform. But that comfortable lead in seats is not quite replicated in votes. Reform win power with a 4.7% swing next time; the Greens if they can muster 5.3%.

Labour appear to have been saved a much worse result by knife-edge wins, founded on the party's innate strength and their better organisation: something else that the BNP shock of 2006 helped fix. Barking and Dagenham now looks less a red wall and more a relatively vulnerable barricade; made more vulnerable because we now know where the vulnerabilities are to each opponent.

Barnet

31 31 1

The Conservatives won Barnet by a country mile in 2026. No, you didn't misread that sentence. Nor is it an error that slipped through editing. This year, the Conservatives polled 39,914 votes across Barnet to Labour's 30,771 - that's 34% to just 26%. Yet Labour won the same number of council seats as the Conservatives and kept control when the sole Green elected voted to re-elect Labour's Barry Rawlings as leader.

The only way that dichotomy between votes and seats can be explained is either rampant gerrymandering or a very poor distribution of votes on the Conservatives' part. The ward boundary changes enacted before the 2022 elections were not gerrymandering but they were disadvantageous to the Conservatives. But it was that alternative option: a very poor distribution of votes, that kept the Tories from winning back the third of the boroughs they lost four years ago.

Ward	2022	2026
Edgware	1,439	2,289
Edgwarebury	100	1,607
Finchley Church End	893	1,641
Garden Suburb	843	2,014
Golders Green	1,521	2,164
Hendon	1,205	2,148
Mill Hill	445	1,584
Totteridge and Woodside	606	1,459

Conservative majorities in safe Conservative Barnet wards, 2022-2026

The Conservatives stacked up the votes - though it's more accurate to say Labour's vote fell away - in safe Tory wards. Labour's vote also collapsed in their safe wards, but the nature of safe wards is that they can typically withstand such a collapse and still be held by the party in question. Now look what happened in the marginals:

Ward	2022	2026
Barnet Vale	-112	-106
Brunswick Park	-463	150
Childs Hill	-315	1,035
East Barnet	-318	-24
High Barnet	-547	117
West Hendon	-874	-524
Whetstone	-562	-2

Conservative majorities in marginal Barnet wards, 2022-2026 (negative figures mean Labour was ahead)

Yes, there were swings to the Conservatives in these wards too (though often they were due to the Tory vote falling by less than Labour's) but, with the exception of Childs Hill not spectacular ones. Barnet Vale, High Barnet and Whetstone are all split wards (Barnet Vale was before, as well: the Tories made no progress there relative to Labour). Just eight votes more in Whetstone, or 70 in High Barnet and the sentence I began this profile with would have been true in every sense: the Tories would today be back running Barnet.

There are three reasons why the Conservatives won the popular vote but missed out on the council. The first is the nature of the safe Conservative wards. All of them (and Childs Hill can probably by added to them after this year's result) have very large Jewish populations. This has been one of the most loyal constituencies to the Conservatives over the long-run, but since the October 7th atrocity perpetrated on Israel by Hamas, and Israel's retaliation in Gaza, Jewish support for the Conservatives has strengthened.

In most wards throughout the country, the Jewish community isn't large enough to affect results, but in parts of Barnet it is: 50% of the population in Golders Green, 41% in Garden Suburb and 30% in Finchley Church End for example. So, even though they were casting their votes in wards the Conservatives already held, they were still able to reinforce their party in places that, to some extent, were looking a little shaky after the big swing to Labour of 2022.

The second factor is how Barnet is evolving. Imagine this borough as on two tectonic plates moving in opposite directions: the Hendon west and the Chipping Barnet east. In the old days, Hendon was the core of Labour support in Barnet: they could virtually always rely on nine councillors returned from Burnt Oak, Colindale and West Hendon.

This group was then complemented by whatever seats the party could win in Finchley: typically East Finchley, West Finchley and, more often than not, Woodhouse. Chipping Barnet, however - with the exception of anomalous Arkley (what is now Underhill) - was uniformly Conservative.

Fast forward to today. Labour still holds what are now four Hendon wards plus the new Cricklewood ward, though by nothing like the vast majorities they used to stack up in Burnt Oak and Colindale. That gives them twelve seats. They got seven from those Finchley three. But they got eleven - and that's after losing Brunswick Park and seats in East Barnet, High Barnet and Whetstone - from Chipping Barnet. The big swings to the Conservatives came on the Hendon side. The small to non-existent swings came on the Chipping Barnet side. And that divergence is not stopping, in no small part because most of the new private housing development is happening on the Hendon side.

It explains why Colindale South in particular, posted such a poor result for Labour: the ward is essentially new housing, quite different from the essentially council estate ward of Colindale North. Meanwhile the Barnet side is becoming younger, with professional, middle-class families seeking slightly less unaffordable housing in a more suburban setting than they can afford further into the capital.

The third is that London-wide trend of the Conservatives posting their fourth thoroughly awful set of London local election results in a row. Yes, they recovered very slightly against Labour and, overall, distributed a smaller vote better. But, counter to that, they also saw too many votes go into buttressing wards they already held; not just in Barnet but, for example, in Kensington and Chelsea too.

This had the ineffective outcome in terms of the borough elections. But it was slightly more productive when the results are totted-up by parliamentary constituency. The Conservatives outpolled Labour in all three Barnet seats: Chipping Barnet by 34 to 27, Finchley and Golders Green by 36 to 27 and Hendon by 34 to 22 - Hendon being the most marginal Labour-held constituency in the country already.

None of these Conservative shares are remotely astounding and Labour can perhaps close the gap somewhat by persuading Greens and Lib Dems to return to their fold. But the Reform UK vote is as potent as the Greens' in Barnet and that means it's possible that tactical voting will not be exclusively a consideration of left-of-centre voters next time.

The Greens won their first ever seat on Barnet council in Woodhouse ward on a 22% swing, their vote surging by almost a thousand since 2022. Ironically, given theirs was the vote that returned Barry Rawlings as council leader at the AGM following the results, they very nearly ousted him in Friern Barnet finishing 222 votes short.

Reform failed to win anywhere, though they were fairly close in Underhill ward and West Hendon (the combined Reform-Conservative vote being substantially larger than Labour's there). This is probably not a borough in which Reform are

likely to thrive: it's too affluent and the Conservative vote too content with that party to crumble to a party to their right.

The Conservatives need just that one seat to recapture Barnet in 2030, with Whetstone having the smallest Labour majority. But to govern comfortably they'll need seats from East Barnet, High Barnet, Barnet Vale, Colindale and perhaps West Hendon. A 5% swing would give the Tories twelve new seats or so. But Barnet is still trending away from them - it's just also trending away from Labour now too, it seems.

The Greens are a long way off from challenging for the council but a 5% swing would give them six councillors or thereabouts - including in Burnt Oak: the first time "Little Moscow", as it used to be called, might elect representatives from a party other than Labour.

Bexley

29 9 7

Bexley was Reform UK's number one target in South London, second only to Havering in the (relatively short) list of councils the party expected to win. Bexley staying Conservative - and quite comfortably - was a major surprise therefore.

It has all the characteristics of a Goldilocks borough for Reform. It's largely white: much more so than London as a whole. Comparatively small numbers of residents are educated to degree-level or higher. It is relatively affluent without being wealthy in the way western suburbs like Richmond are. It has relatively little council housing, and what it does have is concentrated in four wards in the far north. It has large numbers of home owners, and those homes are comfortable rather than grand.

So why did it rebuff Reform so decisively? In truth, things were much closer than the headline results suggest. The Conservatives only outpolled Reform by four percent borough-wide: 33% to 29% (with Labour on 18% and the Greens on 13%). That four point gap in votes translated into a forty-eight point gap in seats (twenty eight if we include the Labour councillors). That must mean that there were an awful lot of very close results which just happened to split in the Conservatives' favour.

Twenty six councillors have majorities of less than 10% over Reform. Reform missed out on a seat in Slade Green & Northend by one vote, and in Blackfen & Lamorbey by two. If they had won all the seats in these two wards, plus the two that split: Belvedere and West Heath, Reform would now have sixteen councillors and the Conservative majority would be three seats, not thirteen.

Bexley is also a salutary reminder to Labour - that is: inner London Labour - that beyond their urban enclaves Reform is every bit as much of a threat to their vote as it is to the Conservatives. Of their seven seats, Reform won three from Labour, which works out at a much higher chunk from the Labour Group than the Tories (a quarter of their councillors lost). Slade Green and Northend, that one-vote Reform loss, is also a Labour ward. In fact the only Reform-proof Labour ward in Bexley is Thamesmead East. It's that way because it is a council estate ward and an ethnically diverse ward which should perhaps be united with its western side in Greenwich.

The Conservative vote share fell from 47% to 33% - a fourteen point drop, but Labour's went from 41% to 18% - twenty-three points. They were lucky to emerge with nine councillors to their name.

If Havering, which went Reform so comfortably and Bexley, which did not are generally similar boroughs what are the differences? The big difference is in how politics has worked in both places. Havering has, right from the start, had a series of strong residents associations able to take on and beat the Conservatives or Labour. It means that elections were already fragmented affairs in Havering, with seats able to be won on relatively low shares of the vote. Reform entering the fray simply fragmented the field even more.

And one of the characteristics we've seen in local elections since 2024 from Reform has been an ability to be a more alluring champion of those who would otherwise support residents associations, independents or localist parties: they have routed them in local elections since 2024 in many places. There is no similar tradition in Bexley: since the centre party challenge faded away at the turn of the 21st century, elections here have been two-party fights.

Bexley is also a much more compact borough than Havering. While it retains well-defined neighbourhoods: Sidcup, Cray, Welling, Bexleyheath, Crayford, Erith and Thamesmead, these blend seamlessly into one another in a tightly-packed corner of south east London. Havering is a more disparate borough with its neighbourhoods separated from each other by large chunks of open land. In other words, there is more of a cohesive borough identity to Bexley than Havering making it easier to organise politically and for a message to be relevant from one end to the other.

It's also possible that Bexley residents picked up on the difficulties the Reform county council in Kent has been experiencing, in respect of internal disciplinary issues and in actually reducing the "wasteful" spending the party claimed was rife in the county. Essex, in contrast was one of the councils that had its county council elections postponed last year so there were no equivalent negative stories percolating into Havering.

Finally, the Conservatives seem to be far better organised in Bexley than Havering. By the 2026 elections nine of the twenty-three Tory councillors elected in Havering in 2022 had defected (mostly not to Reform but to the residents' associations), along with Romford MP Andrew Rosindell: it

was almost as though they had given in to an inevitable trouncing.

Outgoing Bexley Tory leader Teresa O'Neill, in contrast, was quietly confident throughout the campaign that they would win. The Conservatives had been through a by-election campaign in Old Bexley and Sidcup in 2021 when they had fended off Richard Tice, Reform's then leader. A by-election is a great way to refresh local organisation, gain loads more data on voters and ensure the party maintains visible in the community.

So, just as Labour probably saved quite a few seats in Barking and Dagenham with its ground-game, its get out the vote operation and its historical data on that borough's voters, the same is likely true in Bexley with respect to the Conservatives.

But it was such a close-run election. In the wards comprising the Bexleyheath and Crayford constituency: the middle of the borough, Reform polled 11,322 votes and the Conservatives 11,309 - 31.1% each. Labour was ahead in the three wards contributed to the Erith and Thamesmead constituency and the Conservatives in Old Bexley and Sidcup.

Reform need sixteen seats to take Bexley in 2030, and they would get them on a tiny 2.6% swing. Labour, which as recently as 2002 won a council majority needs fewer seats but a 9.6% swing to get them (and that's fanciful: it only appears so low because Reform has pulled the Conservative vote down that it looks far easier to achieve than it would in reality be). This is not a borough remotely drawn to Green or Lib Dem politics and they are entirely out of contention.

Brent

26 **11** **11** **9**

In 2026 Brent had one of its periodic electoral convulsions - in this era far less commonplace than in the turbulent Eighties and Nineties - but nonetheless a jolt that, however comfortable Labour had gotten it could never take this borough for granted.

Brent is arguably London's most ethnically diverse boroughs, and has been for decades. The council reckons it has residents from 215 countries speaking over 150 languages. In particular it has a large African-Caribbean community along the south of the borough from Kilburn in the east, through Kensal Rise, Harlesden and Stonebridge, and a big Asian community centred on Wembley.

You would think so ethically diverse a borough, with a white British population almost non existent in some wards (4.5% in Wembley Central, 6% in Alperton) would be very safely Labour. But it's never quite become that - partly because Labour has often shot itself in the foot locally with bizarre "loony left" politics that alienated large swathes of the borough, and in part because this borough seems more susceptible to react when Labour becomes unpopular nationally. The fact that Brent is now a four-way battleground politically, with deepening seams of votes for each party may mean that 2026 is the opening of a new pluralist chapter in the borough's politics.

Labour went into the 2026 elections defending a majority of 26 seats (down from a 2022 landslide of 41 following a by-election loss and eight defections). That was the third Labour landslide since pushing the Lib Dems (who had run the borough in the minority from 2006 to 2010) off the council in 2018, only for the party to regain seats in its long-term wards of Alperton and Sudbury in 2022.

It was principally because the 2022 Labour majority was so substantial that Brent possibly didn't get the attention it deserved, even though parts of it are trending Conservative for the same reasons as Harrow and Hounslow and parts of Ealing are, while other neighbourhoods are vulnerable to the new Green Party positioning.

In neighbouring Kensington and Chelsea and Westminster it was wards just across the borough boundary that the Greens were targeting: Harrow Road and Golborne for example. There is very little difference demographically between Westminster's Harrow Road ward and Harlesden and Kensal Green - indeed Harrow Road itself runs through both.

And so, unsurprisingly, the result was very similar: the Greens just missing out in Harrow Road by 16 votes and gaining one seat in Harlesden by 182. If the Greens are competitive in Harlesden and Kensal Green they'll be competitive in Roundwood and Kilburn and Stonebridge and Willesden Green.

Brent contains bunches of the different types of voters that were drawn towards the party in 2026. Eleven wards had a Muslim population in excess of 20% - in Dollis Hill and Stonebridge 36%. Four wards had populations of African or Caribbean heritage of over 20% too. Then there were a cluster of wards across the borough in Wembley where new housing development brought it lots of "cost of living" struggling renters.

A remarkable 62% of residents in Wembley Park, the ward containing the national football stadium are private renters - a figure only surpassed by a similar ward in East London: Stratford Olympic Park. The figure in neighbouring Wembley Hill is 45% and in Wembley Central 41%.

Then there is the Hindu and Sikh community that has swung so significantly towards the Conservative in Harrow. Bob Blackman, the Harrow East Tory MP (and his wife, Nicola) was a Brent councillor and led the council in the days when the Tories were still competitive enough here to challenge for power. In Brent the Conservatives were challenged for this bloc of votes though. The wards with the highest proportions

of Hindus and Sikhs are Wembley Central (47%), Alperton (45%), Kenton (32%), Sudbury (31%) and Queensbury (30%). Three other wards have populations above 20%.

Kenton and Queensbury are Conservative-Labour battlegrounds but Alperton, Sudbury and Wembley Central have long been Labour-Lib Dem contests. Of these, Wembley Central became a zinger of a three-way marginal in 2026 - more of that later.

The fact that five Labour councillors defected to the Greens following Zack Polanski's election as party leader, in Stonebridge, Brondesbury Park, Wembley Park and two in Welsh Harp, while one switched to Your Party (Wembley Hill) and one to the Conservatives (Wembley Central) and one in Barnhill went independent also suggested change was coming.

Sometimes defections are simply down to unhappiness within a councillor group with no wider consequence but councillors are politicians - not always astute ones anymore than the ones that reach Westminster are, but people often capable of sensing how the electoral winds are blowing. This was also true with the large-scale defections from the Tories in Havering, for example.

Sometimes a borough that has so many competing parties operating within it, is a boon to the dominant party because they still control the largest single bloc of votes, enabling them to hold on with a low vote share. That is the story of how Labour held Ealing, for example. Sometimes, as is the case in Barking and Dagenham, Labour has won because it has very little competition and so the challengers face an overwhelming stack of Labour votes they cannot surmount.

Brent is clearly now a multi-party borough, and several of its councillors clung on with very low votes and majorities. But the "Ealing model" of a fragmented opposition only works when all parties have decent blocs of support and are broadly evenly divided against Labour. Brent is more of a multiverse: there is a Labour-Conservative universe; a Labour-Lib Dem universe and a Labour-Green universe, all contained in one place.

Con gains (6)	Green gains (9)	LD gains (8)
Preston 2	Harlesden 1	Alperton 1
Queensbury 1	Kilburn 3	Queens Park 3
Tokyngton 1	Northwick Park 2	Sudbury 1
Welsh Harp 1	Wembley Park 2	Wembley C. 3
Wembley Hill1	Willesden Grn 1	

When that happens results go awry very easily as the table of gains above demonstrates: 23 Labour losses, almost equally split between their three opponents.

That Labour faces a clear principal opponent in specific wards does not mean the others are irrelevant. Wembley Central produced a remarkable result with the Lib Dems on 35%, the Conservatives on 30% (and their top candidate just 139 votes behind), Labour on 18% and the Greens and Reform on 9 and 8 respectively. That result is remarkable not just because Labour lost despite a hugely split vote among its challengers but also because, in 2022, Labour had won Wembley Central with over 60% of the vote.

There is a question why Brent's most Hindu-Sikh ward went Lib Dem rather than Conservative, but there is no question about whether Labour's problem with that community manifested in Wembley: it clearly did.

The answer in respect of why Hindus and Sikhs voted Lib Dem is probably principally due to that party's activism in that corner of the borough. The Alperton corner of Brent has been the most loyal to the Lib Dems in the long-run, first electing SDP-Liberal Alliance councillors in 1982 (in fact the ward they won back then, Barham, is very close to the current Wembley Central boundaries). So whereas in most places the Hindu and Sikh community is faced with a binary Labour-Conservative choice, in the Alperton area there is a third option.

And, given the Greens won seats in Wembley Park and (much more surprisingly) Northwick Park, and came very close in Wembley Hill, it could be argued that there is a fourth option, though in these parts of Wembley the Hindu and Sikh population is much lower. The reason the Greens won these wards is far more to do with the huge numbers of private renters, hard to reach behind controlled entry systems and concierges, and high turnover too.

The surprise Green win in Northwick Park was achieved on a split similar to Wembley Central, though without the Lib Dems in the mix. The Greens won both seats with just 34%, Labour polled 24% (down from 57% in 2022) and the Conservatives 23% (down from 35%). As Sudbury Court ward, the Tories had won as much as 70% here in the past.

Just as Northwick Park was a surprise Green win, Welsh Harp (essentially Neasden) - and even more shocking: Tokyngton were surprise Conservative wins. A doctorate thesis could probably be written on the electoral history of Tokyngton: a neighbourhood (it means "The farm of the sons of Toca") that dates back to the 12th century, it has swung this way and that with the tide and often against it.

Until the boundary changes that came into being in 2022, Tokyngton included the area that is now Wembley Park ward but, while there is new housing development around the edges of the current ward, the older neighbourhood that didn't move across is different demographically. Tokyngton is the ward of council leader Muhammed Butt and voted 58% Labour in 2022 so they weren't expecting a serious problem here. Yet Butt held on by just 104 while his fellow Labour ward councillor, Krupa Sheth, lost to the Tories by 45.

	2018	2022	2026
Alperton	58.1	42.3	18.1
Barnhill	64.0	57.3	27.5
Harlesden and Kensal Green	62.2	56.4	38.5
Kilburn	62.3	57.7	33.4
Kingsbury	67.7	53.6	33.7
Northwick Park	55.1	56.5	23.8
Preston	55.3	52.9	24.0
Queens Park	42.4	54.5	26.7
Queensbury	47.3	43.5	20.1
Roundwood	78.4	70.4	45.0
Stonebridge	89.0	70.2	36.7
Welsh Harp	65.2	51.2	26.2
Wembley Central	67.7	60.3	18.1
Willesden Green	69.8	54.6	35.9

Decline in Labour support, 2018-2026

In tables similar to this one in other borough write-ups a medium term slide from 2018 is typically evident, and in some Brent wards it exists. But there are more wards in this table where the 2018 and 2022 Labour shares are very similar and the collapse happened all at once this time round. That may well mean - and Labour will want it to mean - that their losses were all about the dramatic unpopularity of the Labour government rather than a far deeper problem of shedding core votes over the long-run.

Labour most definitely went over a cliff-edge in 2026, dropping from 53% borough-wide to just 29%: seven points ahead of the Greens and nine ahead of the Conservatives. In 1968 Labour managed 28% in Brent and that too was a year of unprecedented government unpopularity too. The difference is that in 1968 voters chose the Conservatives as their party of protest and in 2026 they have a wider variety of choices, far closer to their politics than the Tories ever were back then.

It's possible therefore that there won't be a comprehensive swing back in 2030: so diverse a borough may get quite used to having a diverse range of councillors. Nonetheless, Labour needs just three seats to regain a majority in Brent and they'd get that on a swing of just 0.9%.

The Greens need twenty seats and a 6.6% swing. The wards they'd need to win are not demographically different from the ones they gained this year, nearly all in the eastern end of the borough and they now have a core group of councillor-campaigners to build upon.

The Conservatives are no longer strong enough (especially in the east) to realistically be able to win a majority in Brent - they need a huge swing of 12.8%. But they are a 3% swing away from winning ten more seats which would almost certainly make them the largest group. With parts of West London swinging towards them at pace, it's not out of the question that they could pull such a feat off in 2030.

Bromley

35 8 6 6 3

Reform UK may not appreciate London boroughs that begin with the letter "B". Bromley is the third that the party bragged it would win - and didn't come close. And defeat here was not like neighbouring Bexley: far closer in votes than seats. It was comprehensive on both measures.

This borough is quite a bit different to the others Reform flattered to deceive within. It is a massive wedge of south east London, stretching to areas on the periphery of inner London like Crystal Palace and Penge, all the way out to places that feel like the distant Kentish countryside: he rolling fields beyond Biggin Hill and Chelsfield for example. It is generally a much wealthier borough than Bexley - seemingly too wealthy for Reform to seriously challenge the Conservatives in much of it.

Nonetheless, surely Reform could at least knock out the Conservatives' overall majority which, by the end of the 2022-2026 term was down to just nine seats? Well, no. The Tories now run Bromley with a 12 seat cushion so things did not go at all to plan. Reform could not even defend the seat they won in a by-election at the end of 2025, in Bromley Common and Holwood - their first ever elected councillor in London.

They did pick up the two formerly Independent-held seats in Biggin Hill (one of the councillors stood down, the other defected to the Conservatives and couldn't defend her seat in those colours), and three seats in St Paul's Cray: the least affluent ward in the borough. Two of those came from Labour, one from the Tories - but over the long run St Paul's Cray was a Labour ward.

So too was Mottingham, where they also won a seat. Therefore, of Reform's six seats only three came from the Tories. To offset that loss, the Conservatives picked up both Labour seats in Plaistow ward, immediately south of Lewisham's sprawling Downham council estate. But they lost their sole remaining seat in Beckenham Town and Copers Cope to the Lib Dems. Nonetheless, all this amounted to just a one seat loss for the Conservatives from 2022: a great result in the face of the perceived threat.

In terms of votes cast, things were also comfortable for the Conservatives winning 35% to 20% for Reform, 17% for Labour, 14% for the Greens and 11% for the Lib Dems. This was a Tory drop of less than four percentage points while Labour fell by thirteen and the Lib Dems by seven. That's why the Conservative majority increased.

Yet things were not entirely disastrous for Labour. They still stacked up the votes in their three western core wards: Crystal Palace & Anerley, Clock House and Penge & Cator, where this time it was the Greens that failed to muster a sufficient challenge. This despite them winning the side of

Crystal Palace across the borough boundary in Croydon: that ward split two Green and one re-elected Lib Dem.

So strong did Labour remain in those three wards that, despite the Conservatives doing better there they were still outpolled in Beckenham and Penge constituency: 30.4% to 26.1%. Another example of Labour "losing" traditionally safe wards to Greens and Reform but managing to defend what were, until 2024, reliably Conservative seats (see also MRP polls that consistently show Labour holding onto places like Rushcliffe, Macclesfield and York Outer).

The Liberal Democrats managed to bed themselves in a little more securely in their two current wards: the twin town centre wards of Beckenham and Bromley. But there are no obvious places for expansion for the only party other than the Conservatives that has led Bromley. Their most winnable ward is Chelsfield where they are nearly 900 votes adrift and where as many non-Conservatives vote Reform as Lib Dem.

Reform has supplanted them as the principal challenger to the Tories in the former Lib Dem strongholds in Orpington constituency (Orpington ward itself being the prime example). The wards comprising the Orpington constituency voted Conservative 42%, Reform 25% and Lib Dem just 12% (less than 2 points ahead of the Greens and Labour). They polled just 3% in Crystal Palace & Anerley, a ward they represented with quite hefty shares of the vote at times for over thirty years. Similarly they polled just under 6% in St Paul's Cray which they won seats in over twenty years.

Was there a tactical vote to block Reform across Bromley? These questions are impossible to answer definitively because voters don't tell us their motivations when casting their ballots. But it is surprising that Reform did not get especially close in, for example, St Mary's Cray (where on different boundaries UKIP won two seats in 2014); why they couldn't win Mottingham at a gallop, or Orpington, where both the Lib Dem and Labour votes fell by far more than the Conservatives'. If you regard the latent Lib Dem vote in Orpington as little more than a "none of the above" protest then you can conceive, perhaps, of some of it swinging to Reform as the main purveyor of anti-establishment sentiment of the moment, but surely not all that much of it?

In Bromley Common and Holwood - remember that Reform by-election gain of 2025 and, therefore, the only ward in the borough in which voters knew for sure the relative strength of each party, the Conservative vote barely fell this year. Whereas in the by-election the votes split Reform 34, Conservative 29, Labour 18, Lib Dem, 14 and Green 5, just ten months on the Conservatives polled 38, Reform 28, Green 15, Labour 11 and Lib Dem 8.

Those changes don't represent a massive tactical vote - it is, after all, a novel experience for "progressive" voters to consider voting Conservative to stop a party further to their right that they more viscerally dislike. The six point fall in Reform's vote also needs some reflection, but there does seem to have been some limited co-ordination among voters who did not wish their area to be represented by that party.

After starting to look a bit dodgy after they shed seats all over the place in 2022, the Conservatives suddenly seem much more secure in Bromley. That despite their record low 35% borough-wide vote share. Reform is their closest competitor but they need 24 seats to gain a majority and that will require a swing of 11%. Labour needs a swing of more than 14% and the Lib Dems of just under 18%.

Camden

30 11 10 3 1

For those to the left of Labour seeking to deliver a knock-out blow to Sir Keir Starmer's premiership, the icing on the cake would have been his party being ousted from Camden, the epicentre of metropolitan liberal Labour values and the borough which the then PM represented more than half of.

It was not quite to be though the Greens, Lib Dems and one Your Party-adjacent candidate made inroads into the chunky 39-seat majority Labour won in 2022.

Expectations would have gone down to the wire had the Greens been able to finally win all three seats in Highgate ward, the ward with the longest history of electing the party (dating back to 2006) without them ever being able to seal the deal. Bizarrely in the year of the Green Party surge their sole councillor, Lorna Russell, was unable to pull her two running mates onto the council. The two re-elected Labour councillors finished 200 ahead of the losing Greens.

Fortunately they did better elsewhere, winning seats in Bloomsbury, Gospel Oak, Holborn & Covent Garden and Regent's Park. The Liberal Democrats contributed by regaining full control of Fortune Green and West Hampstead wards, plus holding their by-election gain in Hampstead Town.

Again though, the pattern of Labour performing so much more strongly where their opponents were the Conservatives emerges in Camden. The Tories missed out on Primrose Hill by 36 votes, on South Hampstead by 109 and Belsize (against the Lib Dems) by 104. Had the Conservatives won their two Labour-facing targets Camden would today be a hung council.

On the other hand, it could be argued to be impressive that the Tories remain competitive in a borough like this, especially against the Lib Dems in Belsize (because typically you might expect established Lib Dems to annexe the vote of the party they defeated). The Conservatives only polled 14% across Camden - by some way their poorest performance ever, so they may well feel blessed simply to have survived. Fortunately their vote is sufficiently intensely concentrated

to keep them competitive in five wards: they do not really exist anywhere else in Camden.

However, there was a Labour to Conservative swing of over 8% in Camden and that should have been enough to win the Tories, at the very least, seats in Belsize, Primrose Hill and maybe South Hampstead. The Reform UK vote was larger than the Labour majority in these wards and, indeed, the Lib Dem majority in Hampstead Town.

So, in yet another inner city borough where Reform had no shot at winning a seat, let alone control of the council, this supposed party of the right simply ensured another four years of minimal representation for the more than 1 in 5 that voted Conservative or Reform. Reform's highest vote was in St Pancras and Somers Town where they polled just shy of 14%. Their aggregate share across Camden was just 8.4%.

There was an attempt for a Corbynite Your Party-aligned collective to organise in Camden and, to be fair, they made a better fist of so doing than in Islington itself or Haringey or Hackney. Camden People's Alliance organised in two of the most deprived wards in the borough: King's Cross (which is getting buffed-up but still includes a lot of pretty grim neighbourhoods, and St Pancras and Somers Town - a ward that's squeezed in between all the mainline rail tracks and is in an even worse state than King's Cross.

The CPA came a pretty close second in King's Cross, taking 32% to Labour's 41%. But they actually won a seat in St Pancras and Somers Town, winning 36% to Labour's 36.5%. As in some other parts of London, the Greens stood aside to assist the far left, though who knows whether Green candidates might actually have won the wards the CPA contested? The evidence of Hackney suggests they might well have.

After Georgia Gould, the Camden council leader, was selected as parliamentary candidate for the safe constituency of Queen's Park and Maida Vale in 2024, Camden Labour selected Richard Olszewski as her replacement. The problem he faced was that he represented the marginal Fortune Green ward, already split with the Liberal Democrats back in 2022.

That ward was almost certainly impossible to defend, as a by-election in next door West Hampstead in August 2025 strongly suggested. There the Lib Dems increased their vote by seventeen percentage points while Labour's fell by twenty-five. Faced with a choice between near certain defeat in Fortune Green or taking a punt in a new, more promising ward, Olszewski chose the second option and was selected for the ward the furthest it's possible to get from Fortune Green and remain in the borough: Holborn & Covent Garden.

But voters can often take a dislike to "chicken-runners" - especially high profile ones like council leaders, and especially when many of them were already disinclined to vote Labour in 2026. Who knows whether the Greens would have gained this ward had Olszewski not chosen this as his berth: they finished comfortably but not overwhelmingly ahead there. Nonetheless, Camden had to elect its third leader in two years at the 2026 AGM.

Gould was not the only Camden councillor elected to parliament in 2024: Kilburn's Lloyd Hatton became MP for South Dorset and Camden Square's Danny Beales was elected in Uxbridge and South Ruislip at the second attempt. This teed off three by-elections which Labour held pretty easily despite some big declines in their vote. These were three of eight by-elections that occurred in Camden between 2022 and 2026. With the exception of Kilburn, Labour held those three by-election seats this year - though they were among the safest.

	2018	2022	2026
Bloomsbury	56.1	66.4	37.3
Camden Square		76.6	39.8
Gospel Oak	50.0	65.9	34.2
Holborn and Covent Garden	59.6	68.0	29.8
Kilburn	62.5	68.2	33.4
Regent's Park	63.1	57.2	33.4
St Pancras and Somers Town	73.9	71.4	36.5
South Hampstead	43.1	54.6	28.5
West Hampstead	40.6	46.1	22.1

Decline in Labour support, 2018-2026

But Camden is another borough where Labour won easily despite a collapse in its vote, not because of some miraculous ability to rise above the mayhem. The Labour vote fell 19 percentage points: from 51% to 32%. With that 32% they won 55% of the seats. In 2006 with 29% they'd held just 18 seats and lost control for four years.

So, although their win in terms of seats was comfortable, Labour is much more vulnerable than the seating plan of the council chamber makes it look. The Greens need 17 seats for a majority but they would net them with just a 3.3% swing: the seven Labour seats in the split wards and then Camden Square (2), Kentish Town South (3), and then Haverstock and South Hampstead.

Both the Lib Dems and Conservatives have fallen so far back in Camden that it's not credible to even contemplate the sorts of swings needed for them to win. Beyond the Conservative seat in Hampstead Town, and also being close in South Hampstead, there are no prospects for the Lib Dems - especially now the Greens have established themselves as the principal non-Labour opposition.

For the Conservatives, there are nine seats with majorities under 10% (in fact, under 7%). If they won those, Camden would likely be heading for no overall control, so having some influence on a hung council is possible for them.

Croydon

30 28 8 2 2

What was the secondary theme of the local elections in London, after the Labour collapse to the Greens? It was the failure of the Conservatives to make consequential headway against Labour. And the same was true in reverse. The consequence in a borough where the two parties are, essentially, neck and neck? Well, stalemate.

What that meant in Croydon was that the Conservatives just about held the mayoralty, just as they had in 2022. Also that neither party won a majority on the council: indeed, both went backwards. The Conservatives won just 26% of the vote borough-wide; Labour won 25%. Labour won four seats more than the Tories but, on a 70 seat council, neither got close to the 36 needed for a majority.

This stasis is both the inevitability and consequence of the national decline in support for both parties since 2022, to the benefit of the Greens and Reform; and the fact that Labour is not yet forgiven for its mismanagement of the borough while the Conservatives have failed to fix the mess they inherited. In fact Croydon is in even bigger hock today than four years ago because the interest on the debt is out of control and unsustainable.

In 2022, Conservative Jason Perry won Croydon's inaugural mayoral election by 34.8% to Labour's 32.7% in the first round (and by a slightly narrower margin in round two). This year he beat Labour's Rowenna Davis by 30.7% to 29.7% - in other words Labour achieved a 0.5% swing. Greens won 17% and Reform 12%.

In the Bromley profile it was speculated that the Conservatives did relatively well because of a limited amount of tactical voting against Reform. In Croydon, Reform voters certainly tipped council seats from the Conservatives. Most obviously they gained two seats from the Conservatives in New Addington South. But in New Addington North Labour gained a seat from the Conservatives despite losing more than ten points of support. How so? Because the Tories lost 24 points while Reform wonk 27%.

The Conservatives also lost a seat to the Liberal Democrats in Old Coulsdon despite the Lib Dems losing support since 2022. In Waddon Labour regained a seat with their vote down one point but Tories down six. And in Addiscombe East this Labour-Conservative split ward remained that way for the third election in a row because Labour's vote fell over seven percentage points but the Conservatives' by thirteen. Reform damaged the Tories because they skewed results in marginal wards in the centre of the borough to Labour.

While Reform was hurting the Conservatives, the Greens were hurting Labour in the north. The reason the Greens did not gift the Tories seats up there the way Reform did for Labour in the centre is that there were no marginal wards the Conservatives could win in the north. In any event, the Greens are a stronger party in Croydon than Reform: they were able to win four wards compared to Reform's one, and challenge in others.

Labour desperately want to add South Croydon and Shirley North to that list of Conservative-held seats they can win but they're not quite there yet. The Conservative vote did fall by more than Labour's in both, but Labour cannot win either if it's solely by losing fewer votes. Were that trend to continue chances are another party would just leapfrog them both.

Greens were just 0.4% behind Labour in South Croydon while Reform just beat Labour into third in Shirley North. In other words, while Reform has pulled the Conservatives closer to Labour, they also act as a block on Labour winning them, at least while they are polling as strongly as they were in 2026.

One of the Green clusters of strength on May 7th was a blob of south London that includes Streatham, Dulwich, Lewisham, Peckham and Norwood. In Croydon that meant they were strong enough to defeat Labour in their two remaining Crystal Palace and Upper Norwood seats (the incumbent Lib Dem councillor held the third), in South Norwood (two seats) and in Woodside (1 seat again). They also picked up the third seat in Fairfield - Croydon town centre, winning over 40% of the vote, which in this fragmented political era is almost landslide territory.

Labour's decline in the north of Croydon is more dramatic than the Conservatives' slippage in the south of the borough. This table shows the Labour vote shares in their northern heartland across the last three local elections. In some cases Labour's vote has halved; in most of the rest it is approaching half.

	2018	2022	2026
Bensham Manor	73.9	48.9	30.0
Broad Green	73.4	54.0	41.1
Crystal Pal. & Upper Norwood	50.9	37.8	25.2
Norbury and Pollards Hill	67.6	51.1	35.8
Norbury Park	55.5	47.3	35.4
Selhurst	72.6	49.5	41.0
South Norwood	69.6	47.3	31.7
Thornton Heath	68.3	42.7	36.1
West Thornton	74.8	56.5	36.8
Woodside	63.8	51.1	36.7

Decline in Labour support, 2018-2026

If the Conservatives had not suffered an even greater collapse in support over a much longer run, then Labour would almost certainly have suffered much bigger seat losses in the north. But opposition to Labour here is - for now - too diffuse; not aligned behind one single opponent.

It is much easier for Labour to regain Croydon than for the Conservatives to, even though they are within two seats of each other. Labour needs six seats for a majority and they

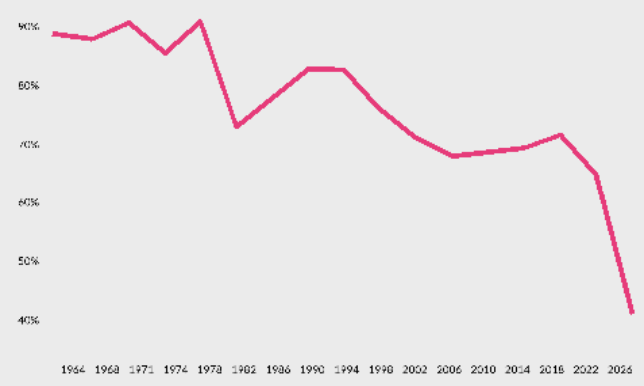
would get them on a 2.3% swing. The Conservatives need eight but for them it would take a 6.5% swing. In fact it's theoretically easier for the Greens to gain the 28 seats they need: that would require a 6% swing.

Ealing

46 13 5 5 1

The last time Labour had a very bad local election result in London, in 2006, the Conservatives polled 38% in Ealing, which was sufficient to win a majority on the council. The time before that: 1990, they polled 44% here. And before that, in 1978 they managed 50.5%. This year they polled 17% an barely survived on the council.

That Conservative collapse is why Labour held power quite comfortably. It's not specifically a Conservative issue: it's just that Ealing has traditionally been a bipartite borough so when Labour was down the Tories were up. And vice versa.



the combined two-party vote share in Ealing, 1964-2026

The collapse of that two-party system is why Labour held on in 2026. It was not because of wild Labour popularity: they polled just 27.5% - almost exactly the (lack of) support they managed back in 1968, when they held onto just five council seats.

In 1968 the two-party vote was 91%. In 2026 they mustered just 44% between them. The Greens polled 20%, the Lib Dems 15% and Reform 11%. Yet the Lib Dems are now the largest opposition party with thirteen councillors because they concentrated their support in the affluent centre of the borough (plus the affluent end of Acton: Southfield ward).

For Labour to lose only thirteen seats from a record haul of 59 in 2022 despite losing almost twenty points of support was lucky, to say the least. It speaks to the Lib Dems largely going after Conservative seats instead of Labour ones; and Labour's 27.5% still being larger than any alternative, distributed time and again in wards across the borough. The Conservatives' inability to recover in middle-class, liberal neighbourhoods is a symptom of that split opposition.

The Lib Dems added just 0.3 of a percent to their 2022 vote, but the centre of the borough is a truffle-field for the party with five or six very comfortably-off wards adjoining one another: Ealing Broadway, Ealing Common, Hanger Hill, Northfield and Walpole - to which we might add Pitshanger and Southfield slightly further afield. Each of these wards has an ABC1 - coda for middle class - contingent of between 60% and 75%, are more than a third white British and, across all seven well-over half the housing is owner-occupied - dramatically higher than the London average. All of them were Conservative in 2006 and 2010; today there are just two Tory councillors left.

The Lib Dem vote was so effectively concentrated in these wards that, across all the wards in Ealing Central and Acton constituency - which now, remember, includes two wards from Hammersmith and Fulham where the party was absolutely nowhere - they came out on top, albeit with a vote share that in normal times wouldn't come close to being sufficient to win. They polled 25.4%, Labour managed 22.5%, the Greens 22.1% and the Conservatives 15.9%, with Reform taking 10%, mostly from the more working class East Acton end of the constituency.

In 2006 the Conservatives would have comfortably won this constituency (accepting that ward boundaries on the Hammersmith side were slightly different): 36% Conservative, 22% Labour, 21% Lib Dem and 9% Green (the Greens didn't contest every ward).

In 2010, the vote that coincided with the general election, things would have been much tighter but still with the Tories just getting past the post first: Conservative 34%, Labour 33% and Lib Dems 24% with the Greens on 8% (again not standing everywhere).

So the Conservatives have lost almost twenty points of support in just sixteen years; and it's far from apparent they can claw much of it back. The party simply isn't now positioned in a way that will make affluent liberals consider them in sufficient numbers to win, especially when the Liberal Democrats sit far closer to their values and are a viable party to win in their neighbourhood. They might - just might - be able to regain their lost seat in Ealing Broadway and, despite huge effort the Lib Dems did not win Hanger Hill all that comfortably. Alternatively, the Lib Dems will mop up those last two Tory seats in Ealing Broadway.

Meanwhile, on the Conservatives' other flank Reform - which of course does not poll well in a borough like Ealing - is still able to take off a chunk of what might otherwise be Conservative votes. More on that problem later.

It's not obvious that the Greens expected to achieve very much in Ealing. They gained seats in their top target, Hanwell Broadway (the former Elthorne) where they had come a pretty close second four years ago, and then gained what were surprise wins in North and South Acton.

The quite elderly Green winner in North Acton, which includes the Park Royal regeneration zone: lots of residential tower blocks in a landscape until now blissfully free of them, had clearly stood as a paper candidate. He was so alarmed that he'd won that he promptly resigned his seat - the Greens held it in the June by-election.

South Acton, meanwhile, covers what is left of the relatively infamous estate of that name, most of which has been regenerated away. What large portions of both wards have in common is that they represent several of the key Green demographics in 2026. There are the unhappy residents left in the remains of the disappearing council estates.

There are also lots of younger first-time buyers and renters of the brand new private blocks going up in areas that don't yet function as neighbourhoods: Park Royal is, beyond the parts that have already been rebuilt, a massive industrial estate with no community facilities. These are people squeezed by the cost of living in London, in not especially lovely areas feeling that Conservative and Labour governments haven't done enough to help.

And they have both been fairly reliable Labour wards whose voters occasionally rebel - historically by voting Conservative but this year trying out a Green Party promising "hope". The party also came very close to winning East Acton, a more owner-occupied working class ward, and North Hanwell - the old Hobbayne.

There is another issue of electoral consequence here, which is what's going on with Southall (and, to a lesser extent, Greenford). Southall is renowned as the heart of West London's large Hindu and Sikh community; one that has gradually spread out into Heston and Hounslow, Hayes and Greenford, Wembley, Kenton and Harrow. All the Southall wards have a Hindu and Sikh electorate of over a third, with the three-named Southall wards exceeding 40%.

Historically, these communities have been overwhelmingly Labour supporting. Even when Labour lost power in Ealing it was never wiped out because of Southall. You can find repeated examples of wards like Glebe (Southall Broadway), Waxlow (Lady Margaret) and Northcote (Southall Green) giving Labour vote shares well in excess of 70%. No longer.

	2018	2022	2026
Dormers Wells	70.5	58.4	31.8
Lady Margaret	74.3	62.1	33.0
Norwood Green	68.0	64.4	22.7
Southall Broadway	78.2	59.6	32.0
Southall Green	83.1	68.1	36.0
Southall West	N/A	50.3	31.9

Decline in Labour support, 2018-2026

Again, despite those dramatic losses of support Labour held all but one of those seventeen seats - with the last going to an ex-Labour councillor winning as an independent. These were all wards in which the Conservatives improved notably in 2022 - and that trend continued in Southall Broadway and Southall West this year despite the Tories generally much poorer result. But the non-Labour vote was fragmented and disorganised, enabling Labour to hold on when, elsewhere in west London, the party's disintegration in Hindu and Sikh neighbourhoods continued apace.

On which subject, the Conservatives would be down to just two councillors in Ealing had they not won, somewhat surprisingly, North Greenford ward off Labour. North Greenford wasn't remotely competitive in 2022, Labour winning 54% to the Conservatives' 23%. There were other wards in Ealing North seemingly more promising for the Tories: Central Greenford had elected Conservatives reliably until 2014 and Perivale also had a Tory-voting past. The Conservatives came close to winning those two wards, but in North Greenford they turned that 31% Labour lead into a nine point win for themselves this year: 36%-27%.

North Greenford is what you might call Wembley-adjacent: it neighbours wards like Alperton and Sudbury and Wembley Central in Brent, all of which swung markedly from Labour too this year. They swung principally to the Lib Dems - the established party of opposition to Labour in that corner of Brent, but we again need to return to what is going on with the waning allegiance to Labour in ethnically very diverse wards across West London. North Greenford is just 17% white British these days (a far cry from when Ealing North Conservative MP Harry Greenway was the epitome of the constituency he represented: white, working class, suburban); Perivale likewise, Central Greenford 19% white and Greenford Broadway 21%.

North Greenford may light a path to Conservative recovery in Ealing. If they cannot win the affluent centre of the borough any longer their only prospect is to start winning in Greenford and Southall. That may happen by default if Labour cannot staunch its losses in these ethnically hyper-diverse wards but it really needs a little more effort and focus from the Conservatives if they want to do embed themselves as the natural party of neighbourhoods like these.

They also need to unite a vote split with Reform. There were six wards where the combined Conservative-Reform vote was larger - often considerably larger - than that of the Labour or Lib Dem winners. There would most certainly not be a Lib Dem councillor in Ealing Broadway had Reform not stood in that ward. Labour would likely have lost every seat in Greenford and Perivale, not just North Greenford, without a split on the right.

But that doesn't necessarily work the other way round. The two wards in which Reform polled strongest: Northolt Mandeville and Northolt West End would not have elected

their councillors with a united right-of-centre vote: the Conservative shares there were too small. But most of Ealing is much less accommodating of Reform and this isn't likely to be a borough they can expect much from: it's either too affluent-liberal or too ethnically diverse.

Because Labour's majority is something of a mirage: not reflected in the votes cast in Ealing this year, any further slippage will start costing them lots of seats. The Greens need 31 seats - a lot, but they just require a 5.9% swing to bag that huge haul. The Conservatives need a similar number and would get them with an 8.5% swing. Despite having the second largest number of councillors and so needing 23 extra seats to win the Lib Dems are further away than these other parties, requiring a 10.5% swing.

Enfield

31 27 5

In Ealing we've just seen how Labour survived, largely unscathed, an 18.6 point drop in its support. In Enfield, an 18.4 point drop in support evicted them from power (their vote almost halved), albeit with an initially surprising shove from the Greens.

There are two explanations for this divergent result. The first is that Labour's slump in Enfield this year came after another (smaller) fall in 2022, whereas Ealing Labour went into 2026 atop their largest win ever. The second is that politics in Enfield is more straightforward: this is not, even today, a multi-party contest. All but five seats are either held by Labour or Conservative - and it's been this duopoly forever.

However well the Conservatives were destined to do in 2026, Enfield was at the very peak of their potential successes. To win, the Tories needed seven gains on an 8.4% swing. They actually managed one of 8.7% borough-wide, but not in the ward that mattered: Bowes.

This is usually a safe Labour urban ward sandwiched between the borough boundary with Haringey and the North Circular. The Tories won one of the ward's seats: the first time any Conservative had won Bowes since 1982, but missed the second. As such, while Labour lost its majority, the Tories didn't win one of their own. Instead, they finished one seat short with 31. Labour held onto 27 and the Greens, for the first time, won five.

Like Barnet, this is a borough in which the Conservatives significantly outpolled Labour (they were ten percentage points ahead), though with only 33% - one point lower than they won in 2022.

Alongside that seat in Bowes the Conservatives won both seats in Highfield - an inbetweener ward east of Palmers Green and west of Edmonton. They gained all three in Southbury, another inbetweener ward as Enfield transitions from the affluent Town ward to the more industrial River Lea side of the borough.

The Greens' success came in different corners of the borough - but all at Labour's expense. They won both seats in New Southgate, another Haringey borders ward. They won two of three in Enfield Lock, in the opposite corner of the borough. And they took a seat in Ponders End: a Lea-side ward

There isn't anything that stands out in the demographics of these three wards to make them more Green-oriented than other similar wards that stayed Labour. It may just be that with Labour and Conservatives polling poorly (23% and 33% respectively quite a large chunk of Enfield came into play and those are the seats that happened to break in their favour.

They narrowly lost seats in Bowes (they were actually closer to winning that second seat than the Tories), Upper Edmonton (39 votes), Haselbury (63 votes), Palmers Green (61), Brimsdown (133) and Carterhatch (95). With the exception of Palmers Green these are all wards on the Lea-side of the borough: gritty wards of modest housing interspersed between industrial estates and warehousing.

The Green vote was remarkably evenly spread. They polled between 20% and 30% in nineteen wards, over 30% in just two, and below 20% in four (all safe Conservative wards). The Greens did dramatically poorer at the Conservative end of the borough. Their most winnable ward in 2022: Southgate, barely shifted at all, re-electing its Conservative councillors. That could mean that the wider Green strategy of pursuing votes to the left of Labour on more "progressive" policies, and playing down more traditional environmentalism that might appeal to Green-minded Conservatives played out perfectly in Enfield. Or it might mean that voters broadly had worked out how to oust an unpopular Labour council ward by ward.

Why did the Greens put the Conservatives into power in Enfield? The main reason was the parties' shared opposition to the building of a New Town on greenbelt land in Enfield Chase where around 21,000 homes are proposed to be built.

The electoral maths in Enfield, with Labour needing all five Greens to vote with them every time were theoretically doable but practically a nightmare over four long years. The Conservatives, however, can win votes without the Greens needing to vote for their motions: they just need them to abstain or be absent. Nonetheless there may be an electoral price to pay for the Greens given that most who voted for them in these deprived southern and eastern wards probably didn't want a Conservative council returned.

There was a bigger than typical swing away from Labour in Whitewebbs ward where most of the Crews Hill and Chase Park New Town scheme would be built. Labour won Whitewebbs in 2018 when it looked like the days of the Conservatives winning Enfield might be over Then they lost

this rural outer ward in 2022 (by 11%) and lost it by a mile in 2026 (33%).

Reform made very little impact in Enfield. That's not surprising in the ethnically diverse inner wards nearing Tottenham, but they were hoping for more in the Conservative wards around Enfield town. Their highest vote was in Bullsmoor ward bordering Hertfordshire, and it probably took enough support from the Conservatives to stop them gaining the two seats here.

Labour held on by 7% and Reform polled 17% (though the Greens polled 21% here so it could even more strongly be argued that they did more damage to Labour than Reform to the Conservatives). But Reform didn't do anywhere well enough to threaten the Tories in their safe wards, which may both be too affluent and too metropolitan to make Reform an attractive punt.

Enfield's political history is like much of outer London: a competitive but usually Conservative-voting borough for most of its history, trending firmly leftwards in the 1990s as migration changed the demographics of the borough, culminating in Labour's record 29 seat win in 2018.

But things started going wrong for Labour in Enfield and the council's failures alongside an active, campaigning Conservative Party has made the borough competitive again. The Tories have been stuck in a band of support between 30% and 40% since 2006 - typically closer to thirty than forty - and that doesn't seem likely to change unless this new administration is wildly popular.

Labour's 2026 result was so bad that the Conservatives even outpolled them in the wards comprising the Edmonton constituency, which had supposedly been put beyond their reach for good following the 1997 general election.

Labour has four years to sort itself out, see how much it can tar the Greens with their support for a Tory-led council and see if it can regain power in 2030. Given they are only five seats from a majority despite polling just 23% across Enfield, the electoral battleground still seems to favour Labour.

Greenwich

35 13 6 1

The first week of May 1971 was the last time Labour was not in power in the London - now Royal - Borough of Greenwich. That means that, by the first week of May 2030 there'll have been a Labour majority for one year shy of sixty. Only Barking and Dagenham has a longer unbroken Labour lineage.

Below that headline - the only headline that matters to councillors - of course Greenwich did not remain immune to the ebb of Labour's fortunes in London. Their vote share fell 21.2 percentage points - only exceeded by Hackney Labour's collapse.

We can see how differently the electoral system treated Labour by contrasting these two boroughs. In Greenwich, they held onto a majority of 21 with 31.9%. In Hackney, the party was almost wiped from the council with exactly 31%. The difference, as always, is not just the vote share one party obtained but what happened to the 68-69% who voted other than Labour. In Hackney, as we shall come to next, Labour's vote was dwarfed by that of the Greens and, in their own little niche within the borough, the Conservatives. In Greenwich, their 31.9% was the largest of any party's and, as long as that borough-wide fact was also true in enough wards, that meant re-election.

That is precisely the story of Greenwich in 2026. As with Hackney, the Conservatives lost little enough of their vote compared to Labour to restore their full control over the enclave in Eltham that returned six councillors. If they'd been a fully-functional opposition, however, they'd also have regained their third Eltham ward: Eltham Park and Progress, made inroads into Blackheath Westcombe, and maybe even in their somewhat weaker side of Eltham: Middle Park and Horn Park (aka Eltham Palace) ward, or Kidbrooke Park perhaps. But six was what they ended up with and six is a lot better than the three they were left with in 2022.

So, again, we saw that trend of the Conservatives making some progress against Labour but requiring a magnifying glass to see it. In Greenwich or, rather, in Eltham that problem is exacerbated by a Reform threat to both the Conservatives and Labour.

Eltham is a typical of an inner London suburb in that the Conservatives have not faded away, as they have in other outer south London suburbs like Sydenham, Grove Park, Dulwich, Streatham and Norwood. Eltham constituency was the only inner London constituency that voted Leave in the 2016 EU referendum.

There has also been a far-right element present in Eltham for years, not helped by the BNP "bookshop" being located on the edge of the neighbourhood in Welling. Whether that presence had anything to do with the racist murder of Stephen Lawrence in Eltham in 1993 isn't proven, but it is an aspect of this corner of London that most locals will detest being associated with. Nonetheless, the one gain Reform UK made in this borough this year was Eltham Page - the working class western side of Eltham and the first time this ward has ever elected a councillor who wasn't Labour.

Should we read anything into the fact that the Reform candidate who won was called Paul Banks and the one who lost Siama Qadar? Let's hope not: there is all over the place an element of racist voting and candidates who are ranked lower on the ballot paper typically poll fewer votes simply because of that placement.

The Conservatives might also blame Reform for their failure to win back Eltham Park and Progress (Eltham North) which, until 2014 had never not voted Conservative in council elections. That complaint would have some legs had not Reform finished second in that ward, just 157 shy of Labour. Nobody won more than 30% of the vote in Eltham Park: Labour took 29.3, Reform 24.7, Conservatives 21.0, Greens 18.7 and Lib Dems 5%. An independent polled 1%. Reform also came second in Kidbrooke Park and Middle Park & Horn Park.

The Conservatives won their two Eltham wards quite easily but across the Eltham and Chislehurst constituency Labour polled 24%, Reform 23% and the Conservatives 22% (Greens on 15%).

An asterisk needs to be added to this result though because Bromley's Chislehurst ward was won by "Chislehurst Matters" independents with over 60%. These independents don't contest parliamentary elections and, before they won, Chislehurst was typically hugely safe for the Conservatives - and almost certainly still is when CM isn't on the ballot. Hence, it's not obvious that Labour would actually have come first (or even second) in Eltham and Chislehurst had that been a general election. But then there are other factors including tactical voting that could also influence the result.

Anyhow, enough of the sideshow, onto the main event: Labour's tussle with the Greens.

The Greens have, over the past three elections, built up support in patches of Greenwich town, especially the peninsula and round to Greenwich Park and the mouth of the river Ravensbourne. Since 2022 these wards have been drawn a little helpfully for the Greens: Greenwich Creekside and Greenwich Park being smaller two-councillor wards and East Greenwich and Greenwich Peninsula larger wards but with more concentrated pockets of Green support within them.

In 2026 the Greens won seven of the ten seats in these four core Greenwich wards. A little oddly only one Green was nominated in Creekside and, although (or perhaps as a result) this tiny, densely-populated ward was their weakest they were still only 118 votes short there. Greenwich Peninsula, which includes the masses of new housing built when the Millennium Dome project regenerated the area is still growing, with 700 voters added to voter rolls since 2022.

The Greens also gained a seat in a by-election in Shooters Hill ward in 2025. This was the second by-election in Shooters Hill: the first caused when the Labour leader, Danny Thorpe, was ousted by his group and he moved on. Labour held that one easily enough but then the party suspended the other councillor for that ward, Ivis Williams, for objecting to and campaigning against the closure/sell-off of Greenwich Equestrian Centre and an adjoining piece of land: Green Garth. This was a custom-made campaign for the Greens and they beat Labour by over 100 in the second by-election. They won both Shooters Hill seats this time by a far larger margin: 47% to Labour's 27.5%.

But there were more defeats heading Labour's way. The Greens also gained the neighbouring ward to Shooters Hill: Plumstead Common, another "always Labour" ward until it suddenly wasn't. They were jut 19 votes from winning Abbey Wood ward, east of Plumstead Common, another 17 from winning West Thamesmead, 49 short in Woolwich Arsenal and somewhat further off - but by no means distant - in Woolwich Common and Woolwich Dockyard. Even Plumstead and Glyndon, probably Labour's strongest ward in Greenwich borough, was not held all that securely.

And there was one last Green gain in what is now called Charlton Hornfair, which they split one councillor apiece with Labour. In 2022 Labour beat the Greens here 59% to 15%: this did not look at all like a Green target. But a 24% swing tuned it into one.

So, the council that emerged from election night comprised 35 Labour councillors, 13 Greens, 6 Conservatives and a Reform UK member. For a borough that, for a few years had two SDP-Alliance councillors, the centre has never been especially strong in Greenwich: six is the most councillors elected here back in 1986. This year the Lib Dems polled just 6.6%, not much worse than they did in 2022. They were not in contention anywhere.

As with Ealing, Labour's comfortable majority in Greenwich belies some considerable weakness in the actual votes cast. The Greens need to more than double the size of their group to win power here but they only need a swing of 2.7% to grab them all. On a 5% swing they'd win 21 seats which would give them 44 out of 55, with just four Labour councillors left. That is the fragility of Labour's grip on Greenwich. No other party is remotely in with a chance of winning this borough and that's why the threat to Labour is heightened: as with Hackney, with one party established as the opponent to choose if you want to oust Labour it becomes much easier to achieve that objective.

Hackney

43 9 6

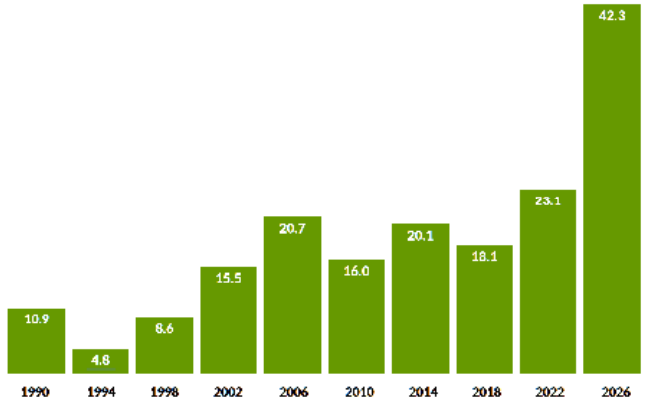
The Greens have been a presence - it wouldn't be quite correct to call them a force - in Hackney going back to the 1990s. They polled above 10% borough-wide for the first time in 1990 and then, in 1998, the first Greens ever elected in London emerged in Stoke Newington's (now abolished) North Defoe ward, from nowhere.

There was a reason for that shock win. 1998 was, until 2024, Labour worst defeat in Hackney in thirty years following a long period of mounting "loony left" chaos culminating in the effective collapse of the borough's Education Department.

North Defoe was the seat of council leader John McCafferty and voters desperate to fix Labour's mess lined up behind the Greens (that part of London was not going to vote Conservative) as the only way to clear the party out. Hackney still elected 29 Labour councillors in 1998 but Lib Dems got 17 seats, mostly in the south of the borough, the Conservatives 12 and the Greens 2: the only time Hackney has been under no overall control.

1998 was not the most opportune time to win a seat for the first time because, in 2002, ward boundary changes completely redrew Stoke Newington. North Defoe was abolished and there was no obvious successor: it was well and truly carved up. That, plus a big swing back to Labour, meant the short-lived Green experiment came to an end.

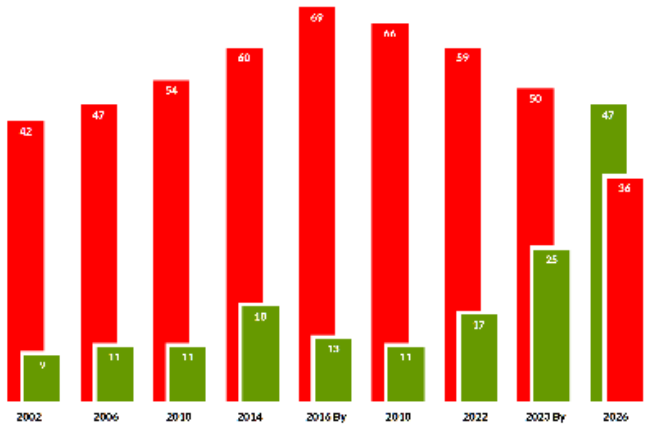
At least in terms of seats. Even as they ceased to win seats, their vote share almost doubled in 2002 to 15.5%, and then to 20.7% in 2006.



Green Party vote share in Hackney council elections, 1990-2026

And there the Greens stuck, up a bit one year, back a bit four years later, from 2006 to 2022. Those sort of vote shares are sufficient to come second in most wards but not to win - not when up against as entrenched a bloc of votes as Labour had. But coming second, again and again, does establish in voters' minds that the most effective vote against Labour is Green.

In 2002 Hackney adopted a directly elected mayor and in its first eight contest (which include two by-elections) these were all walk-overs for Labour. Walk-overs until they all of a sudden weren't, in 2026.



Labour and Green Party mayoral vote shares in Hackney, 2002-2026

Although not remotely comparable with the mess Labour got itself into in the early 1990s, the party certainly had become somewhat complacent - and to be fair, when winning massively lopsided mayoral elections and huge council majorities time after time, that's at least understandable. But perhaps voters' patience began to crack when Labour mayor Phil Granville was forced to resign.

New candidate Caroline Woodley won the 2023 by-election comfortably enough: 50-25% but in itself that represented a swing to the Greens of 8.5% at a time when the Conservatives were still in government and progressive voters were still more concerned with backing the party most likely to defeat them in a general election. Which was Labour.

In the 2024 general election Greens surged to second place in both Hackney constituencies, winning 23% in North & Stoke Newington and 24% in South and Shoreditch. 19,262 people turned out to vote Green, still way behind Labour's 49,079. But from now on Labour was the government and every mis-step, every choice that wasn't as radical as the voters might want, would be laid at their feet.

The Greens will not appreciate the comparison but for all their talk of "hope" in their campaigning materials, they are a party of grievance every bit as much as Reform UK. They are just aggrieved over different things (and sometimes even the same things from a different political perspective). In Hackney those things are grievances over housing repairs given the vast stock of council housing, the so-called gentrification of Hackney which the Greens blame on soft deals with construction giants to build insufficient affordable homes, coupled with their national focus on Gaza and a general more aggressive radicalism than the Labour government was prepared to pursue. But they have an electorate that bear enough of those grievances themselves.

As a result, they benefited from a landslide in 2026. The Greens gained 40 seats, on top of the two they won in 2022 (Dalston and Hackney Downs - they also gained Stoke Newington in a 2024 by-election).

They would have done even better had they not entered into an electoral pact with left-wing councillors who defected from Labour standing as Hackney Independent Socialist Collective. All three of these Socialist councillors lost their seats in wards the Greens topped the poll in. In Victoria, the one Green candidate won 2,090 votes, two Labour candidates trailed in with 1,696 and 1,493, while the two Socialists only mustered 1,010 and 997. In Homerton, the one Green won 2,141 and the Socialist two 893 and 873. And in London Fields, the Socialist candidate got 868 while the two Greens won 1,872 and 1,756.

Nonetheless, 42 of 57 seats is nearly three quarters of the council. The seats won flatters the Greens somewhat: Labour polled 31% but won 16% of the seats. But Labour can hardly

complain having enjoyed decades of lopsided majorities themselves.

The Conservatives increased their share by one percentage point to 12.1% and were able to gain (or hold, if you count it from a 2024 by-election) one seat in Cazenove ward, part of Stamford Hill with its substantial Hassidic Jewish community. Because the Conservative vote is concentrated in this north-eastern corner of Hackney the party is able to maintain representation on the council when, spread more evenly it would typically win no seats. 18% of the vote won them zero representation in Richmond, for example.

The Liberal Democrats are nowadays very weak in Hackney. They lost their last ward: Cazenove, in 2018 and lost almost half their 8% share from 2022 too. In fact, Reform UK outpolled them (just) across Hackney which, given the borough's hostile demographics towards Nigel Farage is probably the best illustration of how the Lib Dems have faded out. That, of course, benefits the Greens: this is no Ealing where multiple fairly strong parties jostle against each other and Labour, having the largest of some fairly low shares, wins. No, over 73% of Hackney voted either Green or Labour in 2026.

And that's how it'll continue to be for the foreseeable future. Labour needs 21 seats - I would add "plus an elected mayor" but the government plans to abolish these roles so next time it'll all be about the council - to regain power and for that they need a 4.8% swing. More of the weaker Green wards are in the south of the borough so, to some extent, Labour needs to do what the Lib Dems did back in 1998 and put together a series of wins along the border with Tower Hamlets.

Hammersmith and Fulham 38 12

Labour appears to have cruised to another landslide win in Hammersmith and Fulham - that's apparent in the headline numbers. Just two seats yielded to the Conservatives in still evolving, redeveloping Sands End. This ward has endured controversies over "parklets" along Wandsworth Bridge Road and low traffic neighbourhoods that ban non-residential cars from the backstreets.

But Labour did not really surf above the devastation these elections wrought almost everywhere else: their vote was down by nearly twenty percentage points borough-wide; by thirty in their strongholds of College Park and Old Oak and Hammersmith Broadway.

So what explains the mismatch of a party well over 60% of the borough voted against winning so handsomely? It comes down to four factors.

First, this election was not really about Labour: it was, again, about the Conservatives and their inability to recover from Brexit. In the 1980s and 1990s, Labour's vote share of 37% would have resulted in defeat because nearly all of the non-Labour vote would have gone to the Conservatives. No longer. The Tories won just 24%, down two on their dismal 2022 performance. The Greens polled 19, up fifteen and Reform won 11 on their debut. The Lib Dems trailed in with just nine, losing a third of their 2022 15%.

Part of the Conservative failure - but only a small part - was down to Reform. It might be argued Reform cost the Tories seats in Sands End, Walham Green and Lillie. But that assumes all Reform votes came from the Tories - they cannot have in College Park and Old Oak and in a ward like Walham Green many Reform votes will have come from the culturally conservative but historically Labour council and housing association estates. The Tory vote rose slightly in Palace and Hurlingham despite 340+ Reform voters there. No: Reform is not the cause of Conservatives being unable to jumpstart a meaningful recovery here.

Do not understate how hollowed out Hammersmith and Fulham Conservatives seem to have become. A vibrant, healthy party does not need to call back to service so many retiring or retired councillors, even if they were only standing in un wards they had no expectation of winning.

Go back twenty, thirty years and the Tory ranks were made up of young candidates who'd go on to be MPs or have success in their chosen professions: think Tim Davie, Theresa Villiers, Jeremy Hunt, Damien Green, Mark Littlewood, Hugh Robertson - the list goes on. These were candidates standing in wards like Coningham and White City: they knew they couldn't win them but they were up for the fight. Today's Conservative group of twelve, albeit with some fresh blood, doesn't have the resources or the votes (at least in the right places) to make the borough competitive.

Second, Labour won Hammersmith and Fulham by such a lop-sided margin in 2022 (54-27%) that they were never going to be felled in one go. There was an 11% swing from Labour in Walham Green; 15% in Lillie. These aren't small swings: but they were still insufficient to overcome the sheer size of Labour's 2022 wins. That 2022 cushion has largely - not entirely, but largely - gone now: Hammersmith and Fulham is on the cusp of being competitive once again.

Third, one of the headlines of the election elsewhere was Eluned Morgan, the defeated First Minister of Wales, declaring that Labour was no longer the party of the working class. That has been evident for a fair while, but within Labour it remains apostasy to admit. Yet how else can the routs in Sunderland, Wigan, Walsall, Dudley, St Helens, Kirklees, Barnsley and Burnley be understood other than in that context? My point with this segue is that Labour's electoral base has changed dramatically since the EU referendum a decade ago.

Hammersmith and Fulham may, at this particular point in time, be Labour's "Goldilocks" borough: packed with just enough of the sort of pretty affluent, pretty liberal, pretty internationalist voters still not ready to abandon the party, still subscribing to the sort of ideals the party talks about, but not the sort of voters the borough was populated by twenty or thirty years ago. Just as Hackney is packed with the sort of voters who align with the Greens, and Havering with Reform UK, so Hammersmith and Fulham right now is for Labour.

But remember: it's true of this moment in time: Havering was once a Labour-Conservative battleground; Hackney always a Labour stronghold; Labour almost won Sutton in 1971 - until they weren't. Just because Hammersmith and Fulham right now is uncompetitive doesn't mean in twenty years it will still be, any more than it was twenty years ago.

There are other factors here. Because Hammersmith and Fulham went Conservative when David Cameron led the party in opposition, and because it is, on most measures, the third or fourth most affluent London borough, a narrative exists that this is a Conservative area that has abandoned the party; been bewitched by Labour somehow. No.

Look at the long run: the eighty years since the Second World War. Conservatives have had a majority on this council for eleven of those years; and ran it in the minority for a further eight. Nineteen non-Labour years; sixty-two and counting for Labour. However posh it looks, this is a Labour borough with deep, deep loyalties that the Conservatives could win on occasion, not the other way around.

Demographics have changed hugely over those eighty years of course. The gentrification of this borough initially benefited the Conservatives (massively) but nowadays seems to be harming them. It is no less an expensive borough for a young Conservative activist to buy or rent in than it is a young Green. Part of the reason Hammersmith and Fulham is relatively politically stable for Labour is that the sorts who can afford to live here are older and established, not really those seeking a new home every couple of years.

The Greens came somewhat close to a breakthrough, but not quite. They chose to target White City, presumably because they came (a very distant) second there without doing any work in 2022. This was a mistake born of inexperience, albeit a brave one.

Brave because it was foolhardy but courageous across the West Central band of London to take on Labour in their very safest wards: Golborne in Kensington, Harrow Road in Westminster, White City here. A mistake because the demographics weren't right for them to succeed in White City: the only ward in the borough that's always voted Labour, without a massive Muslim population enraged about Gaza, and without enough of a local grievance to shift, in many cases, lifelong Labour allegiances.

In next door Shepherds Bush Green, the Greens ran level with Labour in most of the ward. Again, they didn't pour too much energy into this one which, given its small electorate (a lot of the housing expected here hasn't yet materialised) was another mistake (smaller electorates being easier to contact). If they had focussed their campaigning zeal here rather than in White City, which remains safely Labour, they might have won.

Were the Greens right to write off a very affluent, very liberal ward like Ravenscourt? They only fielded one candidate there and finished 700 shy of Labour. Maybe their more vocally left-wing, and less environmental positioning this year would have made that difficult. But we won't know because they didn't try. We do know they managed to win a seat in nearby Chiswick Riverside.

The Lib Dems keep attempting to gain a foothold in this borough but they don't seem to know which of the two parties' to attack, nor which of their wards to focus on. They seem to randomly pick one each cycle, then give up on it when they lose. That is not how Lib Dems operate in boroughs they are serious about: it is about the long haul, not the quick fix. It's not how Simon Knott, their former Hammersmith Broadway councillor won, then held his seat.

But the Lib Dems are even more structurally weak in this borough than the Conservatives now are: by the next election it will be 36 years since they last won a seat, fleetingly, in what is now Walham Green. In Hammersmith Broadway they polled just 9% as Reform and Greens both surged past them; they fell back in their 2022 target of Munster to just 11% and also lost votes in Fulham Town. At least they clung onto a 16% share: their best in the borough.

Reform polled respectably in a couple of parts of College Park and Old Oak, and on the western side of Hammersmith Broadway which includes the Riverside Gardens, Aspen Gardens and Ashcroft Square council estates.

The Conservatives need fourteen seats to win a majority of one in 2030. For that, they need a still hefty swing of 11.4%. Perhaps they need to focus solely on picking off the marginals and semi-marginals: Avonmore, Brook Green, Lillie, Sands End and Walham Green (which gets them to 21) and from there attempt a realistic campaign for a majority.

Curiously, all the best Conservative targets run down the eastern side of the borough, but that is surely just a quirk thrown up by this election rather than anything significant about how the electoral map is evolving. The Greens need more seats: 26, but a slightly smaller swing to win them: 10.7%, because they had a more even spread of support across the borough. The Tories remain strong in Fulham but weak in Hammersmith and extinct in Shepherds Bush. Both Reform and the Liberal Democrats need swings of more than 15%.

Haringey

28 21 8

On the ladder of London boroughs the Greens aspired to win, Haringey was the highest rung. No-one had defeated Labour here since 1968 regardless of scandal and mismanagement or the loony-left tag Haringey acquired in the 1980s.

Labour's strength in Haringey is founded in Tottenham; any seats it can win in the much more affluent west of the borough (Muswell Hill, Highgate, Crouch End) are bonuses. And the party's strength there has been phenomenal. In 2018, for example, Labour polled 81% in Northumberland Park, 73% in Tottenham Green, 71% in Bruce Grove, 75% in Tottenham Hale and 78% in White Hart Lane. They were above 60% in a further six. Little wonder that in the 2017 general election Labour MP David Lammy was one of a rare cluster of MPs to win by over 30,000 votes - and he did so again in 2019.

	2018	2022	2026
Bounds Green	62.9	54.0	34.6
Harringay	56.7	42.8	30.2
Hornsey	62.0	63.6	39.6
Noel Park	65.5	68.4	34.1
Northumberland Park	81.1	70.9	31.8
St Ann's	58.5	53.3	28.6
Seven Sisters	68.8	65.4	36.6
South Tottenham	73.4	63.9	45.9
Stroud Green	56.2	45.4	24.9
Tottenham Central	71.3	61.9	32.5
Tottenham Hale	75.4	67.7	33.5
West Green	66.8	78.1	29.5
White Hart Lane	77.6	58.6	34.0

Decline in Labour support in safe Labour Haringey wards, 2018-2026

And yet today Haringey is administered by a minority Green council - precisely because Labour collapsed in Tottenham. Ironically, Haringey also happens to be one of just three London boroughs (the others being Croydon and Redbridge) in which Labour also gained a seat: in Alexandra Park from the Lib Dems.

	2018	2022	2026
Alexandra Park	39.3	39.8	29.2
Crouch End	37.4	39.1	28.3
Fortis Green	37.3	37.0	33.2
Highgate	28.7	29.8	21.2
Muswell Hill	38.2	34.1	29.3

Decline in Labour support in marginal Haringey wards, 2018-2026

Labour's vote in these wards can hardly be called fantastic, but it also held up comparatively well, at least proportional to the Lib Dems, who are Labour's opponents in the west. That's why they gained the seat in Alexandra Park: their vote slid ten percentage points; the Lib Dems' thirteen points. In an already split ward, that three-point difference can mean gaining or missing the other seat.

This: the very much less bad Labour performance on the much more affluent western side of the borough, can contribute to the voluminous evidence substantiating the secondary story of the elections: Labour's vote, at least in urban London, was far more resilient in very affluent neighbourhoods. All of the Hornsey side of Haringey bar Hornsey ward itself has, at one time or another (and often many-a-time) been Conservative and then Liberal Democrat.

Northumberland Park - that very safest of wards in 1998, had a Green councillor briefly (he resigned, presumably in shock at winning and Labour regained the seat whilst losing one back to the Greens on the same day in Woodside ward). In fact all those wards I listed above as astoundingly safe for Labour now have Green councillors representing them.

Only one ward returned a full slate of Labour councillors in Tottenham proper on 7th May: South Tottenham. Alexandra Park, Hornsey and Bounds Green did the same, but the Greens won eight wards outright and the Lib Dems two (having also ceded a seat in ultra-affluent Highgate to the Greens).

Across the borough, Labour lost 21 percentage points of support, sliding from 53% to 32%. The Green vote more than doubled, from 16% in 2022 to 36% this year. On the Tottenham side of the borough the Greens polled 43% to Labour's 34%: an absurd reversal of fortunes - Labour won 63% to 16% in 2022. That's a 28% swing.

The Liberal Democrats did reasonably well to end up with eight councillors: one more than 2022 despite that Alexandra Park loss and the loss of a Highgate seat to the Greens. they achieved this slight improvement by taking two seats off Labour in Muswell Hill and one off them in Crouch End.

It is an achievement for the Liberal Democrats to remain relevant in council elections after the party loses the parliamentary seat, as they did here in 2015. They've done it in Bermondsey and Old Southwark, though they had a vice-like grip on that constituency for over 30 years. But they couldn't manage it in Brent East/Central - in fact the seats they now hold in Brent are in Brent West, not the constituency they held for a few years. And the party was never able to establish itself on Greenwich council during the period in the mid to late 1980s when the SDP/Alliance held both Woolwich and Greenwich.

This variable success rate for the Liberal Democrats cannot be down to demographics: Hornsey is very different demographically to Bermondsey which is sort of more similar to Brent East (though much whiter). It may be that there are three key criteria for Lib Dems to bed in to a constituency - especially a usually Labour-voting one, of which the party needs to tick at least two. These are:

1) A perfect storm: the stars aligning at exactly the right time to deliver a huge upset. That was present in Bermondsey at the time of Simon Hughes' by-election in 1982 (the defection of the local Labour MP and the infiltration of the local Labour Party by the far left); and in Brent East in 2003 (the Iraq War in an ethnically diverse constituency with a large Muslim population); and slightly less of a factor in Hornsey and Wood Green when Barbara Roche lost to Lynne Featherstone, again mainly because of the Iraq War.

2) An effective Lib Dem MP. Simon Hughes was clearly that becoming "Mr Bermondsey" over his long tenure. Lynne Featherstone wasn't quite in Hughes' league but she had what he did not: a personal fortune to fully fund a constituency party and ensure her profile was high across Hornsey. It was less of a factor with Brent East's Sarah Teather

3) The sorts of neighbourhoods that find being represented by Liberal Democrats more pleasing than the party that previously held the seat. That may be because the Lib Dems are a better fit ideologically for a ward or constituency at a particular point in time, or because of their all year round "pavement politics" approach, much more active and responsive than previous councillors and MPs.

It's true in boroughs like Richmond where the Conservatives are now perceived as too right-wing for a progressive liberal borough, and it's true of places like Bermondsey where Labour is perceived to be too reactionary and unlistening, aside from the travails of the Starmer government.

Nonetheless, for all the Lib Dems' "stickiness" to the western side of Haringey they still came a fairly distant third in the Hornsey and Friern Barnet constituency; Labour actually just coming out ahead there: 12,816 votes to 12,640 Green votes and 9,776 Lib Dem votes. Labour would also have just won the old Hornsey and Wood Green constituency, though with a stronger Lib Dem vote: Labour 14,417, Green 13,963 and Lib Dem 12,437.

As in neighbouring Hackney, the Greens entered into a pact with the Your Party-adjacent Haringey Socialist Alliance. And the result was precisely the same as in Hackney. Whereas the Greens might have won all the seats in these "pact" wards, the sole Green got elected and the Socialists lost. In fact the difference was absurd.

In Bruce Castle, for example, the Green candidate won 1,209 - the second highest number of votes, while the two Socialist Alliance candidates trailed behind with just 599 and 528. Likewise Northumberland Park, albeit the Socialist Alliance candidates were slightly closer: 1,135 for the Green, 826 and 622 for the Trots. And West Green: 2,009 for the winning Green candidate (who topped the poll by a mile), 880 and 781 for the Socialist Alliance.

The consequence of these naive and counter-productive deals almost certainly cost the Greens a majority in Haringey: up to six extra seats they may well have won which they threw away because allying with the far left meant more to the party leadership. They only needed one of those seats to gain a majority. Of course, we know this only in hindsight.

As it was, the Greens were just three votes short of power (among the seats they did contest). That was the majority of Hasret Bozdogan, the Labour councillor who took the third seat in Woodside ward. Bozdogan almost immediately resigned from the council (presumably not in protest at almost being voted out) and in the ensuing by-election the Greens gained her seat.

Unfortunately for them, the Green councillor in Northumberland Park was found to be ineligible to be elected and was disqualified upon his election, and Labour regained that seat. So the Greens remain one council seat from a majority: just a 0.1% swing would put them in power.

Swinging the other way, Labour needs a 3.2% swing to regain the eight seats they require for a majority. The swings for all other parties are simply too large to waste time describing.

Harrow

42 **12** **1**

The only council in 2022 that swung directly from Labour to Conservative was Harrow. And in 2026 that swing from Labour continued, the Conservatives turning a majority of seven seats into one of twenty-nine.

Because the Conservatives had won almost everything there is in Harrow East (though they picked up the last Labour seat in Edgware ward), most of these new Tory councillors represent wards in Harrow West. These include Greenhill, Harrow-on-the-Hill, Roxeth, Headstone and Wealdstone North (on the eastern side of the borough but part of the western constituency).

This result was another more down to Labour's collapse than Conservative advance: the Tory vote share was down about three points across the borough. But Labour's crashed by seventeen to just 20.4%: their worst vote share since 1982 and not all that much better than their 1968 performance, when they won no seats.

In Wealdstone North Labour lost more than thirty-five points of support - this (the old Wealdstone) used to be among the very safest Labour wards. In Roxeth they were down twenty five points: the first Conservative councillor here since 1974 (though there was a long period of Residents' Association representation after that). Kenton East, which always returned Labour councillors until 2018 (when it split) now has a Conservative majority of over 1,400.

These elections were contested by a localist party called the Arise Collective, one of several left-of-Labour parties loosely aligned with Jeremy Corbyn's Your Party but standing under their own colours because of YP's inability to organise itself into actually fielding candidates in an election.

It's not all that obvious whether Arise damaged Labour more than the Greens. One of the Arise candidates won in Marlborough, a usually safe Labour ward undergoing a lot of redevelopment. But she polled under 25% of the vote while her two running mates polled, on average, below 20%. Of course Labour was down a lot too: about 17 points but, as we've already shown, that's not an exceptional fall, and Labour's drops were often larger in wards which Arise did not contest. The party also stood in Headstone, Roxeth, Wealdstone North and Wealdstone South, polling under 20% in each ward.

The Conservative recovery in Harrow and, to less of an extent, Enfield - both boroughs that looked as though they were permanently turning away from the party prior to 2022 - is a reminder that London's politics does not simply flow in one direction.

	2018	2022	2026
Centenary	60.2	35.5	17.2
Edgware	56.9	43.1	22.3
Greenhill*	52.2	40.8	29.4
Harrow-on-the-Hill*	53.6	41.4	33.4
Kenton East	48.8	39.7	14.5
Kenton West	45.8	40.1	13.8
Rayners Lane*	42.1	36.8	27.4
Roxbourne*	62.0	61.1	34.7
Roxeth*	64.5	52.1	29.0
Wealdstone North*	54.7	64.2	28.0

Decline in Labour support, 2018-2026 (* Harrow West constituency wards)

That was equally true in 1987 when Labour held only 23 London constituencies in 1987 to 58 Conservative seats, having just lost Battersea for the first time, Walthamstow and their Fulham by-election gain to the Tories, that was not London's destiny either. Of course there will be parts of the capital (right now far too many parts, from their perspective) that the Conservatives will never be strong enough to win, just as Labour will probably not win many councillors ever in Richmond, Kingston or Sutton.

A lot is claimed about the Conservative success in Harrow being down to the Hindu vote, which is increasingly right-leaning for a variety of reasons. There is very little correlation, though, between the gains the Tories made in 2026 and the size of the Hindu and Sikh vote. It is far more credible to argue that the extent of Labour's defeat in 2026 was down to two things: Harrow East Conservative MP continuing to work his unique type of vote-winning magic on his side of the borough (and also that being noticed in the west); and the particular unpopularity of Labour in 2026.

Harrow is now very much a non-white majority borough: there are only two wards (Pinner and Pinner South) where the white British population was over 30% at the 2021 census and twelve where it was under 20%. But that doesn't mean it's very much a Hindu and Sikh borough either: the only ward where they exceed 40% of the population is Rayners Lane (and that ward re-elected its Labour councillor). But there is also a fairly substantial Muslim population living in Harrow: as high as a quarter in Wealdstone North and over 20% in Roxbourne.

That may also help explain Labour's further decline this year: the Hindu and Sikh vote largely abandoned the party in 2022 while Muslims did so in 2026 - and unlike the former they were very unlikely to switch to the Conservatives.

With the exception of that Arise councillor in Marlborough, Harrow remains a two-party borough - a far cry from the 1980s and 1990s when the Liberal SDP Alliance and the Liberal Democrats had very strong support, and even ran the borough for a term. There were no Lib Dem prospects this year, though former Rayners Lane councillor and never-ceasing candidate there kept them remotely in contention in that ward. Otherwise they didn't win more than 10% anywhere other than the two Pinners.

Because Harrow is no longer the picture postcard epitome of the famous public school, it is hardly a borough attracted to Reform either, though they perhaps had potential in some of the outer wards: Harrow Weald or Stanmore. In fact their best ward turned out to be Wealdstone South where they ran the Conservatives close for second. Labour won there with less than a quarter of the vote. Otherwise Reform was barely more popular than the Lib Dems.

As for the Greens, where Arise stood they were stymied. Only in Roxbourne and West Harrow did they poll above 20%, in both cases a long way short of Labour.

The additional swing to the Tories in 2026 has well and truly embedded them in control of Harrow: it almost looks like a safe Conservative borough. Labour needs a swing of 12.6% to gain the sixteen seats to regain control. But in 1994 they were in a similarly distant position (14 seats on a larger council) and gained a majority in 1998.

Again: just because politics look settled doesn't mean they are. The circumstances of 2026 are different to those of 1998, though. Labour was on the ascendancy nationally and especially in outer London then; they are on a seemingly unstoppable downward trend in west London now.

Havering

39 14 2

And so to the only London borough which lived up to the hype Reform UK made of it. The party swept to power with a comfortable majority of 23 seats, wiping the Conservatives off the council, leaving Labour with just two seats and the Residents' Associations with 14.

How different from the rest of London is Havering? It is overwhelmingly white: Upminster and Cranham wards are over 80% white British which are proportions simply non-existent anywhere in inner London (and most of outer London too). Aside from the two Harold Hill wards plus the emerging Beam Park ward there is virtually no council housing and mass home ownership: 88% owner-occupied in Hornchurch's Hacton ward for example. And, whereas in most of London professionals and managers (ABC1s) predominate in most wards, they are the majority in just six Havering wards (out of 20).

Parts of Dagenham lie close to Romford town centre or adjacent to the neighbourhoods that run up the western side of the borough boundary but most of Havering is physically apart from the local authorities to the west. Havering voted in line with Thurrock to the east more than any London borough this year.

Those (wide) demographic differences between Havering and London are why this borough was the very top Reform UK target.

Although the 2026 result confirmed Reform's ability to roll over established independents, residents associations and localist parties, in truth it was from the Conservatives and Labour that Reform made most of their gains: thirty of Reform's thirty-nine councillors represent seats won from those two parties. The R.A.s lost just nine compared to 2022 (though nine Conservatives defected to the R.A.s over the past term). The R.A.s fared worse in terms of votes lost though: down seventeen points compared to the Tories' sixteen and Labour's ten. Yet they still polled 27% borough-wide compared to Reform's 36%.

Reform holds every council seat in Romford constituency and that is essentially where the party's majority on the council comes from. Results in Hornchurch & Upminster and the Havering side of Dagenham and Rainham were much more closely fought (though with the R.A.s, not the other parties). Of ten seats in Dagenham & Rainham Reform holds four, R.A. councillors four and Labour two. In Hornchurch & Upminster there are fourteen Reform and nine R.A. councillors.

For the first time ever no Labour councillors have been returned from the massive Harold Hill council estate (Gooshays and Heaton wards, plus a bit of Harold Wood). Their last worst performance was in 2014 when they held onto one; and before 2006 they'd never lost any there: they were among the safest Labour wards in London at times.

Labour held on to two seats - just - at the other end of the borough in Beam Park, a small Thames Gateway ward where lots of new high-rise homes are being built (and so the demographics are quite different to the rest of the borough). Labour hung on against Reform by just 24 and 39 votes.

The R.A.s are a bit more embedded, at least in their long-term wards: Cranham, Hacton and Upminster - which they've won throughout this borough's history and back before then too. They also look secure in Harold Wood, which they haven't held forever. It was the wards the R.A.s won more recently that Reform found easier to prise from their grasp: Emerson Park, Hylands and St Andrew's. But they aren't out of contention in any of these.

The Conservative results in Havering look like Labour's throughout much of the rest of London, with vote share collapses of over twenty percentage points in several wards. But then Havering isn't really like any other London borough, and not just because it votes differently.

It's semi-rural: it's scattered with un-London-like electricity pylons and wind-turbines, farms and fields and marshes and woodland. It's far more like the district and county councils in England beyond the capital that Reform has stormed. Nonetheless, a London borough it remains (for now) and as I've shown Labour's collapse across the part three elections in other reviews, here's the Conservative collapse in Havering:

	2018	2022	2026
Havering-atte-Bower	54.7	43.8	13.1
Hylands and Harrow Lodge	54.5	32.4	9.4
Marshalls and Rise Park	49.2	51.1	19.8
Mawneys	58.6	47.1	31.7
Rainham and Wennington	11.3	38.7	4.6
Rush Green and Crowlands	48.9	45.7	25.5
St Alban's	n/a	44.9	19.9
St Andrew's	32.5	16.7	8.5
St Edward's	48.8	40.4	20.8
Squirrel's Heath	59.8	51.5	24.2

Decline in Conservative support, 2018-2026

Reform faces the same problems in Havering as it has wherever it has won: a council on the verge of bankruptcy not because of ludicrous wild spending but because its central government grant and 5% Council Tax rises aren't keeping pace with the costs of the services it is required, by law, to pay for. Holding a referendum to leave London, which will have no legal effect, won't fix that core problem. Equally, the political realties of administering local councils don't seem to be denting Reform's popularity amongst the types of voters that will ever consider supporting it, of which plenty live in Havering.

Nonetheless, Reform's cannibalising of the Conservative vote, of the Labour vote and a lot of the R.A. vote has

ensconced them firmly in control of Havering. The R.A.s need a 6% swing to regain power but everyone else is out of the race: Conservatives, Labour and Greens need a swing in excess of 15%.

Hillingdon

32 16 4 1

If every borough that was principally a Tory-Labour fight behaved as Hillingdon did this year, the Conservatives would have been broadly content. Yes, their vote share fell nearly ten percentage points to an unspectacular 36%, and yes, Reform UK polled far more substantially - 18% - than they'd like, but this is one borough where their emergence hurt Labour at least as much as it hurt them.

Labour's performance was terrible: down twenty points on 2022 to just 19.6%. Even in 1968 Labour polled 25.9% and in 1982 23.2%, but at least their vote is better distributed now that they held 16 seats this year (zero in 1968, ten in 1982).

And that is Labour's problem. Whereas twenty, thirty, forty years ago Labour had support throughout this borough (they even managed to win Harefield in 1994: 7.6% there this year), they are now the Hayes and Harlington Party - and they're even struggling there.

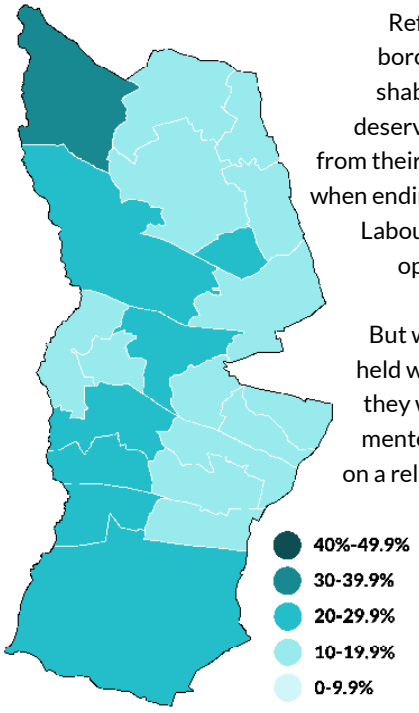
Hayes and Harlington Labour have a spectacular history of starting fights in empty rooms - and the 2022 to 2026 term was no exception. Their split wasn't quite as remarkable as that of Hounslow Labour but four of their councillors left to form the Hayes Independent Party (HIP), another of those left-of-Labour groupings founded in disaffection at Sir Keir Starmer's leadership of Labour (and perhaps some local disagreements too).

Another went to the Greens. The party managed to defeat all those HIP councillors who didn't step down very easily. Nor can HIP claim credit/infamy for causing the Labour losses there were: that party did not contest the wards Labour lost.

Those lost seats were in Charville, a perennially marginal ward which has changed its representation the past six elections. The Conservatives finally won every seat in Charville for the first time since 1982. They also lost their one seat in Uxbridge ward to the Conservatives.

And then there were losses in the far south. They lost a seat in the (geographically) huge Heathrow Villages ward to Reform UK; two seats in next-door West Drayton: one to Reform, one to the Greens; and both seats in Yiewsley, a white working class ward that can politically be quite contrary. Reform won both seats there, by twelve votes and six votes.

This is the paradox of Reform in a borough like Hillingdon: the wards they have a shot at winning tend(ed) to be Labour-held. Reform yet again made - even before the election laughable - claims about winning Hillingdon, albeit that they admitted this would be a more difficult gain. In that last respect they were right given they needed 27 seats for a majority and managed 4.



Reform's 18% of the vote borough-wide was not too shabby: nearly 1 in 5 votes deserves a degree of respect from their opponents, especially when ending up just 1.6% behind Labour, always the principal opposition to the Tories.

But whereas in the Labour-held wards that Reform won they were up against a fragmented opposition and won on a relatively low vote share, against the Tories they had to overcome much larger blocs of votes that they could not surmount.

Reform's strongest ward was not one they won but Harefield Village in the north-east corner. In this single-councillor ward Reform polled 38%. That compares with 28% in Yiewsley, 26% in West Drayton and 23% in Heathrow Villages. But they lost Harefield because the Conservatives polled 45%. Labour polled 25%, 26% and 26% in the now-Reform wards.

But in those four other wards to the north: Colham & Cowley, Hillingdon East, Ickenham & South Harefield and Ruislip Manor the Conservatives polled 36%, 47%, 46% and 46% respectively. With the exception of Colham & Cowley, a very mixed ward that includes the Brunel University campus, those sort of vote shares can't be overcome in a divided political scene like we have today.

And even in Colham & Cowley, the Tories were still thirteen percentage points ahead of Reform because such a mixed ward epitomises that fragmented landscape: Con 36%, Ref 23%, Lab 20%, Grn 15% and LD 4%.

Essentially, with the exception of Harefield Village, the Conservative vote is both too large and too secure for Reform to challenge - and definitely for Labour to challenge: aside from short spells when the won South Ruislip and Hillingdon East, the north and most of the middle of this borough is locked down by the Conservatives.

Things are bleak, but not completely bleak, for Labour in Hillingdon. The Conservatives committed an act of self-harm at the boundary review prior to the last local elections in successfully arguing for a much smaller council. Hillingdon

lost 12 councillors and without a single vote being cast, ten of the abolished councillors were Conservative; two Labour.

That made Hillingdon much more competitive in 2022 and Labour slashed the majority from 23 to a sticky 7 in one of their somewhat less bad performances. It was entirely plausible, given the wards Labour might be expected to win in an even better year (all seats in Charville and Uxbridge plus three in Colham & Cowley) and Reform UK's potential, to see Hillingdon sliding to no overall control this year.

But it wasn't to be: the Conservatives actually increased their majority slightly this year. Whereas Reform acts as a block to the Conservatives doing well in somewhere like Sutton, it seems in Hillingdon they block Labour.

	2018	2022	2026
Belmore	70.5	68.5	30.8
Charville	44.6	50.3	24.5
Hayes Town	69.2	72.1	24.3
Heathrow Villages	52.5	54.2	26.1
Pinkwell	77.3	77.0	34.0
West Drayton	49.2	53.1	25.0
Wood End	65.6	62.0	31.1

Decline in Labour support, 2018-2026

Despite seeing off their renegade councillors, Labour did not do especially well in their own core wards. There is just as much sign of decay in these ethnically diverse west London wards as has been looked at in Hounslow and Harrow and Brent and parts of Ealing.

Hayes and Harlington was one of the constituencies that swung noticeably to the Conservatives in 2024 while Labour was winning their landslide. John McDonnell won comfortably enough but he has long represented the constituency (and tried to represent it a couple of times before that when Terry Hayes was the right-wing Tory MP).

Labour faces double-trouble because this corner of London, if expanded across borough boundaries, includes on the one hand white working class Reform pockets like Feltham, Bedfont and Hanworth (as well as Heathrow and Yiewsley), and on the other, large Hindu and Sikh populations in Heston and Hounslow (as well as Hayes and Yeading) moving right - but to the Conservatives not Reform.

In other words two of the foundations of Labour's success in Hayes and Harlington are crumbling and, while lots of new homes are being built in Harlington and Hayes Labour may not benefit from those either because residents of new neighbourhoods are a Green-trending demographic.

Because Hillingdon is now quite a small council, because Labour's vote is concentrated and the wards they can realistically hope to win nowadays so few, they party could take control of the borough on a 7.3% swing, needing eleven seats. But it is still far more likely that, if the Conservatives are headed for defeat, the borough will fall to no overall control than an outright Labour gain given that Reform does have potential, even if they didn't maximise it in 2026.

Hounslow 32 17 8 3 1 1

Every few years elections in Hounslow go crazy - and it's not simply down to Labour unpopularity (though that's always a large ingredient). The last time this happened was 2006, and things remained askew in 2010 as well. 2006 was a worse result for Labour than 2026 because they lost their majority in Hounslow back then whilst surviving with a majority of two this time.

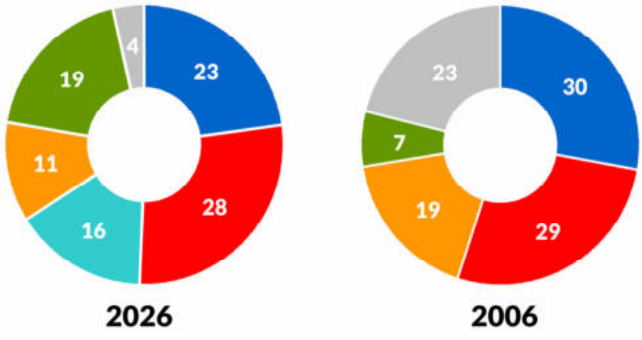
But 2006 was clearly a protest vote and, while that's obviously an element of why things went wrong for Labour in 2026 as well, there may well be longer-term problems for the party that mean normal business does not resume for them if they are less unpopular nationally in 2030.

Labour polled a lower vote share in 2026 than in 2006 yet won eight seats more. In part that's because the Conservatives (and Lib Dems) were down by even more.

That cost the Conservatives seats in the Brentford area: Hounslow South, which is considerably different from the rest of the named Hounslow wards, plus Osterley and Spring Grove returned six Conservative councillors in 2006 and none this year. The Conservatives have two councillors fewer than 2006 in Chiswick (specifically in Chiswick Riverside), and eight fewer in Feltham. The Lib Dems won five seats in 2006 and just one this year.

But the biggest difference between 2006 and 2026 is that there were big votes for specific local parties twenty years ago. "Others" won 23% in 2006.

A Brentford Football Club supporters group (ABeeC) won a seat in that ward; the Isleworth Community Independents won there and in next door Syon, and two "Independent Alliance" candidates won in the west of the borough - a premonition of the sort of Community Independents more prominent across London this year.



Hounslow borough-wide vote shares, 2006 and 2026

Hounslow is a very long borough - and that's not just a geographical attribute: it is the only way to understand the electoral chaos that 2026 threw up. By Chiswick Eyot in the east you are on the edge of inner London. By Feltham Young Offenders Institution you are on the edge of Surrey, watching planes take off and land at Heathrow. There is no other borough in London with such a string of different neighbourhoods within it. Different physically, different culturally, different demographically.

That led to radically different political outcomes in different parts of the borough which collectively look like a chaotic mess. Twelve wards split their representation, one returning councillors from three different parties. In Chiswick, Reform polled less than 8% of the vote. In Feltham and Hanworth, they polled 27%. Same borough: completely different politics.

Hounslow can be split into four distinct clusters of wards. There is the very affluent Conservative stronghold of Chsiwick. There is very mixed Brentford and Isleworth with a large younger professional demographic along with traditional Conservative-Labour battlegrounds. Heston and Hounslow town is the core of the borough's Asian community - principally Hindu and Sikh. And Feltham and Hanworth in the west is the white working-class end of the borough.

These aren't merely handy geographic clusters. As the table below shows, each votes in hugely different ways.

	Con	Lab	LD	Grn	Ref
Feltham & Hanworth	19.9	26.2	8.6	15.4	27.2
	-16.4	-21.4	+6.8		
Heston & Hounslow	27.6	27.6	8.9	18.1	13.6
	+4.6	-26.9	+2.5	+3.9	
Brentford & Isleworth	12.5	31.4	14.9	21.5	13.5
	-7.2	-17.1	+3.8	+4.7	
Chiswick	32.0	24.7	14.0	21.6	7.7
	-8.1	-8.0	-3.4	+11.8	

Varying party performances in different parts of Hounslow

The largest of these clusters is Heston and Hounslow, electing 22 councillors. And the result here explains why, despite doing considerably worse across Hounslow borough in 2026 compared to 2006, the Conservatives were not wiped out.

Nine of the councillors elected in these adjoining neighbourhoods were Conservative this year: no Tories won here in 2022. Yet more evidence of Labour's disintegration in these ethnically very diverse West London wards - seen most obviously in Harrow, then Brent and in patches of Ealing. There was a Labour to Conservative swing in Heston and Hounslow of nearly 16% - whereas in Chiswick there was a very slight swing to Labour - half of one percent.

These were, in 2022, the safest Labour wards. Heston West: the very safest and the council leader's ward, now split. Heston Central: third safest, now wholly Conservative. Cranford: fifth safest - now with two Conservative councillors. Hounslow West, seventh safest - now wholly Conservative. The rest of Hounslow borough suffered convulsions on 7th May, but in Heston and Hounslow itself there was a landslide.

It's the results in these wards that made me speculate at the start that Labour may not necessarily recover in Hounslow as they did after their last bout of national unpopularity. There is no sign of Labour working out how to regain its support in these communities; not even much evidence it wants to try. And there are plenty more seats in this cluster to lose.

Other than the two Chiswick Riverside seats and two or three in Feltham and Hanworth all the most winnable wards for the Conservatives are in Heston and Hounslow. If they can replace Labour as the party of these neighbourhoods, as they have done in Harrow and as they're doing in those other parts of West London then, at the very least, they remove Labour's majority and make it incredibly difficult for them to cobble a coalition or minority administration together.

Yet things would be even easier if the Conservatives had a bit more game in wards they used to win handsomely. In 2006 Conservatives won Feltham North by 2:1 over Labour. Spring Grove was an always-Conservative ward; this year Osterley stayed Labour quite comfortably with the Greens threatening to take second place from the Tories.

In Hounslow South, the middle class end of town which the Conservatives could once rely on, they came fifth this year. Labour held that one easily despite a relatively low vote share. For the Conservatives to win fewer votes than Reform here is dismal: the epitome of the problem they face in London and more widely in the country.

In the west of the borough Reform was triumphant, winning eight seats. Though they would have preferred to have fewer split wards shared with Labour, they polled the most votes in Feltham and Hanworth: 27% to Labour's 26% and the Tories' 20%. This was Labour's second worst section of the borough, losing 21 percentage points of support. But Reform took votes and seats off both larger parties, and Labour also lost

votes to the Greens. Again, though, there remain six highly vulnerable Labour councillors at this end of the borough and a another voter demographic Labour is no longer in sync with.

Finally, Chiswick. There should be nine Conservative councillors here and there aren't. Worse, the party's vote share fell to just 32%. That Labour's fell by an almost identical amount ensured that the Tories stayed in front in Homefields and Gunnersbury, but lost a second Chiswick Riverside seat to the Greens. The Green surge brought them very close to Labour across the neighbourhood and, if the Tories slip any further then they will be in peril of losing seats in the other two Chiswick wards.

Labour would have lost their majority in Hounslow had seven of their voters in Bedfont voted Reform or fourteen in Hounslow Central voted Conservative. To remain in power until 2030 Labour councillors will have to show a lot more discipline than they managed throughout the last term where a 52-10 majority was whittled to 40-10-8 (with four vacancies), due to defections.

The Conservatives need a 3% swing to gain Hounslow though it's likely that if they got close enough the Reform councillors would prefer them to Labour being in power; in which case something like a 2% swing would do. The Greens in theory could win on a 6% swing and Reform on 8.8% though neither of these scenarios is remotely likely.

Islington

32 **19**

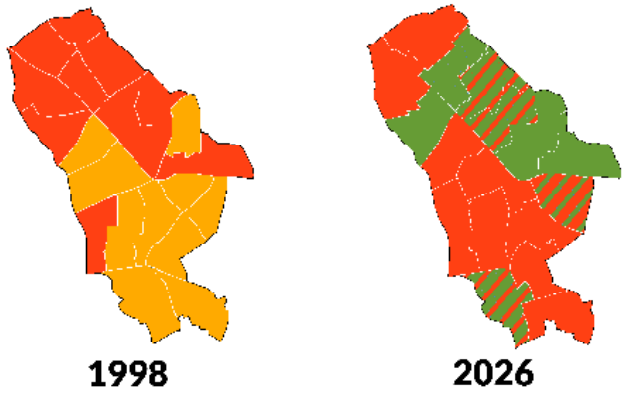
Why did Hackney fall in a landslide to the Green Party yet Islington, with it's almost invisible boundary with Hackney, stayed Labour?

It isn't as though Islington was a more staunchly Labour borough than Hackney. There was a strong Lib Dem presence here from the birth of the Social Democratic Party in 1981 through to 2014, running the borough with a landslide majority from 2002-2006. And at the 2024 general election half of the borough chose to stick with Jeremy Corbyn rather than Labour, re-electing their 41 year MP as an independent.

Islington North was always the stronger, more reliably Labour half of the borough but the trauma of the mass switch away from the party to re-elect Corbyn had a clear follow-through in 2026. All bar three of the Green Party's gains in Islington happened in the north: neighbourhoods like Tufnell Park, Tollington and Finsbury Park - on top of Highbury

This electoral pattern in itself is interesting because, in the (long) era when the Lib Dems provided serious opposition to Labour, their strongholds were the exact mirror of where the Greens won this year. Look at the maps above: 1998 is almost a "negative" image of 2026. There are, of course, reasons for that difference.

Islington South was the half of the borough where the SDP split with Labour had the (much) bigger impact, with a popular MP seeking re-election in 1983. Enough Labour councillors had also defected to the SDP for the party to (very briefly) taking control of Islington before the 1982 local elections. having elected Green councillors since 2014.

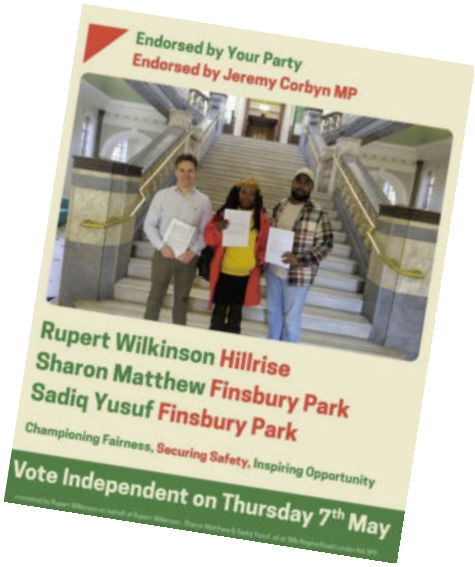


Labour, which had its own "loony left" issues in Islington back in the day, had picked Chris Smith to win the seat back - with tabloids seizing on the fact that he was the first openly gay candidate to stand for parliament at the height of the AIDS panic. Smith only narrowly won Islington South in 1983 and 1987 while the Alliance, and then the Lib Dems began stringing together council seat wins, starting with St Peter's and Clerkenwell, then expanding to Bunhill, Canonbury, St Mary's, Barnsbury and Holloway.

There are actually only very small differences in the demographics of the northern and southern ends of the borough, so the explanation as to why the Lib Dems dominated the south and the Greens were able to seize the north come down to those long-run political histories: the Labour SDP split having especial impact in the south and the Labour-Corbyn split obviously having most impact in the north.

We shouldn't spend too long on this question but for the sake of it we should ask why the Greens were the beneficiary of the fracture with Labour in the north in 2026. After all, wasn't Corbyn now the (joint) leader of Your Party? Where were they? It's a question lots of those who had resigned their Labour memberships since Keir Starmer became Labour asked, as the extraordinary self-sabotage of this latest manifestation of far-left politics burst onto the scene and then imploded. But surely Corbyn could organise enough support to contest the eight wards in his own constituency?

The answer was: he could not, though a few Your Party-adjacent Community Independents stood across the borough. "Independent" is too vague a branding to imprint itself on voters' minds, especially as there were different clumps of candidates standing under different banners and not working in any co-ordinated, effective way. In other words: exactly the same chaotic mess that Your Party itself descended into.



So the Greens were able to capture pretty much all of the anti-Labour surge in Islington with their clearer messaging, their boost in membership and the fact that Islington was adjacent to the Green epicentre in London: Hackney.

The Greens polled nine percentage points stronger in Islington North than South (39% to 30%), though Labour's support was more even: 35% in North and 37% in South. But that gap mattered: the Greens led the poll in North - and as a result won sixteen seats there, while Labour led in South - and won twenty four seats there. With another eight seats held in North, Labour held onto Islington, albeit with their majority slashed from 45 seats to 13.

The Liberal Democrats collapsed dramatically once they achieved their goal of running Islington from 2002 to 2010: 38 seats at their peak, then 24 seats in 2006, 13 in 2010 and then zero from 2014 onwards. The only ward in which the Lib Dems remain remotely competitive is St Mary's and St James where they polled 21%. But even that share was ten points worse than they managed in 2022.

Nonetheless, winning one ward and then building from there is how the Alliance started out in Islington. If the party has the activists and the activism to rebuild then that is surely what they must do again.

The Greens need seven more seats to take power in Islington, and for that they need a 1.6% swing. So again we see how close Labour came to losing even in a borough that, on the face of it, they held relatively easily given their national travails. The Greens need to gain Laycock and mop up the seats they missed in the five split wards, though Caledonian offers them the opportunity to pad their majority out a bit.

But there were also four Green councillors elected with majorities of less than 1%, and a 5% swing back to Labour would net them thirteen seats. Highbury, Tollington and Tufnell Park are the Green wards with the largest majorities but even these aren't secure, so it's entirely plausible that a more popular Labour Party nationally could produce a 100% Labour Islington again - an outcome not seen since 1974.

Kensington and Chelsea ▮34 ▮13 ▮3

Although losing having their majority trimmed by two seats, Kensington and Chelsea Conservatives reversed the rot that had led, by 2022, to the vaguest hint that they might be vulnerable in their very safest London borough.

Just one seat changed hands: the Lib Dems taking all three seats in Earl's Court for the first time and after several attempts. I say just one - but by that I mean, of course, from 2022. Not from the outgoing council. There were quite a few changes if that's the benchmark, mostly to Labour's depleted ranks.

Labour has had an extraordinary term, losing seats in all directions - none through by-elections, all through defections. They started off with thirteen, and ended with just seven. Two went Green, two independent, one Conservative and one to Rupert Lowe's far-right Restore Britain...but only after a segue via George Galloway's far-left Workers Party! She stood as an independent in her Dalgarno ward and came last, the voters seemingly eager to give her some time in a dark quiet room to work out what her political outlook is.

The voters of North Kensington duly sorted Labour out, restoring them in all thirteen seats.

But they came perilously close to deciding not to. Golborne - what should be Labour's safest ward - was held by just fifty votes, as the party lost almost thirty percentage points of support. The Greens, who didn't even contest Golborne last time, polled 37% of the vote with defector councillor Mona Adam leading their field.

	2018	2022	2026
Chelsea Riverside	46.1	40.2	38.4
Colville	53.8	60.1	37.6
Dalgarno	70.7	58.2	36.1
Earl's Court	23.7	19.0	8.2
Golborne	79.0	70.1	41.5
Norland	24.9	20.6	14.2
Notting Dale	68.8	71.0	42.9
Pembridge	26.3	27.4	9.7
St Helen's	53.6	51.1	36.2

Decline in Labour support, 2018-2026

Labour's slump was not confined to Golborne: they were down by a similar amount in Notting Dale and by 22 points in Colville and Dalgarno. These are terrible shares for Labour in some of the least affluent, most ethnically diverse wards in the country, with among the highest amounts of council and housing association homes.

And in the more affluent North Kensington ward of St Helens, just north west of the Westway, the Conservatives came 26 votes short of regaining a seat they last won in 2014. Again, this was the Greens pulling Labour down: not a Conservative

revival. But at least Labour avoided their debacle of 2006 when they lost St Charles to the Conservatives; or 2010 when they lost (two seats in) Colville to the Lib Dems.

At the other end of the borough, the only other ward Labour has remotely realistic hopes of winning also went wrong for them, yet again. The old South Stanley used to be Labour's only ward in Chelsea, dominated by the high rise Worlds End and tenement Cremorne estates.

But South Stanley became a larger 3-councillor ward in 2002 gaining very strongly Conservative streets along the Embankment, and the ward further expanded in 2014. And Labour has never won South Stanley's successors. Yet Labour nearly won Chelsea Riverside in 2018, made no further progress in 2022, and then collapsed this year.

It was the same story in Holland ward in the middle of the borough. This is very different territory: there is very little council housing in Holland. Labour surged in 2018 following the Grenfell tragedy and the opening of a lot of new private high rise housing down the borough boundary.

The cabinet member responsible for housing and, therefore, Grenfell represented Holland and that may have played a part in the Tory slump eight years ago, even as he stood down in...well "disgrace" doesn't seem a big enough word for what he was politically accountable for. After a repeat of the 2018 result in 2022, an 18% swing back to the Conservatives this year returned their share to a much more typical 70%.

The Liberal Democrats finally - after six elections of trying - won all three council seats in Earls Court. It's an incredibly difficult task trying to put down electoral roots in a ward like this; much of which is high turnover, pretty young, politically disengaged when they're home - which is seldom - mostly behind entry phones. And then the other side of Earls Court: the Nevern Squares of the world: ultra exclusive and unwaveringly Conservative.

Even after a decade of holding the ward, Lib Dem councillor Linda Wade could barely pull two colleagues over the line: both on 40% of the vote with the Tory vote actually increasing to 34%. It's not a Lib Dem stronghold: it will never be. But it's still a huge accomplishment to win here - and not too long before thousands of new homes get built on the Earls Court exhibition centre site.

Four years ago, the Lib Dems polled well in four other K&C wards: Redcliffe and Courtfield which adjoin Earl's Court, Queen's Gate in South Kensington and Pembridge in Notting Hill. As with Labour's challenge, the Lib Dem vote collapsed in all bar Pembridge this year.

This is an occasional feature of politics in this borough: very rarely the Conservative vote will collapse in a particular ward. Not quite by enough to lose but to suggest that it might happen next time...only for the Tory vote to rebound four years on. It's happened twice now in both Courtfield and Redcliffe.

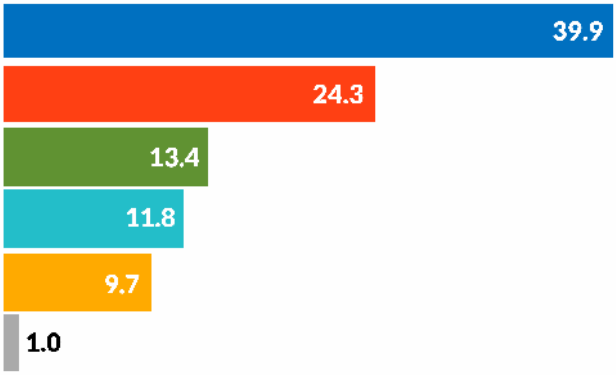
	2018	2022	2026
Courtfield	66.6	50.1	69.0
Holland	49.3	53.1	70.0
Norland	63.0	48.8	58.1
Pembridge	51.3	41.1	50.8
Queen's Gate	68.0	53.5	63.5
Redcliffe	59.9	47.8	59.0

Rebound in Conservative support, 2018-2026

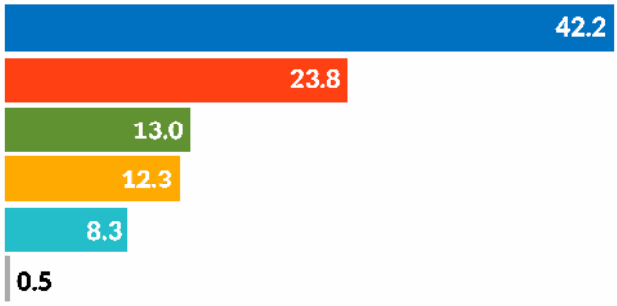
Pembridge has always been just tantalisingly out of reach - nowhere near as safe as the other always-Conservative wards but, usually, it's Labour who have been runners up here.

The recovery of the Conservative vote in what can once again be regarded as their ultra-safe wards is as bad news for Labour as their own losses to the Greens in the north. The results totted-up in both Kensington & Bayswater and Chelsea & Fulham constituencies were grim for the party, not yet two years since Labour gained both seats in the 2024 general election landslide.

Chelsea and Fulham vote shares



Kensington and Bayswater vote shares



The Conservatives didn't do well, at least by historic standards. Their vote was up by 2.5% borough-wide but from a record low of 44%. 46.5% is their second-lowest share ever.

The reason their grip looks much more secure once again is because they fell back most in wards they don't hold while recovering a lot in wards they do. They were aided hugely by the Lib Dem (beyond Earl's Court) and Labour votes

cratering: down nine and thirteen percentage points respectively borough-wide. The net result is that the Tories look stronger: a lot stronger. This feels like the old days have returned.

The result in Chelsea Riverside is an exemplar. Here in this: the only marginal ward in Chelsea, they essentially doubled their majority despite winning only 38% - down a couple of points. Labour, which had been stuck on somewhat over 30% for a while, fell to just 18%; the Lib Dems fell from 27% to 7%.

If the Conservatives, Labour and Lib Dems were all down, where did their votes go? Well, Greens won 15% and Reform 12% - both not having fought Chelsea Riverside in 2022. An independent candidate from the Worlds End estate also won nearly 11%. With this seriously split opposition: five parties each polling less than 20%, the Conservatives' majorities leapt from just over 100 votes last time, to over 500: again despite the Tory vote falling.

Reform did not poll well in Kensington and Chelsea, unsurprisingly. They managed one second place, in Royal Hospital ward. Perhaps they polled relatively well with Chelsea Pensioners? Their highest vote share, a little surprisingly, was in Dalgarno: the borough's far north, but even here it was below 14%.

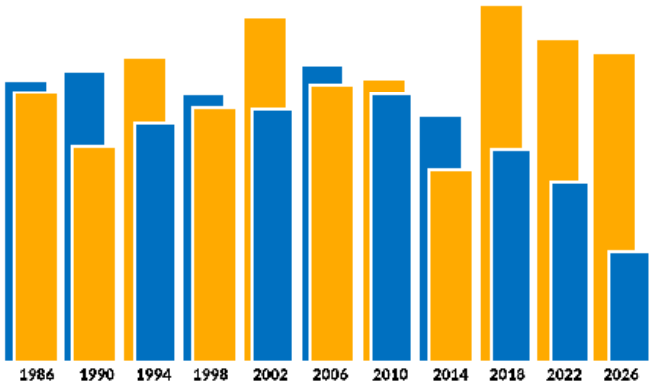
Kingston-upon-Thames ▮34 ▮2 ▮2

For the third election in a row, the Liberal Democrats won a landslide victory on a declining share of the vote. But, as has been noted in other borough reviews, it is not the amount of votes any party wins but the gap between the winner and the runner up that matters.

In 2014, the Conservatives beat the Lib Dems by eight percentage points, albeit with the rather unimpressive vote share of 35%. But in 2018, following the Brexit referendum and the Lib Dem recovery after their disastrous stint in government (which cost local MP Ed Davey his seat for a couple of years), the Conservatives collapsed, losing by twenty points and holding just nine seats. In 2022 the gap was nineteen points but the Tories lost another six seats. And in 2026 the Lib Dems won by twenty-eight points, not gaining any, net. But then they hold all but four of them.

Kingston is literally and figuratively the middle ground of the three Lib Dem boroughs in south west London. It is not as affluent or as progressive as Richmond, but it doesn't quite share the more provincial values of Sutton either. Kingston voted substantially to remain in the EU in 2017 but not as substantially as Richmond while Sutton voted Leave.

There is still a Conservative ward in this borough: there are none left in either Richmond or Sutton. Although the Lib Dems have a landslide majority (or, in the case of Richmond, hold every seat), their hold on Kingston, even today, and even with that huge lead in votes, never feels as secure as it should - certainly not as secure as Richmond.



Liberal Democrat and Conservative vote shares in Kingston-upon-Thames relative to each other, 1986-2026

That the Lib Dems were 28% ahead on only 42.7% of the vote shows that the Conservative problems are largely self-inflicted. To be reduced to just 15% in a borough in which they've polled 74% is an extraordinary collapse, even by London's standards.

Their ten-point drop in support from 2022 fairly neatly aligns with the twelve percent Reform won but so what? In 2014 UKIP won 11% here and hardly any of that vote came from Conservatives (or, if it did, it went circuitously with the Tories winning back votes from the Lib Dems).

Reform again did poorly in Kingston. To clarify, this is not a borough it was going to poll well in generally but there are pockets that you might think they would have at least some game in, notably white working class Chessington and white working class Tolworth - both once Labour strongholds. Bizarrely, Reform stood no candidate in the new ward of St George's and Sunray, which very loosely might be described as Tolworth East; but did waste them in Coombe Hill and Kingston Gate and Tudor: super-affluent wards they'll never have a shot at winning.

Reform didn't do badly in those southern wards: 29% in Chessington South & Malden Rushett, 23% in Hook & Chessington North but only 13% in Tolworth (which, to be fair was the safest Lib Dem ward in 2022, though it should not be), but they weren't close to winning any of them: the Lib Dem bloc was insurmountable.

The Greens had the same issue, just in a quite different set of wards. Their top target, St Marks and Seething Wells (seething because they were tidal and as the Thames ebbed and flowed the pressure made the water froth and churn) remained their best with a 26% share of the vote but more than twenty points behind the Lib Dems. Neighbouring Kingston Town with a fairly substantial student vote gave them 19% of the vote, again about twenty points behind, and they managed to replace Labour as runner-up in working class, relatively ethnically diverse Norbiton, but about twenty

five points behind the Lib Dems there - the ward Ed Davey's wife Emily represents.

The Green Party dilemma in boroughs in which the Lib Dems have established themselves and become dominant is: why risk a switch to a more radical alternative that doesn't offer as much of a change of direction and might let other parties win in that ward? Just as Kingston may in general be too affluent for Reform, it's probably too affluent for the Greens as well.

There is one other factor in Kingston politics - albeit one that, try as it might, struggles mightily to gain traction - and that is KIRG: the Kingston Independent Residents Group. Alongside the Conservatives they have two seats on the council, representing the New Malden ward of Green Lane and St James's. Their two councillors are interesting. One, their leader James Giles, has strong links to both George Galloway's Workers Party and Jeremy Corbyn's Your Party: not labels one would imagine would prove hugely attractive in the outer suburbs.

His grandmother, Yvonne Tracey, is the other councillor for their ward. She is a former postmistress keen on highlighting the post office accounting scandal which Ed Davey was involved with when he was minister responsible for the postal service when the miscounting occurred. Whatever their wider political allegiances they are clearly deeply interested in serving their local neighbourhood on this council.

If the Conservatives keep losing Kingston-upon-Thames by the sorts of margins they have these past three elections there is absolutely no chance of recovery. But Kingston is a lot more swingy than Richmond: it's why I remarked earlier that it doesn't feel anywhere like as secure (even accepting that Richmond too can swing hugely when the mood takes it).

Perhaps it feels less like an archetypal Lib Dem area: an area where, at least until recently, people voted Lib Dem just to defeat the Conservatives rather than with any enthusiasm for the party itself. That may be unfair and Kingston is perfectly content with the political colours its draped in. Regardless, for the Tories to gain the 23 seats needed to regain this borough they need a hefty 15% swing.

Lambeth

29 26 8

Unlike Reform UK, the Greens didn't really brag about the haul of boroughs they were going to take in May. They obviously were going to do very well in Hackney and Lewisham, but MRPs also put them in with a good shot at Lambeth too; so maybe this would be the third rung in their ladder of gains?

It didn't quite work like that, mainly because the electorate split their votes quite chaotically. Lambeth's political map now resembles a coat that Harlequin or Joseph might have worn: a patchwork of Labour red, Green green and Lib Dem yellow. Ten wards elected councillors of different political denominations. But the Greens weren't too far off a majority: three seats, in fact. And with eight Lib Dem councillors they had the chance to remove Labour from power for the first time since 2006.

Lambeth has gone through distinct phases where different parties have formed the opposition to Labour.

Up until the 1990s the Conservatives were the opposition, because pockets of Lambeth are affluent and suburban, and didn't appreciate the left-wing posturing of Labour even as the inner suburbs were being populated with more "progressive" voters. As Brixton, Stockwell and Vauxhall were the Labour strongholds, Streatham and Norwood returned a lot of Conservative councillors.

The Conservatives won a landslide in Lambeth in 1968 and were a sizeable opposition group from the late 1970s to 1990. But then the Lib Dems rapidly overtook the Conservatives and also started stringing a set of northern Labour wards: Bishops, Princes and Oval, together and then expanding into Stockwell and, briefly, Vassall (now Myatt's Fields).

Then, from 2006, Labour advanced rapidly, regaining the northern wards and winning for the first time the Streatham and Norwood hold-outs and notching up landslide council majorities.

But the Greens broke onto the council in 2014, gaining seats in St Leonard's ward - an affluent Streatham-Balham borders ward. In 2018 they added seats in Gipsy Hill and Herne Hill, losing them in 2022. But 2026 was the perfect storm for a party positioned to the left of Labour.

	2018	2022	2026
Brixton Acre Lane	15.1	18.2	37.8
Brixton Rush Common	23.8	24.8	45.3
Clapham East	17.3	20.5	34.4
Knight's Hill	15.3	20.6	43.0
Oval	11.6	17.8	29.5
Stockwell West and Larkhall	13.7	17.3	29.1
Streatham Hill East	16.6	20.3	41.5

Green growth in Lambeth, 2018-2026

The Greens won seven wards outright, mostly in the south of the borough, and have councillors in no fewer than nine wards split with Labour, as far north as Vauxhall. The Lib Dems also started rebuilding a consequential group of councillors, regaining wards they lost to Labour in 2014: Streatham Wells, Streatham Hill West and Thornton (the old Thornton ward), Clapham Common and Abbeville, Stockwell East (where long-time Labour councillor Tina Valcarcel defected to the Lib Dems just before the local elections) and Vauxhall and Waterloo - the old Bishop's ward.

But there were other former Lib Dem wards that this year went Green. Knight's Hill, Streatham Hill East, Vauxhall and Myatt's Fields. Labour hung onto Streatham Common and Vale - the most southerly ward in the borough, on a vote split of Lab 30.6%, LD 27.7% and Grn 26.5%. That ward held two by-elections in 2024 which Labour easily held with 50.1% and 46.8% of the vote: a measure of the party's collapse since the general election.

Labour's performance gets worse the further south you travel. On the Lambeth side of Vauxhall and Camberwell Green constituency Labour polled 34% to the Greens 31% and the Lib Dems' 18% - huge potential for Lib Dem tactical voting there, but to benefit whom?

In Clapham and Brixton Hill - the middle portion of the borough, Labour polled 34% again and the Greens 32% with 15% for the Lib Dems. But on the Lambeth side of Streatham and Croydon North, the Greens polled 34%, Labour 26% and the Lib Dems 26% - Labour was 98 votes ahead of the Lib Dems there. Even adding the more Labour Croydon parts, the Greens polled most votes there (in a constituency that would have been Conservative until 1997).

Those seats the Lib Dems gained may - who knows? - have prevented the Greens winning an overall majority this year: they ended up four seats short. There are an awful lot of wards where the Lib Dems polled a lot of votes but didn't win: Kennington (18%), Oval (19%), Streatham Common & Vale (28%), Streatham Hill East (23%) and Vauxhall (22%). Bar Streatham Common & Vale, these are all wards the Lib Dems held in recent memory so there may well have been some confusion among voters wishing to get Labour out as to the best vessel to achieve that.

But Labour losing power in Lambeth happens so infrequently that when it happens the opposition parties don't then enable them to remain in power, so a Green-Lib Dem accommodation was pretty swiftly arrived at. Between them they have eleven more councillors than Labour.

The Conservatives collapsed in the last ward they had the slightest hope in: Clapham Common and Abbeville, falling from 25.7% to just 10.7%. The only ward the Tories have the faintest pulse in - and it's barely detectable - is Clapham Town where they polled 18.6% (down from 27.5%). But Clapham Town, while it includes some of the very grandest homes in that neighbourhood, also has a long strip of council estates running along the Wandsworth Road within it, and even in strong Conservative years they could only occasionally nick a seat off Labour there. There's no obvious path to a Conservative recovery in Clapham or Lambeth.

There were a couple of by-elections shortly after the May elections, both in Green-held seats. One was because the councillor was ineligible for election to the council and the other had made some comments for which the Greens renounced her and she quit after winning. The Greens held the seat in Clapham Park caused by the disqualification but the Lib Dems gained the Streatham St Leonard's seat, which doesn't change the balance of the council.

The Greens need three more seats for a majority based on the May result, which they'd have won on just 0.3% more of a swing. Labour needs six seats, which they'd get on a 1.2% swing. For all their improvement in 2026 the Lib Dems fared very poorly in most of the borough and they need 24 seats on a 13.6% swing.

Lewisham

40 **14**

Lewisham has long challenged Hackney for the title of best Green London borough. Yes, Hackney elected London's first Green councillors but Lewisham had a period where six Greens served on the council - until this year the largest Green group elected in the capital.

There was very little in it between Hackney and Lewisham for the Greens this year. On the council side they polled 42% in Hackney and 41% in Lewisham. As for the boroughs' mayors, the better known, more established Zoe Garbett in Hackney polled 47% while Liam Stravastava in Lewisham won 40%. They won 42 out of 57 council seats in Hackney and 40 out of 54 in Lewisham - a slightly higher proportion in Lewisham in part because there is no Conservative enclave equivalent to Stamford Hill in Lewisham (any more). Both boroughs have Green voter vaults: Stoke Newington in Hackney and Deptford in Lewisham.

But there are differences too. Hackney Greens won across the board: from Hoxton in the south west to Lea Bridge and Hackney Wick in the east, to Brownswood and Clissold in the north west. In Lewisham a diagonal line can be drawn from Sydenham in the south west to Lee Green in the north east.

The northern side of that line is almost entirely Green: there is just one Labour councillor in Forest Hill and one in Blackheath. South of the line there are Green councillors but Labour is stronger: twelve of their councillors to five Greens. The only ward which declined to elect any Green councillors was the sprawling council estate ward of Downham which runs along the borough boundary with Bromley (and which Bromley went to no end of machinations to stop Downham residents being able to travel from the estate into Plaistow, back in the day).

There are also differences in the political journeys the two boroughs have been on. Hackney. Labour first gained control of Hackney in 1919 (Stoke Newington, then a separate and much smaller borough, didn't crack until 1945). In Lewisham, the smaller borough of Deptford fell to Labour in 1919, but while Lewisham fell in the landslide of 1945, by 1949 it was back in Conservative control. It wasn't until 1962 that Labour began winning Lewisham regularly, but even then strong

Conservative pockets remained: Blackheath, Sydenham, Forest Hill, the posher parts of Catford, Grove Park.

The reason Lewisham has this stronger Conservative history is because the outer parts were developed as exclusive rural retreats for the wealthy of London. Where they haven't been demolished and replaced with 1950s apartment blocks, look at the grand homes along Westwood Hill in Sydenham or on the crazy-steep hillside surrounding the Horniman Museum in Honor Oak. But as Lewisham transitioned from being a rural outpost to an outer suburb to resembling in some parts an inner suburb, so its nature changed.

Some of those big Sydenham mansions were sub-divided and became HMOs. Some were sold off to developers and replaced with mansion blocks. Whole plots of land were cleared or developed fresh as council estates: the Wood Vale estate and the Hazel Grove estate, for example. As the population grew and the demographics changed, the Conservatives were fairly rapidly pushed out of contention.

There then followed a period of Labour hegemony lasting thirty years, from 1994 to 2026. Even in 2006, Labour's last meltdown year, they remained by far the largest party on the council and, in any event, easily retained the mayoralty. But those were the days when opposition to Labour was divided not just between the Conservatives, Lib Dems and Greens but also a variety of far left groups, most notably Socialist Alternative, strong enough to win council seats in Telegraph Hill.

It also included Lewisham People Before Profit (which polled well in 2014), the Trade Union and Socialist Coalition (TUSC), and the Socialist Alliance. In other words, as the parties to the centre and right of Labour faded out, in Lewisham parties to the left of them grew - not enough to win, but enough that they should have been noticed. Hackney did not have this recent history of factional left-wing parties standing.

It's not obvious Labour did pay much attention to their left flank - not when they were easily winning mayoral races and sweeping every seat on the council (which they did in 2014, 2018 and 2022). Again similarly to Hackney, the party appeared to become very complacent, treating voters with a degree of contempt and elections as boring necessities to intersperse their divine right to run Lewisham.

Just as, in Hackney, the elected mayor was forced to quit in disgrace shortly after being returned in 2022, there was a mayoral by-election in Lewisham when Damien Egan was selected to stand for parliament in the Bristol seat of Kingswood in 2024. This wasn't a necessary by-election: it was a Labour activist climbing the greasy pole on the backs of Lewisham voters. And then his successor, Brenda Dacres, did exactly the same, getting appointed to the House of Lords by Keir Starmer. It hardly suggests that Labour had any commitment to Lewisham residents other than when pesky elections intervened and they needed a rubber stamp.

Labour selected Blackheath councillor Amanda De Ryk but she had very little time to establish herself borough-wide and very little to campaign on that Labour hadn't promised before. The Green candidate was Liam Srivastava, a Labour councillor for New Cross who defected, along with Evelyn councillor Hau Yu-Tam (and later fellow Evelyn councillor Rudi Schmidt) in 2024.

There were some crushing results for Labour in May, especially at the Deptford end of the borough. Aside from the 23.85% swing in the mayoral election, Deptford (ward) swung 25.25% to the Greens, New Cross Gate 24.75%, Telegraph Hill 24.8% and Evelyn 22.95%. There were slightly smaller swings in the wards the Greens won a few elections ago: Brockley and Ladywell, but only because the Greens had maintained a much higher vote even when the wards reverted to Labour. And there were wards like Bellingham: arguably the safest Labour ward in Lewisham, where the Greens didn't even stand in 2022, that elected a Green councillor this time round.

These results were more shocking in Lewisham than Hackney because the Greens had been making measurable progress over a couple of decades there, whereas they took Labour out in one massive surge here.

The last ward to declare was Blackheath, which the Liberal Democrats hoped to win. But residents had other ideas despite the Lib Dems' dodgy bar-chart (above). Two Greens and a Labour councillor were eventually elected.

There remain some faint Lib Dem targets in Lewisham. They didn't lose by a huge amount in Blackheath. In neighbouring Lee Green they polled 18%. And in Catford South, they won 22%. But the Greens surged past them in all three. Unless the Greens prove too divisive and incompetent there is unlikely to be any prospect of Liberal Democrat fortunes in Lewisham, especially with the foil of a Labour government for the Greens to play off.

Labour is by no means out of contention in Lewisham: that would have been a leap too far for a borough so firmly in Labour's grip until it suddenly wasn't. They need fourteen seats to win back the council (and with this seeming to be the last term for a mayoralty heading for abolition) and for that

they need a 4% swing. But the days of Labour sweeping clean the electoral map are probably over for good - something that's great for local residents who did not thrive under a one-party state.

Merton 32 19 8 2

There are boroughs that are characterised by deep political polarisation. Croydon, with its Labour (and now partly Green) north and its Conservative south. Labour Hammersmith versus Conservative Fulham. Labour Hayes and Harlington versus the rest of Hillingdon. But Merton, whether viewed politically or economically is among the starkest.

On the one hand: exclusive, affluent if not opulent Wimbledon Village, Wimbledon Park, Wimbledon Hillside and Raynes Park. On the other: Mitcham with its working class neighbourhoods, its council estates and modest terraced streets, its substantial Muslim population and unfashionable suburbs.

Even when the Conservatives were competitive in Mitcham up until the mid 1990s, its was a brasher type of Thatcherite Conservativism compared to the gentile high-Toryism up the hill. From 1990, when Labour won control of Merton for the first time ever, the political divide was clear: Conservative-voting north, Labour-voting south.

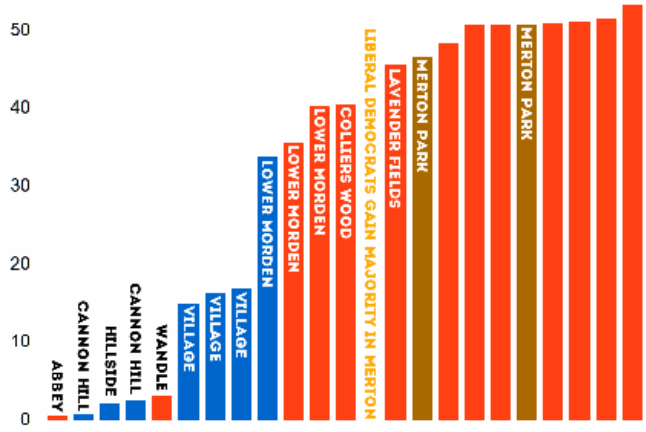
Fast forward to today and things are essentially the same - except that the Liberal Democrats have supplanted the Tories as the party of the north.

The Lib Dems were pretty confident - at least outwardly - of winning control of Merton this year. In part they had to be as Merton was the only London borough they had any chance of gaining. But their confidence was also based on the advance they had made in the borough in the 2022 local elections and 2024 general election, and their expertise in running local election campaigns.

Winning Merton, though, was never a probability for the Lib Dems, at least in one go. They may well have broken the Conservatives across most of Wimbledon (the village and hillside being the last Tory hold-outs), but taking on Labour in their phenomenally safe Mitcham and St Helier redoubts was a different kettle of fish for them.

Mitcham and Morden is not a moribund, complacent Labour Party. Led by its iconoclastic local MP Siobhan McDonagh, they are a campaigning behemoth making sure they are abreast of local concerns. Yes, rapid demographic change has helped turn the constituency from a long-term marginal to a safe Labour seat, but the foundations of turning marginal wards into very safe ones came from ceaseless campaigning.

This is why a Lib Dem gain of Merton was highly unlikely in 2026:



This chart shows the percentage majorities the Lib Dems needed to overturn in 2026 to run the council. It was relatively easy for them to progress a bit: split seats in Abbey, Cannon Hill, Hillside and Wandle wards with small majorities to overcome for example. Village ward is a significant step up in difficulty and then yet another leap to gain Lower Morden and Colliers Wood, Lavender Fields and Merton Park - held for years by a residents' association.

To win those required a swing of over 20% against quite different opponents to a Conservative Party that had been in power and deeply unpopular when the Lib Dems had gained their wards.

As it turned out, even the low-hanging fruit proved difficult to pluck for the Lib Dems. They were able to snatch the last Labour seat in Abbey ward (South Wimbledon), and the two Conservative seats in Cannon Hill (Upper Morden). But the Lib Dems lost their seat in Wandle ward, the area around Wimbledon FC's ground near Tooting, and failed to take Wimbledon Village or the remaining Conservative seat in Hillside.

Meanwhile Labour picked up a seat from the Conservatives in Lower Morden ending election night one seat up, net. Self-evidently, no party can gain control if their opponent that holds the majority actually expands it. So, yes, the Liberal Democrats emerged from the election with (slightly) more councillors, but still ten short of the 29 they need for the narrowest win.

What the Lib Dems did succeed in doing was bringing down that huge swing needed to win Merton in 2030 - from over 20% to a still challenging 8.1%. Crucially, they managed to cut deeply into Labour's majority in Ravensbury, pulling off a 26.5% swing, and making slightly less impressive progress in Colliers Wood, where they split the anti-Labour vote with the Green Party.

It isn't obvious that the Lib Dems can break through in Village ward, where they achieved only a 3.8% swing despite a huge campaigning effort. Likewise, while they probably won

Merton Park by a comfortable amount in the general election, this year the R.A. councillors beat them 55%-10%. In other words it is critical for the Liberal Democrats that they can put into play more than one Labour ward - they need at least two and ideally three or four. But they are far from achieving that.

As a result Hammersmith and Fulham and Merton became Labour's two best London boroughs in 2026. Not Newham or Haringey or Southwark but two boroughs that in relatively recent history were classic swing boroughs which the Conservatives could challenge for. Yet more evidence of that secondary theme of the election: Labour doing least badly in the areas that the Conservatives should be recovering in, and are not.

For all Labour's headline success in defending - indeed increasing - its majority in Merton, dig deeper and things aren't quite so rosy for the party. Their win came off a borough-wide vote share of just 29%, down from 41% in 2022, and their lowest share since 1982 (when they won just 15 seats).

In Wimbledon constituency Labour polled just 15.5% (which the Lib Dems won't welcome: that's far too high a figure than they would want). But in 1994 and 1998 Labour held half the wards in Wimbledon; they won the constituency in 1997 and 2001 (and came close again in 2017). Labour cannot built a secure majority in Merton if it cannot win at least one or two wards on the Wimbledon side.

Labour's majorities fell from phenomenally safe to just plain safe, though in an election where Labour polled above 50% in just six London wards, for four of them to be in Merton (and Cricket Green to be only marginally lower) speaks again to the impact relentless campaigning can have in reinforcing support.

	2018	2022	2026
Colliers Wood	64.5	55.5	43.7
Cricket Green	67.2	66.6	49.5
Figge's Marsh	82.1	72.7	55.9
Graveney	80.8	68.6	52.7
Lavender Fields	69.3	62.2	42.2
Longthornton	78.3	63.8	51.2
Lower Morden	50.7	43.7	33.8
Pollards Hill	82.4	74.1	52.0
Ravensbury	62.5	63.7	38.7
St Helier	63.5	59.7	39.0

Decline in Labour support, 2018-2026

Despite losing a further three seats this year, the Conservatives in surviving with any councillors can be considered a modest cause for self-congratulation. That it should be even contemplated that the Conservatives might not win Wimbledon Village is extraordinary, but then neighbouring Raynes Park is only a few degrees less opulent and the Lib Dems now hold that one pretty comfortably.

Is there a path to a Conservative recovery? Probably not, at least in any significant sense, for the time being. It is of minor note that the Lib Dems failed to advance - may well have plateaued - in Wimbledon (compared to the general election, not the 2022 local elections) but they are now securely embedded in the affluent ex-Tory wards they gained in 2022.

There are three wards the Conservatives didn't lose massively: split Hillside, Cannon Hill and neighbouring Lower Morden. The Lib Dems are their opponents in Hillside and Cannon Hill, Labour in Lower Morden - the only ward in which Reform polled moderately well. They should also be able to do much better in Raynes Park than they managed this year: if a ward is likely to spring back towards them it'll be this one. But none will be easy wins and the fact they now need a massive 15.7% swing to win Merton shows how far, how fast they've fallen away in this borough.

As in other parts of London where the Liberal Democrats are the clearly established "none of the above" party, the Greens could not build themselves into contention. Colliers Wood was the only ward in which they polled consequentially in 2022 but they couldn't improve on that result, falling back 3%. But they're still not out of it there and, given their significant improvement in Tooting Broadway ward, just across the borough boundary, this wider neighbourhood seems to be more likely to bear fruit for the Greens than the Lib Dems.

Reform polled almost 11% in Merton but that isn't remotely enough to be a threat. Either Merton is too ethnically diverse or too affluent for Reform to thrive so its principal influence in a borough like this is to stymie a Conservative recovery.

Why does polarisation matter in politics? Well, if Labour's 29% had been spread more evenly across Merton they may well have lost the borough this year. But by polling just 15.5% in Wimbledon and 41% in Mitcham and Morden Labour pretty much maximised the number of seats it could win on such a low share of the vote.

Newham

26 24 16

Before 2026, Labour had only lost power in Newham once: back in 1968. Even then they held thirty seats to the combined opposition's thirty, so kept power on the mayor's casting vote. 2026 was somewhat similar.

Labour lost control of the council more clearly: there are now 42 non-Labour councillors to 24 Labour ones. But decision-making power rests with a directly-elected mayor and Labour held onto that position - ironically thanks to the decision by the last Conservative government to switch mayoral elections to first past the post: a decision Labour has now reversed (just not in time for these contests). With just 30%

of the vote, Labour's Forhad Hussain would likely have lost a Supplementary Vote election given Newham Independent Mehmood Mirza was only 5,300 votes behind. I think it's more likely that many more of the 19,000 who voted Green would have given Mirza second preferences than Hussain under SV. However, Labour won fair and square according to the system in place: their seventh win since elected mayors were introduced to Newham.

Nonetheless, Labour only winning 30% in any election in Newham is extraordinary. In 2022 Forhad Hussain's deselected predecessor Rokhsana Fiaz won with 56% and in 2018 with 73%. The table of Labour decline in Newham is remarkable:

	2018	2022	2026
Boleyn	73.6	59.8	28.5
Canning Town North	71.8	56.5	25.6
Custom House	70.2	50.2	24.7
East Ham	79.4	63.4	24.5
East Ham South	77.1	64.1	24.6
Forest Gate South	63.0	58.6	26.9
Green Street East	83.9	65.8	31.2
Green Street West	80.5	70.7	28.9
Little Ilford	88.4	53.7	32.0
Wall End	74.8	49.3	20.6

Decline in Labour support, 2018-2026

What made this electoral punishment beating worse for Labour was that they had different opponents in different parts of the borough. Newham Independents did best in heavily Muslim East Ham; the Green Party in more ethnically diverse West Ham. Labour did best - or, rather, least badly, in the south of the borough.

It still takes some getting used to the fact that there is any opposition to Labour in Newham, let alone a combined opposition than is larger. In 1986, 1998, 2010, 2014 and 2018 Labour won every single council seat. In the years in between and since, opposition has tended to mean one, maybe two wards electing someone different - no more than that. Today there are just six wholly Labour wards, eleven wholly non-Labour wards and six splits.

And that wasn't some distortion caused by First Past The Post: Labour not only won more than 50% of the vote borough-wide (until 2026 only three times had they polled below 50%) but ward by ward as well. It was the clear, settled will of the majority of this big bloc of the East End that they wanted Labour in power.

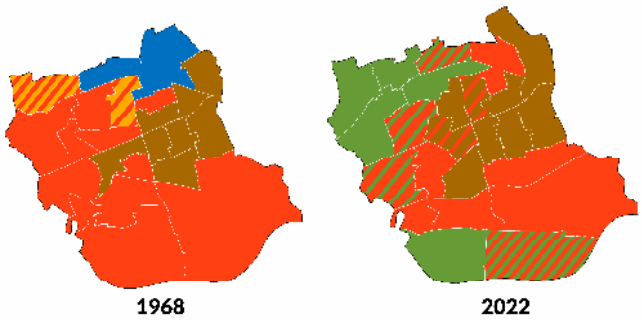
But Labour has been getting into difficulties in Newham. There has been serious push-back over the "regeneration" of council estates where many more private flats have been built and housing densities increased. The wider redevelopment of the borough, especially along the Thames-side and the Stratford Olympic site in the north, has raised complaints about gentrification. The pace of this change has been deeply unsettling for life-long Eastenders. And the council has run into financial difficulties, requiring big Council Tax increases. There were scandals relating to procurement and organised crime in the run-up to the 2012 Olympics which lapped at the council's door. In fact 2012 was around the date that the tide started ebbing from Labour in Newham, but so ensconced in power were they that they paid no heed until their vote was in freefall.

Politically, with no opposition parties represented on the council, Labour became factional and divided. There was the de-selection of long-term mayor (and before that council leader) Sir Robin Wales prior to the 2022 elections and his replacement by Fiaz, far further to the left. But Fiaz promised stuff she couldn't deliver: not least abolishing the mayoralty which required a referendum backing the move. She didn't get it and it left her considerably weaker early into her term. Fiaz was eventually deselected herself.

The Gaza conflict was another critical moment in Labour's collapse in Newham given the huge population of Muslims and others who care passionately about what's happening there. Although they have a far wider platform than just Gaza, Newham Independents were able to form a critical mass because of that conflict and the rampant unhappiness at Labour's response to it.

Mohammed Mirza, the leader of Newham Independents won a by-election in East Ham's Boleyn ward in July 2023, and the party won two further by-elections in the borough as well as picking up a couple of defectors.

It is surely nothing more than a coincidence but compare the 1968 and 2026 maps of Newham. Ignore the Greens for now: just look at where the Residents' Associations won in 1968 and Newham Independents won in 2026 - broadly the same places.



1968 2022

It must be a coincidence because the Newham Independent wins came in some of the most heavily Muslim wards - wards which were nothing like as ethnically diverse back in 1968. Back then this was still a largely white East End. Nonetheless, perhaps there was still a discernible demographic difference between the East Ham side of the borough and West Ham.

There is such a difference beyond ethnicity and religion. East Ham remains largely a neighbourhood of tightly-packed

terraced streets. West Ham has many more high rise council estates, stretching from the docks north to Stratford. Labour evidently did less badly in wards with lots of council estates.

The Greens gained the new Stratford Olympic Park ward in 2022 - a ward carved out of a massively oversized Stratford in that year's boundary review. It also contributed much of the new Maryland ward as well. Stratford Olympic Park is an entirely new neighbourhood and utterly unlike anywhere else in Newham. It has the lowest proportion of home owners and the highest proportion of white British, the lowest proportion of Muslims and the highest proportion of professionals and managers (ABC1s).

Over half the ward comprises private renters living in the blocks built to accommodate the Olympic athletes or developed subsequently. So, in a year - 2022 - when Labour was still backed strongly, it made some sense that the Greens would win a ward that both was new (before the Olympics this was derelict industrial land) and strongly atypical of Newham as a whole.

There was a defection to the Greens from among the Labour councillors too and that was Areeq Chowdhury who would go on to be the Green candidate for mayor of Newham in 2026. Unusually for a mayoral candidate Chowdhury did not defend his council seat in Canning Town, nor stand for another ward so, once he lost the mayoralty he didn't have any role to play.

But fortunately for the Greens they won fourteen new councillors. There is a powerful cluster of Green votes now in Stratford - the party also won both Bow wards in neighbouring Tower Hamlets and both sides form a parliamentary constituency. Across Stratford and Bow, the Greens polled 36%, Labour 26% and Newham Independents/Aspire 21%.

In East Ham Newham Independents led with 31%, Labour won 27% and the Greens 19%. But in West Ham and Beckton Labour just came out ahead, albeit with a terrible 26% of the vote. The Greens were on 23%, Newham Independents on 19% and Reform on 13%.

Do we have a clearer idea of who votes Green after these local elections? Well, the two wards in the far south of Newham are interesting in helping us understand that. Greens won three of the four seats in these wards, but they won one significantly more comfortably than the other.

You might imagine that Royal Victoria and Royal Albert simply split a homogenous neighbourhood - but, in fact, they're very different. Royal Victoria: clearly the much more affluent ward, voted Green 39%, Labour 21%. Royal Albert, with more council housing, many more residents working in manual jobs and without educational qualifications, voted Labour 28%, Green 25% - and also gave Reform 20%, that party's highest share in a borough in which they do not have much electoral appeal.

	Albert	Victoria
Owner occupied	22.4	23.2
Public rented	35.0	17.4
Private rented	38.1	55.1
White British	20.1	20.0
African/Caribbean heritage	24.2	14.7
Muslim	20.1	14.2
ABC1	44.9	71.5
C2DE	55.1	28.5
Degree or higher	46.2	68.6
No qualifications	15.3	7.1

2021 Census comparison between Royal Albert and Royal Victoria wards

Newham like all bar five London boroughs, had their council ward boundaries reviewed prior to the 2022 elections. The Newham review was quite complicated because Labour proposed a dramatically larger council of 72 seats. They ended up with 66. Unlike parliamentary reviews, local government boundary reviews are based upon estimated electorates five years down the line. Council officers had to identify major developments likely to have been completed, in Newham's case, by 2025.

But the Covid pandemic wrecked house-building in London, both by killing the physical construction process for over a year, and changing the economics of these hugely costly development sites because of changes in how we work. Newham is particularly exposed here because there was so much development planned.

By the 2026 council elections the level of electoral "inequality" (simply put: the differences in populations each councillor represents) had warped several Newham wards far beyond usually tolerated levels. Royal Victoria, a 2-councillor ward, already has an electorate meriting three councillors. Both Canning Town North and South are 3-councillor wards that should really only have two councillors. Maryland is almost the same size as Plaistow South but has one fewer councillor.

	Cllrs	Electors	Variance
Canning Town North	3	7,301	- 33.9
Canning Town South	3	6,152	- 44.3
Maryland	2	8,543	+16.1
Plaistow South	3	8,938	- 19.0
Royal Victoria	2	11,112	+51.0
Stratford Olympic Park	2	8,414	+14.3

Electoral Inequality in Newham, May 2026

It is not typical for council boundaries to get reviewed more frequently than 16 to 20 years but Newham's may need fixing after just a couple of elections.

Labour is eight seats from a majority in Newham, and they require a 1.6% swing to grab them. The Greens need eighteen seats and a 3.7% swing. Newham Independents need ten seats and a 2.6% swing. These are finely balanced margins.

Redbridge

43 9 5 5 1

Ilford North MP Wes Streeting was unable to avoid crowing about Labour's achievement in holding onto Redbridge quite easily this year.

After his remarkably close 2024 general election win, where a pro-Gaza independent cut his majority to just 528 votes; and thereafter watching those same Ilford Independents easily win a council by-election in Mayfield ward, Labour supremacy was not guaranteed. In Mayfield Noor Begum won there with 1,080 votes (43%) to Labour's 663 (26%) - a forty-five point fall in Labour's support.

But Labour's hold of Redbridge this year was...how shall we put this...jammy. Their vote cratered from 54% to 29.8%, yet they somehow still managed to hold 68% of the council seats with that derisory vote. In context, in 2006 Labour polled 29.3% but that time won 19 seats.

The difference is the Conservative vote. In 2006 the Tories were more than ten points ahead of Labour. In 2026 they were 13 points behind. And that was an improvement on 2022 when they trailed by 23 points. Yet that 5% swing back didn't net them a single extra seat. They regained full control on Bridge ward which had split two Labour, one Conservative in 2022 but then lost two seats in Fairlop to Labour.

There were marginal Labour seats in the north of the borough in 2022: Aldborough, Barkingside, Churchfields and South Woodford. None of these is completely out of reach after 2026 but not because of any electoral magic conjured by the Conservatives. In South Woodford, where the Tories made a bit of a push, it was the Greens that won two of the seats. The Conservatives were a distant third. In none of these once-Conservative wards could you look at their performance in 2026 and assert that they have a realistic chance of regaining them in 2030.

Other Redbridge by-elections produced considerably better results for Labour, though. In Wanstead Park, in November 2024, caused by the resignation of Cllr Bayo Alaba who had just been elected an MP, Labour retained, with nearly three times the votes won by the Conservatives, a ward that was not all that long ago fairly reliably Tory-voting.

More impressively - and perhaps yet again speaking to the rampant problems Reform has even in their more promising neighbourhood with voters ganging up to defeat them - in Hainault on 1 May 2025 they held the ward by one vote (and over an independent, not Reform (who were 224 behind).

The circumstances of that by-election could not have been worse for Labour as the local councillor, who worked for Wes Streeting, was prosecuted for exposing himself to a girl from his car. In no neighbourhood is such an act likely to prove popular but in working class, isolated Hainault? He was lucky not to be lynched.

It's a little surreal that in Hainault's relatively recent past it has elected councillors from the Conservatives, UKIP and the BNP, yet Reform could not win here - let alone by the landslide you might expect of such a place. In the Hainault by-election Labour's vote was down to below 29% so they held on more by a divided opposition (Independent 28.8%, Reform 21.1, Conservative 14.5%) than Labour popularity. But Labour won, and the principal objective of those contesting elections is to win them.

By-elections don't always forecast how the all-out election (though sometimes they do - see the Sutton profile) will go: in May Reform did win two of the three seats in Hainault and the Greens won Wanstead Park. And the by-elections did all show that Labour's vote would plunge in May.

When it came to these local elections, Ilford and Redbridge Independents it depends on your perspective how well they did. They found 42 candidates to contest a 63 seat council, which is impressive, and most of those stood in wards in which they should have chances (in other words: any ward away from the western edge of the borough or Hainault).

Ilford Independents appeared to be well organised, produced decent publicity and were backed by Jeremy Corbyn: another of London's diaspora of Your Party-aligned community independents.

Where the subjectivity comes in is whether you think them winning nine seats is good (for a first-time contestant) or bad. In fact, it very much looks as though the decision of local Greens to contest the hugely Muslim wards cost Ilford Independents lots more gains.

Why it is that Greens were willing to stand aside for Your Party-aligned candidates in inner London but not here is something only they can explain, but in all these inner Ilford wards listed below the Green and Ilford Independent vote share was larger - often significantly larger - than Labour's.

	Lab%	Ind +Grn %
Clayhall	28.5	33.7
Clementswood	27.1	36.9
Cranbrook	22.9	39.6
Goodmayes	32.1	44.4
Ilford Town	29.7	45.9
Loxford	31.7	36.7
Mayfield	34.2	46.0
Newbury	39.7	42.0
Seven Kings	22.9	35.9
Valentines	31.2	47.4

Decline in Labour support, 2018-2026

And that, in essence, is why Labour held onto Redbridge. Ilford Independents won seats in six of these wards but they won none outright. There are nine Labour councillors that survived in Clementswood, Cranbrook, Ilford Town, Mayfield,

Seven Kings and Valentines who may well not have expected to, especially after that landslide Ilford Independent win in the Mayfield by-election.

It'd probably be quite wrong for Labour to draw the conclusion that their woes in Redbridge are behind them as a result of these wins. On the other hand, many of the Ilford Independent and Green councillors won their seats by tiny margins: six of them by less than 1%. Labour would win every Redbridge seat bar the two Conservatives in still-safe Monkhams on a 6% swing.

When you have ward after ward contested by not five parties, each receiving a fairly decent share, but six (Lab, Con, LD, Grn, Ref and Ilford Independent) plus whatever extras decide to throw their hats in the ring, winning percentages are pulled down so much that the concept of swing almost dissolves. That's because a party could be left comparatively close to the winner despite winning a derisory vote that won't realistically be enlarged enough for them ever to win.

Hence, the Green Party, despite needing a whopping 27 seats to win control of Redbridge could gain them on what I think we'll have to call a "notional" swing of 6.4%. The Conservatives also need 27 gains to win the council - and they need a 7.3% swing. Ilford Independents need 23 seats and a 6.6% swing. But unless and until some of these parties decide to co-operate and try to unite the large non-Labour vote in ward after ward, most likely Labour will continue to divide and rule.

Richmond-upon-Thames 54

When some commentators complained that the Liberal Democrats had swept every single seat in Richmond-upon-Thames this year, an aggrieved representative of that party noted that when Labour had pulled off similar monopolies in Barking, Lewisham or Newham multiple times no-one had made an especial fuss.

Indeed, there was almost no notice taken before the election when the single biggest reason for this Lib Dem landslide - a reason that made this result almost inevitable - came about. That was the ending of a pact the party had made with the Greens for the past two elections: that the Lib Dems would, in effect "gift" the Greens a handful of seats by only fielding two candidates in 3-councillor wards. In return, the Greens would not stand against the Lib Dems anywhere else.

We saw in Hackney that these sort of pacts don't necessarily work as intended when the Greens stood aside for Your Party-adjacent Socialists and all those candidates were trounced. And even in Richmond there is the odd case of the Green not winning when the Lib Dems did. But broadly speaking the pact worked well, even if it can be questioned whether Greens were any sort of opposition to the Lib Dems on most issues. If you can't really find all that much policy difference between the two then, in effect, Richmond has been without meaningful opposition since the Tories lost their last seat here in a 2023 by-election.

Why would the Lib Dems gift seats they'd otherwise have won to another party? It's certainly not the reason political parties were established: to organise to get your own side elected and your opponents' defeated. But the great gain for the Lib Dems was no divided progressive field against the Conservatives, with the risk that a split could let Tories win.

The Lib Dems took the view that, in 2026, the Conservatives were so diminished a force nationally, and especially in liberal, Remain-voting, ultra-affluent boroughs like this, that they could beat them regardless of how many votes they lost to the Greens. And even if that did mean a Conservative or two won - unlikely but not impossible - they'd still face a big Lib Dem majority, and the borough might actually benefit from an opposition that had a more different view of how Richmond should be administered.

In fact this wasn't the first ever Richmond monopoly, or near monopoly. The Conservatives won every seat here in 1968. When the SDP-Liberal Alliance first surged in the 1980s they won 49-3 in 1986 and 48-4 in 1990; and of course 48-5 (Green)-1 (Conservative) in 2022. It's really splitting hairs to say winning every seat is bad but winning all bar three or four is reasonable.

Why is Richmond susceptible to such big swings and distorted results? Critics of First Past The Post will blame the system and, of course, that's the delivery mechanism. But it's not the core reason, which is that Richmond is a homogenous borough: each ward has remarkably similar demographics to one another. There are no pockets of extreme deprivation, at least not so large as to deliver sufficient votes to a different party. So, in other words, if one ward moves substantially towards the Lib Dems (or Conservatives), most - if not all - the others will too. And that creates a wave.

It also means that when the voters want change, big losses occur. In 2002 the Tories gained 25 seats and the borough. In 2006 they lost 21 and the borough. And again in 2018 when a 24-seat Conservative majority became a 24-seat Lib Dem majority, just as the Tories were looking like regaining a firm grip on the borough. Zac Goldsmith's Messiah complex and Brexit saw to that fallacy.

So, the Lib Dems hold 100% of the seats on 49.7% of the vote. Again, a PR supporter would call that egregious - but I call winning almost half the vote a very significant achievement. That degree of strength is something many proportional or more-proportional systems will struggle to iron out. A Supplementary Vote or Alternative Vote system would likely have produced the same outcome. So too would a French-style two round system.

These systems exist to draw votes towards the centre from the extreme (the principle that after voting for the party you like most you then vote for the one you least dislike to stop someone you regard as worse from winning) - but First Past The Post in Richmond does that already, and does it better.

Given that the 2024 general election gave the Lib Dems exactly the proportion of seats their vote merited on top of big wins in the sort of councils they nowadays can win, you might well ask if the party really does want a change of voting system.

In any event, proportional representation is only desirable if your view is that proportionality across a whole elected entity is desirable, or more desirable than any other attribute. Many advocates of a different electoral system want their own representatives elected with over half the votes in their ward or constituency: that is the arguable value of AV and SV.

If you're one of those then 28 councillors won with over 50% and a further 18 won more than 45%. When you get that close to half the votes, no two (or more) round electoral system is going to elect someone else. And I doubt even the remaining Lib Dems who polled somewhat less than 45% would have lost either - to imagine they would you would need to assume that all Green voters in wards the Conservatives came second would switch their vote to the Tories. That is...unlikely, even in posh Richmond.

Although the borough-wide Lib Dem victory was thumping in both seats and votes (the Conservative 18% share was four percentage points worse than 2022, and that was their worst ever performance at the time), the Conservatives do still have some prospects: three if we're minded to be generous.

They came closest in Barnes, losing there by 43% to 32%.Their top candidate there was only 221 votes adrift. The gap is slightly larger in next-door Mortlake and Barnes Common ward: 39-25. Given both parties polled notably lower shares, you can glean that this area is more electorally diverse than Barnes and, indeed, that's correct: Labour has won it in living memory, the ward is sufficiently less affluent to give Reform a slightly less derisory vote and, as one of the wards where a seat was gifted to the Greens, they've had a more visible presence here too.

Their third possibility - and this is more of a Hail Mary pass - is East Sheen where the gap in 2026 was 50.5% to 25.6% but where, again the top Tory candidate was a bit closer and the bottom Lib Dem was somewhat adrift. East Sheen was the ward in those Alliance landslide days of the 1980s that always stuck with the Conservatives and would have contributed mightily to Zac Goldsmith's 20,000 majority only eleven years ago. If the Tories are ever to rebuild in Richmond East Sheen has to be part of the foundation.

So what of the newly-liberated Greens? Obviously they failed to hold their five seats. They also, somewhat bizarrely, were nominated without any party description, though the Green logo did appear on ballot papers. The decision to allow them to do that by election officials is legally questionable but, that aside, it can't have assisted their candidates so the action of their election agent makes no sense.

The five Green gifted wards in 2022 were Fulwell & Hampton Hill, Ham, Petersham & Richmond Riverside, Mortlake & Barnes Common, South Richmond and South Twickenham. There should have been a sixth: they were also gifted Hampton North but voters chose the two Lib Dems plus long-time Tory councillor Godfrey Samuel.

Unhelpfully, three of the five Green councillors retired in 2026 and a fourth swapped wards to stand in their top target, Ham. The problem they had was that this is also one of the safer Lib Dem wards over the long-run; for years the seat of their council leader David Williams. It's also a vast ward containing most of Richmond Park, so the communities are somewhat dispersed around its edges, making it more challenging to canvass and build a cohesive campaign message relevant to the whole area. The Greens lost there by nearly twenty points on average.

There were no stand-out Green performances in all honesty though they came almost as close in South Twickenham as in Ham and then Fulwell and then Mortlake and then South Richmond. You'll notice that these are all gifted wards so the presence of Green councillors, even if they didn't seek re-election, seems to have helped boost the party's support.

But the Greens only won in excess of 20% in four wards this year and, just as electoral gravity applies to the Conservatives it applies to the Greens too: up against much, much larger Lib Dem blocs of votes 25% isn't going to win any seats.

It is worth asking whether the Green strategy since Zack Polanski became leader of pivoting hard to the left and focussing on a more Corbynite radicalism to gain traction in inner London Labour wards harmed the party especially in boroughs like Richmond. You might imagine that an affluent, environmentally conscious, liberal would find considerable appeal in a party championing green issues; much less so one with values that have never been voted for in Richmond or Twickenham.

On the other hand, if voters believe they're getting in their Lib Dem councillors values which come closest to the ones they share since the Conservatives aggressively repudiated them a decade ago, there's no need to consider a different progressive party: they are in their Goldilocks Zone. Not too hot, not too cold.

To win Richmond-upon-Thames requires some of the biggest swings anywhere in London for each of the - well, as they're not represented on the council can they really be called "opposition" parties? The Conservatives, who are probably still reeling at how far, how fast they've fallen, need a 16.8%

swing. The Greens need 18.1%. And Labour - no, don't laugh: they've won as many as fourteen seats in Richmond in the past, albeit decades ago - need 23%.

It's unachievable. That's why those three wards identified above matter to the Conservatives: the first step is to get back on the council and in numbers where a meaningful opposition is possible. The Lib Dem clean sweep, now the borough is aware it can happen, may assist the Tories (and perhaps the Greens too) next time as some of the softer Lib Dem support this year votes tactically to deliver some councillors not wearing yellow rosettes.

Southwark

29 22 12

What would have happened if the Bermondsey by-election had never happened? And why am I asking about a 1983 by-election in 2026? Well, addressing the last question first, Labour lost Southwark for only the second spell ever this year. But they only just fell short: four seats short. And the Lib Dems' took twelve seats.

And so we come back to my first question, because without the Bermondsey by-election there's a good chance the Lib Dems would not have ever won council seats in Southwark - at least not in that part of the borough. The council seats followed Simon Hughes' epic by-election win: this was not a case of the Lib Dems building up a lot of support in council elections and then taking the parliamentary seat. There was no history of liberalism in Bermondsey - at least in the modern era: the last Liberal councillors were defeated in 1928.

That doesn't mean Labour would not have lost in 2026 had the Liberal Democrats never existed here: at least some of the wards the Lib Dems hold may well have chosen to vote Green instead. The Greens only narrowly missed out on Lib Dem-held Surrey Docks and the parties both hold seats in Elephant and Castle: the Lib Dems in St George's; the Greens in Chaucer and North Walworth.

The Lib Dems are just over ten points clear of the Greens on average in North Bermondsey and Borough & Bankside. In other words, without a Lib Dem presence in Southwark the Greens might simply have won a majority in 2026. Or those northern, Thames-side wards might still be allegiant to Labour.

Labour polled the lowest vote share they've ever taken in Southwark this year: 34.4%, which was still their third-highest vote share in London (after Hammersmith & Fulham and Islington). And their 29 seats is one better than their lowest representation in 2002 and 2006. But in 2002 the Lib Dems had 30 seats and the Conservatives 5 (from Dulwich). Only one ward north of Burgess Park had Labour councillors.

Nonetheless, Labour losing its majority in Southwark is an event of scarcity so, when it happens, the likelihood of them staying in power is very low. The people have voted for change, argue the other parties, and change they shall have, for as long as they vote for it. This was even true despite - or perhaps because of - a hefty portion of the Green councillors elected this year being former Labour councillors who defected during the previous term. Principal among them was new Southwark council leader, James McAsh.

Labour had a fairly bumpy 2022-2026 term in power, especially towards the end of that period as a poisonous leadership election split the group apart. This is a borough that, in parts, is changing - perhaps far too rapidly for the comfort of residents. Vast "regeneration" projects that are eradicating some of the largest council estates in the world and replacing them with shiny new private tower blocks.

Labour argues this is replacing poorly built, failing estates that were huge sinks of deprivation with more mixed communities, a wider Council Tax base and better provision all round. Critics - especially to Labour's left - call it social cleansing or gentrification of working class neighbourhoods with nowhere near the number of council homes demolished being replaced.

But Labour is struggling to make the financing of this revolution across the north-centre of the borough work. The consequence: swathes of the half-demolished Aylesbury estate almost entirely decanted but, nearly thirty years after an earlier Labour government turned up to announce its regeneration, still standing. Nonetheless, Faraday ward - in which what's left of the Aylesbury lies - stayed Labour in 2026.

In terms of the might of its Labour vote, at least until 2026, Peckham - the central strip of the borough - was South London's equivalent of Tottenham. But the Greens succeeded in breaking into it, winning seats in Old Kent Road ward, Peckham, St Giles and Nunhead. These wards, especially on the eastern side of the borough, centred on the Millwall Football Ground (which is just in Lewisham), are very similar demographically to New Cross and Deptford: another clump of wards the Greens surged within.

	2018	2022	2026
Camberwell Green	70.5	60.1	43.7
Chaucer	55.2	54.8	30.3
Dulwich Hill	61.7	52.9	39.1
Nunhead and Queen's Road	70.7	53.2	34.4
Old Kent Road	66.3	59.8	34.8
Peckham	77.0	81.0	41.3

Decline in Labour support, 2018-2026

One slightly odd quirk. Until 2026 just one Green had been elected to Southwark council: Jenny Jones, now in the House of Lords, had won South Camberwell ward - roughly the ward

now known as Champion Hill. Yet this ward stayed Labour in 2026 - maybe because it is the ward of former Labour council leader Sarah King, who finished a long way ahead of everyone else there.

It was the election of Cllr King that caused the big bust up in the Labour Group. When Southwark leader Kieron Williams decided to stand down a year before the elections, the Labour Group narrowly elected left-wing Goose Green councillor James McAsh to replace him. After complaints about proxy votes being cast irregularly, Labour re-ran the election and McAsh lost to King.

This provoked three councillors to refuse to vote for King in the full council meeting confirming her election as council leader and the resignation of group chair Kath Whittam from the party.

Over the next month three more councillors left Labour - including McAsh, and Whittam eventually joined too. Two other councillors became independents. Of these, McAsh, Whittam and Reginald Popoola - who represented Nunhead but had to stand in Rye Lane because the Greens had already selected candidates for his old ward - were re-elected in May.

It's not obvious that these councillors' time as councillors and party-switching was of much benefit to the Greens: Whittam came third in Rotherhithe, just 72 votes ahead of Labour, Popoola third in Rye Lane, 48 votes ahead, and McAsh second in Goose Green - the old East Dulwich ward - surely the archetype of somewhere that would elect Green councillors. In fact Goose Green voted Green 39%, Lib Dem 28% and Labour 25%: 92% for "progressive" parties while Reform UK polled just 4% and the Conservatives 3.5%.

Labour's best wards were scattered across the borough but arguably affluent Dulwich was their most successful set, stringing together Dulwich Wood, Dulwich Wood, Champion Hill and one seat in Dulwich Hill. Dulwich Village routinely posts the highest turnouts in London council elections: 61.5% in 2026 (60.5% in 2022), in part because this ward has been marginal and won by three different parties, in part because very affluent wards which aren't so safe as to be hopeless tend to vote in larger proportions than poorer ones irrespective of how competitive they are.

Labour also held a cluster of three wards on the Camberwell-Kennington-Walworth border: Faraday, Camberwell Green and Newington. Labour holding Newington, which was a fairly strong Lib Dem ward when they were dominating the north of the borough, means that three different parties represent Elephant and Castle: Labour here, the Greens in North Walworth and Chaucer and the Lib Dems in St George's.

Finally, Labour sustained losses to both the Lib Dems and Greens in Bermondsey after three elections of prising the Lib Dems out of the north. Rotherhithe split, two Greens and one Labour, the Lib Dems regained a seat in London Bridge and West Bermondsey - the ward that includes The Shard, as well as holding North Bermondsey, Borough and Bankside and Surrey Docks, while Labour held South Bermondsey, where the opposition vote was heavily split between the Lib Dems and Greens.

As for the Bermondsey and Old Southwark constituency, returning to where we began this narrative, the Liberal Democrats emerged from this chaotic election with the most votes: 9,276 or 28.4%. The Greens came second with 8,640 (26.4%) and Labour third with 8,140 (24.9%). We'll have to wait and see whether confrontational and factional Labour MP Neil Coyle - another one who can start a fight in an empty room - has the capacity to attract votes back to him at the general election.

More shockingly the Greens won most votes in Peckham constituency: 13,005 to Labour's 12,371 (the Lib Dems are not competitive here), while the six Dulwich wards which are now split between two other constituencies gave Labour a 9,570 to 8,057 lead over the Greens (37.5% to 31.6%).

As for the outcome on the council, Labour finished two seats short. The two Green councillors with the smallest majorities are in Old Kent Road ward, who won by 31 (0.6%) and in St Giles, with a 65 vote (1.3%) majority. So Labour needs a 0.7% swing to win those two. But they were less than 5% behind in a further twelve Green and Lib Dem seats.

The Greens need ten more council seats to administer Southwark without the Lib Dems, and a 1.8% swing to gain them. One of the ten is held by the Lib Dems. A further eight seats have majorities of less than 5%.

Despite the Lib Dems' slight recovery they have fallen back a long way since their glory days of the 1990s and early 2000s. Even then they couldn't put together enough seats to win a majority: they needed Conservative support to run the borough. Today they need twenty seats for a majority on the council which would require a 12.4% swing.

Sutton

51 2 1 1

Occasionally, a council by-election illuminates the electoral reality that's heading our way in the all-out elections rumbling down the track. One such took place in Sutton's Carshalton South and Clockhouse ward in May last year.

In that seat, in one of Sutton's many split or marginal wards, the Lib Dems gained thirteen percentage points and the Conservatives lost nineteen. The reason for the Tory collapse was the debut of Reform which took about 45% of the 2022 Conservative vote. Meanwhile so-called "progressive" voters wanting to guarantee Reform (and the Conservatives) didn't win, lined up behind the Liberal Democrats, knowing they

were the only centre-left party that could win. Labour fell to just 2.8% and the Greens 2.5% - their 12.7% combined decline almost matching the Lib Dems' gain.

In May, what had happened in that by-election happened across Sutton. The Conservatives lost all twenty of their 2022 council seats and their vote almost exactly halved to just 17% (their previous lowest vote share borough-wide being 25%). Reform went, as they used to say on the Chart Show, "Straight In" at 19%.

Whatever happened on the left of the ledger doesn't really matter with the right-of-centre vote so deeply divided: Lib Dems could have polled 35%, 45% or 55% and they'd have won a near clean sweep. That's because, of course, what matters isn't just vote share - it's the gap between the winner and the closest loser.

In the event, the Lib Dems polled 44%, up from just 37% in 2022. But the gap? In 2022 they were just 3.1% ahead of the Conservatives. In 2026: 26.6% ahead of the Conservatives and 23.8% ahead of Reform. So a Lib Dem council majority of two was transformed into one of 47 (on a 55-seat council).

Anyone who voted Reform cannot complain about the outcome: they put the gesture politics of voting for what they regarded as a purer embodiment of their views than voting out a tired, pretty unpopular and internally divided Lib Dem administration that had run Sutton since 1990.

Except, of course, that they didn't even get what they voted for: the only area Reform had sufficient strength to win was St Helier. Two seats. All they got in those eight wards that had Conservative councillors is that they're now represented by Lib Dems, and with pretty healthy majorities too. Reform voters in Sutton are the Lib Dems' useful idiots.

Sutton's landslide Lib Dem majority now makes this borough look like the other two the party runs in south west London. But it isn't. Just look at the "official" opposition: Reform UK, with their two seat behemoth of a group. Richmond (and slightly less certainly) Kingston would elect Jeremy Corbyn's Your Party before they voted-in a Reform councillor.

It is a bizarre juxtaposition that Sutton voted Leave in the EU referendum yet has a Lib Dem council. But in part, that explains why the Lib Dems won so easily this time around. Progressive voters in Sutton, well aware of the borough's choice to leave the EU, perhaps also aware that the Lib Dems were getting re-elected on diminishing shares of the vote, and more or less the luck of the draw these last two times, had a real fear that Reform could poll very well there - and a real determination to stop that from happening.

So, just as in that Carshalton South by-election, Labour's vote collapsed: 17.1% down to 6.5%. The Greens gained two percentage points of support but their Sutton share of 10.9% was the lowest in London bar Havering's (9.8%). In fact this is a misleading Green figure: they grew only because they contested every ward this time while leaving four wards uncontested in 2022. In the only ward that looked remotely promising for them last time: Carshalton Central, their vote halved, Reform coming second this time.

In part the Greens are weak here for the same reasons they're weak in Richmond and Kingston. The Lib Dems are too well established, there's no reason for a new "none of the above" option, and much of Sutton is simply too prosperous to flock to a party with the stated intent of taking dramatically more in taxes off them.

But Sutton is also not a great Green prospect because its liberalism flows not from the sort of progressivism Richmond is soaked with, but of the pavement politics sort: Lib Dems showing all the way back to the 1970s that local issues matter to them and that they are the best champions to fix the potholes and SEND delays, to get cycle lanes or help boost recycling.

Alongside the two Reform councillors elected in St Helier West, one Labour councillor clung on in Hackbridge (this was the very safest ward in Sutton in 2022 yet the Lib Dem tide reached all this way), and an independent - Nick Mattey - survived in Beddington.

Mattey is an ex-Lib Dem councillor and no love is lost between him and his ex party, which put in a huge effort to regain the ward. They knocked out his two running mates (one of whom, Tim Crowley, switched parties and wards to stand with him, fruitlessly) but Mattey survived nearly 250 votes clear of the defeated Lib Dem.

Labour had a mini breakthrough in 2022 winning Hackbridge and a seat in St Helier East, and coming within reach in St Helier West and Sutton Central: their first seats won in Sutton since 2002. But they went from their best vote share since the 1970s when they were the opposition party in Sutton to their worst ever showing - and were lucky to hold onto that one seat in Hackbridge in the context.

The Conservatives are in a forlorn position now. If Reform was strong in the more working class north of the borough and they were the preferred choice in the south then not only would their prospects transform but Con-Ref might even have a chance of winning the borough despite the huge swings they need in 2030. But Reform split the 2022 Conservative vote equally in every ward making them all hopeless while the right is divided like this.

The smallest Lib Dem majorities over the Conservatives are in Cheam, Belmont and South Carshalton (there that ward is again!) But they're not all that small: high-300s, 400s, 500s. The closest Reform got, beyond St Helier West, was St Helier East, then Hackbridge, then North Cheam and then Beddington (more because that ward's votes are deeply split). All these wards are in the north of the borough and

emanating from that St Helier core - so the foundations of a north-south split are there: they're just very weak and there's no sign of the two right-of-centre parties being the least willing to co-operate.

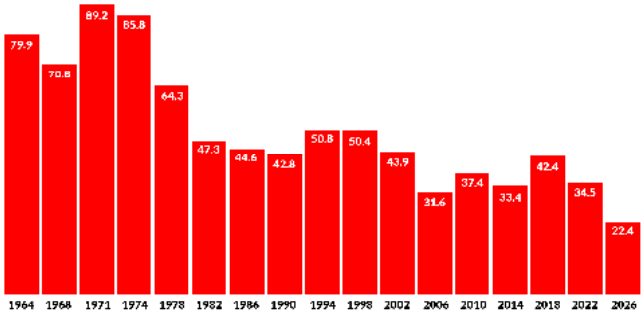
As such, the Liberal Democrats look set to continue ruling Sutton beyond the forty years they'll have reached by 2030.

Tower Hamlets

33 5 5 1 1

In Tower Hamlets, Labour was saved from the collapse it endured throughout London in 2026 - but only because that collapse came four years earlier at the 2022 elections. Then, not only had Labour's directly-elected mayor, John Biggs, been soundly beaten (for the second time) by Lutfur Rahman but his Aspire Party won a majority on the council as well.

Labour has been losing votes pretty much since the borough was founded in 1964. Early on this was an inevitability, both because Labour was absolutely dominant and so the only way was down; but also because it was dominant because hardly anyone else contested the borough. As politics (slowly) opened up, with Liberals initially making inroads, then others joining the fray - until today Tower Hamlets council seats are among the most highly contested around - the very fact Labour had credible challengers would lower its support base.



Labour declined rapidly from the moment the Liberals began contesting the borough from 1978, but their real problems have been around since the dawn of the 21st century. Even when the Alliance/Lib Dems were challenging them for control in the 1990s, Labour was still polling over 40%. It is only since 2002 that their vote began slipping below 40% and just once since then has it ever climbed back above.

That more problematic slippage coincides with the emergence of ethnic and religious driven politics. The means of delivering opposition to Labour has morphed: first it was George Galloway's Respect Coalition, then a succession of parties in support of Lutfur Rahman: Tower Hamlets First, Peoples Alliance of Tower Hamlets and finally Aspire.

Labour has not come close to finding a way to combat Lutfur's popularity and populism, often finding themselves on the wrong side to the voters when they've tried twice, for example, to block and then scrap the directly elected mayoralty. The voters stood with Lutfur against Labour, especially once he returned to power having been disqualified from office for five years, and that is not a good place for the party to find itself.

HOW AN ELECTORAL FRAUDSTER BECAME MAYOR (AGAIN)

Special Report

Lutfur Rahman was removed as mayor of Tower Hamlets in 2015 after being found guilty of vote-rigging and bribery — now he has just won his third term. *By Sarah Haque*

Labour's vote didn't just decline; it became inherently unstable, surging then meeting new opposition, believing it had been overcome only to find it return stronger.

In 2022 Labour lost 22 seats to Aspire and one, in Bow, to the Greens. But that still left nineteen Labour councillors in Tower Hamlets: either a decent basis for a recovery in 2026 or a further bunch of targets to be picked off. Aspire didn't gain any extra votes in 2026: in fact they lost six percentage points, falling below 30% of the vote. But Labour lost twice as much and with at least ten of their councillors defending majorities of less than 6%, further losses were inevitable.

In fact Labour did much worse. To the Greens they lost their remaining seat in Bow West and all three seats in Bow East, which was their safest ward with majorities of over 1,400. The party then lost three of the wards it split with Aspire in 2022: Bethnal Green East, Whitechapel and Stepney Green.

If the Conservatives were recovering in London then Labour should have been at risk of losing its seat in split Island Gardens: the tip of the Isle of Dogs loop in the Thames. But instead Conservative Peter Golds survived and Labour's seat there too fell to Aspire. Finally, Labour lost two wards it won all the seats in last time: Mile End and St Dunstan's, also to Aspire.

That left Labour with two councillors in St Katherine's and Wapping, one in Weavers, one in Limehouse and one in Bromley South, down a further 14 on their dreadful 2022 performance. It would have been worse if the Tories had been stronger: St Katherine's and Limehouse are both wards that have voted Conservative in the past - not to mention Canary Wharf (the old Millwall) or Blackwall and Cubitt Town which Aspire now hold, a little incongruously. Given how divided votes are in Tower Hamlets it wouldn't have taken much of a Conservative uplift to be competitive - but they couldn't even manage that.

The Liberal Democrats regained a foothold on the council by winning a seat in Shadwell, the ward with the highest Bangladeshi population in the borough (53%). Their winner was a special case however: Rabina Khan who fought the mayoral contest for Tower Hamlets First in 2018 while Lutfur was disqualified. She won Shadwell with just 28% of the vote, a fall of eight points since she contested the ward in 2022.

In just two wards: Poplar and Stepney Green did any party (Aspire, of course) poll more than 40%, and they only exceeded 30% in another eight. Labour just crept past 30% in Limehouse and St Katherine's wards and polled less than 20% in eight.

Labour is well adrift now in Tower Hamlets: less in votes (they're less than seven points behind Aspire) than in seats. They need eighteen gains to retake control of the council in 2030 - which if the Labour government holds true to its decision to abolish council directly elected mayors will be all that matters - for which they need a swing of 5.7%.

On paper it's slightly easier for the Greens to gain the eighteen seats they too need to win: they require a 5.4% swing. But when seats are decided on such low percentage votes, some of the gaps between what the Greens polled in 2026 and what they need to win are unlikely to be realised whilst Aspire commands the fierce allegiance of the largest ethnic bloc in Tower Hamlets: Bangladeshi Muslims.

Waltham Forest

31 15 14

All the narrative preceding the elections about Green gains focussed, understandably, on Hackney and Lewisham - and maybe Lambeth and Haringey. These are all boroughs in which the Greens had some history. Meanwhile, a borough in North East London in which the Greens had never won a seat was undergoing a quiet revolution.

The Greens surged to power in Waltham Forest, winning a majority of 2 seats. Ignominy for Labour saw them barely win second place (in seat terms) ahead of the Conservatives, who held onto their crumbling northern base and booting Labour out of the sole seat it held in Valley ward.

Was a Green win such a surprise though? Perhaps winning a majority on the council was but the fact the Greens would do well in this borough, that runs from the edge of Buckhurst Hill to the edges of Forest Gate - very much semi-rural to inner-urban, was almost assured.

That's because Waltham Forest contains big proportions of some of the key demographic groups the Greens have been attracting over recent months. In some ways Waltham Forest is like Haringey across the river Lee, except for two things. First, it has slightly less (but still abundant) poverty than the Tottenham side of Haringey; second it has gentrified neighbourhoods not too dissimilar to the Hornsey side of Haringey - but without an embedded Lib Dem presence. Not any more, anyway.

Check out any "best places to live in London" guides and the somewhat weird people who write them will usually put Walthamstow "village" near the top. Some have also started including Leyton "village" in the list too. No, we really will not start to call the place "Awesomestow", thank you.

These aren't just neighbourhoods that have gentrified almost beyond recognition; they have become populated by the sort of young professionals that object to the presence of a Gails bakery (normally the sign an area has made it, at least according to those London guide writers) because its owners in some abstract way apparently support Israel.

When we talk about white flight in London, that concept usually means white Londoners departing the capital. In Waltham Forest it means the opposite: this is the only borough in London in which the white British population increased at the last census.

So, bizarrely, in Waltham Forest you can probably easily find young professionals recently moved into the neighbourhood complaining about the gentrification they're complicit in. It is, perhaps, the end of a stream of nonsensical ideology from a left that seems to hate itself but make a political virtue of that self-loathing.

Waltham Forest south of the North Circular is a massive sprawl of residential terraced streets stretching across Walthamstow and into Leyton and Leytonstone, though with added council estates at the Leyton end. There are tens of thousands of the sort of two-up homes, far less expensive than the same might cost in Mile End or Canonbury. And Waltham Forest's gentrification is probably nowhere close to being over - more likely it might be where Fulham's was in 1980 or Battersea's in 1990.

While the types moving into Fulham and Battersea voted right, those moving into Waltham Forest vote left. At the 2017 general election Stella Creasey - the epitome of the woke professional virtue-signalling types moving into the borough, won a majority of over 32,000, and it stayed over

30,000 in 2019. This in a constituency the Conservatives managed to win in 1987, if only just. In these council elections the Greens polled the most votes in the wards comprising Walthamstow.

But that is just one section of the electorate that has swung heftily from Labour to the Greens. There are also the private renters and the public housing renters, plus ethnically diverse Waltham Forest. Seven wards have private renters comprising more than a third of households; in six wards council tenants comprise more than a quarter of the population; thirteen have a Muslim population of more than a fifth. The Greens now represent most of these wards (and, of course, some of the wards fit in more than one category).

All the Green councillors won in wards that were previously Labour: they made no impact whatsoever in the Conservative north. In part that's because they stood aside in a couple of the Chingford wards in favour of Independents who were hoping their non-party status could finally wrench these seats from the Tories. They didn't. But even where the Greens did stand, they lost by substantial amounts. Chingford stayed Conservative, and Chingford delivers a bloc of fourteen council seats.

In Hatch Lane and Highams Park North, all three Conservative councillors defected to Reform prior to the election and were rewarded with a fourth placed finish, with about 14% to the Conservatives' 38%. Reform is perhaps a more likely challenger to the Conservatives in Norman Tebbit's Chingford than the Greens but they got nowhere too: 15% in Valley ward was their high point. If Reform can't win at the Essex borders end of Waltham Forest they certainly aren't going to poll well at the Haringey-Hackney-Newham end. 6% was their vote across Walthamstow; 8% in Leyton.

No, as in Hackney and Lewisham and Haringey, most of Waltham Forest was a straight fight between the Greens and Labour. In terms of votes, things were quite close: 30,830 people voted Green; 27,769 voted Labour. That's reflected in there being five split wards. In Walthamstow there was an east-west split with Labour doing better in the east. But the western side of Walthamstow is larger and the Greens won seats in all five wards on this side. Leyton was even worse for Labour, yielding them just two council seats. Waltham Forest's Lea Bridge ward went Green as did Hackney's. Leyton and Leytonstone. Cann Hall and Cathall.

And on the same sort of huge swings: Forest 32%, Leyton 31%, Cann Hall 27.55, High Street 23.55%. In Lea Bridge the Greens didn't even stand in 2022 but polled 40% this time.

Labour may rue the oddities of the electoral system. They won 15 seats with 32%. In 2006 they won 26 with 30% and the same number in 1982 with 31%. In part the explanation is that Labour faced a more divided opposition in earlier decades; in part the Lib Dems had a very poor distribution of votes in Waltham Forest; winning just 19 seats in 2006 with just 1% less support than Labour. But they can at least take comfort in this year not rivalling 1968 when they held just four seats with 30% of the vote (the Tories polled 55% that year - hence the near wipe-out.

The Liberal Democrats have not been a factor in Waltham Forest since 2014 when they lost their last six seats. But they were, throughout the 1980s and 1990s a serious rival to Labour, winning as much as 31% in 1994. With Conservative backing they were able to run the council in the minority for two terms: 2002 to 2010 but, once Labour was out of government, local support surged to them as a clear signal of opposition to the Conservatives nationally. The Lib Dems polled just 5.4% borough-wide in 2026 - and the only remarkable thing about that dismal share is that it isn't close to being their lowest vote in London this year.

Although the Greens have an overall majority of just two, their lead over both other parties represented on the council is much larger. Labour needs sixteen seats to regain a majority and they require a 6.6% swing to take them. Just because the Tories have only one councillor fewer than Labour does not mean they need a similar swing - because they have virtually no support beyond the wards they hold. Their seventeen seats would require an 18.5% swing to win, and that ain't gonna happen.

Wandsworth

29 **28** **1**

Election night in Wandsworth was the definition of a roller-coaster. Were the Conservatives about to regain their long-time flagship borough or could Labour hold on for a second consecutive term?

There were counter-indications throughout the count. Labour held their sole seat in East Putney: a ward was arguably their most implausible gain in 2022, then lost one in Battersea Park drawn, they expected, to be safe for them. 54-year councillor Tony Belton clung on, but only by 79 votes - though he's survived close results before.

In the end, though, the Conservatives won one single seat more and with it, Labour's term of office was drawn to a close. For the third time in borough history: 1986 and 2018 being the others, Labour won more votes while the Tories won more seats borough-wide.

For the first time since the early 1980s (if lone independent Malcolm Grimston will forgive me so describing elections beyond his own ward), this was not a straightforward two-party fight. MRP polls since Zack Polanski became Green Party leader in the autumn of 2025 consistently showed his party performing comparatively strongly in Tooting. Some absurd forecasts by the likes of "Bombe" - they bombed - even suggested a Green majority in Wandsworth. Not quite.

And the Lib Dems: in Wandsworth, like Hammersmith & Fulham, a party of travelling salespersons, without a seat on the council since they lost Earlsfield in 1986. Would they alight upon a ward they could actually win rather than flatter to deceive and then collapse? No: though they did almost pull off the shock of the night by running the Tories close in Thamesfield, once one of the safest Conservative wards.

When West Hill, in almost an exact re-run of the 2022 result, finally declared - again choosing one independent, one Labour and one Conservative councillor, the Tories had fallen one seat short of recapturing Wandsworth. 29 seats to Labour's 28 and independent Malcolm Grimston. Not quite their success in Westminster but as near as dammit: they will run this borough for the next four years, by-elections and defections notwithstanding.

The Conservatives gained seven seats: two in West Putney (ignoring the by-election); two in St Mary's, one in Battersea Park, one in Wandle and one in Trinity. They retained their sole seat in Wandsworth Town, while Labour did the same in Balham and East Putney.

79 votes extra for the Conservatives in Battersea Park, or 64 extra for Labour in West Hill and St Mary's combined would give either side a majority. By such margins are local elections occasionally determined.

Mathematically, of course, Malcolm Grimston holds the balance of power. But, as when Labour lost the 2010 general election but the Tories did not win it, there is realistically only one way this can work.

For Labour to have retained power, they would firstly need to keep the mayoralty - and for that they'd have needed Grimston's support. Then they'd need every one of their councillors present at every vote; they would also need the mayor voting on every division, and then they'd need the mayor's casting vote to win.

That's theoretically doable; but for every vote at every meeting for four years? It'd make for a miserable time - and there's no reasonable expectation that the independent would align with Labour most of the time, let alone at all times. That fate was made probable by Labour changing council standing orders not long before the election to prevent councillors outside of groups (i.e. Grimston) from being able to move motions and exert any influence in other ways in meetings: a spectacular and petty own-goal.

The Conservatives, however, may rue regaining power in Wandsworth. The Labour government has already passed its so-called "fair funding" legislation, massively reducing central grant funding of some boroughs including this one, with the expectation that it will compel a significant rise in Council Tax.

Labour managed to avoid rises this year by, effectively, wiping out the council's reserves. So the Tories again inherit, as George Osborn did nationally in 2010, a note left by their outgoing Labour finance supremo telling them there is no money, plus considerable Labour council borrowing to repay and all the other upward pressures on council finances.

For a party whose raison d'etre in Wandsworth is low Council Tax, this is a baleful inheritance. They will need an exceptional communications strategy to make the electorate blame Labour not them; or else a financial magic trick I'm not sure has been invented.

Let's turn away from what the newcomers like to call the "legacy" parties and look at what almost was.

Similar to their strategy in other boroughs, the Greens almost anti-intuitively chose Labour's safest ward: Tooting Broadway, to target. This was not only odd based on the 2022 result but, in two by-elections since the last election, Labour had increased its vote share to two thirds. Arguably, Furzedown, Trinity and South Balham wards: all more affluent and more liberal/environmentally aware, offered a better Green prospect than Tooting Broadway.

But Tooting Broadway did have attributes that made it potentially good for the Greens. It has a very high proportion of private renters. It is quite ethnically diverse. The fact that it is not affluent is helpful in the sense that it is full of cost-of-living strugglers. It has high numbers of young graduates (a.k.a. ex-students) who are motivated by a wide-spectrum left-wing social and economic agenda. Labour locally has tried to lean as far as it can in their direction but it could never out-radicalise a party free of all constraints of elected office and limitations of political reality.

The largest chunk of Tooting Broadway came from the old Graveney ward, which for years was the best Lib Dem prospect in Wandsworth. Does an area with a history of political non-conformism ever shake it off, even three elections on from the Lib Dems' collapse in Graveney? Sure, the insurgent this time was different: but it's the instinct to rebel against the dominant party that perhaps gets imprinted on a ward.

Incidentally, the last Lib Dem candidate who came close to winning Graveney, Stephanie Dearden, stood this year in Tooting Broadway for Reform UK.

Anyhow, the Green targeting, questionable as it was, almost worked. Their vote in Tooting Broadway more than doubled: from 16% in 2022 to 35% this year. Labour crashed from 60% to 42% and, in the third seat Rex Osborn held on by just 51 votes (1%). If they'd targeted Furzedown, or Shaftesbury and Queenstown - both wards in which they'd have started from a (slightly) higher base - might they have councillors today?

The Greens performed reasonably well in these aforementioned wards: 26% in Furzedown and in Shaftesbury & Queenstown; 29% in Tooting Bec, 23% in Falconbrook (where Labour council leader Simon Hogg lost more than twenty percentage points of support in a ward with loads of new high-rise homes being built) and 21% in Nine Elms. If Wandsworth was not still, principally a two-party borough; if other parties were more competitive and the big two had lower vote shares in the right places, the Greens could perhaps have won with those sorts of numbers. But it is and they didn't.

The Lib Dems almost pulled off an extraordinary win in Thamesfield: Putney's riverside ward. Thamesfield has been Conservative since 1978, it's the ward Tory council leaders Paul Beresford and Eddie Lister represented and, only going back eight years, they won over half the votes here.

This is largely incredibly affluent but pretty liberal Putney, stretching from the huge villas ringing Putney Common in the west to the new high-rise neighbourhood east of Wandsworth Park. It's also fairly politically engaged and the current local issue to antagonise its residents has been changes TfL and the Labour council made to the road junction at Putney Bridge. This resulted in severe traffic jams along Putney High Street, Lower Richmond Road and Putney Bridge Road. Is that what drove votes towards the Lib Dems in Thamesfield?

Maybe, and perhaps this was the straw that almost broke the camel's back after the cumulative disappointments of the Conservatives, nationally and locally. Brexit, the Johnson and Truss era did not sit well with Thamesfield voters. Yet the Conservatives survived comfortably during those turbulent times so why now would they struggle? The Lib Dems surged from 14% to 30% and the Tories slid from 43% to 34%. The closest Tory councillor to defeat survived by just fifty (0.7%).

The Lib Dems also came fairly close in Southfields, something they seem to do every few election cycles without ever winning. The last time was 2006 though this iteration of the ward should be somewhat better for the Lib Dems than the old, much larger, Southfields with its council estates in the north. The party hoped that their huge advances in neighbouring Wimbledon might boost them this side of the borough boundary - and maybe it did, but not by enough.

There is a big difference between Merton's Wimbledon Park ward - now Lib Dem, and Southfields. That is that Labour were never strong in much of the former, which covers swathes of extremely affluent Wimbledon hillside around the tennis club. They are much stronger here, in the Southfields "grid" and the long streets leading to Earlsfield. Even in a grim year for Labour - and the same thing happened in 2006 - they have a core vote the Lib Dems haven't found a way of cracking. Outcome: the Tories won a larger majority this year than in 2022 over Labour.

Some forecasting sites suggested the Lib Dems' best chance in Wandsworth was the still emerging new ward of Nine Elms, presumably based on a fairly close second place in its inaugural contest four years ago. Back then, Nine Elms had hardly any electors: just 2,847, so most of the voters this time were new, making forecasting here even more of a fool's errand than in more settled neighbourhoods.

In the event the Lib Dems collapsed in Nine Elms - partly, I suspect, because they knew this wasn't where they should target their efforts this year, partly because it is so hard a ward to campaign in: virtually every property is behind controlled entry and concierge systems. This time the Greens became the principal opposition, but the Conservatives effectively doubled their majority. This despite one of their outgoing councillors defecting to Reform UK. He stood and came seventh with 9.5%.

So let's talk about Reform. Hardly unexpectedly, given the borough's demographics, they polled very weakly here. Their highest share was just 14% in Roehampton; the ward in which Leave probably won its highest (though still losing) share in the EU referendum. Nowhere else did Reform exceed 10%.

But this poor showing was still more than enough to deny the Conservatives a majority in likelihood. The Reform vote exceeded Labour's majorities in Balham, Battersea Park, East Putney, Trinity, Wandle and West Hill and, bolted onto the Conservative share would have maybe made Roehampton and Shaftesbury & Queenstown close, even accepting that far from all Reform voters are former Conservatives.

When Malcolm Grimston resigned from the Conservative group in 2014 after representing West Hill as a Tory for twenty years, he must have at least harboured doubts that an independent could win: none had done so before. In 2018 he won with over 4,000 votes - an extraordinary achievement, especially in that large, diffuse ward; and essentially achieved identikit results in 2022 and 2026.

Now, from being just one of 58 councillors, he holds the balance of power. If this were to be his last term as a councillor, it's a mighty fine way to conclude his service to the borough.

Westminster 32 22

The Conservatives see the City of Westminster as a local authority they should run almost as of right: the heart of government and faith, with responsibility for some of London's most prestigious neighbourhoods: Belgravia, Knightsbridge, Mayfair, St James's, Victoria, Pimlico, Marylebone and St John's Wood to list just a few.

In 2026, they regained power after a four year Labour interregnum they will hope was anomalous. But, while they are back with a majority large enough to administer for four

years, the Conservative performance was on a par with that of Wandsworth - it's just that a handful more seats landed on their side of the line.

The Conservatives had been favourites to regain Westminster for a while. Labour had the misfortune of having to defend seats in two of its most marginal wards: Vincent Square (following the death of its sole councillor) and West End, following the election of one of their three councillors as MP for Bournemouth West at the 2024 general election. They lost both - not massively, but clearly enough, despite the entrance of Reform not exactly helping Conservative prospects. Labour lost a second West End councillor, Paul Fisher, who defected to the Conservatives and was re-elected under his new colours there this year. So Labour's 2022 majority of eight seats had been whittled away to just two by the time of the election.

The Conservatives didn't have things all their own way though. In 2025 Lancaster Gate councillor Layla Cunningham defected to Reform, becoming the party's first London councillor (they'd have to wait a few more months to get their first councillor elected under their banner, in Bromley Common). She proved quite a media magnet and was to rapidly go on to be Reform's London mayoral candidate for the 2028 election. Later, Abbey Road Conservative councillor Alan Mendoza crossed the council chamber to form a Reform group in Westminster. Cunningham did not defend her seat, Mendoza did but lost by over 700 votes.

The Green Party, meanwhile, decided to fight Labour hard in its very safest enclave of North Paddington: that "near-Kamizake" strategy I described in the introduction. In 2024, there had been a by-election in Harrow Road ward - the middle of the three Labour fortresses around and north of the Westway: another caused by the election of a councillor to parliament (this time Tim Roca, MP for Macclesfield).

In that election, not long after the general election, Labour's vote share fell almost thirty points. They still won, easily, but Labour does not normally poll below 50% in Harrow Road - this time they won just 44%. The Greens, who hadn't even stood here in 2022, took 21% and George Galloway's Workers Party a further 14%. Combined, their vote was just 112 votes behind Labour's.

Harrow Road became the top Green target in Westminster in 2026, though they also invested as much effort as they could muster in the adjoining wards of Queen's Park and Westbourne. All three of these wards have never been remotely winnable by anyone other than Labour, which won with shares of 73%, 76% and 69% in 2022. But the Greens were banking on a huge collapse in Labour support in ethnically diverse, deeply deprived wards with vast amounts of council and housing association homes in them. And they campaigned hard.

As the headline result shows, they didn't win any seats. But that doesn't mean their effort was futile because they only missed out in Harrow Road by 16 votes; in Queen's Park by 142 and in Westbourne by 178. They were 215 adrift in the fourth northern Labour fiefdom: the Marylebone ward of Church Street. If the Greens can bed-in their huge advance in votes and members over the long run, and convert even more of their membership into campaigners and candidates then these are no longer wards on which Labour can bank. Or, alternatively, the Labour majorities will rebound in 2030, either because the party is back in opposition nationally or Andy Burnham has rebuilt their support in inner city London.

But what was the consequence elsewhere in Westminster of Labour being forced to campaign in wards it's largely taken for granted for decades? If you take these results as the answer, it was seats lost in Labour - Conservative marginals: in Hyde Park, Lancaster Gate, Bayswater, Little Venice and West End (already counting their loss of Vincent Square).

But it's a little more complicated because there was not a wholesale abandonment of Labour in these wards where it was the Tories, not the Greens, that the party was facing. That Labour could retain a seat in Hyde Park ward, and retain councillors in Lancaster Gate and Bayswater demonstrates that. These are incredibly affluent - in some corners opulent - wards that were, until 2018, comfortably to safely Conservative.

The Conservative recapture of Bayswater was somewhat surprising given how easily Labour gained it in 2022, but even here look at what happened: Labour down over twenty percentage points, the Conservatives only up four. The Greens polled 14% and Reform eight. In Lancaster Gate, the Tory vote fell more than Labour's, keeping the ward split: 2 Labour, 1 Conservative. The Tory vote also fell in Hyde Park, though here by nowhere near as much as Labour's. Still, Labour kept hold of one seat by 40 votes.

In other words, the Conservatives sputtered and wheezed to victory behind the wheel of a Reliant Robin, not sweeping back into City Hall in a gleaming Rolls Royce. Back in power more because of the votes Labour lost to its left than to any enthusiasm for their own cause. Had it been otherwise, they'd surely have gained Pimlico South (the Churchill Gardens and Tachbrook estates plus Dolphin Square). They lost here by 42 votes. They'd win West End which, yes, includes Labour-leaning Soho and Fitzrovia but is, at its core, Mayfair (remember: the poshest square in Monopoly!) with more than 40%.

One of the themes of these elections was the Conservatives hunkering down in the wards they hung onto in 2022. But in Westminster that was less true: the Tory vote fell everywhere: by more than eleven points even in Knightsbridge and Belgravia (following a near-20 point fall there in 2022). They polled 85% in this ward as recently as 2006: this year 50%. The Conservative vote fell everywhere: it's just that Labour fell by more.

Of course, the reason the Tories slipped even further (eight percentage points further) from their dismal 2022 performance was the debut of Reform UK, which polled 11% - slightly better than they managed in Camden, Wandsworth or Kensington & Chelsea. But, even assuming - which we cannot - that all Reform voters are second-choice Conservatives, we still get a glimpse of the swing away from the right in Westminster. Combined, these two parties' votes amount to 44.5%.

That's only higher than Conservative shares since 2010: it's substantially lower than at any election bar 1986 prior to that year. Labour's vote, in comparison is not historically low and, if conducting the same dodgy sum on the left, combining their share with that of the Greens, we see just how finely balanced Westminster now is as an electoral entity: 43.4 for the left, 44.5 for the right.

The other problem the Conservatives have is that the electorate in Westminster continues to evaporate - and it's more of their vote that is disappearing. The only wards that grew between 2022 and 2026 were Labour-held, and then by relatively small amounts. Bayswater lost nearly 600 voters, Knightsbridge & Belgravia, and West End 400, the two Pimlico wards 300 apiece. These are not vast falls individually but they amount to thousands across a borough: over 3,000 in Westminster in just four years.

Hyde Park ward is more than 20% smaller than the borough average (presumably because development of the huge Paddington Basin housing scheme stalled during Covid and momentum hasn't been recovered); Queen's Park is 16% larger. This isn't yet such egregious electoral inequality as to merit a boundary review - it's simply that there is a seemingly inexorable trajectory that will be to the detriment of the Tories when such a review happens.

The city has been losing electors for years, even as London has grown at pace. For the Conservatives, whose win was narrow and whose majority is precarious, Labour wards growing while their wards shrink is not a happy proposition. Let's just hope that their attempted fix isn't a Mark II Designated Sales [Homes for Votes] policy!

Before I start a moral panic with that flippancy, such a policy wouldn't work again, even if they did try it, which they would not. But they do need to find a way of reversing this long-run slippage of their vote if they can't get the normal way of so doing: winning voters over to their cause, to work.

These factors all give Labour, despite their defeat, more cause for optimism in the longer term than the Conservatives. The Tories led by less than three points city-wide, and this time the vote share totals weren't distorted by the massive pile up of Labour votes we normally witness in North Paddington: it's a far more representative spread of votes.

If Labour is out of government by 2030 they have every chance of flipping the six seats needed to regain the majority: a feat that requires a swing of just 3%.

Overview of the 2026 results: seats won

Note: change figures may not tally because of council size changes

The "local parties" column covers Ealing Community Independents, Arise Collective in Harrow, Havering Residents' Associations, Kingston Independent Residents Group, Newham Independent Party, Redbridge Independents and Aspire in Tower Hamlets. There were other local parties that stood but in a far less widespread basis, and their shares are included in the "others" column.

London by-elections 2022-2026

One hundred and ten by-elections occurred between May 2022 and November 2025 when the "six-month rule" - which means by-elections do not have to be held within six months of the next council election - guillotine fell.

Wards that changed hands are denoted by a dot: the ward coloured by the party that won and the dot by the party that failed to successfully defend the seat. A "2" denotes that two by-elections occurred in the ward. In Hackney's Cazenove ward, where two by-elections occurred on different dates, the Conservatives gained one seat but Labour retained the second. And in the Greenwich ward of Shooter's Hill, another ward in which two separate by-elections were held, Labour retained the first seat but the second was lost to the Green Party.
